Sophomores find home in first-year quad

BY KATHRYN ARDINGER

Bucknellian Staff Writer

Despite speculation that the University is integrating first-year students with upper-class students in residence halls, Kari M. Conrad, director of housing and residential life, confirmed that this is not the case.

Conrad said, "At this point, there's no intentional strategy on our part to integrate upper-class students with first-year students."

There are a number of sophomores involved in the residential college program that are living in Smith Hall and Larison Hall/Bucknell Cottage this academic year.

Consequently, there are two and a half halls of first-year students being housed in Swartz Hall, a traditionally upper-class dormitory.

The sophomores living in Larison and Smith made the choice to live in those dormitories, mainly because they wanted to live with people in their residential college, Sue Ellen Henry, the program coordinator for the residential colleges said.

Brad Fixman, a sophomore who is living in Larison Cottage this year, said he is living downhill with the first-year students because he wanted to continue living amongst the Humanities College members.

Fixman has been an helpful source of information for his first-year student hall mates, by answering questions regarding courses as well as the Humanities College in particular.

Henry said that having upper-class students involved in the residential college program beyond the first year, "makes the program more a part of the University culture."

> *"At this point there is no intentional strategy on our part to integrate upperclass students with first-year students."*

Henry pointed out that a large incoming class has an impact on a number of people.

She said that one factor that has to be considered is that upper-class students choose their living arrangements for the following year in the spring, before the University knows with certainty the size of the incoming class.

Swartz is the only upper-class dormitory that first-year students are living in, Conrad said. With approximately 897 first-year students, they've got to be housed somewhere, she added.

Henry is not convinced that first-year students living uphill is a problem, rather it's just something we are not accustomed to.

Conrad said that students like the first-year experience they have had and that change is hard at any time.

Brett Cooper, a first-year student living in Swartz, does not seem to mind living in an upper-class residence hall, since his hall is all first-year students. Cooper said that "in general, I still associate with people in the [first-year] quad; it's just a longer walk."

In fact, Conrad said that there are advantages to living in an up-

Suspicious events alarm off-campus students

KATHRYN WRIGHTSON

Bucknellian Staff Writer

The male intruder who has entered three Bucknell student homes and attempted to enter one more in the vicinity of 6th Street since mid-July is described as a white male in his mid-twenties, 5'7" tall, with bushy blond hair, and a flaky complexion.

On one occasion, he was described as wearing a cream colored sweatshirt and dirty, ripped jeans.

The man first entered a 6th Street home in mid-July. The female residents of the house said that the man strolled into their living room and asked if they had any marijuana. They told him to leave and called Public Safety.

At the time of the incident the residents were not locking their doors or windows.

At the end of August the same man approached a group of Bucknell women who were standing outside their 6th Street home. "He came up to us and said something weird and then asked if we knew where he could 'get any reefer'. We told him we didn't know and he walked away," one of the women said.

On a separate occasion the man actually entered apartments on the second and third floors of that same house. The women now lock their windows and doors, "something we didn't do before".

On August 29th, the man attempted to enter another home on 6th Street. "We were sitting inside when he came to the side door and was rattling the doorknob. One of my roommates went outside and asked him what he wanted. He asked her if there were any other apartments in the house and whether a guy he knew still lived here. She told him no and he left."

Later that evening the women returned home and found their phone off the hook. They called the Lewisburg Police and had an officer walk through their home. No evidence of a break-in was found.

The landlord of the house was notified and he promptly installed deadbolt locks on every door and two automatic sensor lights on the back of the house.

This year 420 students live off-campus, which is the maximum number of students permitted to live off-campus by the University. Most students live in the area of 6th and 7th Streets and the cross streets in-between; however, students do live all over town.

Leslie Cullen, the off-campus living coordinator said, "It's a likely area for a person with suspicious intent to wander around. He or she would wander in an area where they won't be questioned and where homes are easily accessible to them."

Cullen said the issue of safety is very important and should not be overlooked. "The first place students need to call if any safety issues or problems arise is the Police Department," Cullen said. "It's not a bad idea to call Public Safety and keep them informed, but it's really the Police Department they need to call."

"Relatively speaking, Lewisburg is a safe town, but on the other hand there's no need to be foolish concerning safety issues," Cullen said. Precautions such as locking doors and windows are important.

The Lewisburg Police Department was unable to be reached regarding these incidents.

Kristen Gardella '97 waits at the new Administrative Services Window for copies . Administrative Services has moved to a new location in Marts Hall.

Renovations bring care to Marts

BY TRACY THIFFAULT

The basement of Marts Hall was renovated this summer in an attempt to put a stop to the ongoing sickness the many workers in first floor offices have suffered.

The "sick building syndrome" began years ago and is believed to have come from the printing presses located in the basement of the building. The presses gave off vapors containing minute quantities of chemicals, which made people sick. Symptoms included headaches, watery eyes, itchy throats, and nausea.

The printing presses used to print most campus circulations and flyers have been moved to the old food storage warehouse across from the Ziegler Health Center where no one will be affected.

Administrative Services' and the Registrar's office, both located above the presses have expanded into the basement. Now completely renovated, the basement exhibits no signs of odors.

The 'sick building syndrome' plaguing Marts Hall has been the focus of investigation for the past five or six years. Numerous companies have tested the air quality and the machines and have found no health hazards.

Studies have concluded that hypersensitive people are the most likely victims of the syndrome and that they have been reacting to the mild chemicals in the air. Now that the presses have been moved, there has been no complaint of sickness.

According to Dennis Hawley, director of the Physical Plant, the

A Japanese television production crew was in Lewisburg Tuesday, Sept. 3, to film the Hufnagle Bridge for a series on the Nippon Television Networks on "Bridges of the World."

The Hufnagle Bridge, a covered wooden foot bridge , was designed and built as a Bucknell civil engineering class project in 1982. Jai Kim, professor and chair of civil engineering, was one of the faculty advisers to the project.

American bridges that have been shown in the series include the Golden Gate Bridge of San Francisco, the Covered Bridge in Madison County, Iowa (which was featured in the novel and movie), and the 150-year-old Suspension Bridge in Wheeling, WV.

PUBLIC SAFETY LOG

August 26, 1996

VEHICLE ACCIDENT - An unattended Physical Plant vehicle rolled into a passing vehicle near Bucknell Hall. There were no injuries in the accident.

THEFT BY UNLAWFUL TAKING-TELEVISION SET - A BU student reported the theft of a 26" RCA color television set from a sorority suite. The television was taken between 9:15 - 11:30 p.m. Investigation continuing.

ASSIST LOCAL POLICE DEPARTMENT - LEWISBURG BOROUGH Public Safety observed a male BU student carrying a sign on St. George St. Lewisburg police responded and cited the student who admitted to having consumed alcoholic beverages while under the age of 21 years. It was determined that the sign had been found on a pile of garbage. The student was returned to Vedder Hall and the RA was advised.

August 27, 1996

ASSIST LOCAL POLICE - NOISE COMPLAINT - Public Safety responded with Lewisburg Police to S. 5th St. for a noise complaint, possibly involving BU students. A gathering of 30-40 people to the rear of a residence housing Bucknell students was cleared on verbal warning from the police officer.

INFORMATION - SUSPECTED LIQUOR LAW VIOLATION - Public Safety Officers attempted to stop a male, near the Botany Building, carrying an open container of alcohol. The male fled on foot through the campus. He was last scene in the Farm Lot to the rear of LCA.

CRIMINAL TRESPASS - A BU student reported to Bucknell Public Safety that an unknown male had entered her unlocked dorm room while she was out of her room for a few minutes. Upon returning to her room, she confronted the unknown male who fled the room. Victim reported nothing was taken from her room. A search of the area was conducted by BUPS with negative results. Lewisburg and East Buffalo Township Police were notified and a Public Safety alert was issued. Investigation is continuing.

INFORMATION/MISSING PERSON REPORT - PERSON LOCATED At 7:30 p.m. a family member of a male Bucknell student, who is presently not attending the University, contacted Public Safety to report the male missing for 24 hours. The male was subsequently located at the Chi Phi Fraternity. The appropriate personnel were notified.

LIQUOR LAWS - UNDERAGE CONSUMPTION - Two male BU students were observed near the President's house in an intoxicated state. Upon questioning by PSO it was determined both were 1st year students and under the age of 21 years. University citations were issued.

ASSIST LOCAL POLICE-UNAUTHORIZED USE OF MOTOR VEHICLE(S) - East Buffalo Township Police requested that Bucknell Public Safety temporarily detain one suspect apprehended for operating a motor vehicle without the authorization of the owner. The suspect was transported to meet East Buffalo Township officers.

HARASSMENT BY COMMUNICATIONS - The RA in Vedder Hall reported to Public Safety Officers that a resident of Vedder hall had received a phone call from a male who used obscene language. A second call was placed on the answering machine. Investigation continuing.

HARASSMENT BY COMMUNICATIONS - The RA in Smith Hall reported to Public Safety that a female student in her building had received a harassing phone call which had sexual overtones. Investigation continuing.

INFORMATION/CHECK WELFARE OF STUDENT - Public Safety officers were called to Roberts Hall to check on the condition of a female Bucknell Student, by friends of the student. The student was found to be fine.

August 29, 1996

INFORMATION-UNAUTHORIZED COMPUTER LAB USE - Two males, without affiliation to the University were found in the 24 Hour Study Computer area. A warning was issued along with an explanation of the Computer Use Policy.

INFORMATION - INDIVIDUAL AND VEHICLE - A white male has been observed driving a vehicle on and about the pathways behind the Fieldhouse. A description of the male was given to Public Safety, East Buffalo and Lewisburg Police departments.

OFF-CAMPUS INFORMATION - SUSPICIOUS CIRCUMSTANCES - A female Bucknell student reported to Public Safety that a male entered her off-campus residence and requested to know where he could purchase marijuana. When the female responded, the intruder left the residence. The female was requested to contact 9-1-1 and notify the Lewisburg Police who had jurisdiction in the area of her residence. Public Safety also responded to the scene and spoke with Lewisburg Police. Investigation is continuing.

August 31, 1996

UNDERAGE CONSUMPTION/PUBLIC DRUNKENNESS - A Penn State student, William C. Hamilton, Jr., stopped by Public Safety at the Music & Arts Building, was issued citations for underage drinking and public drunkenness by the Lewisburg Police.

DRIVING UNDER THE INFLUENCE/UNDERAGE DRINKING - A PSO observed a vehicle speeding on 7th Street and failing to stop at a stop sign. BU student was stopped by Public Safety and arrested for D.U.I. by the East Buffalo Township Police.

CRIMINAL MISCHIEF - A BU student reported to PSO that his bike was damaged while locked in the bike rack at the Gateway Complex. Investigation continues.

September 1, 1996

INFORMATION - PSO was contacted by a Resident Director who needed assistance with verifying the well being of a student who had not been seen for a period of time. Student was located and was determined to be safe.

INFORMATION/POSSIBLE DRUG VIOLATION - PSO responded to Larison Hall for the report of a possible drug violation. PSO checked out the area and determined report was unfounded at this point.

September 2, 1996

MEDICAL AIDED - PSO responded to Larison Cottage on a report of a BU student having a sharp pain in his chest. PSO transported student to Evangelical Hospital for treatment.

presses began to be used more frequently several years ago because of the increased demand for productivity. Consequently, more fumes were produced, enough to make people sick.

Hawley was a key member of the renovation which was headed by Jeffrey Loss, assistant director of Central Services. Hawley "sincerely hopes this has solved the problem."

Those who suffered from health problems are no longer experiencing symptoms. Sandy Raymond, who was severely affected, has "seen a tremendous change this summer." Barry Maxwell, vice president of Administration, is "not aware of any negative comments relative to the air quality." He is "cautiously optimistic that they have found the solution."

News Briefs

National News

Missile attacks followed Iraqi operation

WASHINGTON— Iraqi forces crossed the 36th parallel into the northern no- fly zone last weekend, and helped a Kurdish faction loyal to Saddam Hussein take control of Irbil. The no-fly zone does not exclude ground troops and artillery.

At the Wednesday afternoon news conference, Perry denied reports that several of the U.S. missiles in the Tuesday strike had missed their targets. Earlier, Ralston said the decision to restrike was based on officials' desire to make certain Iraqi air defenses could not hinder enforcement of the no-fly zones.

"We felt that we had a very effective strike but as you do in bomb damage assessment, sometimes other factors such as clouds get in the way, and if there was any doubt at all as to whether we reduced the effectiveness of his air defense system, we thought it prudent to go back with a restrike," the general said.

Ralston did not rule out further U.S. military action.

President analyzes bombing campaign

WASHINGTON— President Clinton said Wednesday afternoon that he was pleased with the results of the U.S. military operation against Iraqi military targets, but cautioned that the current crisis was not yet over. "Our mission has been achieved," Clinton told reporters called to the Oval Office. "There has been a withdrawal of the (Iraqi) forces dispersal of the forces, but it's too soon to say that this is permanent or that further action will not be taken."

Earlier Wednesday, Iraqi forces twice challenged U.S. enforcement of no-fly zones in Iraq, said Secretary of Defense William Perry, who said he did not consider either incident "serious." Perry said at a news conference that two Iraqi MiG jets flew toward the no-fly zone Wednesday, but turned back at the last minute. In the second incident, an Iraqi SA-8 radar locked onto an Air Force F-16 jet, Perry said.

Iraqis threatened to defy U.S.

WASHINGTON— Iraqi news organizations reported Wednesday that Saddam Hussein and his military were reviewing their options, and planned to defy the actions taken by the U.S., including two missiles strikes against Iraqi targets on consecutive days.

"Once again we say to the ungodly Americans in a loud voice ... (that) from today there will be no (part) of Iraqi territory off-limits to us, whether in the north or the south," said Babel, one of Iraq's official newspapers.

Air Force Gen. Joe Ralston, vice chairman of the Joint Chiefs of Staff, told reporters that the second U.S. air strike — 17 missiles fired at four targets Wednesday morning — had "sufficiently reduced" the risk to allied aircraft enforcing a newly expanded no-fly zone in southern Iraq. Ralston denied an Iraqi news report that Iraq's military had downed a pilotless plane Wednesday morning over southern Iraq. "We have no evidence that is true," he said.

Southeast coast braces for Hurricane Fran

MIAMI— Hurricane Fran, its winds at 115 mph (184 kph), appeared headed toward the southeastern United States, prompting the governor of South Carolina to declare a state of emergency. Officials predict the storm will strike land sometime late Thursday or early Friday.

Fran is expected to grow more fierce as it moves across the Atlantic. Forecasters said it bears an eerie resemblance to Hurricane Hugo, which ravaged the Carolinas seven years ago. Gov. David Beasley called Fran "an exceedingly large and dangerous storm" that needs to be monitored closely. "

World News

Combination of therapies to treat cancer

WASHINGTON— Treating lung cancer with both chemotherapy and radiation almost triples the number of patients who live at least five years, says a new study. But researchers cautioned that even with combination therapy's improvement, the future remains bleak for lung cancer patients, as those who survive even five years remain a minority.

"It still isn't great," said Dr. Robert O. Dillman, lead author of the study, "But when you look at how common this type of cancer is, the difference could amount to an addition of several thousand people still alive."

Lung cancer is the nation's most common malignancy. The American Cancer Society says it will strike 177,000 Americans this year, and kill 158,000.

Communist leader attacks Chechen peace plan

MOSCOW— Russia's Communist Party leader lashed out Wednesday at the Chechnya peace deal, accusing the government of suffering a "political and moral defeat" in its war with the separatists.

Gennady Zyuganov told a news conference the government had handed Chechnya over to the rebels. He warned that the deal may set off "an eruption in the entire North Caucasus."

He said the pact, which defers a decision on Chechnya's independence for five years, threatens Russia's territorial integrity. He said security chief Alexander Lebed had no right to sign it.

A truce is now in place in Chechnya and Russian troops are pulling out.

Step forward in Mid-East Peace process

EREZ, Gaza Strip— After an hour-long meeting that began with a handshake, Palestinian leader Yasser Arafat and Israeli Prime Minister Benjamin Netanyahu expressed willingness to work together to advance Mideast peace efforts. But there was no announcement of specific progress to break the stalemate in negotiations since Israeli voters put Netanyahu's hard-line government in office last May.

At a joint news conference following their talks, Netanyahu said he was committed to carrying out peace agreements Arafat had signed with Israel's previous government, but added that a "contract was only as good as its fulfillment by both sides."

Arafat, whose comments in Arabic were translated into English, also expressed his readiness "to advance the peace of the brave.

It appeared finding answers to unresolved issues would be left to Israeli-Palestinian steering committees set up to oversee implementation of agreements already signed.

The way to harmony

SINGAPORE— A clean toilet is the answer to a gracious society, so say Singapore officials. Hoping to flush away bad habits, Singapore launches a two-month campaign beginning Monday on proper toilet etiquette.

Singapore's government says the program is aimed at making people aware of the importance of leaving public lavatories clean after use.

Apparently, the toilet-training drive is in response to Prime Minister Goh Chok Tong's call for his people to measure social progress by the cleanliness of public facilities and their appreciation of music.

Nation and World News Briefs compiled by Anna Foca from the CNN Interactive Web Site.

Bucknell News

- Jackson Hill, professor of music, James Orbison, professor of civil engineering, and Marilyn Mumford, professor of English, have been named Presidential Professors at Bucknell University. They join 15 other faculty members who have been named presidential professors since the board of trustees established the special rank in 1972.
- Maurice Aburdene, the T. Jefferson Miers chair in electrical engineering and professor of computer science at Bucknell University, has been named an Institute of Electrical Engineers Fellow effective January 1, 1996.
- Charles Coder, director of the Small Business Development Center (SBDC) at Bucknell, has received the Academic Partner Award from the Ben Franklin Technology Center.

Coder retired as professor of mechanical engineering in 1989, was recognized this year as the professor who contributed his time and expertise to helping Ben Franklin clients develop or apply innovative technology.

- The Bucknell SBDC was also recognized as the 1996 Eastern Pennsylvania SBDC Subcenter of the Year by the Philadelphia district office of the U.S. Small Business Administration.
- Angelita Hogan '96 received the Julia Fonville Smithson Memorial Prize for 1996 for her sestina entitled "Selling the Farm." Jeremy Finkelman '96, Lauren Gagliardi '96, and Michael Kaufmann '98 received honorable mentions for their poetry.
- *The Bucknellian* received The Columbia Scholastic Press Association Silver Medalist Certificate for 1996.

Second telephone line costs skyrocket

BY ERIC BLOEM

The price of installing a second telephone line on campus has skyrocketed to $200 this year. Previously costing students $90 for an additional phone line, this heavy hike in price may have in impact on students thinking about purchasing additional lines for modems.

Gene Spencer, director of Computer and Communications Services (CCS), said that Telephone Services primary goal is "to adequately cover the costs and services provided."

The telephone switch which the entire campus uses is nine years old and does not have many more lines available for use. The $90 cost of past years, based on 1987 prices, remained the same while the value of phone lines increased over time.

Chris D'Agnes '99 said "If they wanted to increase the price it should have been more gradual. Why did they wait so long to raise the prices?"

Spencer stated that "This is not a long term situation" and plans are in the works to relieve the strain on the switch.

"To increase the switch for additional lines is estimated to cost between $75,000 and $150,000," said Spencer, but added that this is not the objective of Telephone Services.

Rather they would like to replace the existing system by the end of next summer. He stressed that cost will remain at $200 for the next year. Furthermore, the cost will not be reduced once the new system has been implemented.

Some students on campus believe that this increase in price is another way to restrict internet access from dorm rooms.

Emily Petersen '99 said, "Obviously the number of students who log in from their rooms will decrease with the additional $110. Two-hundred dollars is too much money for that service".

"We do not want to restrict phone access over the internet," Spencer said. He added that CCS is now compiling a "strategic plan to move networking into the residence halls."

INTEGRATION

from page 1

per-class dormitory. For instance, first-year students have the opportunity to interact with upper-class students and be in close proximity to the academic quad.

"I think it's really good for them [first-year students] to have relationships across classes as well as their own," Conrad said.

Housing and Residential Life hasn't received much feedback since first-year students have been living in Swartz, according to Conrad. She added that the floors get very close with one another.

As well, the University makes the same types of efforts to get first-year students living in Swartz interacting with other first-year students, as it does with first-year students housed in Hulley House and Taylor House.

RUSH

From Page 1

optimal situation. Men postponed their first rush event to avoid conflicting with the fair.

"It was beneficial in the sense that it gets it over with so people can focus on classes, but overall it did conflict with other activities," said Meredith Wisor '97, Panhellenic Council president. "We never would have scheduled a round of rush if we had known about the Activity Fair."

Wisor felt that the Committee on Complementary Activities, which approved the schedule to be submitted to the University, should have made Panhel and IFC aware of conflicting activities.

"Panhel would like to see more input from other organizations, we'd like CCA to include other peoples' views. We're willing to sit down with CCA to work rush in with the rest of campus events."

Panhel and the IFC developed their rush schedules taking into consideration home football games and the Jewish holidays, Yom Kippur and Rosh Hashanah. Rush regulation prohibits activities to be held during a Jewish holiday and is not recommended during home football games, said Gretchen Phillips '97 in an interview last semester.

Starting rush this early gets it out of the way and doesn't conflict with tests says Derek Guenther '97, IFC president. But it is also "in our faces the first day of classes. It's added to the confusion that surrounds the hectic first day of school," he said.

Myra Legg, acting director for Greek affairs, said that because she has been in her position for only one week, she has no basis to compare this year's rush schedule to previous schedules.

Legg is assuming the responsibilities of Edward Dadez, former associate dean of students, until a permanent replacement is found.

Audrey Jaeger, assistant director of student activities said, "I don't think it was necessarily the best time [to have rush]."

"It had a major effect on Activities Unlimited," Jaeger said.

However, she ascertained that the Greek system is taking the blame for the conflict when it was the CCA who needed to step back and look at the campus-wide calendar and make the different organizations aware of the conflicting schedules.

Jaeger said ten groups did not show up to their tables, several of which were directly due to rush activities.

Jaeger said it's unfortunate that first year students were unable to see Greek students in other organizations.

In the past several years, more sophomores have been attending Activities Unlimited; this year they were forced to choose between Greek events and other activities whereas in the past they were able to be a part of both.

Overall, Jaeger said she had no way of determining the impact of the conflicting schedules.

Matthew Moyer '97, chair of CCA, said that when the committee approved the proposal "we did not take those things [Activities Unlimited, CDC events] into account."

"CCA was entirely concerned with the academic calendar. It would be impossible to manipulate the campus calendar so that there's nothing to conflict."

Moyer said that the committee may keep nonacademic affairs in mind in the future.

Last semester CCA advised the president to approve the rush proposal with two minor changes. It was asked that the time of bid delivery on September 7th be moved from 8 a.m. to 9 a.m. in an attempt to reduce disturbances in the Lewisburg community. Last year there was no time restriction in place.

CCA also requested that as a part of pre-rush meetings, IFC and Panhel explicitly inform participants in rush not to request special accommodations from professors.

The Bison: new and improved or not?

"There's more variety at the new Bison and that is why I like it."
—Orwell Jacobs '98

"I don't like how they don't take orders and give you a number. There is one good thing though, less waiting time."

Karin Davidson—The Bucknellian

A Japanese television production crew was in Lewisburg Tuesday, Sept. 3, to film the Hufnagle Bridge for a series on the Nippon Television Networks on "Bridges of the World."

The Hufnagle Bridge, a covered wooden foot bridge , was designed and built as a Bucknell civil engineering class project in 1982. Jai Kim, professor and chair of civil engineering, was one of the faculty advisers to the project.

American bridges that have been shown in the series include the Golden Gate Bridge of San Francisco, the Covered Bridge in Madison County, Iowa (which was featured in the novel and movie), and the 150-year-old Suspension Bridge in Wheeling, WV.

PUBLIC SAFETY LOG

August 26, 1996

VEHICLE ACCIDENT - An unattended Physical Plant vehicle rolled into a passing vehicle near Bucknell Hall. There were no injuries in the accident.

THEFT BY UNLAWFUL TAKING-TELEVISION SET - A BU student reported the theft of a 26" RCA color television set from a sorority suite. The television was taken between 9:15 - 11:30 p.m. Investigation continuing.

ASSIST LOCAL POLICE DEPARTMENT - LEWISBURG BOROUGH Public Safety observed a male BU student carrying a sign on St. George St. Lewisburg police responded and cited the student who admitted to having consumed alcoholic beverages while under the age of 21 years. It was determined that the sign had been found on a pile of garbage. The student was returned to Vedder Hall and the RA was advised.

August 27, 1996

ASSIST LOCAL POLICE - NOISE COMPLAINT - Public Safety responded with Lewisburg Police to S. 5th St. for a noise complaint, possibly involving BU students. A gathering of 30-40 people to the rear of a residence housing Bucknell students was cleared on verbal warning from the police officer.

INFORMATION - SUSPECTED LIQUOR LAW VIOLATION - Public Safety Officers attempted to stop a male, near the Botany Building, carrying an open container of alcohol. The male fled on foot through the campus. He was last scene in the Farm Lot to the rear of LCA.

CRIMINAL TRESPASS - A BU student reported to Bucknell Public Safety that an unknown male had entered her unlocked dorm room while she was out of her room for a few minutes. Upon returning to her room, she confronted the unknown male who fled the room. Victim reported nothing was taken from her room. A search of the area was conducted by BUPS with negative results. Lewisburg and East Buffalo Township Police were notified and a Public Safety alert was issued. Investigation is continuing.

INFORMATION/MISSING PERSON REPORT - PERSON LOCATED At 7:30 p.m. a family member of a male Bucknell student, who is presently not attending the University, contacted Public Safety to report the male missing for 24 hours. The male was subsequently located at the Chi Phi Fraternity. The appropriate personnel were notified.

LIQUOR LAWS - UNDERAGE CONSUMPTION - Two male BU students were observed near the President's house in an intoxicated state. Upon questioning by PSO it was determined both were 1st year students and under the age of 21 years. University citations were issued.

ASSIST LOCAL POLICE-UNAUTHORIZED USE OF MOTOR VEHICLE(S) - East Buffalo Township Police requested that Bucknell Public Safety temporarily detain one suspect apprehended for operating a motor vehicle without the authorization of the owner. The suspect was transported to meet East Buffalo Township officers.

HARASSMENT BY COMMUNICATIONS - The RA in Vedder Hall reported to Public Safety Officers that a resident of Vedder hall had received a phone call from a male who used obscene language. A second call was placed on the answering machine. Investigation continuing.

HARASSMENT BY COMMUNICATIONS - The RA in Smith Hall reported to Public Safety that a female student in her building had received a harassing phone call which had sexual overtones. Investigation continuing.

INFORMATION/CHECK WELFARE OF STUDENT - Public Safety officers were called to Roberts Hall to check on the condition of a female Bucknell Student, by friends of the student. The student was found to be fine.

August 29, 1996

INFORMATION-UNAUTHORIZED COMPUTER LAB USE - Two males, without affiliation to the University were found in the 24 Hour Study Computer area. A warning was issued along with an explanation of the Computer Use Policy.

INFORMATION - INDIVIDUAL AND VEHICLE - A white male has been observed driving a vehicle on and about the pathways behind the Fieldhouse. A description of the male was given to Public Safety, East Buffalo and Lewisburg Police departments.

OFF-CAMPUS INFORMATION - SUSPICIOUS CIRCUMSTANCES - A female Bucknell student reported to Public Safety that a male entered her off-campus residence and requested to know where he could purchase marijuana. When the female responded, the intruder left the residence. The female was requested to contact 9-1-1 and notify the Lewisburg Police who had jurisdiction in the area of her residence. Public Safety also responded to the scene and spoke with Lewisburg Police. Investigation is continuing.

August 31, 1996

UNDERAGE CONSUMPTION/PUBLIC DRUNKENNESS - A Penn State student, William C. Hamilton, Jr., stopped by Public Safety at the Music & Arts Building, was issued citations for underage drinking and public drunkenness by the Lewisburg Police.

DRIVING UNDER THE INFLUENCE/UNDERAGE DRINKING - A PSO observed a vehicle speeding on 7th Street and failing to stop at a stop sign. BU student was stopped by Public Safety and arrested for D.U.I. by the East Buffalo Township Police.

CRIMINAL MISCHIEF - A BU student reported to PSO that his bike was damaged while locked in the bike rack at the Gateway Complex. Investigation continues.

September 1, 1996

INFORMATION - PSO was contacted by a Resident Director who needed assistance with verifying the well being of a student who had not been seen for a period of time. Student was located and was determined to be safe.

INFORMATION/POSSIBLE DRUG VIOLATION - PSO responded to Larison Hall for the report of a possible drug violation. PSO checked out the area and determined report was unfounded at this point.

September 2, 1996

MEDICAL AIDED - PSO responded to Larison Cottage on a report of a BU student having a sharp pain in his chest. PSO transported student to Evangelical Hospital for treatment.

presses began to be used more frequently several years ago because of the increased demand for productivity. Consequently, more fumes were produced, enough to make people sick.

Hawley was a key member of the renovation which was headed by Jeffrey Loss, assistant director of Central Services. Hawley "sincerely hopes this has solved the problem."

Those who suffered from health problems are no longer experiencing symptoms. Sandy Raymond, who was severely affected, has "seen a tremendous change this summer." Barry Maxwell, vice president of Administration, is "not aware of any negative comments relative to the air quality." He is "cautiously optimistic that they have found the solution."

News Briefs

National News

Missile attacks followed Iraqi operation

WASHINGTON— Iraqi forces crossed the 36th parallel into the northern no- fly zone last weekend, and helped a Kurdish faction loyal to Saddam Hussein take control of Irbil. The no-fly zone does not exclude ground troops and artillery.

At the Wednesday afternoon news conference, Perry denied reports that several of the U.S. missiles in the Tuesday strike had missed their targets. Earlier, Ralston said the decision to restrike was based on officials' desire to make certain Iraqi air defenses could not hinder enforcement of the no-fly zones.

"We felt that we had a very effective strike but as you do in bomb damage assessment, sometimes other factors such as clouds get in the way, and if there was any doubt at all as to whether we reduced the effectiveness of his air defense system, we thought it prudent to go back with a restrike," the general said.

Ralston did not rule out further U.S. military action.

President analyzes bombing campaign

WASHINGTON— President Clinton said Wednesday afternoon that he was pleased with the results of the U.S. military operation against Iraqi military targets, but cautioned that the current crisis was not yet over. "Our mission has been achieved," Clinton told reporters called to the Oval Office. "There has been a withdrawal of the (Iraqi) forces dispersal of the forces, but it's too soon to say that this is permanent or that further action will not be taken."

Earlier Wednesday, Iraqi forces twice challenged U.S. enforcement of no-fly zones in Iraq, said Secretary of Defense William Perry, who said he did not consider either incident "serious." Perry said at a news conference that two Iraqi MiG jets flew toward the no-fly zone Wednesday, but turned back at the last minute. In the second incident, an Iraqi SA-8 radar locked onto an Air Force F-16 jet, Perry said.

Iraqis threatened to defy U.S.

WASHINGTON— Iraqi news organizations reported Wednesday that Saddam Hussein and his military were reviewing their options, and planned to defy the actions taken by the U.S., including two missiles strikes against Iraqi targets on consecutive days.

"Once again we say to the ungodly Americans in a loud voice ... (that) from today there will be no (part) of Iraqi territory off-limits to us, whether in the north or the south," said Babel, one of Iraq's official newspapers.

Air Force Gen. Joe Ralston, vice chairman of the Joint Chiefs of Staff, told reporters that the second U.S. air strike — 17 missiles fired at four targets Wednesday morning — had "sufficiently reduced" the risk to allied aircraft enforcing a newly expanded no-fly zone in southern Iraq. Ralston denied an Iraqi news report that Iraq's military had downed a pilotless plane Wednesday morning over southern Iraq. "We have no evidence that is true," he said.

Southeast coast braces for Hurricane Fran

MIAMI— Hurricane Fran, its winds at 115 mph (184 kph), appeared headed toward the southeastern United States, prompting the governor of South Carolina to declare a state of emergency. Officials predict the storm will strike land sometime late Thursday or early Friday.

Fran is expected to grow more fierce as it moves across the Atlantic. Forecasters said it bears an eerie resemblance to Hurricane Hugo, which ravaged the Carolinas seven years ago. Gov. David Beasley called Fran "an exceedingly large and dangerous storm" that needs to be monitored closely. "

World News

Combination of therapies to treat cancer

WASHINGTON— Treating lung cancer with both chemotherapy and radiation almost triples the number of patients who live at least five years, says a new study. But researchers cautioned that even with combination therapy's improvement, the future remains bleak for lung cancer patients, as those who survive even five years remain a minority.

"It still isn't great," said Dr. Robert O. Dillman, lead author of the study, "But when you look at how common this type of cancer is, the difference could amount to an addition of several thousand people still alive."

Lung cancer is the nation's most common malignancy. The American Cancer Society says it will strike 177,000 Americans this year, and kill 158,000.

Communist leader attacks Chechen peace plan

MOSCOW— Russia's Communist Party leader lashed out Wednesday at the Chechnya peace deal, accusing the government of suffering a "political and moral defeat" in its war with the separatists.

Gennady Zyuganov told a news conference the government had handed Chechnya over to the rebels. He warned that the deal may set off "an eruption in the entire North Caucasus."

He said the pact, which defers a decision on Chechnya's independence for five years, threatens Russia's territorial integrity. He said security chief Alexander Lebed had no right to sign it.

A truce is now in place in Chechnya and Russian troops are pulling out.

Step forward in Mid-East Peace process

EREZ, Gaza Strip— After an hour-long meeting that began with a handshake, Palestinian leader Yasser Arafat and Israeli Prime Minister Benjamin Netanyahu expressed willingness to work together to advance Mideast peace efforts. But there was no announcement of specific progress to break the stalemate in negotiations since Israeli voters put Netanyahu's hard-line government in office last May.

At a joint news conference following their talks, Netanyahu said he was committed to carrying out peace agreements Arafat had signed with Israel's previous government, but added that a "contract was only as good as its fulfillment by both sides."

Arafat, whose comments in Arabic were translated into English, also expressed his readiness "to advance the peace of the brave.

It appeared finding answers to unresolved issues would be left to Israeli-Palestinian steering committees set up to oversee implementation of agreements already signed.

The way to harmony

SINGAPORE— A clean toilet is the answer to a gracious society, so say Singapore officials. Hoping to flush away bad habits, Singapore launches a two-month campaign beginning Monday on proper toilet etiquette.

Singapore's government says the program is aimed at making people aware of the importance of leaving public lavatories clean after use.

Apparently, the toilet-training drive is in response to Prime Minister Goh Chok Tong's call for his people to measure social progress by the cleanliness of public facilities and their appreciation of music.

Nation and World News Briefs compiled by Anna Foca from the CNN Interactive Web Site.

Bucknell News

- Jackson Hill, professor of music, James Orbison, professor of civil engineering, and Marilyn Mumford, professor of English, have been named Presidential Professors at Bucknell University. They join 15 other faculty members who have been named presidential professors since the board of trustees established the special rank in 1972.
- Maurice Aburdene, the T. Jefferson Miers chair in electrical engineering and professor of computer science at Bucknell University, has been named an Institute of Electrical Engineers Fellow effective January 1, 1996.
- Charles Coder, director of the Small Business Development Center (SBDC) at Bucknell, has received the Academic Partner Award from the Ben Franklin Technology Center.

Coder retired as professor of mechanical engineering in 1989, was recognized this year as the professor who contributed his time and expertise to helping Ben Franklin clients develop or apply innovative technology.

- The Bucknell SBDC was also recognized as the 1996 Eastern Pennsylvania SBDC Subcenter of the Year by the Philadelphia district office of the U.S. Small Business Administration.
- Angelita Hogan '96 received the Julia Fonville Smithson Memorial Prize for 1996 for her sestina entitled "Selling the Farm." Jeremy Finkelman '96, Lauren Gagliardi '96, and Michael Kaufmann '98 received honorable mentions for their poetry.
- *The Bucknellian* received The Columbia Scholastic Press Association Silver Medalist Certificate for 1996.

Second telephone line costs skyrocket

BY ERIC BLOEM

The price of installing a second telephone line on campus has skyrocketed to $200 this year. Previously costing students $90 for an additional phone line, this heavy hike in price may have in impact on students thinking about purchasing additional lines for modems.

Gene Spencer, director of Computer and Communications Services (CCS), said that Telephone Services primary goal is "to adequately cover the costs and services provided."

The telephone switch which the entire campus uses is nine years old and does not have many more lines available for use. The $90 cost of past years, based on 1987 prices, remained the same while the value of phone lines increased over time.

Chris D'Agnes '99 said "If they wanted to increase the price it should have been more gradual. Why did they wait so long to raise the prices?"

Spencer stated that "This is not a long term situation" and plans are in the works to relieve the strain on the switch.

"To increase the switch for additional lines is estimated to cost between $75,000 and $150,000," said Spencer, but added that this is not the objective of Telephone Services.

Rather they would like to replace the existing system by the end of next summer. He stressed that cost will remain at $200 for the next year. Furthermore, the cost will not be reduced once the new system has been implemented.

Some students on campus believe that this increase in price is another way to restrict internet access from dorm rooms.

Emily Petersen '99 said, "Obviously the number of students who log in from their rooms will decrease with the additional $110. Two-hundred dollars is too much money for that service".

"We do not want to restrict phone access over the internet," Spencer said. He added that CCS is now compiling a "strategic plan to move networking into the residence halls."

INTEGRATION

from page 1

per-class dormitory. For instance, first-year students have the opportunity to interact with upper-class students and be in close proximity to the academic quad.

"I think it's really good for them [first-year students] to have relationships across classes as well as their own," Conrad said.

Housing and Residential Life hasn't received much feedback since first-year students have been living in Swartz, according to Conrad. She added that the floors get very close with one another.

As well, the University makes the same types of efforts to get first-year students living in Swartz interacting with other first-year students, as it does with first-year students housed in Hulley House and Taylor House.

RUSH

From Page 1

optimal situation. Men postponed their first rush event to avoid conflicting with the fair.

"It was beneficial in the sense that it gets it over with so people can focus on classes, but overall it did conflict with other activities," said Meredith Wisor '97, Panhellenic Council president. "We never would have scheduled a round of rush if we had known about the Activity Fair."

Wisor felt that the Committee on Complementary Activities, which approved the schedule to be submitted to the University, should have made Panhel and IFC aware of conflicting activities.

"Panhel would like to see more input from other organizations, we'd like CCA to include other peoples' views. We're willing to sit down with CCA to work rush in with the rest of campus events."

Panhel and the IFC developed their rush schedules taking into consideration home football games and the Jewish holidays, Yom Kippur and Rosh Hashanah. Rush regulation prohibits activities to be held during a Jewish holiday and is not recommended during home football games, said Gretchen Phillips '97 in an interview last semester.

Starting rush this early gets it out of the way and doesn't conflict with tests says Derek Guenther '97, IFC president. But it is also "in our faces the first day of classes. It's added to the confusion that surrounds the hectic first day of school," he said.

Myra Legg, acting director for Greek affairs, said that because she has been in her position for only one week, she has no basis to compare this year's rush schedule to previous schedules.

Legg is assuming the responsibilities of Edward Dadez, former associate dean of students, until a permanent replacement is found.

Audrey Jaeger, assistant director of student activities said, "I don't think it was necessarily the best time [to have rush]."

"It had a major effect on Activities Unlimited," Jaeger said.

However, she ascertained that the Greek system is taking the blame for the conflict when it was the CCA who needed to step back and look at the campus-wide calendar and make the different organizations aware of the conflicting schedules.

Jaeger said ten groups did not show up to their tables, several of which were directly due to rush activities.

Jaeger said it's unfortunate that first year students were unable to see Greek students in other organizations.

In the past several years, more sophomores have been attending Activities Unlimited; this year they were forced to choose between Greek events and other activities whereas in the past they were able to be a part of both.

Overall, Jaeger said she had no way of determining the impact of the conflicting schedules.

Matthew Moyer '97, chair of CCA, said that when the committee approved the proposal "we did not take those things [Activities Unlimited, CDC events] into account."

"CCA was entirely concerned with the academic calendar. It would be impossible to manipulate the campus calendar so that there's nothing to conflict."

Moyer said that the committee may keep nonacademic affairs in mind in the future.

Last semester CCA advised the president to approve the rush proposal with two minor changes. It was asked that the time of bid delivery on September 7th be moved from 8 a.m. to 9 a.m. in an attempt to reduce disturbances in the Lewisburg community. Last year there was no time restriction in place.

CCA also requested that as a part of pre-rush meetings, IFC and Panhel explicitly inform participants in rush not to request special accommodations from professors.

EDITORIAL

Slipping into integrated class housing may cause a fall

This year, a careful observer might notice a spattering of upperclass stu dents residing in the traditional first-year residence halls in the politically incorrect "freshmen quad."

Doing the math and discovering that sophomores are living in Smith Hall and Larrison Cottage, one might ask where the rest of the first-year students have been placed.

Two and a half halls of first year students could tell you that they've been put uphill in Swartz Hall.

Apparently there is no intentional movement towards class integration in on-campus living. Does that mean the University is allowing for these changes without considering the ramifications for students?

It would be one thing if the University had a well-developed plan with a rationale for wanting to make residence halls multi-class places. But as there is not conscious effort to do this, we question the decision to slip into an integrated housing situation. In other words, if there is no intentional effort to make a change to the current housing situation, why isn't there an intentional effort to keep it the same?

Birds of a feather flock together . . . and bond. That's right, when high school graduates take that flight out of the nest into their first year of college, they are naturally eager to make friends and often derive comfort from knowing that they are surrounded by others who are in similar situations.

There is enough to worry about that first year without having to be concerned because the sophomores next door and the juniors across the hall already have their circle of friends and aren't in a huge hurry to meet new people.

And how about sophomore rush? First-year students are not allowed to rush so they can establish themselves in the Bucknell community without feeling that Greek life is the only social option. But living with sophomores puts a big emphasis on sororities and fraternities right away as rush starts during the first couple weeks of school.

Resident Hall Association brings up another point. Friendships and contacts are made during the events that the hall groups coordinate. Residence hall ski trips, building dances and bagel breakfasts assist in building solidarity among a class that will be moving through the ranks together.

Of course these examples may not be felt as strongly if the entire campus was integrated. And perhaps upperclass students are actually choosing to live in traditional first-year residence halls so they can be a part of the residential college program. But first-year students do not have the option of picking where they live.

Let's not ostracize such a small portion of them by putting only a few students in upperclass halls. If there is not an intentional effort to entirely organize the housing situation, for the sake of the first year students, keep the class together.

OPINIONS

Terrorist attacks challenge Americans

Will the violent events of the summer of 1996 strengthen our country or intimidate it?

BY CAROLYN CHRISTENSON
Bucknellian Staff Columnist from abroad

Whatever else the summer of 1996 will eventually be known for, it will go down in history as the greatest attack of fatal terror directed at Americans.

The attacks began in June when a U.S. troops barracks was bombed in Dhahran. Three weeks later an explosion brought down a TWA flight leaving New York for Paris. And finally, only 9 days after the TWA tragedy, a pipe bomb blew Atlanta into the history books as the first fatal terror attack directed at the Olympics themselves—rather than the athletes of a particular country.

Heart wrenching pictures of mangled bodies and a blown apart 747 have covered the pages of newspapers and magazines; permeating the minds of the American citizenry. Only a little over a year after the bombing of a federal office building in Oklahoma City, these bombings were further evidence to Americans that their long immunity from domestic and international terrorism has ended.

If a bomber is to blame for the TWA crash, the death toll will be the highest ever in the U.S., worse even than the Oklahoma City blast that claimed 168 lives. There is certainly no shortage of potential suspects: Afghan fundamentalists, Bosnian Serbs, Saudi extremists, drug cartels, American ideologues, and any deranged individual with a grudge against the United States. Perhaps it was followers of Sheik Abdul Rahman and Ramzi Yousef, the alleged masterminds of the 1993 World Trade Center bombing, now on trial for plotting to blow up a dozen American 747's over the Pacific Ocean.

Is America on the verge of becoming a country with intimate knowledge of terrorist violence? Each new scene of carnage from Atlanta or Oklahoma City or the waters off Long Island suggest the growing danger.

Americans have begun to look at their surroundings in an unsettling light, in which an abandoned bag might be a grenade or any car a bomb. They have responded with calls for more intrusive measures and for enhanced police power. This must stop! The very purpose of terrorism is to challenge our vision of who we are. If terrorists can cause us to become a closed and fearful society, they win.

The lessons from the bombings are the same: the political and judicial systems must go about business as usual, and so, in turn, must we. We are a chastened country but one determined to forge on. We must have faith that our judicial system will find the perpetrators, and when it does, they will be tried, prosecuted, and if convicted, executed. But our real victory will be the maturity with which we handled our agony.

Can candidates give us a reason to say no?

ALLISON PRICE
Bucknellian Staff Columnist

I am trying to pinpoint exactly why I am no longer a political science major. I am not satisfied with the usual explanations - frustration, corruption, isolation and betraying compromises. It is almost as if it is a different kind of burnout, a different kind of farce.

Why should the Republicans feign a big tent? When push comes to shove, policy gets shoved one way and by voting we are choosing that path. This is not a partisan phenomenon. When asked about Clinton's about stance on the welfare bill, Al Gore had a perfectly sensitive, perfectly circumvented answer. Oh come on, Al Gore is an intelligent man. Clinton played a political chip and Al Gore is as queasy about it as the rest of us.

Perhaps it is a positive thing that people are turning away from conventions due to their necessary fakeness. Can you imagine the consequences if Al Gore had openly disagreed with Clinton or if Bob Dole had enforced, or even read, his party's platform? However, I should have followed my own advice. I could take a lot watching what I did of the GOP convention; the Hillary rituals, and how if we all worked a little harder we would be healthy enough not to even need health care. On the other hand, the Republican drug jabs were way too rich.

Bucknellian file photo

During his acceptance speech, Bob Dole commented on the horribly corrupt Clinton White House and in particular all the younger members of the staff who, according to Dole, just "couldn't say no." Beyond all these old, stale rumors hides our inability to confront the real issues in American society, in this case illegal drug use. If there is political gain to be made in the simplification of such complex dilemmas, the truth will be simplified. If anyone attempts to inject any bit of critical thinking, they are radical. If anyone applies morality, it has to be of the right wing nature or it doesn't count. And then there is the truth as we know it.

Remember Nancy Reagan on "Different Strokes"? She told the class to "just say no." The First Lady also went along on a police raid once and I remember her saying how it was such a great experience. No, try a horrifying one. We remember the public service announcements - "Real Friends Don't Do Drugs" and "Do Drugs, Do Time." Yeah, right.

After spending time on this campus, most people are aware of the fallacies of the Public Service Announcement. Real friends do a lot of things you may prefer they did not do and users do not always get caught. If these are the best reasons we can come up with to just say no, we are in dire trouble. In addition, just saying no is not all that easy. A high school student I was tutoring once told me how so many of her fellow ninth graders smoked marijuana in public and she asked me why she should not avoid the adolescent agony of being an out person and just join them.

In high school not doing something because it is illegal is low on the scale of moral reasoning. The ninth grader was asking for something more. She was asking for reasons that defy politics but are the only way to attack the problem Dole has been pushing as a Democratic failure. I do not necessarily believe that the reasons can be embodied in policy or programs, but it can be conveyed through real leadership. That kind of leadership is what politics sorely lack, the betrayal of simplistic solutions.

How about telling the truth? Doing drugs does not make you a bad person and you might not ever get caught. However, you know you are doing something that sells yourself out to chemicals and hurts your health. When you buy illegal substances you are making yourself a party to the scourge of violence in the U.S. today — when that infant gets killed by a stray bullet in a drug shootout, you are feeding an industry. It vexed me when Representative Susan Molinari, caught in a falsehood as she swore she never touched pot (once again, we know better) used this sentence to back up her denial, "You must remember, I was Representative Guy Molinari's daughter." So, she had the money to get it?

There is a real need to stop the influx of drugs into this country, as Dole says. However, considering Dole's lollipop from the parade float tax cut, it would not be possible to afford his plan to enlist the military. I also doubt he would support increased funding for rehabilitation programs. Another complexity which presents itself is that addiction to alcohol is seen as a disease but addiction to drugs is solely seen as a crime. Most of all, drug abuse is a problem that transcends political party and socioeconomic status. Dole is not addressing all of this, and seeing he can't lace together a coherent sentence concerning the recent military moves as of this time in Iraq, I do not see him picking up the pace any time soon.

I once had a friend who swore up and down he would never tell his own kids a thing about drugs until they asked and would never refer to his own life choices. Maybe what Dole is missing are the reasons why people don't just say no. At either end of the decision. Yes or no is not enough.

OPINIONS

GOP convention message far from realistic issues

TODD ZERANSKI
Bucknellian Staff Columnist

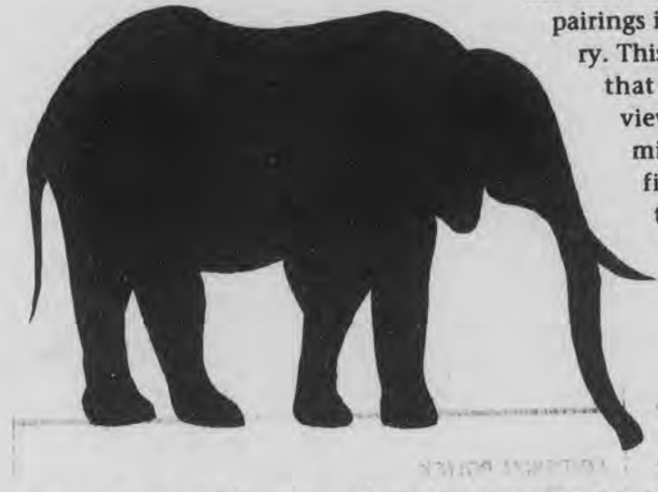
As I sit in my commodious dingle, comfortably curled up in the fetal position, my thoughts drift back to the summer, full of carefree days and easy living.

Well, mostly carefree living anyway. I was subject to great gastric distress while watching the Republican National Convention, that painful and morally abhorrent attempt of massive spin politics that comes around every four years. And to be sure, the Republicans were cognizant of the reception their 1992 "Family Values" Convention in Houston received. So in turn, their convention this year was full of senseless propaganda as to make Goebels proud. The convention hall was teeming with beaming delegates of all races and walks of life ... or at least that's what the cameras showed us. And there was Colin Powell, the revered African-American war general beloved by all, babbling incessantly.

"A nation as great and diverse as America deserves leadership that opens its arms not only to those who have already reaped the rewards of the American dream, but to those who strive for and struggle each day against daunting odds to make that dream come true. The Republican Party must always be the party of inclusion."

Wow. Well, I guess that the GOP is inclusive. Unless you're black, poor, gay, or an immigrant. And only if you're male. Indeed, 90% of the delegates in the hall listening to Powell's filth were white. 20% were millionaires.

The true power players within the party-Newt Gingrich, Trent Lott, and Richard Armey-kept a low profile, although Newt did make a cameo appearance to delight us all with his commentary on beach volleyball. No wonder why Ted Koppel left in disgust.



The main draw was Bob Dole and Jack Kemp, for my money, one of the most unusual political pairings in recent memory. This, the Jack Kemp that abandoned his views on both immigration and affirmative action to join the ticket. And they say that Clinton has no principles.

Bob Dole revealed the panic of the Republican's executive wishes when he endorsed and promised a 15% tax cut. This coming from a man of such sterling character that he once joked of a bus of supply-side economists driving off a cliff. The only problem, he noted, was that Jack Kemp wasn't on it. What a ticket.

I think back once again to Colin Powell. "It is our party, the party of Lincoln, that must always stand for equal rights and fair opportunity for all." If the San Diego Convention is any indication, prepare for a long wait.

Speak Out

What is your reaction to the integrated housing on campus, such as having first year students live in Swartz and sophomores live in Smith?

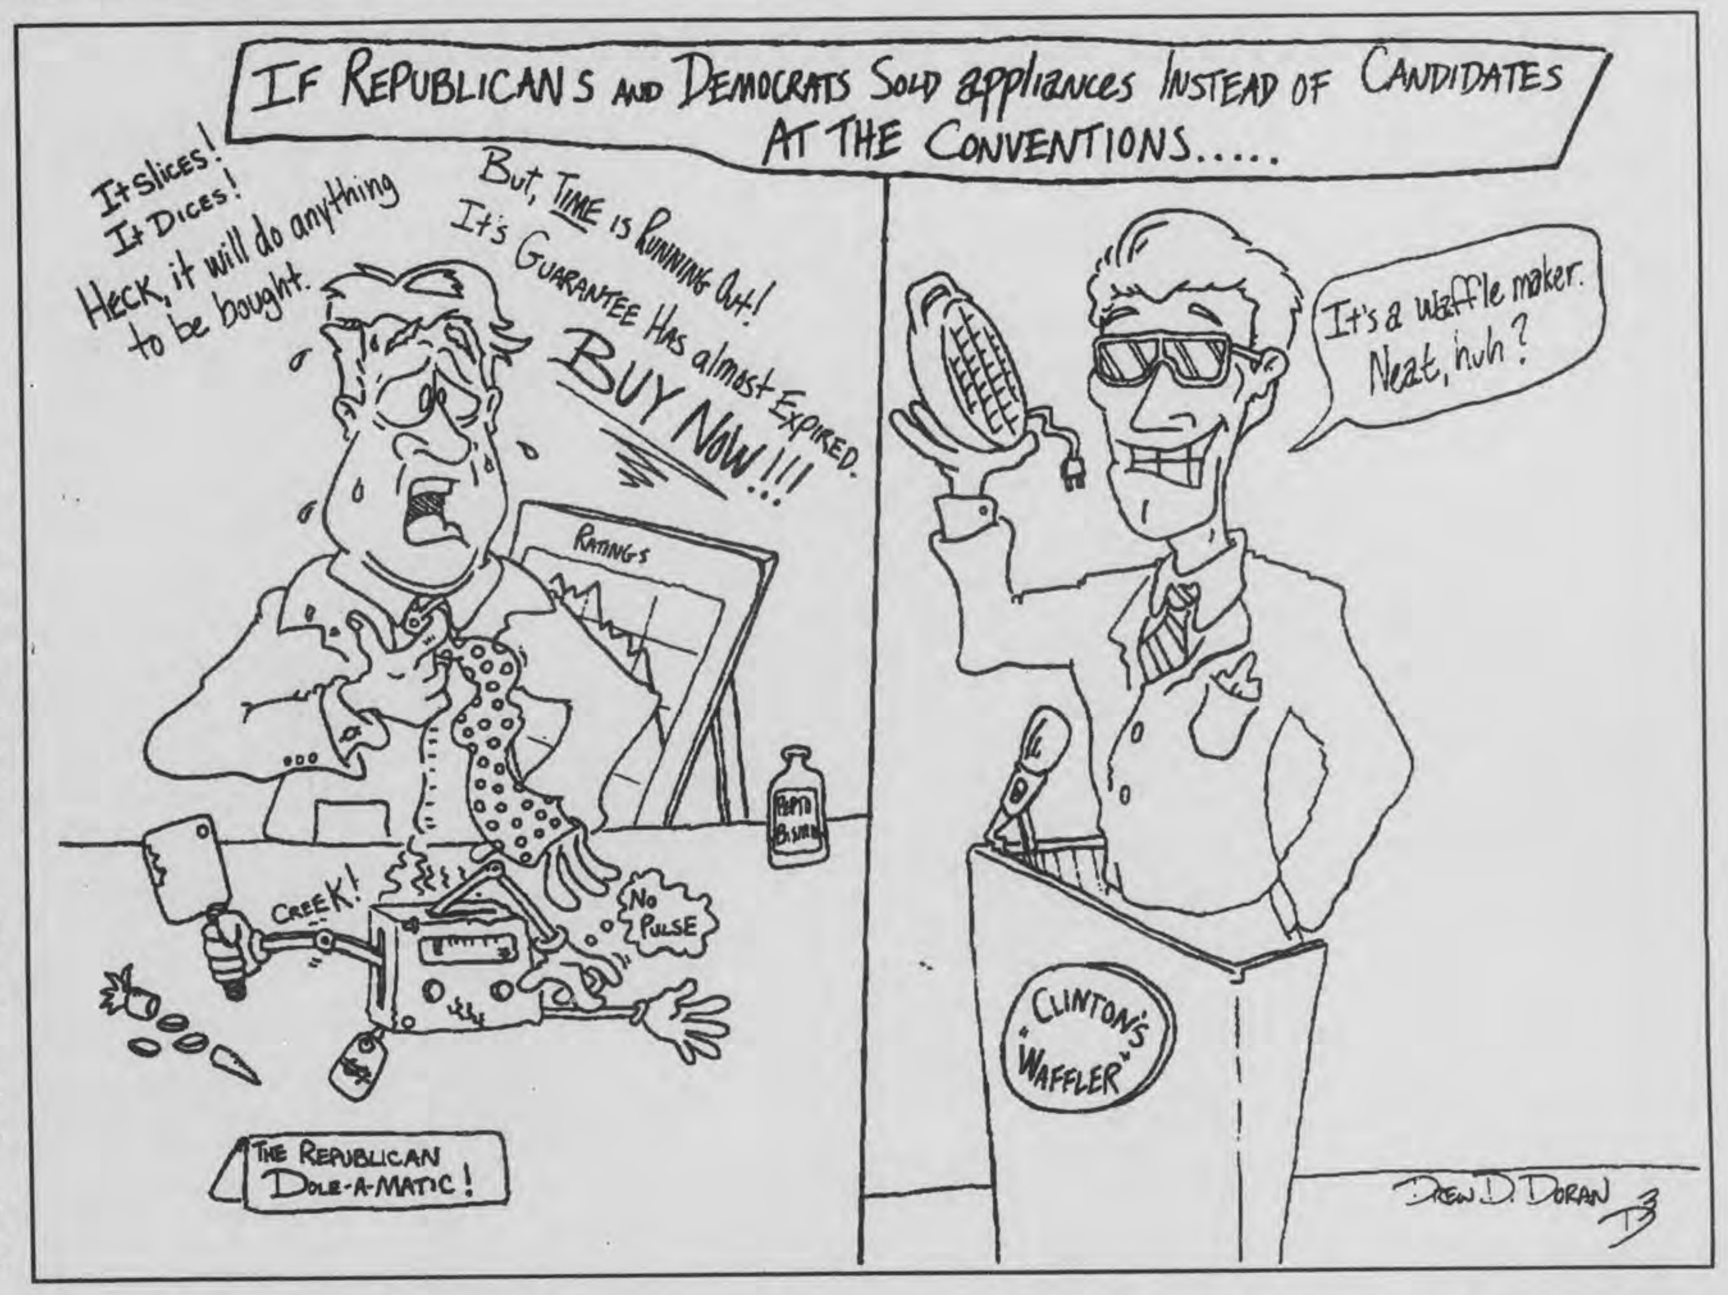
Tracey Gray, '99
"I think it would detract from the freshman experience because you are not living in a community of people who are experiencing things for the first time like you are."

Tara Driscoll, '00
"If I was a sophomore, I would feel awkward being in the midst of the new freshmen who are trying to adjust and make new friends."

Amy Shaw, '97
"If they totally integrated all the freshmen dorms and Swartz, it would work because everyone would be in the same situation and there would be more interaction. But integrating only a little bit makes people feel separated from their classmates."

Holly Stuart, '99
"I don't see any problem because it is important for everyone to get acquainted. I would have liked to meet upperclassmen because it makes more of a bonded campus."

What do you think? Write* The Bucknellian *and let us know.



IF REPUBLICANS AND DEMOCRATS SOLD appliances INSTEAD OF CANDIDATES AT THE CONVENTIONS.....
It slices! It Dices! Heck, it will do anything to be bought.
But, TIME is Running Out! It's GUARANTEE Has almost Expired. BUY NOW!!!

Students allow themselves to be easy crime targets

The University offers effective programs to keep harm from coming our way

NICOLE MAESTRI
Bucknellian Staff Columnist

Although it's been said hundreds of times before, Lewisburg is not immune to the problems of larger towns or cities. My roommates and I learned this when our off-campus apartment was robbed this summer. None of us were there when it happened, but it is still hard to accept.

There is always the idea in the back of my mind that someone came into my house, went through my things, and took whatever he or she wanted. I have no clue who that someone might be and that scares me.

Even if your "home" is temporary — a dorm room, a rented apartment, a house on 6th Street — it is still a sacred place. It is a personal space filled with your necessities, your valuables, and your memories.

That is why is such a violation when you are robbed. A stranger has been in your home, rifled through your things, and taken what is not his or hers. A shadow is left behind by an intruder, the lurking idea that your once peaceful home is now somehow impure.

Ours is not the only incident that has been reported this school year. Living off-campus, there is greater contact with the community and greater chances for problems to arise. We are temporarily living in a community in which we overestimate our safety.

Bucknell students let themselves be easy targets for crime. When the weather is nice we all have a tendency to become careless with our own safety. We leave our windows open since we don't have or can't afford air conditioning, we keep our doors unlocked because we don't think anyone is going to actually come into our home, and we exercise outside wearing a walkman to distract us and make us less aware of our surroundings. Why should warm weather in a small town be any sort of excuse to compromise our own safety?

We need to actively ensure our safety, both on and off-campus. We should use the resources that Public Safety offers to help us protect ourselves. Make yourself aware of the programs that have been designed to make our lives at Bucknell more secure.

How many students know that Public Safety will do a security survey of your room, home or apartment? Who even knows what a security survey is? A security survey involves Public Safety assessing how secure your home is, wherever you are living and what else you can do to protect yourself. It certainly could not hurt to have one done.

Why don't more students use the walking escort service when they really do need an escort late at night? If you would not walk home alone anywhere else, why is it suddenly safe to do it at Bucknell? Just because a walking escort may not be as convenient as a driven escort, it is no reason to pass it up. There are many areas on and off-campus that are not lit sufficiently at night.

The city of Bethlehem has become involved with the security of Lehigh students who live off-campus. Students are able to register their off-campus home or apartment with community police and they in turn regularly check these homes while students are away on break. This watch program is free and students are contacted if any problems arise.

Granted, Bethlehem is a much larger city than Lewisburg and they are dealing with more serious instances of crime, but if a similar program was developed in Lewisburg, many students would sign up.

Don't allow yourself to be an easy target. Don't forget to do those common sense tasks such as locking your door and leaving a light on when you go out. Have a sense of your surroundings, what is normal and what seems odd, and report anything that is out of the ordinary. Make it publicly known when there has been a problem so the rest of us can be made aware of it and be on guard.

Unfortunately, it is usually the victims of past crimes who are the most concerned about their safety. The rest of us wander around the campus oblivious, having other priorities. We are an intelligent student body. Let's not be stupid when it comes to protecting ourselves.

Directionless politicians need leadership and vision to direct disillusioned voters

TOBY ANDERSON
Bucknellian Staff Writer

What is it our country lacks? Among other things: a common morality, coherent foreign and domestic policies, healthy urban centers, political leadership, and a national vision. However, what should be concerning us most in the upcoming election is not the ongoing problems which will require years to root out and which are never completely solved. It should be the lack of leadership and vision in our country's political elite, because leadership and vision are required if we are to ever attempt to seriously address the other issues.

We are faced with yet another election of directionless politicians, who look for the message that will improve their ratings next week. In the wake of the cold war, our state is the most powerful state in the world, militarily and economically. However, we have hamstringed our position through policy waffling, and no definable direction in which to lead our country, let alone a vision of where we will be twenty years from now. That is pathetic to say the least.

Vision shouldn't be something we beg for, it should be something we demand. If we do not take the global reins soon, then someone else will. If we don't do it in America, then our society will face ever-worsening identity crises.

We were faced with the opportunity to mold many aspects of the world in which we live, both domestically and abroad. However, due to bipartisan bickering, waffling, and rudderless sailing, our policy decisions are given little credence. We have sacrificed much of the faith that we and other countries have put into our government amidst the incompetencies of our political elite.

We have witnessed a moderate democrat turn into a liberal democrat and then swing back over to a moderate republican. We have also witnessed a social moderate, fiscal conservative turn into a social conservative, and then back to a social moderate, supply-sider. It is hard to tell whether we are more confused than the chameleons, as they change color. One of the two is trying to save his hide, while the other is trying to change his hide. Which is which? Depends on the day.

Each tries every maneuver to improve their stands in the polls, but both end up treading water. Why? Because people are disappointed, disaffected, and even distressed. They are afraid that the one they vote for probably won't improve their situation, and they're not sure which one will worsen it. Both candidates attempt to seize the political center, but in so doing they long ago compromised any consistency they had earned. Coming from a moderate-centrist republican, that's a pretty bad sign.

What the candidates have failed to recognize, and it is glaringly obvious, is that the people (and other countries) crave for an American presidential candidate who knows what this country and world will look like, according to his/her VISION, 20 years from now. They need to take a clear stand on issues both foreign and domestic, and to provide the pressure from the White House to bring these issues before Congress for four years, regardless of the ever-changing polls. They would then either be run out of town, or hailed as the greatest president and world leader, in recent times. Because of the leadership we currently lack, it would more than likely be the latter.

Vision shouldn't be something for which we beg, it should be something we demand. If we do not take the global reins soon, then someone else will. And if we don't do it in America, then our society will face ever-worsening identity crises. I will vote in November because I must take accountability for what happens to this society, and so should you.

ARTS & ENTERTAINMENT

Alumni help commemorate 150 years of creativity in Center Gallery

RACHEL DOEBBER
Bucknellian Staff Writer

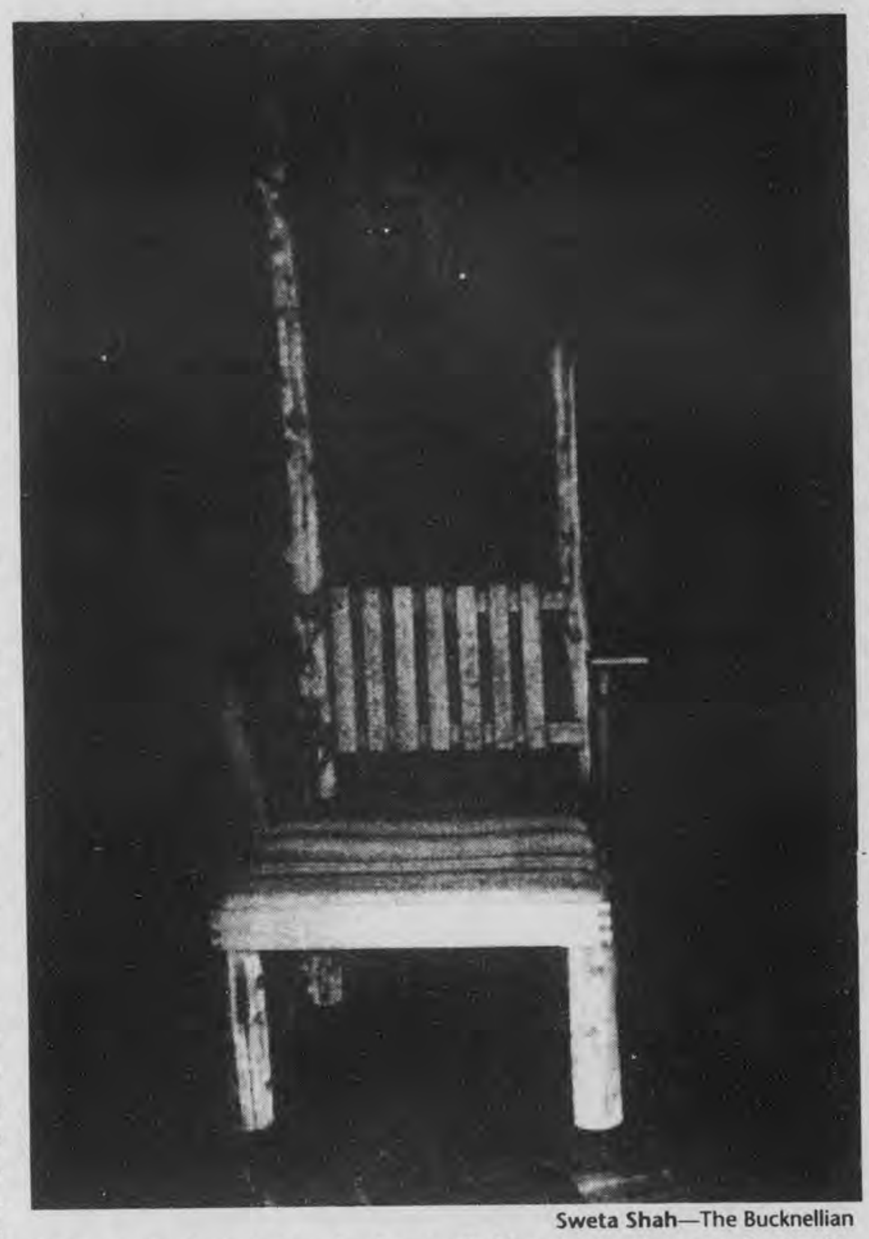
As a continuation of the University's Sesquicentennial Celebration, the Center Gallery is hosting an exhibit entitled "Fragments of a Journey: 150 Years of Art at Bucknell" which can be seen through October 20.

Since this is a celebration of art at Bucknell, it is appropriate that the curator of the exhibit is Bucknell graduate, Richard Humphrey '74, who is a Pulitzer Prize winning producer of films, well-known curator, and director of Humphrey Fine Arts in New York City.

Humphrey has contributed large donations to the University's arts program and also had a part in the development of the focus semester series four years ago.

When asked how he felt about playing such a major part in the University's Sesquicentennial Celebration, Humphrey replied, "I love to come back to Bucknell and reinvent myself."

Humphrey, who majored in English with a concentration in theater at the University, was approached by Center Gallery coordinator, Cynthia Peltier, to curate the exhibit and to choose the artists, all of whom are active University alumni artists. To advertise for artist participation, ads were placed in *Bucknell World*. Artists sent in slides of their work which Humphrey reviewed and selected those to be included in the exhibit. Works done by 28 active artists are displayed in this exhibit.



Sweta Shah—The Bucknellian

This exhibit featured in the Center Gallery in the Langone Center is called "Chair" and was designed by Richard Mold '81.

The exhibit features a wide variety of art forms that include quilts, photography, sculpture, furniture and paintings done in many styles from realistic to abstract.

The artist alumni span the years from 1939 to 1995. Margaret Brown '39 of Camphill, Pennsylvania, displayed three oil paintings which she described as realistic compared to the vast majority of paintings that were done in a more abstract style. Mako Fujimura '83 who now lives in New York City, submitted two semi-abstract landscapes that were completed in shades of blues and greens. Comparing the art program that he went through and the one that is established now, Fujimura said that the University has made great strides in supporting and expanding the arts programs. He wished that there had been an Art Residential College when he was a freshman because he feels "it's very important to learn about other art forms."

The Center Gallery is open to the public free of charge Monday through Friday from 11 a.m. until 5 p.m. and on weekends from 1 p.m. until 4 p.m.

Renowned feminist poet visits campus

Ostriker to read in Bucknell Hall

BY DAVID CARPENTER

Alicia Ostriker, one of the country's premier poets, returns to the University for a poetry reading in Bucknell Hall on September 11, at 8 p.m. She is considered one of the foremost feminist poets in the country.

In addition to her reading, she will meet with interested faculty and students to give them the chance to talk informally with her.

Ostriker originally came to the university as part of the Bucknell Lectures in Literary Theory funded by a Mellen Foundation grant. It was here she delivered a collection of essays called *The Bible and Feminist Revision.*

She now returns as a poet who has published numerous works, both fiction and nonfiction, including *Stealing the Language*. This is recognized as a foundation of feminist studies in the United States.

Ostriker has received numerous awards for her poetry, including a Rockefeller Foundation Fellowship, a Guggenheim Fellowship and the Poetry Society of America's William Carlos Williams Prize.

Her new work, *The Crack in Everything*, explores many social problems, such as poverty, in the United States today. On a more personal level, Ostriker's writing deals with her recovery from breast cancer, which catalyzed her search into her spiritual condition in Judaism.

Her return to Bucknell is through the enormous effort and cooperation of four major departments on campus, the College of the Humanities, Association for the Arts, the department of English and the Stadler Center for Poetry. Cynthia Hogue, the newly appointed Director of the Stadler Center, met Ostriker at a conference at Rutgers University where she is a professor of English and Creative Writing. It was there that the idea of a poetry reading at the University first arose.

Playwright celebrates Sesquicentennial

Bernardo Solano returns once again for Latin American Focus Semester residency

RACHEL DOEBBER
Bucknellian Staff Writer

Three words that are familiar to playwright Bernardo Solano are Lights, Camera, Action! He has been an actor, director, and playwright for over 20 years.

Solano first came to Bucknell in 1989 after having been recommended by several people in the theater business to Gary Grant, professor of theater. He has returned every three years as the Playwright in Residence for the Latin American Focus Semester.

This year is particularly special considering it is the Sesquicentennial Anniversary of the University's founding. As part of the year-long celebration, Solano will premier the sequel to his acclaimed hit *Speak Spanish for Me*, entitled *Speaking the Language*.

Being performed for the first time during homecoming weekend as part of Le Cafe Tustin, *Speaking the Language* will feature Bucknell alumni and one current Bucknell student. *Speak Spanish for Me* will also be performed on September 12 at 7 p.m. in Vaughan Literature Auditorium by Cap & Dagger's Educational Theater Company as part of the Sesquicentennial festivities.

Both of these plays are about the experiences of African American, Latino and Caucasian students in a university setting. According to Solano, Gary Grant felt this was a very appropriate performance considering Bucknell University is attempting to achieve a more multicultural atmosphere.

Born in Columbia, South America, Solano grew up in the suburbs of Washington, D.C. He attended the University of Maryland and received his Bachelor of Arts. He went on to attain his Masters in Fine Arts and Playwriting from Yale. Salano then trained as an actor in Off Broadway and Regional Theater productions.

For the past 13 years, Solano has been writing his own plays as well as taking part in Playwright in Residence programs in universities all over the country. When asked if having a Latino background has influenced his writings, Solano said, "Definitely. It has been a very empowering feeling to be able to express my own viewpoints about multiculturalism and cultural identity in my own plays."

In addition to directing the students in his plays, *Speak Spanish for Me* and *Speaking the Language*, Solano will also be conducting a play writing workshop tomorrow, Tuesday, and next Friday from 4:30 to 6 p.m. in the Tustin Studio Theater.

He will also be giving a public lecture on one of his more recent projects involving himself, a professional theater company out in Los Angeles, Cornerstone Theater Company, and the Watts community of Los Angeles. The lecture will address the new play, which is an updated liberal version of Gaust, involving a man who sells his soul to the devil. Written by Salano and the community members of Watts, this new version sends a proactive social message that deals with violence and the attempt to cope in a tense multicultural setting. The lecture will take place on Tuesday at 7 p.m. in the Langone Center Cave.

When asked if he has seen any changes at the University since 1993 when he was last here, Solano responded, "I see more diversity in terms of the student population and the faculty body. I think Bucknell is moving closer to achieving more of a multicultural atmosphere by facing the tensions and difficulties."

A & E Calendar

FRIDAY, SEPTEMBER 6
BAC Comedians: "Scared, Little Weird Guys"
Midnight, Langone Center Bison
Twister
Rooke Chapel Lawn, 10 p.m. to 11:30 p.m.
Rain - Vaughan Literature Auditorium

Playwriting workshop: conducted by Latin
American Semester Focus
In-Residence Playwright, Bernardo Salano
4:30 p.m. to 6 p.m., Tustin Studio Theater

MONDAY, SEPTEMBER 9
Playwriting workshop conducted by Latin
American Semester Focus
In-Residence Playwright, Bernardo Salano
4:30 p.m. to 6 p.m., Tustin Studio Theater

TUESDAY, SEPTEMBER 10
Religious Studies Forum:
"What's the Stake of Religion in Higher Education?"
Noon, Walls Lounge, Langone Center

Public Lecture:
Playwright Bernardo Salano and his
collaboration with the Cornerstone Theater of L.A. and
the Watts community of L.A.
7 p.m., Langone Center - the "Cave."

WEDNESDAY, SEPTEMBER 11
Poetry Reading: Alicia Ostriker
8 p.m. Bucknell Hall

SCIENCE AND TECHNOLOGY

Bucknell Bubble still clouded in soot

Power Plant still spews out smoke as plans for a new one are still in the making

BY JAMIE KRAUK
Bucknellian Staff Writer

Black soot pours daily from the smoke stack at the power plant. We have come to accept it as a part of daily life, but when will it's reign over us end?

When students left for the summer last year, we were under the impression that somehow the problem would not be there to smack us in the face upon our arrival in the fall. We now realize that is not the case. The black blanket on freshly polished cars that were ready for another Bucknell season reminds us of the nemesis that we thought we left behind.

Physical Plant Director Dennis Hawley admits his personal frustration with the three bidders who expressed an interest in the job last spring, but he is sure that action concerning the soot will be taken soon. "Unfortunately, each of the bids came in at 25% over our budget, so we are still in the process of negotiating down the cost. Within the next three or four weeks, we should finalize a contract for action," Hawley said with slight hesitation in his voice. Once a bid is accepted, the contract must pass on to the Board of Trustees so that they can approve the proposed cost. That process will be take additional three or four weeks.

The question that keeps coming up is "Why is the problem seemingly worse than it has ever been?" Physical Plant offers an explanation. "The coal source that we use is a very old coal pile located on Smoketown Road across Route 15 near the golf course. We are trying to utilize the remainder of that supply in order to prepare for the natural gas system that is to come," Hawley stated. The problem arose when a pocket of faulty coal was reached. The glitch was not realized until the coal was placed over the burner. Over time, the coal had become too fine and would not burn as it should. When air passed over the coal to draw it into the flame, the fine coal was too light and was blown directly out of the smoke stack. Subsequently, the soot that everyone has experienced on their cars is fine coal that never even made it through the burner. That coal pocket is no longer being used. As of now, the problem is still at the same stage that it was last spring.

The question of what will eventually be done is still the most pressing question in the minds of students. Once the contract is processed, the projected time frame for completion is 24 months. So in two years and some odd weeks the problem of relentless soot should be just a memory. By that time, unfortunately only half of the student body will still be here to remember the way things once were. The students who enter Bucknell as the class of 2002 will arrive at a facility that has been totally rebuilt from the inside out.

The external structure will be the same, but as Dennis Hawley phrased it, "The inside will be gutted so that we can start from scratch. I don't want a single wire or pipe to be in there that isn't new." The entire system will be converted from coal (burning) to natural gas. The result: a cleaner environment for everyone involved and a lot more ease for the Physical Plant. "Coal is an effective fuel source, especially in Central Pennsylvania where that's what everyone uses, but it really just has no place in small plants. It should be used in very large facilities that are able to keep it burning clean and efficiently but it has no place in small, localized plants," reflected Hawley as he mused on the prospect of the new system that is to come.

The implications of the new power plant are widespread. The finalization of a contract brings with it an anticipation from the student body and a comfort in knowing that the project will be underway soon. A cleaner power supply means cleaner air and cleaner cars, as well as less work for groundskeepers and snow that stays white all winter without being bathed in black ash. The prospects are looking bright.

Amy Frost — The Bucknellian

With plans in the making to rebuild the Power Plant and replace the coal system with natural gas, the black soot particles streaming from the smoke stake will only be just a bad memory in about 2 years.

Health Service offers more than meets the eye, from counseling to free rides

BY TIM PARROTT
Bucknellian Staff Writer

After a year of seemingly resilient viruses, the Student Health Service has become almost exclusively recognized as an abundant source of amoxycilin and other wide reaching antibiotics. Unbeknownst to a majority of the campus, the Ziegler Health Center offers a wide variety of services to "provide the best health care possible," in accordance with their threefold mission statement.

It claims to, "1. Provide the best health care possible in a manner that is competent, current, compassionate, timely, and in an atmosphere of mutual responsibility; 2. Educate the university community in health-related areas in an attempt to insure that each member obtain and preserve his or her optimal level of physical, mental, and spiritual well-being; 3. Instill respect for the human organism and its position within the ecosystem." The main types of services the health center offers to University students are general medical services, gynecological services, drug and alcohol counseling, as well as free rides and information. These operations are administered throughout the semester by a group of six registered nurses, three practicing physicians, a nurse practitioner for gynecological services, and a drug and alcohol counselor.

According to Jane Haile, R.N., a part time nurse at the health center, the student health service can be compared to a miniature emergency room, equipped to deal with most patient's immediate needs. During the week the Student Health Service is staffed with two or three nurses from 8 a.m. to 8 p.m. and two physicians from 9 a.m. to 11:45 a.m. and 4 p.m. to 5:45 p.m. During the weekends the staff is reduced to one nurse on duty Saturday and Sunday from 9 a.m. to 5 p.m. and one physician on duty Saturday from 11 a.m. to 11:45 a.m. and Sunday from 12:00 p.m. to 12:45 p.m.

The health center is equipped during these hours to administer general physicals as well as allergy shots free of charge for students whose conditions necessitate regular doses of allergy medicine. In the case of an emergency, the health service is able to deal with any strained muscles, sprained limbs, deep lacerations, or heat exhaustion within the health center examination rooms.

In each case the nurse on duty would promptly deal with the patient's needs and administers a follow up program with each patient. Follow-up may include further treatment or a call to check on the student's health. The Ziegler Health Center also has the ability to prescribe some antibiotics for the students, while making them available at a small fee directly following the patient's visit. Although the health center is capable of delivering many of the necessary general health services on campus, when they are unable to deal with a patient's symptoms, they have the ability to refer patients to Lewisburg Evangelical Community Hospital, where the student can be treated with the proper equipment.

Although most students consider these medical services the extent of Ziegler Health Center's capabilities, this student service has more to offer. In a discreet section of the building, separate from the main portion of the health center, both gynecological and alcohol and drug counseling services are offered. These services, unlike the general medical services, are arranged by appointment rather than on a walk in basis. Rozalyn L. Yannaccone, C.R.N.P., the nurse practitioner for gynecological services, offers general physicals, pelvic exams and contraceptives to female students in a private, confidential setting. Appointments may be made for these gynecological services by calling x1332 at the Health Center.

Robert S. Thomas, M.A., is the coordinator of drug and alcohol programs in the Ziegler Health Center. Through this student service, he offers counseling for anyone who seeks relief from their addiction to either alcohol or drugs. His office is located on the second floor of the health center, where students can have private and confidential meetings with a counselor in a one-on-one setting. Drug and alcohol counseling can be made available for students by calling x1159. In addition to personal meetings, the Student Health Service also offers a wide selection of informational pamphlets concerning alcohol and drug abuse as well as contraception and gynecological wellness.

For students without cars on campus, or students who may be too ill to drive themselves to the health center or hospital, the Ziegler Health Center offers a free ride service 24 hours a day. It is supplied by four student drivers, who take turns on call. This service can be utilized by students by calling x1401 and providing the receptionist with some information concerning their condition. These free rides allow all students to have equal accessibility to health services on and off campus, regardless of their physical condition.

All questions and concerns regarding these services should be directed toward the Ziegler Health Center at x1401 between the hours of 8 a.m. and 8 p.m.

Bucknell reaches out to prospectives with a new Web site

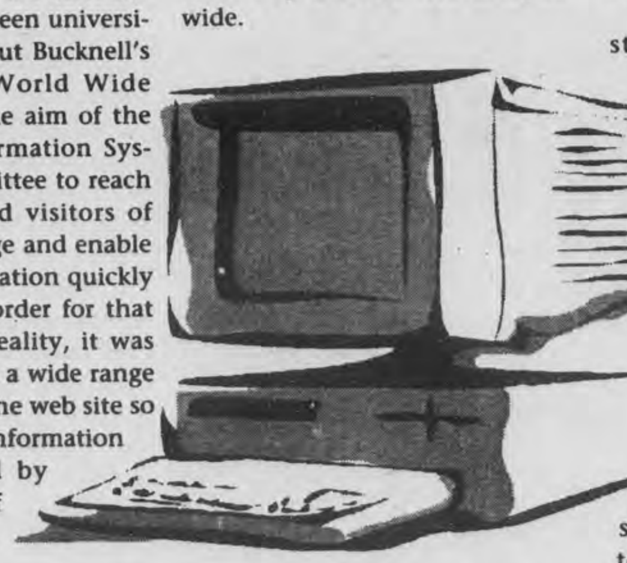
Site will provide Bucknell community members a common location for all resources

BY MATT CHRIST
Bucknellian Staff Writer

As students move back into the Bucknell community, many changes are taking place. Not only have students moved forward in their academic careers, but they have also moved into a new computer era. According to Sharon Poff from the Office of Public Relations, "There has been university-wide concern about Bucknell's presence on the World Wide Web."It has been the aim of the Campus Wide Information Systems (CWIS) Committee to reach out to students and visitors of Bucknell's home page and enable them to find information quickly and effectively. In order for that goal to become a reality, it was necessary to include a wide range of departments on the web site so that a vast array of information could be accessed by worldwide users of the internet. This task was accomplished by the CWIS during the spring and summer months.

Unique changes in the Bucknell web site appear in the Library's Departmental site, which provides substantial opportunities for the students. According to Roberta Sims, assistant to director of library and information services, "You can access library research materials from any computer terminal connected to the internet on campus."

There is a link that allows for guidance through the Internet using a program called The Library Wizard. When the library is not open for hours of operation, questions can still be answered using the Wizard, which can be accessed from any on-line site campus-wide.



Opportunities to visit various library web sites from around the globe are also available. This improvement allows information to be accessed that is not found in the Bertrand Library on campus. In addition to research information, the web provides a full schedule of the library's operating hours as well as historical background information about the library itself.

Still more new features of the new web site include easy access to information on Admissions, Administrative offices, Financial Aid, alumni, parents, and students. Students, faculty and staff may also locate information on student resources, events, news and publications, academic resources, and the campus directory.

Bucknell's Web site allows the student to learn information about the campus, locate their past and present class schedules and receive a direct link to web sites all over the country. The new Web Site continues to provide the Bucknell community with access to an array of informational resources and it remains committed to working with students, faculty and staff in learning, teaching, and research arenas. For the future, the library personnel expressed that their goal is to integrate all resources into a common location - a feat which has never been done before.

Many computer students are to be accredited for much of the work on the library's site. Several students who have devoted time to the modernization of Bucknell's World Wide Web site are Ben Dewey, Randy Faust, Kathleen McQuisten, and Pam Ross.

In order to further accentuate the developments on Bucknell's home page, there will be a visual tour of the various components of the system in the Cave on Monday, Sept. 9. This program will serve as an introduction to the new site and will provide the community with a glimpse at all that the new service has to offer.

Following the tour, there will be a "ribbon-cutting" ceremony performed by Daniel Little, Vice President of Academic Affairs, and Ann deKlerk, Co-chair of CWIS Committee, in honor of the new Bucknell Web Site. In addition to these advancements, the University continues to look for more ways that allow students, faculty, and visitors to see what the University has to offer and in the process, improve the success of integrating common resources into daily lives of all involved with the Bucknell community.

ARTS & ENTERTAINMENT

Alumni help commemorate 150 years of creativity in Center Gallery

RACHEL DOEBBER
Bucknellian Staff Writer

As a continuation of the University's Sesquicentennial Celebration, the Center Gallery is hosting an exhibit entitled "Fragments of a Journey: 150 Years of Art at Bucknell" which can be seen through October 20.

Since this is a celebration of art at Bucknell, it is appropriate that the curator of the exhibit is Bucknell graduate, Richard Humphrey '74, who is a Pulitzer Prize winning producer of films, well-known curator, and director of Humphrey Fine Arts in New York City.

Humphrey has contributed large donations to the University's arts program and also had a part in the development of the focus semester series four years ago.

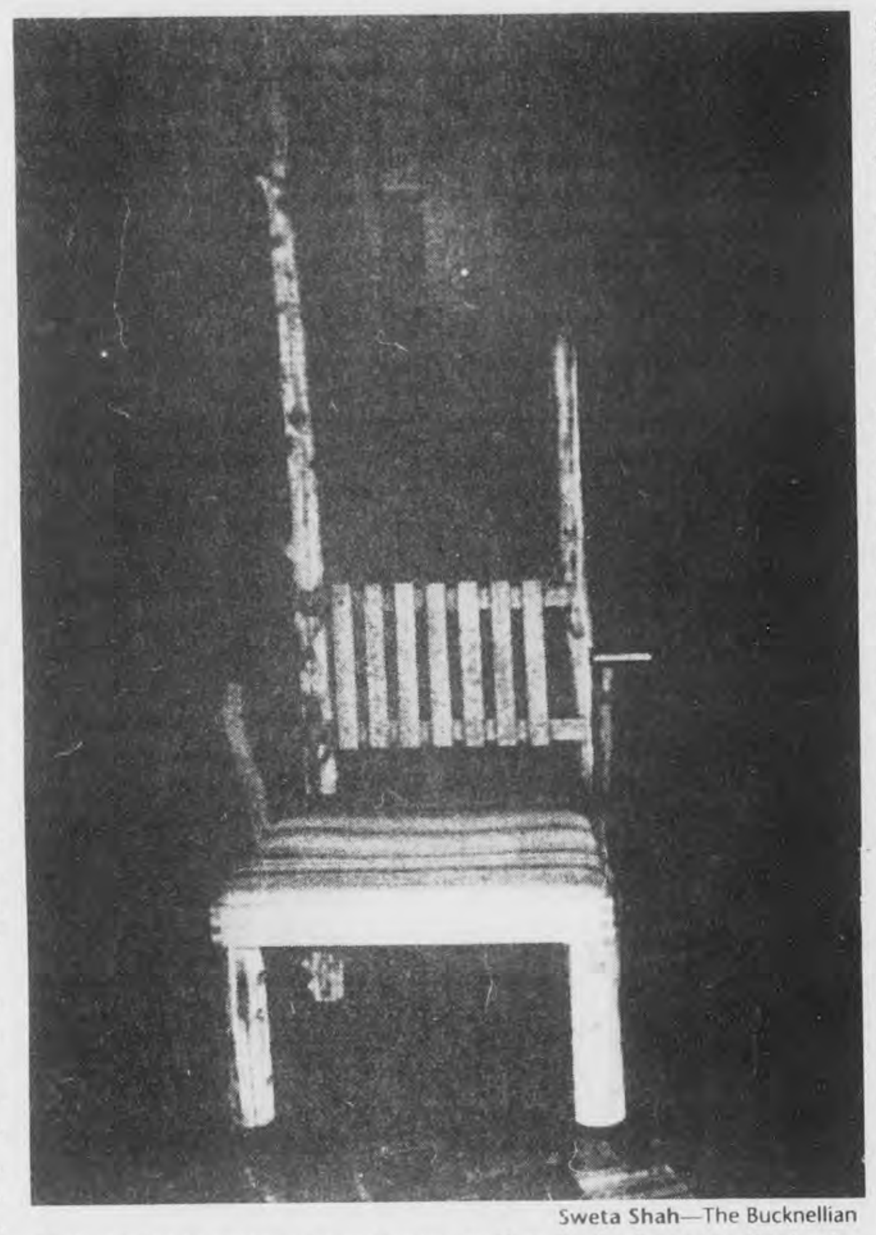
When asked how he felt about playing such a major part in the University's Sesquicentennial Celebration, Humphrey replied, "I love to come back to Bucknell and reinvent myself."

Humphrey, who majored in English with a concentration in theater at the University, was approached by Center Gallery coordinator, Cynthia Peltier, to curate the exhibit and to choose the artists, all of whom are active University alumni artists. To advertise for artist participation, ads were placed in *Bucknell World*. Artists sent in slides of their work which Humphrey reviewed and selected those to be included in the exhibit. Works done by 28 active artists are displayed in this exhibit.

The exhibit features a wide variety of art forms that include quilts, photography, sculpture, furniture and paintings done in many styles from realistic to abstract.

The artist alumni span the years from 1939 to 1995. Margaret Brown '39 of Camphill, Pennsylvania, displayed three oil paintings which she described as realistic compared to the vast majority of paintings that were done in a more abstract style. Mako Fujimura '83 who now lives in New York City, submitted two semi-abstract landscapes that were completed in shades of blues and greens. Comparing the art program that he went through and the one that is established now, Fujimura said that the University has made great strides in supporting and expanding the arts programs. He wished that there had been an Art Residential College when he was a freshman because he feels "it's very important to learn about other art forms."

The Center Gallery is open to the public free of charge Monday through Friday from 11 a.m. until 5 p.m. and on weekends from 1 p.m. until 4 p.m.



Sweta Shah—The Bucknellian

This exhibit featured in the Center Gallery in the Langone Center is called "Chair" and was designed by Richard Mold '81.

Renowned feminist poet visits campus

Ostriker to read in Bucknell Hall

BY DAVID CARPENTER

Alicia Ostriker, one of the country's premier poets, returns to the University for a poetry reading in Bucknell Hall on September 11, at 8 p.m. She is considered one of the foremost feminist poets in the country.

In addition to her reading, she will meet with interested faculty and students to give them the chance to talk informally with her.

Ostriker originally came to the university as part of the Bucknell Lectures in Literary Theory funded by a Mellen Foundation grant. It was here she delivered a collection of essays called *The Bible and Feminist Revision.*

She now returns as a poet who has published numerous works, both fiction and nonfiction, including *Stealing the Language*. This is recognized as a foundation of feminist studies in the United States.

Ostriker has received numerous awards for her poetry, including a Rockefeller Foundation Fellowship, a Guggenheim Fellowship and the Poetry Society of America's William Carlos Williams Prize.

Her new work, *The Crack in Everything*, explores many social problems, such as poverty, in the United States today. On a more personal level, Ostriker's writing deals with her recovery from breast cancer, which catalyzed her search into her spiritual condition in Judaism.

Her return to Bucknell is through the enormous effort and cooperation of four major departments on campus, the College of the Humanities, Association for the Arts, the department of English and the Stadler Center for Poetry. Cynthia Hogue, the newly appointed Director of the Stadler Center, met Ostriker at a conference at Rutgers University where she is a professor of English and Creative Writing. It was there that the idea of a poetry reading at the University first arose.

Playwright celebrates Sesquicentennial

Bernardo Solano returns once again for Latin American Focus Semester residency

RACHEL DOEBBER
Bucknellian Staff Writer

Three words that are familiar to playwright Bernardo Solano are Lights, Camera, Action! He has been an actor, director, and playwright for over 20 years.

Solano first came to Bucknell in 1989 after having been recommended by several people in the theater business to Gary Grant, professor of theater. He has returned every three years as the Playwright in Residence for the Latin American Focus Semester.

This year is particularly special considering it is the Sesquicentennial Anniversary of the University's founding. As part of the year-long celebration, Solano will premier the sequel to his acclaimed hit *Speak Spanish for Me*, entitled *Speaking the Language*.

Being performed for the first time during homecoming weekend as part of Le Cafe Tustin, *Speaking the Language* will feature Bucknell alumni and one current Bucknell student. *Speak Spanish for Me* will also be performed on September 12 at 7 p.m. in Vaughan Literature Auditorium by Cap & Dagger's Educational Theater Company as part of the Sesquicentennial festivities.

Both of these plays are about the experiences of African American, Latino and Caucasian students in a university setting. According to Solano, Gary Grant felt this was a very appropriate performance considering Bucknell University is attempting to achieve a more multicultural atmosphere.

Born in Columbia, South America, Solano grew up in the suburbs of Washington, D.C. He attended the University of Maryland and received his Bachelor of Arts. He went on to attain his Masters in Fine Arts and Playwriting from Yale. Salano then trained as an actor in Off Broadway and Regional Theater productions.

For the past 13 years, Solano has been writing his own plays as well as taking part in Playwright in Residence programs in universities all over the country. When asked if having a Latino background has influenced his writings, Solano said, "Definitely. It has been a very empowering feeling to be able to express my own viewpoints about multiculturalism and cultural identity in my own plays."

In addition to directing the students in his plays, *Speak Spanish for Me* and *Speaking the Language*, Solano will also be conducting a play writing workshop tomorrow, Tuesday, and next Friday from 4:30 to 6 p.m. in the Tustin Studio Theater.

He will also be giving a public lecture on one of his more recent projects involving himself, a professional theater company out in Los Angeles, Cornerstone Theater Company, and the Watts community of Los Angeles. The lecture will address the new play, which is an updated liberal version of Gaust, involving a man who sells his soul to the devil. Written by Salano and the community members of Watts, this new version sends a proactive social message that deals with violence and the attempt to cope in a tense multicultural setting. The lecture will take place on Tuesday at 7 p.m. in the Langone Center Cave.

When asked if he has seen any changes at the University since 1993 when he was last here, Solano responded, "I see more diversity in terms of the student population and the faculty body. I think Bucknell is moving closer to achieving more of a multicultural atmosphere by facing the tensions and difficulties."

A & E Calendar

FRIDAY, SEPTEMBER 6
BAC Comedians: "Scared, Little Weird Guys"
Midnight, Langone Center Bison
Twister
Rooke Chapel Lawn, 10 p.m. to 11:30 p.m.
Rain - Vaughan Literature Auditorium

SCIENCE AND TECHNOLOGY

Bucknell Bubble still clouded in soot

Power Plant still spews out smoke as plans for a new one are still in the making

BY JAMIE KRAUK
Bucknellian Staff Writer

Black soot pours daily from the smoke stack at the power plant. We have come to accept it as a part of daily life, but when will it's reign over us end?

When students left for the summer last year, we were under the impression that somehow the problem would not be there to smack us in the face upon our arrival in the fall. We now realize that is not the case. The black blanket on freshly polished cars that were ready for another Bucknell season reminds us of the nemesis that we thought we left behind.

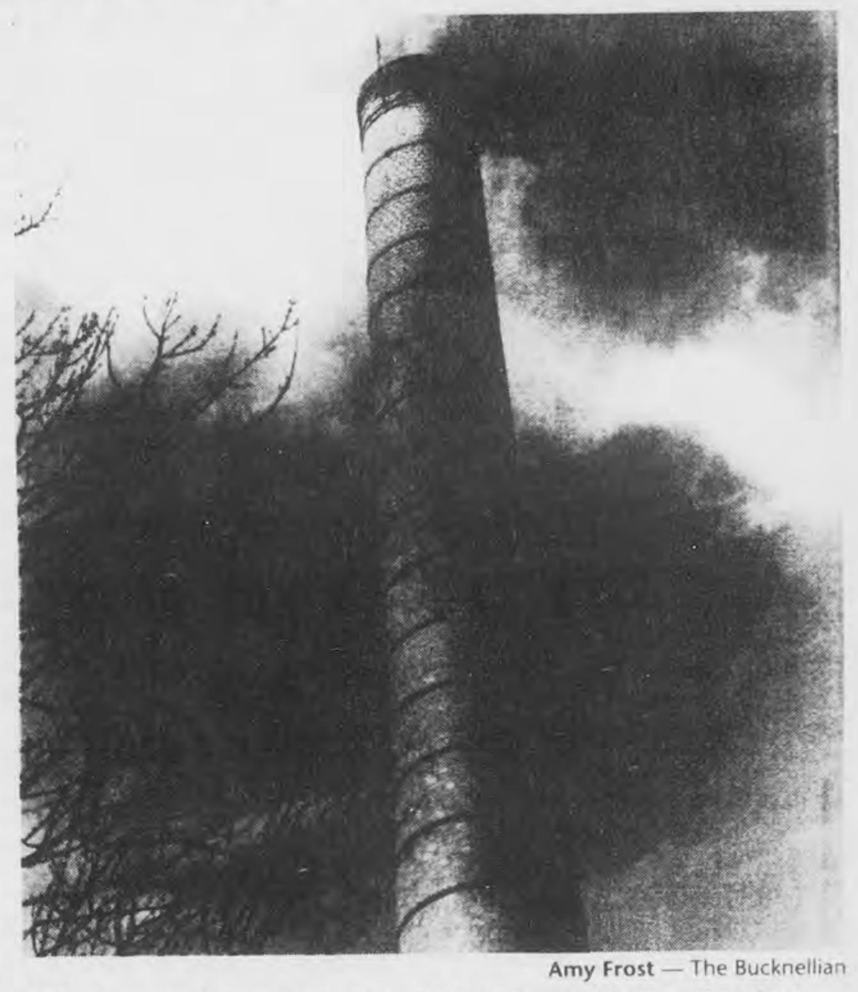
Physical Plant Director Dennis Hawley admits his personal frustration with the three bidders who expressed an interest in the job last spring, but he is sure that action concerning the soot will be taken soon. "Unfortunately, each of the bids came in at 25% over our budget, so we are still in the process of negotiating down the cost. Within the next three or four weeks, we should finalize a contract for action," Hawley said with slight hesitation in his voice. Once a bid is accepted, the contract must pass on to the Board of Trustees so that they can approve the proposed cost. That process will be take additional three or four weeks.

The question that keeps coming up is "Why is the problem seemingly worse than it has ever been?" Physical Plant offers an explanation. "The coal source that we use is a very old coal pile located on Smoketown Road across Route 15 near the golf course. We are trying to utilize the remainder of that supply in order to prepare for the natural gas system that is to come," Hawley stated. The problem arose when a pocket of faulty coal was reached. The glitch was not realized until the coal was placed over the burner. Over time, the coal had become too fine and would not burn as it should. When air passed over the coal to draw it into the flame, the fine coal was too light and was blown directly out of the smoke stack. Subsequently, the soot that everyone has experienced on their cars is fine coal that never even made it through the burner. That coal pocket is no longer being used. As of now, the problem is still at the same stage that it was last spring.

The question of what will eventually be done is still the most pressing question in the minds of students. Once the contract is processed, the projected time frame for completion is 24 months. So in two years and some odd weeks the problem of relentless soot should be just a memory. By that time, unfortunately only half of the student body will still be here to remember the way things once were. The students who enter Bucknell as the class of 2002 will arrive at a facility that has been totally rebuilt from the inside out.

The external structure will be the same, but as Dennis Hawley phrased it, "The inside will be gutted so that we can start from scratch. I don't want a single wire or pipe to be in there that isn't new." The entire system will be converted from coal (burning) to natural gas. The result: a cleaner environment for everyone involved and a lot more ease for the Physical Plant. "Coal is an effective fuel source, especially in Central Pennsylvania where that's what everyone uses, but it really just has no place in small plants. It should be used in very large facilities that are able to keep it burning clean and efficiently but it has no place in small, localized plants," reflected Hawley as he mused on the prospect of the new system that is to come.

The implications of the new power plant are widespread. The finalization of a contract brings with it an anticipation from the student body and a comfort in knowing that the project will be underway soon. A cleaner power supply means cleaner air and cleaner cars, as well as less work for groundskeepers and snow that stays white all winter without being bathed in black ash. The prospects are looking bright.



Amy Frost — The Bucknellian

With plans in the making to rebuild the Power Plant and replace the coal system with natural gas, the black soot particles streaming from the smoke stake will only be just a bad memory in about 2 years.

Health Service offers more than meets the eye, from counseling to free rides

BY TIM PARROTT
Bucknellian Staff Writer

After a year of seemingly resilient viruses, the Student Health Service has become almost exclusively recognized as an abundant source of amoxycilin and other wide reaching antibiotics. Unbeknownst to a majority of the campus, the Ziegler Health Center offers a wide variety of services to "provide the best health care possible," in accordance with their threefold mission statement.

It claims to, "1. Provide the best health care possible in a manner that is competent, current, compassionate, timely, and in an atmosphere of mutual responsibility; 2. Educate the university community in health-related areas in an attempt to insure that each member obtain and preserve his or her optimal level of physical, mental, and spiritual well-being; 3. Instill respect for the human organism and its position within the ecosystem." The main types of services the health center offers to University students are general medical services, gynecological services, drug and alcohol counseling, as well as free rides and information. These operations are administered throughout the semester by a group of six registered nurses, three practicing physicians, a nurse practitioner for gynecological services, and a drug and alcohol counselor.

According to Jane Haile, R.N., a part time nurse at the health center, the student health service can be compared to a miniature emergency room, equipped to deal with most patient's immediate needs. During the week the Student Health Service is staffed with two or three nurses from 8 a.m. to 8 p.m. and two physicians from 9 a.m. to 11:45 a.m. and 4 p.m. to 5:45 p.m. During the weekends the staff is reduced to one nurse on duty Saturday and Sunday from 9 a.m. to 5 p.m. and one physician on duty Saturday from 11 a.m. to 11:45 a.m. and Sunday from 12:00 p.m. to 12:45 p.m.

The health center is equipped during these hours to administer general physicals as well as allergy shots free of charge for students whose conditions necessitate regular doses of allergy medicine. In the case of an emergency, the health service is able to deal with any strained muscles, sprained limbs, deep lacerations, or heat exhaustion within the health center examination rooms.

In each case the nurse on duty would promptly deal with the patient's needs and administers a follow up program with each patient. Follow-up may include further treatment or a call to check on the student's health. The Ziegler Health Center also has the ability to prescribe some antibiotics for the students, while making them available at a small fee directly following the patient's visit. Although the health center is capable of delivering many of the necessary general health services on campus, when they are unable to deal with a patient's symptoms, they have the ability to refer patients to Lewisburg Evangelical Community Hospital, where the student can be treated with the proper equipment.

Although most students consider these medical services the extent of Ziegler Health Center's capabilities, this student service has more to offer. In a discreet section of the building, separate from the main portion of the health center, both gynecological and alcohol and drug counseling services are offered. These services, unlike the general medical services, are arranged by appointment rather than on a walk in basis. Rozalyn L. Yannaccone, C.R.N.P., the nurse practitioner for gynecological services, offers general physicals, pelvic exams and contraceptives to female students in a private, confidential setting. Appointments may be made for these gynecological services by calling x1332 at the Health Center.

Robert S. Thomas, M.A., is the coordinator of drug and alcohol programs in the Ziegler Health Center. Through this student service, he offers counseling for anyone who seeks relief from their addiction to either alcohol or drugs. His office is located on the second floor of the health center, where students can have private and confidential meetings with a counselor in a one-on-one setting. Drug and alcohol counseling can be made available for students by calling x1159. In addition to personal meetings, the Student Health Service also offers a wide selection of informational pamphlets concerning alcohol and drug abuse as well as contraception and gynecological wellness.

For students without cars on campus, or students who may be too ill to drive themselves to the health center or hospital, the Ziegler Health Center offers a free ride service 24 hours a day. It is supplied by four student drivers, who take turns on call. This service can be utilized by students by calling x1401 and providing the receptionist with some information concerning their condition. These free rides allow all students to have equal accessibility to health services on and off campus, regardless of their physical condition.

All questions and concerns regarding these services should be directed toward the Ziegler Health Center at x1401 between the hours of 8 a.m. and 8 p.m.

Bucknell reaches out to prospectives with a new Web site

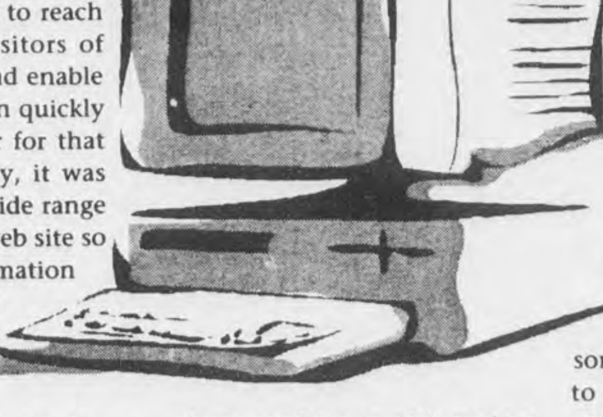
Site will provide Bucknell community members a common location for all resources

BY MATT CHRIST
Bucknellian Staff Writer

As students move back into the Bucknell community, many changes are taking place. Not only have students moved forward in their academic careers, but they have also moved into a new computer era. According to Sharon Poff from the Office of Public Relations, "There has been university-wide concern about Bucknell's presence on the World Wide Web."It has been the aim of the Campus Wide Information Systems (CWIS) Committee to reach out to students and visitors of Bucknell's home page and enable them to find information quickly and effectively. In order for that goal to become a reality, it was necessary to include a wide range of departments on the web site so that a vast array of information could be accessed by worldwide users of the internet. This task was accomplished by the CWIS during the spring and summer months.

Unique changes in the Bucknell web site appear in the Library's Departmental site, which provides substantial opportunities for the students. According to Roberta Sims, assistant to director of library and information services, "You can access library research materials from any computer terminal connected to the internet on campus."

There is a link that allows for guidance through the Internet using a program called The Library Wizard. When the library is not open for hours of operation, questions can still be answered using the Wizard, which can be accessed from any on-line site campus-wide.



Opportunities to visit various library web sites from around the globe are also available. This improvement allows information to be accessed that is not found in the Bertrand Library on campus. In addition to research information, the web provides a full schedule of the library's operating hours as well as historical background information about the library itself.

Still more new features of the new web site include easy access to information on Admissions, Administrative offices, Financial Aid, alumni, parents, and students. Students, faculty and staff may also locate information on student resources, events, news and publications, academic resources, and the campus directory.

Bucknell's Web site allows the student to learn information about the campus, locate their past and present class schedules and receive a direct link to web sites all over the country. The new Web Site continues to provide the Bucknell community with access to an array of informational resources and it remains committed to working with students, faculty and staff in learning, teaching, and research arenas. For the future, the library personnel expressed that their goal is to integrate all resources into a common location - a feat which has never been done before.

Many computer students are to be accredited for much of the work on the library's site. Several students who have devoted time to the modernization of Bucknell's World Wide Web site are Ben Dewey, Randy Faust, Kathleen McQuisten, and Pam Ross.

In order to further accentuate the developments on Bucknell's home page, there will be a visual tour of the various components of the system in the Cave on Monday, Sept. 9. This program will serve as an introduction to the new site and will provide the community with a glimpse at all that the new service has to offer.

Following the tour, there will be a "ribbon-cutting" ceremony performed by Daniel Little, Vice President of Academic Affairs, and Ann deKlerk, Co-chair of CWIS Committee, in honor of the new Bucknell Web Site. In addition to these advancements, the University continues to look for more ways that allow students, faculty, and visitors to see what the University has to offer and in the process, improve the success of integrating common resources into daily lives of all involved with the Bucknell community.

Coffee and culture combine at new Market Street joint

BY CATHY BARTCH
Bucknellian Staff Writer

The hot, sultry sun beats down on the rugged terrain as you sit and sip the thirst-quenching cappuccino. In the background, the echo of a Native American chant releases you from the confines of Bucknell's structure, and your mind, body and soul become replenished.

Doesn't this sound exhilarating? It would be the supreme solution to release stress during those midterm blues when piles of work reach escalating heights.

Although Lewisburg is not comprised of vast plains or cactus-filled dusty roads, it recently welcomed the arrival of a unique shop that blends rich gourmet coffee with the taste of Native American culture.

The Market Street store is named Maya, which derives from the Sanskrit meaning of illusion. Maya's sign reads: "nourishment for the mind, body, and soul."

The shop is a house transformed into a bookstore and coffee shop wrapped in a warm and cozy ambiance. In addition to these attributes, the store will offer sandwiches and soup, along with a cafe type setting outside. The owners also hope to attract local musicians and artists to showcase their talent.

Arriving from Pittsburgh in January, the owners decided to pursue their dream in Lewisburg, which seemed the perfect setting for such an original creation. Kerry Hoffman, her brother Craig Hoffman and his wife Sandy Bell combined traits from three different entrepreneurship to organize the business. Kerry Hoffman says it was the "business, restaurant, and psychology mind all wrapped up" in one.

Kerry Hoffman, the restaurant expert, and Bell, the vice-president of a business, left their practices to embark on this new project. Craig Hoffman, who is a psychotherapist, will continue his profession in addition to devoting time to the store.

The Native American theme of the store arose primarily out of Craig Hoffman's passion for the subject and history of the people. Kerry Hoffman claims that all three are fascinated with the culture, and they want to educate and offer an objective, alternative presentation of the Native American.

All of the Native American artwork on display has been made on reservations. In addition to information on Native Americans, customers will find books focused on various topics such as women, children, herbs, spirituality, and cooking.

Besides the basic coffees, which are reasonably priced, the store also offers foods that are primarily vegetarian. Also there are baked goods, soups, salads, and sandwiches.

Karin Davidson—The Bucknellian

Kerry Hoffman, right, and Sandra Bell, owners of the new coffeehouse and bookstore Maya, hope to educate their patrons with their Native American displays. Maya will be open from 10 a.m. to 6 p.m. Monday to Thursday and 10 a.m. to 9 p.m. on Friday.

Most importantly, Kerry Hoffman hopes that the shop sets the atmosphere for people to relax and enjoy the company of each other. "I want people to come in and feel comfortable to hang out."

Working rapidly and wholeheartedly, Kerry Hoffman believes that the tremendous effort and collaboration engendered a "heart and soul kind of project."

Before you savor the taste of that fifth cup of generic coffee to stimulate you for that all-nighter, walk over to Market Street and visit Maya. Treat yourself to a truly unique aroma, and cleanse your mind Native American style.

Students spend summer at Bucknell

BY CORRIE DRUMMOND
Bucknellian Staff Writer

Countless mini-reunions have been held across campus in the last few weeks. You know, "Hi! How *are* you?" We all try to catch up with people to whom we *should* have written over the summer, but invariably, the conversation reverts back to the old stand-by: "So, how was your summer?"

Most of us recount tales of working at home, counseling camp, internships, and/or obscene amounts of time spent at the shore. There is, however, a minority of students that spent their summer here in Lewisburg. Contrary to what one would guess, there is more summertime activity at Bucknell than taking classes.

Karen Rossetti '99 lived in Lewisburg the whole summer, with the exception of a few weekend trips to Philadelphia, Washington DC, New York, and Baltimore sponsored by the Office of Student Activities. Rossetti was the summer intern for the OSA, planning events for the upcoming year and working full time in the office. Though she enjoyed her job, she was quick to add that she wouldn't spend another summer in Lewisburg.

John Zanella '97 was here this summer doing biology research (DNA manipulation) under Mitchell Chernin, professor of biology. The campus was very quiet, but he said it wasn't altogether disagreeable. He also noted that the residents of Lewisburg were friendlier. While it was not the most exciting summer, he asserted that the research opportunity "was a unique experience and one I could foresee doing for the rest of my life."

Sean Sherrod '98 was one of 20 students who participated in the Institute for Leadership and Technology in Management (ITLM). Participants in the program were a combination of management and engineering students entering their junior year.

The purpose, as the name suggests, is to explore how management and technology relate to leadership in the future. Lectures were given by a variety of professors as well as guest speakers. The students were divided into groups to explore problems in manufacturing plants and determine possible solutions.

Sherrod enjoyed the program, in spite of the fact that it involved a lot of work. Not only were the students paid for their participation, but they will also be offered internships through the program next summer.

Of course, there *is* always the option of taking classes. Jon Slusser '97 came to the University in the fall of last year as a second semester sophomore. In order to graduate in the spring, he had to stay and take classes this summer. Slusser completed his Capstone requirement and also took an introductory German class. Being that the class sizes were very small, he noticed that professors were highly available and more than willing to help.

While most other students had a lot of spare time, he was kept fairly busy. Slusser had the opportunity to participate in an independent study under Christopher Zappe, professor of management, researching management decisions involving the space shuttle Challenger. On top of all that, he had an internship at the Williamsport Hospital and led a Bible study.

While many of us would not consider staying at Bucknell for the summer our top priority, most of the students agreed that the atmosphere was relaxed and they met new people.

Cook home meals in your own room

BY STEPHANIE L. KARDOHELY

In this trying time of schedule revision, locating new classrooms, and figuring out how to get a Snapple at the Bison, wouldn't it be nice to sit down to a meal of your choice, cooked exactly to suit your individual taste?

Unfortunately, cooking in dorm rooms can become a logistical nightmare. Simply getting to a grocery store may require delicate negotiations with friends and acquaintances, and when it's all said and done you come home bearing Ramen noodles and Lipton Cup-A-Soup because they can be made using only water.

To help add some variety to your menu, several students have shared recipes that can be easily made by those with only a refrigerator and microwave.

•For starters, try tasty quesadillas. All you need are two tortillas and a layer of cheese. Heat the tortillas and cheese, cut into manageable pieces, and serve with a side of beans (canned refried beans can be bought vegetarian style too!).

•Along the same line, burritos, soft tortillas filled with beans, cheese, and salsa, are a flavorful dish.

•Pizza bagels require only the spaghetti sauce of your choice or a fresh sliced tomato. Top with cheese. Sprinkle lightly with pepper and parmesan cheese for extra flavor.

•For a light sandwich, place tomato slices between two slices of bread spread with Dijon mustard or Dijonnaise.

•If you're in the mood for a salad, they can be bought prepackaged in several varieties. Also available in the produce section of the grocery store are precut carrots.

CAKE
DORITOS
©Olsen 96

•Another delicious meal is a baked potato. Microwave for 7-10 minutes and top with butter, cheese, or salsa.

•Perennial favorites are always macaroni and cheese and spaghetti. Spaghetti noodles can be cooked in the microwave. If you have only a small cooking container, try breaking the noodles into smaller pieces so they can be covered by boiling water.

•Microwave Minute Rice (brown or white) and season with a packet of Lipton Cup-A-Soup. The rice tends to boil over easily, so cover the rice with water. Monitor frequently while it cooks.

•If you're searching for healthy snacks look no further than the freezer! Frozen banana pieces (peel before freezing) and frozen grapes are both excellent choices.

•Rice cakes or Graham crackers smothered with peanut butter and honey go well with any study break!

•Place Spoon-Size Shredded Wheat in a container and shake with powdered sugar and cinnamon—easy to store for future snacking.

•As an alternative to coffee, tea, or hot chocolate, heat apple juice to boiling—great for cold weather!

•Lipton Brew Powder comes highly recommended as an iced tea mix.

•Also, for less sugar, try Celestial Seasonings Herbal Iced Tea. It comes in convenient bags that brew right in your own refrigerator—no sunlight required!

These are just a few of the many food possibilities available to students with limited cooking resources. So enjoy these recipes and be creative in concocting your own delicious combinations!

Bison capture '95-'96 Presidents' Cup

Strong athletic performance on the field gives University fourth cup in past six years

BY E.J. CRAWFORD
Bucknellian Staff Writer

Bucknell captured its fourth Presidents' Cup trophy in the past six years for the 1995-1996 season. The award is given to the school with the strongest showing for all athletic teams over the 1995-1996 school year. Bucknell racked up 96.5 points, to narrowly edge the United States Military Academy, which had won the award the past two years.

The point system works as such: if all seven Patriot League schools compete in a given sport, the winner of the Patriot League, in that given sport, receives seven points, with six points to the runner-up, five to third place, etc. If two teams tie for a spot, say second, then they would both receive five and a half points.

Although Bucknell claimed only two overall championships, lacrosse and baseball, during the 1995-1996 athletic season, the Bison placed near the top consistently, which was enough to push them past Army.

Broken down into men's and women's athletics, the Bison men finished second with 49.5 points, trailing only behind Army, the winner of the men's trophy for the last four years. The men were boosted by runner-up finishes in football, cross-country, and track and field, while the undefeated lacrosse team, and the baseball team, which earned a trip to the NCAA Championships, both took home the titles in the conference.

Although the men fell to Army in a close race for the men's trophy, the women edged Colgate with 47 points to earn the women's trophy. Although the women did not take home any titles, they did place second in field hockey, volleyball, soccer, and track and field, which earned them the necessary points to push past Colgate and take the Presidents' Cup title. The women's trophy was their second in a row, and their fourth overall.

Football sets sights on elusive crown

BY BRETT TOMLINSON
Bucknellian Staff Writer

Despite a 7-4 record and only one league loss, Bucknell's football team finished their 1995 campaign without the elusive Patriot League title. This year, the Bison return with a strong core of starters, including the entire offensive backfield, in their quest for their first championship in their 11th season of Patriot League play.

Head coach Tom Gadd, who took the helm last season after 20 years as a defensive coordinator at various Division I schools, made his mark immediately with a defense that ranked 16th nationally in yards allowed. However, the defensive lineup has changed greatly due to graduation.

The most significant loss for the Bison was All-American defensive end Ed Burman '96, who shattered the school record with 14.5 sacks last season. The defensive line also suffered heavy losses at noseguard, where two seniors split time last season.

Reloaded with a fresh group of juniors, the line will look to defensive end Hunter Adams '98 for leadership and big plays. Adams earned second-team All-Patriot League honors while starting 11 games as a sophomore and has the size (6' 5", 270 lbs.) to be a dominant player. Outside linebacker Brandon Little '97 will also be a leader for the defense.

In the defensive backfield, the Bison return four key contributors from the pass defense which ranked 13th in Division I-AA last year. Seniors Jack Boyle and Willie Jackson will look to lead the pass coverage at strong safety and cornerback, respectively.

Much like the defense, the Bison offense will need to adjust to losses with new personnel, mainly on the line. The offensive line will have fresh faces at center and both guard positions, while returning starters Patrik Jonsson '99 and Mariusz Misiec '98 will anchor the tackle positions.

Last year, quarterback Jim Fox '97 emerged as one of the top signal-callers in the league, taking some of the offensive pressure off superstar tailback Rich Lemon '97, who rushed for over 100 yards in seven games en route to his third 1,000 yard season.

After a mediocre start, Fox developed precise control of the offense, throwing just one interception in the final five games. His main challenge this year will be adjusting to a new receiver corps. A trio of sophomores is listed at the top of the depth chart for the wide receiver positions, and the top returning receiver is the reliable and always dangerous Lemon, who caught 35 passes last season.

Lemon is unquestionably the showpiece of the Bucknell squad. At 5' 8" and 160 pounds, the diminutive tailback is the Barry Sanders of the Patriot League. His quickness and ability to find holes makes him an All-American candidate and a terror for opposing defenses. With the school rushing record already well behind him, Lemon looks to break onto the national scene this year. A 1,000 yard rushing season this year would be his fourth, an unprecedented feat in Division I-AA. He needs 890 yards to become the Patriot League's leading rusher, 1,056 yards to break the 5,000 yard plateau, and 1,389 yards for the all-time rushing record in NCAA Division I-AA. The statistics speak volumes for what Lemon has accomplished and what he means to the Bison. He was held below 100 yards only four times last year, and Bucknell lost three of those contests. Fortunately, Patriot League opponents still have not found a flaw in Lemon's armor. The last time a league opponent held him below the century mark was in his freshman year.

A pre-season poll of Patriot League coaches predicted the Bison to finish second, closely behind defending champion Lehigh. The Bucknell-Lehigh game proved crucial last year when the Engineers used a fourth quarter rally to edge the Bison en route to an undefeated league mark. This year's rematch is slated for November 2. Bucknell opens the season at home on September 14 against Towson State.

Water Polo looks to improve ranking

Men's squad stuggles to make up for graduates and move back into the top 20

BY ERICA FRIEDLANDER
Bucknellian Staff Writer

After graduating eight seniors, including All-American Tim Nesvig, Water Polo coach Mike Wooster was worried that this year's Bison might not be able to live up to last year's 10-15 record, when they finished the season ranked 21st in the country. "Due to the large graduating class, conditioning would make or break this team," Wooster said. With a terrific but difficult pre-season training camp, the men's team may be more solid than anticipated.

"We've got a young team this year," junior co-captain Jeremy Kish said, "so other teams may not think that our team will work too well together. This will be beneficial to us because we can come out and give them something totally unexpected."

The club includes first year students Josh Watts, Mike Knudtsen, Alex Bozic, Gil Olvera, and Matt Halk, all of whom will be making their debuts this season. These new players are experienced however, as each has played for several years on their hometown teams.

> *"We've got a young team this year, so other teams may not think that our team will work too well together. This will be beneficial to us because we can come out and give them something totally unexpected."*
> *—Jeremy Kish '98, co-captain*

The water polo team does not consist of all new members. Leading this year's returns are captains Jeremy Kish '98 and Alex Lunding '98, both of whom have years of polo experience.

In addition to the captains, the Bison returning goalies include Zach Blixt '99 and Elo Comfort '98, who both have been excellent players in past seasons. Other returning contributors from last year's squad include Bill Wheeler '99, Matt Lutz '99, Antonio Lannes '98, Brad Wolfe '98, Scott Broderick '99, Dan Stephenson '98, Joe Courtney '99, and Jay O'Neil '97.

O'Neil, the only senior on this year's squad said "We want to make this season a lot less streaky than last season when we started off 0-6, then went 6-0, and then fell apart at the end of the season. It would be great to see the team hold together the entire season."

Coach Wooster also feels that the team has potential, "We definitely have the talent to win big games. Whether or not we have the ability to play four full quarters in a 30 meter pool is yet to be seen," he said.

"We've got our first tournament this weekend at Navy," Lunding said, "and we're hoping to play tough and succeed. This will be a great season if we all play our hardest."

The Bison squad kick off their season at the Navy Invitational this weekend, with their first and only home tournament coming on the weekend of September 28th.

Flash in the Pan

Tiger Turns Pro: Tiger Woods, the three-time defending National Amateur champion, turned professional this past week. Woods, a junior at Stanford, has played in numerous professional tournaments, but has never finished higher than a tie for 22nd at this year's British Open. His first tournament was last week's Greater Hartford Open, in which he started with a round of four under, but faded back to a tie for 60th.

Attack of the Teens: This year's U.S. Open featured two young stars on the women's side. Anna Kournikova, a Russian teen who just turned 15, upset 14th seeded Barbara Paulus, and advanced to the fourth round of only her second professional tournament, where she eventually fell to top seeded Steffi Graf. Kournikova was joined in the fourth round by another 15 year-old, Martina Hingis, who recently moved into the top 16 in the world, and upset third seeded Arantxa Sanchez-Vicario to move into a quarterfinal date with Jana Novotna.

Injuries Plague NFL: In the first week of the NFL season, two of the NFL's biggest stars fell to injury, and one of them will miss the remainder of the season. The Pittsburgh Steelers, in an ironic twist of fate, lost star linebacker Greg Lloyd for the season with a knee injury, just as last year they lost their star defensive back Rod Woodson, in a similar fashion. The news is better for Cowboy fans, although they appeared to be in bad shape after Emmitt Smith lay on the Soldier Field turf for over ten minutes after crashing to the turf on a fake dive. Smith was taken off the field on a stretcher, and is listed as doubtful for next week's game against the Giants.

World Cup News: In hockey's world cup, the USA pulled off surprisingly easy upsets of both Canada and Russia to ensure a semifinal encounter against the winner of the Finland/Russia quarterfinal matchup. This is the most success an American hockey team has had since the "miracle on ice" gold medal performance at Lake Placid in the 1980 Olympics.

Cone Returns: Cy Young award winner and Yankee staff ace returned this past week, and pitched seven innings of no-hit ball against the Oakland A's, before giving way to Mariano Rivera, who lost the no-hit bid on a controversial infield single in the ninth inning.

Home Run Record Threatened: Gary Sheffield and Todd Hundley are each one homer away from becoming the 8th and 9th players to hit 40 home runs in the major leagues this season. This would break the record set in 1961, the year Roger Maris made his amazing charge into the record books with 61 home runs in a season. In addition, Hundley needs only one more home run to break Roy Campanella's record for home runs in a season by a catcher.

Division I College Football Top 10

1. Nebraska (0-0)
2. Tennessee (1-0)
3. Florida State (0-0)
4. Florida (1-0)
5. Colorado (1-0)
6. Notre Dame (0-0)
7. Penn State (1-0)
8. Texas (1-0)
9. Syracuse (0-0)
10. Ohio State (0-0)

Coffee and culture combine at new Market Street joint

BY CATHY BARTCH
Bucknellian Staff Writer

The hot, sultry sun beats down on the rugged terrain as you sit and sip the thirst-quenching cappuccino. In the background, the echo of a Native American chant releases you from the confines of Bucknell's structure, and your mind, body and soul become replenished.

Doesn't this sound exhilarating? It would be the supreme solution to release stress during those midterm blues when piles of work reach escalating heights.

Although Lewisburg is not comprised of vast plains or cactus-filled dusty roads, it recently welcomed the arrival of a unique shop that blends rich gourmet coffee with the taste of Native American culture.

The Market Street store is named Maya, which derives from the Sanskrit meaning of illusion. Maya's sign reads: "nourishment for the mind, body, and soul."

The shop is a house transformed into a bookstore and coffee shop wrapped in a warm and cozy ambiance. In addition to these attributes, the store will offer sandwiches and soup, along with a cafe type setting outside. The owners also hope to attract local musicians and artists to showcase their talent.

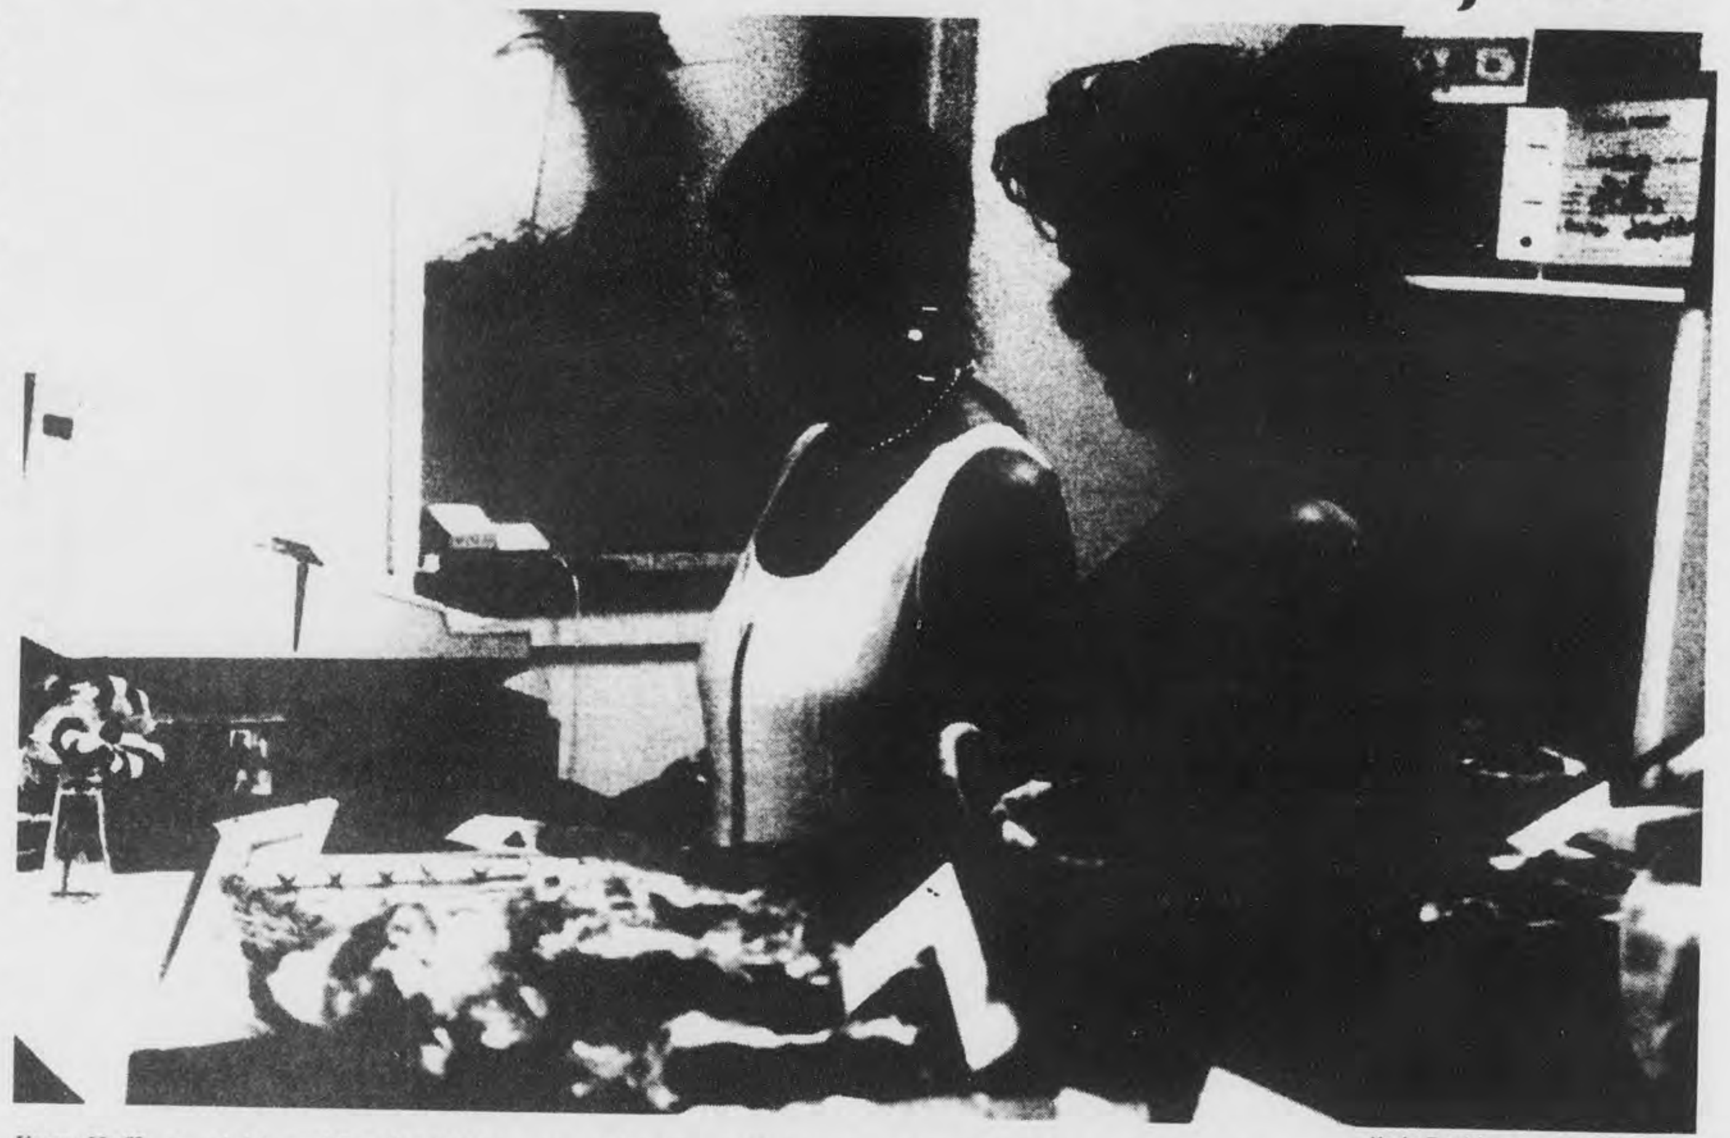
Arriving from Pittsburgh in January, the owners decided to pursue their dream in Lewisburg, which seemed the perfect setting for such an original creation. Kerry Hoffman, her brother Craig Hoffman and his wife Sandy Bell combined traits from three different entrepreneurship to organize the business. Kerry Hoffman says it was the "business, restaurant, and psychology mind all wrapped up" in one.

Kerry Hoffman, the restaurant expert, and Bell, the vice-president of a business, left their practices to embark on this new project. Craig Hoffman, who is a psychotherapist, will continue his profession in addition to devoting time to the store.

The Native American theme of the store arose primarily out of Craig Hoffman's passion for the subject and history of the people. Kerry Hoffman claims that all three are fascinated with the culture, and they want to educate and offer an objective, alternative presentation of the Native American.

All of the Native American artwork on display has been made on reservations. In addition to information on Native Americans, customers will find books focused on various topics such as women, children, herbs, spirituality, and cooking.

Besides the basic coffees, which are reasonably priced, the store also offers foods that are primarily vegetarian. Also there are baked goods, soups, salads, and sandwiches.



Karin Davidson—The Bucknellian

Kerry Hoffman, right, and Sandra Bell, owners of the new coffeehouse and bookstore Maya, hope to educate their patrons with their Native American displays. Maya will be open from 10 a.m. to 6 p.m. Monday to Thursday and 10 a.m. to 9 p.m. on Friday.

Most importantly, Kerry Hoffman hopes that the shop sets the atmosphere for people to relax and enjoy the company of each other. "I want people to come in and feel comfortable to hang out."

Working rapidly and wholeheartedly, Kerry Hoffman believes that the tremendous effort and collaboration engendered a "heart and soul kind of project."

Before you savor the taste of that fifth cup of generic coffee to stimulate you for that all-nighter, walk over to Market Street and visit Maya. Treat yourself to a truly unique aroma, and cleanse your mind Native American style.

Students spend summer at Bucknell

BY CORRIE DRUMMOND
Bucknellian Staff Writer

This year, the Bison return with a strong core of starters, including the entire offensive backfield, in their quest for their first championship in their 11th season of Patriot League play.

Head coach Tom Gadd, who took the helm last season after 20 years as a defensive coordinator at various Division I schools; made his mark immediately with a defense that ranked 16th nationally in yards allowed. However, the defensive lineup has changed greatly due to graduation.

The most significant loss for the Bison was All-American defensive end Ed Burman '96, who shattered the school record with 14.5 sacks last season. The defensive line also suffered heavy losses at noseguard, where two seniors split time last season.

Reloaded with a fresh group of juniors, the line will look to defensive end Hunter Adams '98 for leadership and big plays. Adams earned second-team All-Patriot League honors while starting 11 games as a sophomore and has the size (6' 5", 270 lbs.) to be a dominant player. Outside linebacker Brandon Little '97 will also be a leader for the defense.

In the defensive backfield, the Bison return four key contributors from the pass defense which ranked 13th in Division I-AA last year. Seniors Jack Boyle and Willie Jackson will look to lead the pass coverage at strong safety and cornerback, respectively.

Much like the defense, the Bison offense will need to adjust to losses with new personnel, mainly on the line. The offensive line will have fresh faces at center and both guard positions, while returning starters Patrik Jonsson '99 and Mariusz Misiec '98 will anchor the tackle positions.

Last year, quarterback Jim Fox '97 emerged as one of the top signal-callers in the league, taking some of the offensive pressure off superstar tailback Rich Lemon '97, who rushed for over 100 yards in seven games en route to his third 1,000 yard season.

After a mediocre start, Fox developed precise control of the offense, throwing just one interception in the final five games. His main challenge this year will be adjusting to a new receiver corps. A trio of sophomores is listed at the top of the depth chart for the wide receiver positions, and the top returning receiver is the reliable and always dangerous Lemon, who caught 35 passes last season.

Lemon is unquestionably the showpiece of the Bucknell squad. At 5' 8" and 160 pounds, the diminutive tailback is the Barry Sanders of the Patriot League. His quickness and ability to find holes makes him an All-American candidate and a terror for opposing defenses. With the school rushing record already well behind him, Lemon looks to break onto the national scene this year. A 1,000 yard rushing season this year would be his fourth, an unprecedented feat in Division I-AA. He needs 890 yards to become the Patriot League's leading rusher, 1,056 yards to break the 5,000 yard plateau, and 1,389 yards for the all-time rushing record in NCAA Division I-AA. The statistics speak volumes for what Lemon has accomplished and what he means to the Bison. He was held below 100 yards only four times last year, and Bucknell lost three of those contests. Fortunately, Patriot League opponents still have not found a flaw in Lemon's armor. The last time a league opponent held him below the century mark was in his freshman year.

A pre-season poll of Patriot League coaches predicted the Bison to finish second, closely behind defending champion Lehigh. The Bucknell-Lehigh game proved crucial last year when the Engineers used a fourth quarter rally to edge the Bison en route to an undefeated league mark. This year's rematch is slated for November 2. Bucknell opens the season at home on September 14 against Towson State.

Water Polo looks to improve ranking

Men's squad stuggles to make up for graduates and move back into the top 20

BY ERICA FRIEDLANDER
Bucknellian Staff Writer

After graduating eight seniors, including All-American Tim Nesvig, Water Polo coach Mike Wooster was worried that this year's Bison might not be able to live up to last year's 10-15 record, when they finished the season ranked 21st in the country. "Due to the large graduating class, conditioning would make or break this team," Wooster said. With a terrific but difficult pre-season training camp, the men's team may be more solid than anticipated.

"We've got a young team this year," junior co-captain Jeremy Kish said, "so other teams may not think that our team will work too well together. This will be beneficial to us because we can come out and give them something totally unexpected."

The club includes first year students Josh Watts , Mike Knudtsen, Alex Bozic, Gil Olvera, and Matt Halk, all of whom will be making their debuts this season. These new players are experienced however, as each has played for several years on their hometown teams.

> ***"We've got a young team this year, so other teams may not think that our team will work too well together. This will be beneficial to us because we can come out and give them something totally unexpected."***
> *—Jeremy Kish '98, co-captain*

The water polo team does not consist of all new members . Leading this year's returns are captains Jeremy Kish '98 and Alex Lunding '98, both of whom have years of polo experience.

In addition to the captains, the Bison returning goalies include Zach Blixt '99 and Elo Comfort '98, who both have been excellent players in past seasons. Other returning contributors from last year's squad include Bill Wheeler '99, Matt Lutz '99, Antonio Lannes '98, Brad Wolfe '98, Scott Broderick '99, Dan Stephenson '98, Joe Courtney '99, and Jay O'Neil '97.

O'Neil, the only senior on this year's squad said "We want to make this season a lot less streaky than last season when we started off 0-6, then went 6-0, and then fell apart at the end of the season. It would be great to see the team hold together the entire season."

Coach Wooster also feels that the team has potential, "We definitely have the talent to win big games. Whether or not we have the ability to play four full quarters in a 30 meter pool is yet to be seen," he said.

"We've got our first tournament this weekend at Navy," Lunding said, "and we're hoping to play tough and succeed. This will be a great season if we all play our hardest."

The Bison squad kick off their season at the Navy Invitational this weekend, with their first and only home tournament coming on the weekend of September 28th.

Flash in the Pan

Tiger Turns Pro: Tiger Woods, the three-time defending National Amateur champion, turned professional this past week. Woods, a junior at Stanford, has played in numerous professional tournaments, but has never finished higher than a tie for 22nd at this year's British Open. His first tournament was last week's Greater Hartford Open, in which he started with a round of four under, but faded back to a tie for 60th.

Attack of the Teens: This year's U.S. Open featured two young stars on the women's side. Anna Kournikova, a Russian teen who just turned 15, upset 14th seeded Barbara Paulus, and advanced to the fourth round of only her second professional tournament, where she eventually fell to top seeded Steffi Graf. Kournikova was joined in the fourth round by another 15 year-old, Martina Hingis, who recently moved into the top 16 in the world, and upset third seeded Arantxa Sanchez-Vicario to move into a quarterfinal date with Jana Novotna.

Injuries Plague NFL: In the first week of the NFL season, two of the NFL's biggest stars fell to injury, and one of them will miss the remainder of the season. The Pittsburgh Steelers, in an ironic twist of fate, lost star linebacker Greg Lloyd for the season with a knee injury, just as last year they lost their star defensive back Rod Woodson, in a similar fashion. The news is better for Cowboy fans, although they appeared to be in bad shape after Emmitt Smith lay on the Soldier Field turf for over ten minutes after crashing to the turf on a fake dive. Smith was taken off the field on a stretcher, and is listed as doubtful for next week's game against the Giants.

World Cup News: In hockey's world cup, the USA pulled off surprisingly easy upsets of both Canada and Russia to ensure a semifinal encounter against the winner of the Finland/Russia quarterfinal matchup. This is the most success an American hockey team has had since the "miracle on ice" gold medal performance at Lake Placid in the 1980 Olympics.

Cone Returns: Cy Young award winner and Yankee staff ace returned this past week, and pitched seven innings of no-hit ball against the Oakland A's, before giving way to Mariano Rivera, who lost the no-hit bid on a controversial infield single in the ninth inning.

Home Run Record Threatened: Gary Sheffield and Todd Hundley are each one homer away from becoming the 8th and 9th players to hit 40 home runs in the major leagues this season. This would break the record set in 1961, the year Roger Maris made his amazing charge into the record books with 61 home runs in a season. In addition, Hundley needs only one more home run to break Roy Campanella's record for home runs in a season by a catcher.

Division I College Football Top 10

1. Nebraska (0-0)
2. Tennessee (1-0)
3. Florida State (0-0)
4. Florida (1-0)
5. Colorado (1-0)
6. Notre Dame (0-0)
7. Penn State (1-0)
8. Texas (1-0)
9. Syracuse (0-0)
10. Ohio State (0-0)

Soccer hopes to kick into form

By E.J. Crawford
Bucknellian Staff Writer

Men's Soccer Preview

Bucknell men's soccer returns an extremely young team for the 1996 season, as it looks to top last year's 6-10-1 overall record. This may prove to be a difficult task, particularly with a team of only two seniors. However, despite losing three starters, including versatile star Tom Roller, to graduation Coach Reynolds seems excited about "returning a solid nucleus from last year." That includes a large number of sophomores and juniors who gained valuable experience from last year, in addition to a solid recruiting class.

Leading this year's Bison squad are captains Doug Sweet '97 and Wright Ramsey '98. Sweet is third among returning players in scoring with seven points, while playing both back and midfield, and Wright tallied 12 points to place second on the team among the returnees. Rounding out the offensive firepower from last year's team is Kevin McClure, who led the returnees with fourteen total points, and tied for the overall team lead last season with six assists.

As for the defense, the Bison return junior Brendon Whitworth and sophomore Ryan Cummings from last season's strong defensive squad. To bolster the defense, the Bison also return senior goalkeeper Corey Harbold, who has started 33 of Bucknell's last 34 games, and will be the major force in the net this year, after splitting time with Ken Prothero last year.

Coach Reynolds said about this year's team, "we've improved in areas which were weak last year, and there is a big improvement in experience, confidence, and depth." However, he tempered his enthusiasm by noting that "we lack a go-to guy up front," and are relying on a group effort to score goals for this season.

The men's soccer team has a pair of home games upcoming against Manhattan and St. Peter's.

Volleyball opens with mixed results

Bucknell starts the season at 2-2

By Jacob Lipman
Bucknellian Staff Writer

Bucknell's women's volleyball team is coming off their best season in recent years. The Bison set a school record for wins in a season by going 26-7 overall, shattering the previous record of 22 victories.

The team also won all six regular season games against Patriot League foes, to capture their first ever regular season Patriot League title. They also reached the Patriot League tournament finals for the first time in team history, but unfortunately fell to Colgate in four games.

This season, the Bison look to defend that regular season title successfully, but more importantly, emerge as the winners of the Patriot League Tournament. It won't be an easy task though. The Bison lost four-time All-Patriot League first team selection Katie Steele, and co-captain Brenda Hayduk to graduation. However the team does return five starters including Melissa Wharton '98 and Susie Teitsworth '97.

Wharton led the Patriot League in attack percentage and block average while Teitsworth had the top ace average and dig average. Both players were also among the NCAA Division I top 10 players in each of these statistical categories.

The Bison embarked on the new season this past weekend at the Hartford tournament. The team won two of four matches.

In the first match, Bucknell fell to a tough Rutgers squad, 15-7, 3-15, 7-15, 11-15. Wharton had an excellent match, leading the team with 12 kills. Also playing well were Allison Morris '97 and Teitsworth, who had 16 and 15 digs respectively.

The Bison regrouped from the loss to Rutgers earlier in the day and defeated the host Hartford, 17-15, 15-5, 10-15, 15-4. Wharton continued to shine for the Bison, recording 21 kills.

Cameron Adams '99 had a great offensive performance as well, notching 12 kills. Teitsworth was impressive as usual with 13 kills and 17 digs and Morris had another 16 digs.

Day two of the tournament saw the Bison pick up where they left off the day before, when they crushed Delaware St., 15-4, 15-2, 15-7. Wharton and Tristen Voget '99 led the team with 14 and 8 kills respectively.

In the final match of the tournament, Bucknell lost an extremely close contest to Fordham, 15-7, 11-15, 12-15, 15-13, 13-15. Wharton racked up 25 more kills and Heather Rendle '97 added 14 kills. Teitsworth had 13 kills and a team-high 26 digs, while Morris finished with 20 digs.

Though Bucknell had a case of early season jitters and lost to Fordham, a team they probably should have beaten, the Bison had a good opening weekend.

"I'm really pleased with our offensive production this weekend," said coach Cindy Opalski. Wharton, the big gun of the Bison offensive attack, garnered All-Tournament team honors by tallying 72 kills over the four matches.

Bucknell traveled to Delaware to face the Fighting Blue Hens this Wednesday evening but results were not available at press time. This Saturday, the Bison will play in their home-opener in Davis Gym. They will face St.Francis (NY) and St.Francis (PA).

Women lose heartbreaker to Towson State

Despite loss, Bucknell soccer hopeful to repeat last season's undefeated conference record

By Eric Keber
Bucnellian Staff Writer

The Bucknell women's soccer team opened up their season with a game against Towson State on August 31. The 7 p.m. game, which ended in a 2-1 loss for the Bison(0-1), was the first meeting ever between the two teams.

Towson State's Kari Colsey scored first with only 8:37 into the game, but with 8:23 left in the first half junior forward Liz Woodrow, who earned first-team All-Patriot League honors last year, scored for the Bison to tie the game at 1-1.

The game went scoreless from then until Towson State's Christie Landi scored with only 2:29 remaining to put the Tigers ahead for good.

"Overall we didn't look that bad," noted Coach Toby Lovecchio, "It was a good game and Towson State was physical and had good speed."

Lovecchio played 18 different players and had five first year studets playing 50 percent of the game.

Senior goalkeeper and tri-captain Becky Snover played the whole game and recorded seven saves. Midfielder Katie Senderowitz '00 assisted Woodrow on her goal.

The Bison under Lovecchio, went 10-6-1 last year but were undefeated in Patriot League competition with a 6-0 record.

"This year will be harder because other teams didn't expect us to do as well as we did last year," stated Lovecchio. "Our success will depend on the commitment level of the team."

The Bison only lost three starting players and with 11 returning varsity membersthey are not lacking in experience.

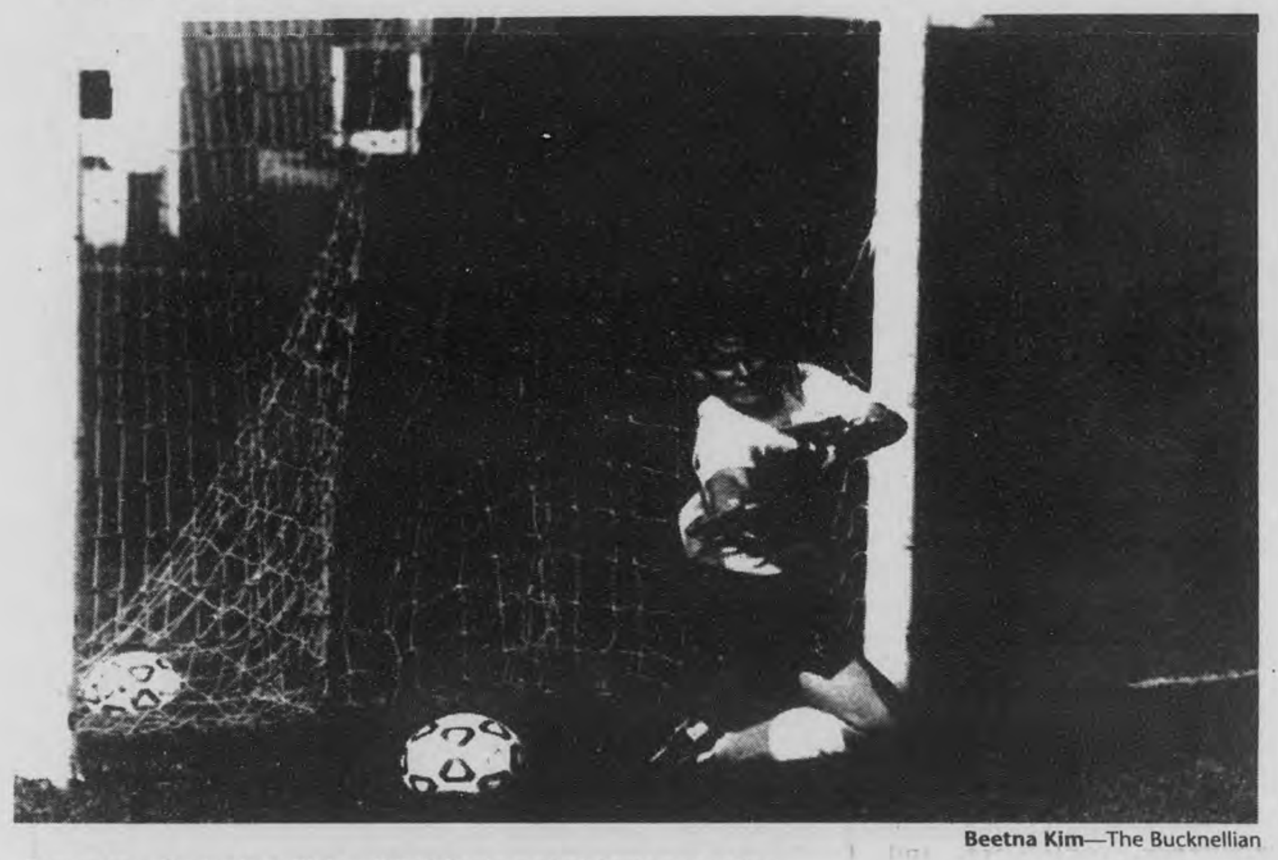
Tri-captain Karen Spall, who made second-team All-Patriot League last year, will miss the entire season due to torn ligaments in her leg.

"Anytime you lose an All-League player and a starter, you lose a person with experience and maturity," remarked Lovecchio, "When you lose someone like that and you feel it. It's a big loss."

Senior captains Amy Green and Snover, and fellow senior Heather Andrews will provide the leadership that such a young team needs.

"As a group they all worked really hard," adds Lovecchio about the Towson State game," But we need to improve in a number of areas to reach our goals."

The Bison will work on conditioning and limiting mental mistakes in preparation for their game against St. Francis at home on Saturday.



Beetna Kim—The Bucknellian
Reserve goalie Andrea Fisher '00 deflects a shot during practice.

Beetna Kim—The Bucknellian
Kathryn Senderwitz '00 and Sarah Stopper '00 fight for control of the ball during practice. The Bison return 11 players from last year's squad which went undefeated in the conference last season, before dropping the Patriot League Championship final.

Soccer hopes to kick into form

By E.J. Crawford

Bucknellian Staff Writer

Bucknell men's soccer returns an extremely young team for the 1996 season, as it looks to top last year's 6-10-1 overall record. This may prove to be a difficult task, particularly with a team of only two seniors. However, despite losing three starters, including versatile star Tom Roller, to graduation Coach Reynolds seems excited about "returning a solid nucleus from last year." That includes a large number of sophomores and juniors who gained valuable experience from last year, in addition to a solid recruiting class.

Men's Soccer Preview

Leading this year's Bison squad are captains Doug Sweet '97 and Wright Ramsey '98. Sweet is third among returning players in scoring with seven points, while playing both back and midfield, and Wright tallied 12 points to place second on the team among the returnees. Rounding out the offensive firepower from last year's team is Kevin McClure, who led the returnees with fourteen total points, and tied for the overall team lead last season with six assists.

As for the defense, the Bison return junior Brendon Whitworth and sophomore Ryan Cummings from last season's strong defensive squad. To bolster the defense, the Bison also return senior goalkeeper Corey Harbold, who has started 33 of Bucknell's last 34 games, and will be the major force in the net this year, after splitting time with Ken Prothero last year.

Coach Reynolds said about this year's team, "we've improved in areas which were weak last year, and there is a big improvement in experience, confidence, and depth." However, he tempered his enthusiasm by noting that "we lack a go-to guy up front," and are relying on a group effort to score goals for this season.

The men's soccer team has a pair of home games upcoming against Manhattan and St. Peter's.

Volleyball opens with mixed results

Bucknell starts the season at 2-2

By Jacob Lipman

Bucknellian Staff Writer

Bucknell's women's volleyball team is coming off their best season in recent years. The Bison set a school record for wins in a season by going 26-7 overall, shattering the previous record of 22 victories.

The team also won all six regular season games against Patriot League foes, to capture their first ever regular season Patriot League title. They also reached the Patriot League tournament finals for the first time in team history, but unfortunately fell to Colgate in four games.

This season, the Bison look to defend that regular season title successfully, but more importantly, emerge as the winners of the Patriot League Tournament. It won't be an easy task though. The Bison lost four-time All-Patriot League first team selection Katie Steele, and co-captain Brenda Hayduk to graduation. However the team does return five starters including Melissa Wharton '98 and Susie Teitsworth '97.

Wharton led the Patriot League in attack percentage and block average while Teitsworth had the top ace average and dig average. Both players were also among the NCAA Division I top 10 players in each of these statistical categories.

The Bison embarked on the new season this past weekend at the Hartford tournament. The team won two of four matches.

In the first match, Bucknell fell to a tough Rutgers squad, 15-7, 3-15, 7-15, 11-15. Wharton had an excellent match, leading the team with 12 kills. Also playing well were Allison Morris '97 and Teitsworth, who had 16 and 15 digs respectively.

The Bison regrouped from the loss to Rutgers earlier in the day and defeated the host Hartford, 17-15, 15-5, 10-15, 15-4. Wharton continued to shine for the Bison, recording 21 kills.

Cameron Adams '99 had a great offensive performance as well, notching 12 kills. Teitsworth was impressive as usual with 13 kills and 17 digs and Morris had another 16 digs.

Day two of the tournament saw the Bison pick up where they left off the day before, when they crushed Delaware St., 15-4, 15-2, 15-7. Wharton and Tristen Voget '99 led the team with 14 and 8 kills respectively.

In the final match of the tournament, Bucknell lost an extremely close contest to Fordham, 15-7, 11-15, 12-15, 15-13, 13-15. Wharton racked up 25 more kills and Heather Rendle '97 added 14 kills. Teitsworth had 13 kills and a team-high 26 digs, while Morris finished with 20 digs.

Though Bucknell had a case of early season jitters and lost to Fordham, a team they probably should have beaten, the Bison had a good opening weekend.

"I'm really pleased with our offensive production this weekend," said coach Cindy Opalski. Wharton, the big gun of the Bison offensive attack, garnered All-Tournament team honors by tallying 72 kills over the four matches.

Bucknell traveled to Delaware to face the Fighting Blue Hens this Wednesday evening but results were not available at press time. This Saturday, the Bison will play in their home-opener in Davis Gym. They will face St.Francis (NY) and St.Francis (PA).

Women lose heartbreaker to Towson State

Despite loss, Bucknell soccer hopeful to repeat last season's undefeated conference record

By Eric Keber

Bucnellian Staff Writer

The Bucknell women's soccer team opened up their season with a game against Towson State on August 31. The 7 p.m. game, which ended in a 2-1 loss for the Bison(0-1), was the first meeting ever between the two teams.

Towson State's Kari Colsey scored first with only 8:37 into the game, but with 8:23 left in the first half junior forward Liz Woodrow, who earned first-team All-Patriot League honors last year, scored for the Bison to tie the game at 1-1.

The game went scoreless from then until Towson State's Christie Landi scored with only 2:29 remaining to put the Tigers ahead for good.

"Overall we didn't look that bad," noted Coach Toby Lovecchio, "It was a good game and Towson State was physical and had good speed."

Lovecchio played 18 different players and had five first year studets playing 50 percent of the game.

Senior goalkeeper and tri-captain Becky Snover played the whole game and recorded seven saves. Midfielder Katie Senderowitz '00 assisted Woodrow on her goal.

The Bison under Lovecchio, went 10-6-1 last year but were undefeated in Patriot League competition with a 6-0 record.

"This year will be harder because other teams didn't expect us to do as well as we did last year," stated Lovecchio. "Our success will depend on the commitment level of the team."

The Bison only lost three starting players and with 11 returning varsity membersthey are not lacking in experience.

Tri-captain Karen Spall, who made second-team All-Patriot League last year, will miss the entire season due to torn ligaments in her leg.

"Anytime you lose an All-League player and a starter, you lose a person with experience and maturity," remarked Lovecchio, "When you lose someone like that and you feel it. It's a big loss."

Senior captains Amy Green and Snover, and fellow senior Heather Andrews will provide the leadership that such a young team needs.

"As a group they all worked really hard," adds Lovecchio about the Towson State game," But we need to improve in a number of areas to reach our goals."

The Bison will work on conditioning and limiting mental mistakes in preparation for their game against St. Francis at home on Saturday.

Bad Boys, Bad Boys, Whatcha' gonna do?

Commentary

E. J. Crawford
Co-Sports Editor

It's fall, the wind is picking up, there's a chill in the air (alright, maybe it's still ridiculously hot), but now it's football season. Thousands of fans flock back to their local stadiums or television sets to celebrate this truly American pastime. And when you think of football, you have to think of America's team—the Dallas Cowboys. Only problem is, if these Cowboys are really what America is all about—greed, wealth, drugs, alcohol, adultery—then America is in a lot more trouble than anyone thought, except for possibly Cowboys president Jerry Jones. In the past two seasons, the Dallas Cowboys have had players suspended for multiple reasons, and have shown that they are a team out of control, and one that is consumed by power and greed.

The Cowboys are in trouble and struggling for a multitude of reasons, but for the purpose of order, let me start at the top with Barry Switzer. Now any idiot, except for, again, Jerry Jones, can clearly see that Switzer is overmatched as a coach in the NFL, but what many have apparently forgotten is that Switzer went through these same problems of spousal, drug, and alcohol abuse when he was the head coach at Oklahoma. People seem to forget that Switzer's resignation, and soon thereafter retirement, coincided with Oklahoma being put on four years probation by the NCAA, and numerous arrests of Oklahoma players for using drugs, selling drugs, drunk driving, and repeated arrests for attempted rape and abuse. At the time, these incidents appeared to be a sad reflection of the overindulgence in big-time college football, but now it appears to be a type of ironic foreshadowing. But beyond Switzer's inability to, in any way, shape, or form, control his players, he has been even more of a failure as a coach. Switzer was a great college football coach because he was an excellent recruiter, and he surrounded himself with quality people. He has never been known as a great x's and o's coach, and has never been known as a student of the game. Unfortunately, these are the intangibles that make for a good pro coach. In addition, Switzer is now coaching scared. After Emmitt Smith's injury Monday night, Switzer admitted to considering taking Smith out after the third quarter of the Bears blowout, but said he was afraid the media would accuse him of giving up on the game. Any coach who is afraid of the media has no place in professional football, and clearly Switzer is one of these coaches.

But it is not fair to totally blame Switzer for letting the inmates run the asylum, some of the blame has to fall on the inmates as well. Let's start with Michael Irvin. Plain and simple, Irvin makes me sick. In addition to his indictment on drug charges, as well as the fact that he was caught with two prostitutes (Irvin is married and has children, who are truly the biggest losers in his sad charade), Irvin showed little regard for the authorities or the city of Dallas by repeatedly showing disinterest in his own case, showing up to his trial in bright orange and lime colored suits, and actually threatening one of the witnesses with bodily harm if she testified against him. Irvin then staged one of the greatest shows in the history of professional athletics, as he issued a hollow and belittling apology to his family and the state of Texas, and then was spotted at multiple strip clubs the following night. To me, it is sad that such a con-man and egotist is blessed with the kind of talent Irvin possesses.

But Irvin is not the only member of the Cowboys to run into legal troubles. Deion Sanders, speaking of egotists, is still facing charges for a bar-room brawl, and let us not forget that Pro-Bowl tackle Erik Williams missed the beginning of last season after injuring his knee in a drunk driving accident. By the way, Williams is still waiting to hear about charges of spousal abuse. Also last season, defensive tackle Leon Lett and two other Cowboys were suspended for the first four games of the season for violating the league's drug policy, and the list goes on.

The saddest part of this saga is that the Cowboys still have an immensely talented team, and will probably be on top long enough for more kids to idolize them, just hoping that maybe they can become the next Michael Irvin, the next Deion Sanders, and emulate America's team. The Cowboys claim to be a one of a kind team, let's hope so.

Maggie McCormick—The Bucknellian

Kristin Jones '00 is one of ten first year students on the tennis team.

Field hockey returns eight starters

BY CHRIS ELLIS

Bucknellian Staff Writer

After qualifying for the four-team Patriot League tournament for the first time ever two years ago, Bucknell field hockey had very realistic visions of a league title last season. A 3-1 loss to Lafayette in the Patriot finals smashed those dreams, and the desire for the title has grown all the stronger.

The Bison, who are returning eight starters from last year's finalist, seem ready to undertake the challenge — and expectations — that go along with being one of the league's elite teams. They seem ready to make another run at the championship they have never earned.

"We just need to make one more step," said head coach Heather Lewis. "As far as expectations go, though, I think we're ready to take that next step."

Bucknell will be led by midfielder Megan Bossuyt '97, the team's leading scorer last year and an all-Patriot league player. Forwards Kristin Soto '98 and Susan LeFevre '98 lead a talented, albeit inexperienced, group of forwards that will be more vital to the team's success this season than ever before. After years of playing a tight-marking, defensive-oriented style, the Bison have abandoned their conservative playbook and instead have decided to gear their efforts around an explosive offense.

"I tell the players every day that we will play attacking hockey this year," Lewis said. "I've never really taken that approach before, but we have a balanced team that is very capable of attacking well."

The offensive-minded strategy places considerable pressure on goalkeeper Maureen Breslin '99, who started all 17 games for the Bison last season. Breslin saw 35 shots in a 4-1 exhibition loss to Wake Forest last Sunday, and made 11 saves to keep Bucknell in the game for the duration.

The team's starting lineup is virtually unchanged from last year, but the graduation of three starters has paved the way for incoming freshman to make immediate impacts on the Bison's starting corps.

First year students Malina Anderson and Jen Zimmermansaw considerable action in last week's season-opener, and all of the team's eight freshmen are expected to play often as the season progresses.

The season did not begin kindly for the Bison, as they were forced to face off against perennial field hockey power Wake Forest in a game played in Amherst, Mass. Bucknell led the Deacons, a top-ten finisher last year, throughout much of the first half, and played even until 22 minutes remained in the game. After that point, however, the more-experienced Deacons took control of the game and coasted to the three-goal victory.

"We showed that we have what it takes to compete at that higher level," Lewis said. "Near the end of the game, though, we lost our legs and they (Wake Forest) took advantage of it. We need to be in a little better shape."

Nevertheless, the game was a huge positive for a team gearing up to Patriot-League title run. Solid at every position and with a roster that is deeper than most Patriot-league competitors, the Bison are prepared to take their play where they need it to go— just one step further.

"This is one of the most balanced teams I've seen in a while, and we have excellent senior leadership everywhere," Lewis said. "I think we can do what we've set out to do."

Tennis rebuilds with youth

BY BETH COALE

Bucknellian Staff Writer

The Bucknell women's tennis team prepares for another promising season with a few returnees and a large number of newcomers. With 10 new first year students on the team, this unusually large squad will be full of new faces and a variety of skills. The team's captains this year are Susan Vincent '97 and Rebecca Korb '97, both strong doubles players. Katie Roland '99 and Wendy Eason '98, last year's number two and three seeded players respectively, are the only 'top six' players returning from last season.

As coach Rose Ewan enters her 18th season at Bucknell she is very excited for the upcoming year. She expects to be able to rely upon the skill and experience of her returning upperclassmen to lead the team through the season. Throughout the fall, Coach Ewan also hopes to develop and expand upon the skills brought to the team by the first year students. Despite the fact that the Bison are predicted to finish third in the Patriot League, Coach Ewan is determined to prove them wrong.

Tennis Preview

The women begin their season next weekend (September 13-15) with the West Virginia Invitational. Their first home match is on Saturday, September 21 against the University of Maryland at Baltimore County at 12 noon.

Thomas Marotta—The Bucknellian

Brian Ruddy '98 (left) scored two goals afgainst Kutztown

Soccer deafeats Kutztown, 5-0

BY E.J. CRAWFORD

Bucknellian Staff Writer

Bucknell soccer rebounded well from a tough 1-0 loss to Fairleigh Dickinson to trounce Division II member Kutztown 5-0 behind the strength of junior Brian Ruddy's two goals and one assist. The win evens the Bison record at 1-1 for the season, with conference play yet to begin.

Against Fairleigh Dickinson, the men's team allowed an unassisted goal just two minutes into the game before righting themselves and playing a tough Fairleigh Dickinson school to a standstill for the remaining 88 minutes. The lone goal was an unassisted shot from 20 yards that snuck past goalie Nate Fitzgerald '00. Fitzgerald was subbing for the injured Corey Harbold '97, who missed the game with a concussion.

Despite the goal, Coach Reynolds credited Fitzgerald with playing "a solid game," and he finished with two saves.

The Bison had their best scoring opportunity with time running out in the first half, but Fairleigh Dickinson's goalie made a spectacular save, one of five in the game, to thwart the Bison threat.

Despite the loss, Bucknell can look favorably upon dominating the ball for much of the second half, and outshooting their opponents 11-8.

Against Kutztown, the men's squad started slowly, squandering numerous scoring opportunities in the first half before exploding for five second half goals.

Junior Brian Ruddy led off the scoring 12minutes into the second half off a cross-field feed from sophomore Ryan Cummings. Five minutes later, Brendon Whitworth '98 scored off a feed from junior captain Wright Ramsey, and the rout was on.

Brian Carr '00 tallied two goals in the game to compliment Whitworth's goal and Ruddy's two goals and an assist. Also recording assists were Michael Nevin '00 and Myles Perkins '98.

The defense again did what Coach Reynolds deemed "an excellent job," and was bolstered by the return of senior Harbold, who recorded two saves in the victory.

The Bison take on a Manhattan team this Saturday that is looking to rebound from a disappointing season last year, and then face St. Peter's next Tuesday. Both games are at home.

Charitable gifts to University more than double; students to benefit

BY BETH MARTIN

For the second year, the University has received a record setting volume of charitable gifts from alumni, parents, friends, corporations and foundations.

Contributions totaled almost $14 million in 1995-96, an increase of four percent over the $13.4 million given in 1994-95, and 85 percent above the $7.5 million received in the previous fiscal year.

The University saw a dramatic increase in alumni giving, with participation hitting 38 percent this year, after moving from 32 to 36 percent last year. Robert Caldwell, director of annual giving, said that of 40 frame of reference schools, Bucknell had the highest percentage increase in contributions given by alumni over the last year.

Corporation and foundation grants also peaked this year totaling more than $2.2 million. Carol Ingald, director of corporate and foundation relations, who is responsible for seeking these funds, said that the University has more actively pursued grants in recent years due to a steady decline in government funds available to Bucknell.

However, she said that grant contributions "fluctuate from year to year, so it is hard to predict what will happen in upcoming years."

Erin Leidl—The Bucknellian
Robert Caldwell, University director of annual giving

Ingald said that most of the grant money is "narrowly focused" with corporations and foundations offering grants for specific programs at the University.

For example the Sheary Trust given this year provided $7900 in support of a new government document workstation for the Bertrand library. The Pitcairn-Crabbe Foundation gave $25,000 for a three year program, "Religion in the Third Millennium." Exxon gave $84,172 for annual support of engineering, geology, athletics and the arts to endowed scholarships.

Alumni, parent, and friend donations are not used for one specific purpose. They are extremely important as Caldwell said, "Tuition only covers 80 percent of the cost for each student to attend Bucknell. The rest comes from charity."

Caldwell attributes the increase in alumni giving to a new fundraising strategy that takes into account "today's economic climate where people have to make choices about which charities to give to." He and his staff must "market Bucknell as the right choice with a strong, crisp, clear case for support delivered with a personal touch."

However, his specific approach varies for the 41,000 solicitable alumni and parents. A "magical line" is drawn separating the 10 to 15 percent contributing $1000 or more. Most are greeted with a face to face solicitation followed up with either more visits and/or phone calls.

A dedicated calling center, employing 80 trained students a year, target contributors who don't fall into the $1000 or more bracket. Caldwell said "this program is really effective in getting new donors on board and raising a $25 gift to a $100 gift."

The growth in alumni and parent donations is not the result of just the visiting and calling campaign said Caldwell. "It's alumni and parents becoming more involved as volunteers, it's our constituency getting more involved in regional Bucknell Club events, it's President Adams, staff, and volunteers out on the road putting Bucknell on the plates of our constituency both emotionally and fiscally," said Caldwell.

Most of the gifts the University receives each year from alumni are cash, although Caldwell said that many gave appreciated stock, property, real estate, annuities, and material stuffs, such as painting collections.

Ingald and her staff use a different approach. They apply to corporations and foundations offering grants that the University might be eligible to receive. Ingald said that the University often will not get the grants, because, with many other universities applying, it is "very competitive."

Both Caldwell and Ingald agree that the University's reputation affects annual contributions. The favorable effect of winning sports teams and an increased rank in publications, such as the *U.S. News and World Report*, rating the competitiveness of colleges, affects contributions because "people want to support and be part of a winning team," said Caldwell.

Cara Mickelson—The Bucknellian

Financial difficulties uproot Appleseeds

KATHRYN ARDINGER
Bucknellian Staff Writer

In just over two weeks, the closed sign hanging on the door of Appleseeds Market and Deli will indicate a permanent closing at its Market Street location.

As the result of ongoing struggles over finances and unpaid rent, the lease for Appleseeds has been terminated. The situation has sparked controversy in the community.

John Gardner, the owner of the building in which Appleseeds is located, acknowledged that there were a lot of people in the community on both sides of the issue who are upset.

"The decision to remove me from the marketplace has been made and it is irreversible," said Kate Stilin '76, the sole proprietor of Appleseeds.

Stilin said there has been an outpouring of offers to petition or picket from both the University and Lewisburg communities. The communities' fear is that Lewisburg is becoming too commercialized; citizens are concerned that a big name chain will take Appleseeds' place.

"The decision to terminate Appleseeds lease was made before we had any tenant," Gardner said referring community concern about what business will be moving into the 328 Market Street location.

Both Gardner and Stilin declined to comment on what business will move into the location.

"I have tried working for a long time with Kate to make things work," Gardner said. However, "Kate was not the only one who did not have choices. I did not have any other choices also," Gardner said.

"The choice that I had was not a desirable one, but a necessary one," he continued.

As a Bucknell graduate and local business person, Stilin said, "I feel this decision was one not made in the best interest of the community."

Having received a lot of positive feedback from the University and local communities, she said, "I obviously made some sort of impact and people do like what's going on here."

One local proprietor who wished to remain anonymous commented that he was sorry to see Stilin go and that he really enjoyed her food. He said that he would have done whatever he could have to remedy the situation if it would have helped.

"This is an untimely end and I hope it is not an end," Stilin said. But for now, "the future of Appleseeds is up in the air."

"I do have some interesting possibilities I'm pursuing and all I can say is that I'll keep you posted," Stilin said referring to her possible relocation in Lewisburg.

Stilin estimates that between 75 and 80 percent of Appleseeds' business has been from Bucknellians. Furthermore, the deli has had a lot of staff turnover of University students during their college careers.

"I think it's unfortunate because Appleseeds had such a comfortable, friendly setting. Lewisburg is a quaint community and the addition of another commercialized chain will detract from the relaxed, small-town atmosphere," Colleen Dempster '97 said.

PBS' 'Firing Line' to televise political debate in Weis Center

BY TRACY THIFFAULT

The popular Public Broadcasting System (PBS) television show, "Firing Line," will be filming a live political debate in the Weis Center on Oct. 19th.

Henry Kissenger

Republican representatives will be William Buckley Jr., Kay Bailey Hutchison, Henry Kissinger, and Newt Gingrich. The Democratic panel includes political analyst, Bob Shrum and George McGovern. Two other Democratic panelists have yet to be announced.

Free tickets for the event will be available for students this Saturday beginning at 9am in the Weis Center box office.

The moderator for the debate will be one of the country's foremost political commentators, Michael Kinsley. Kinsley, whose work has been published in *The New Republic*, *The New Yorker*, and *Time*, is looking forward to the event.

Because it is close to election time, the debate is expected to be a big event.

Tickets are limited for the event. Students have been allotted 350 tickets, faculty and staff, 150 tickets, and alumni and parents, 350 tickets.

One hundred tickets have also been set aside for the Bucknell Board of Trustees, the Board of Directors of the Alumni Association, and the President's staff. Govern-

Sophomore rush spawns a variety of opinions in community and on campus

BY TARA DRISCOLL

News Analysis

At the corner of University Ave. and S. Third St. in Lewisburg, two neighbors live across the street from each other and within 100 feet of a fraternity house. They've survived parties, late night music, keg runs and massive noise. They know what rush is and that it was a week earlier this year.

Lois VandenHeuvel and D. Ann McClure are no strangers to the community. In fact, McClure has lived in that same house for 30 years. She and her neighbor know what's going on.

"Rush at Bucknell doesn't bother me," McClure said, "It's using the town as part of the process that does."

VandenHeuvel agrees, "I don't think anyone really minds it, it's only a weekend. But, I wish these students would stay on campus."

Lewisburg gets itself ready each year for rush and it's climactic Bid Day. The community that borders the campus must cope with the singing and screaming that lasts for the duration of rush.

Leslie Cullen, the off-campus living coordinator, noted a variety of community opinions exists on rush.

"It would be difficult to characterize any one attitude expressed by the community. Certainly some townspeople know this is a part of college life and accept it, and of course there are those who are grumpy at the extra noise."

The University makes sure that the community voice is heard. The establishment of Coalition of Bucknellians and Lewisburg Residents (CBLR) encourages input from the Lewisburg community and students at Bucknell in order to make rush and other University sponsored events run more smoothly. The group meets twice

New chair on Board of Trustees

As of July 1st, James W. Schubauer, '56 succeded Lee Idleman '54 as the chair of the Board of Trustees. Schubauer has been on the Board of Trustees scince 1989. He served as vice chair of the Board and has chaired several committees.

Idleman, will remain on the Borad for the next four years.

Robert C. Rooke has been named as vice chair of the Board of Trustees. Rooke, who has served on the Board for 26 years, succeeds Herbert Barness '48. Barness will continue to serve on the Board as trustee emeritus.

BUCKNELL UNIVERSITY — LEWISBURG, PENNSYLVANIA 17837

Weekend Weather

Friday: Mostly cloudy, highs reaching mid-70's

Saturday: Showers, highs mid-60's

Sunday: Windy, highs in the 60's

THE BUCKNELLIAN

Charitable gifts to University more than double; students to benefit

BY BETH MARTIN

For the second year, the University has received a record setting volume of charitable gifts from alumni, parents, friends, corporations and foundations.

Contributions totaled almost $14 million in 1995-96, an increase of four percent over the $13.4 million given in 1994-95, and 85 percent above the $7.5 million received in the previous fiscal year.

The University saw a dramatic increase in alumni giving, with participation hitting 38 percent this year, after moving from 32 to 36 percent last year. Robert Caldwell, director of annual giving, said that of 40 frame of reference schools, Bucknell had the highest percentage increase in contributions given by alumni over the last year.

Corporation and foundation grants also peaked this year totaling more than $2.2 million. Carol Ingald, director of corporate and foundation relations, who is responsible for seeking these funds, said that the University has more actively pursued grants in recent years due to a steady decline in government funds available to Bucknell.

Erin Leidl—The Bucknellian

Robert Caldwell, University director of annual giving

However, she said that grant contributions "fluctuate from year to year, so it is hard to predict what will happen in upcoming years."

Ingald said that most of the grant money is "narrowly focused" with corporations and foundations offering grants for specific programs at the University.

For example the Sheary Trust given this year provided $7900 in support of a new government document workstation for the Bertrand library. The Pitcairn-Crabbe Foundation gave $25,000 for a three year program, "Religion in the Third Millennium." Exxon gave $84,172 for annual support of engineering, geology, athletics and the arts to endowed scholarships.

Alumni, parent, and friend donations are not used for one specific purpose. They are extremely important as Caldwell said, "Tuition only covers 80 percent of the cost for each student to attend Bucknell. The rest comes from charity."

Caldwell attributes the increase in alumni giving to a new fundraising strategy that takes into account "today's economic climate where people have to make choices about which charities to give to." He and his staff must "market Bucknell as the right choice with a strong, crisp, clear case for support delivered with a personal touch."

However, his specific approach varies for the 41,000 solicitable alumni and parents. A "magical line" is drawn separating the 10 to 15 percent contributing $1000 or more. Most are greeted with a face to face solicitation followed up with either more visits and/or phone calls.

A dedicated calling center, employing 80 trained students a year, target contributors who don't fall into the $1000 or more bracket. Caldwell said "this program is really effective in getting new donors on board and raising a $25 gift to a $100 gift."

The growth in alumni and parent donations is not the result of just the visiting and calling campaign said Caldwell. "It's alumni and parents becoming more involved as volunteers, it's our constituency getting more involved in regional Bucknell Club events, it's President Adams, staff, and volunteers out on the road putting Bucknell on the plates of our constituency both emotionally and fiscally," said Caldwell.

Most of the gifts the University receives each year from alumni are cash, although Caldwell said that many gave appreciated stock, property, real estate, annuities, and material stuffs, such as painting collections.

Ingald and her staff use a different approach. They apply to corporations and foundations offering grants that the University might be eligible to receive. Ingald said that the University often will not get the grants, because, with many other universities applying, it is "very competitive."

Both Caldwell and Ingald agree that the University's reputation affects annual contributions. The favorable effect of winning sports teams and an increased rank in publications, such as the *U.S. News and World Report*, rating the competitiveness of colleges, affects contributions because "people want to support and be part of a winning team," said Caldwell.

Cara Mickelson—The Bucknellian

Financial difficulties uproot Appleseeds

KATHRYN ARDINGER

Bucknellian Staff Writer

In just over two weeks, the closed sign hanging on the door of Appleseeds Market and Deli will indicate a permanent closing at its Market Street location.

As the result of ongoing struggles over finances and unpaid rent, the lease for Appleseeds has been terminated. The situation has sparked controversy in the community.

John Gardner, the owner of the building in which Appleseeds is located, acknowledged that there were a lot of people in the community on both sides of the issue who are upset.

"The decision to remove me from the marketplace has been made and it is irreversible," said Kate Stilin '76, the sole proprietor of Appleseeds.

Stilin said there has been an outpouring of offers to petition or picket from both the University and Lewisburg communities. The communities' fear is that Lewisburg is becoming too commercialized; citizens are concerned that a big name chain will take Appleseeds' place.

"The decision to terminate Appleseeds lease was made before we had any tenant," Gardner said referring community concern about what business will be moving into the 328 Market Street location.

Both Gardner and Stilin declined to comment on what business will move into the location.

"I have tried working for a long time with Kate to make things work," Gardner said. However, "Kate was not the only one who did not have choices. I did not have any other choices also," Gardner said.

"The choice that I had was not a desirable one, but a necessary one," he continued.

As a Bucknell graduate and local business person, Stilin said, "I feel this decision was one not made in the best interest of the community."

Having received a lot of positive feedback from the University and local communities, she said, "I obviously made some sort of impact and people do like what's going on here."

One local proprietor who wished to remain anonymous commented that he was sorry to see Stilin go and that he really enjoyed her food. He said that he would have done whatever he could have to remedy the situation if it would have helped.

"This is an untimely end and I hope it is not an end," Stilin said. But for now, "the future of Appleseeds is up in the air."

"I do have some interesting possibilities I'm pursuing and all I can say is that I'll keep you posted," Stilin said referring to her possible relocation in Lewisburg.

Stilin estimates that between 75 and 80 percent of Appleseeds' business has been from Bucknellians. Furthermore, the deli has had a lot of staff turnover of University students during their college careers.

"I think it's unfortunate because Appleseeds had such a comfortable, friendly setting. Lewisburg is a quaint community and the addition of another commercialized chain will detract from the relaxed, small-town atmosphere," Colleen Dempster '97 said.

PUBLIC SAFETY LOG

September 3, 1996

VEHICLE DAMAGE - A male Bucknell student reported to PSO that he returned to his vehicle to find scratches on the rear quarter panel. Investigation is continuing.

September 4, 1996

HARASSMENT BY COMMUNICATION - A BU student reported to a PSO that he had received two harassing phone calls in his dorm room. A phone trap was requested for this telephone line. The investigation is continuing.

THEFT - A BU employee reported to a PSO that unknown persons(s) had stolen an electronic scale from the Rooke Chemistry building. Investigation is continuing.

INFORMATION/SUSPICIOUS PERSON - While looking out her room window in Hunt Hall, a Bucknell student observed a suspicious male sitting in a vehicle and, later, walking along the exterior of the building. PSO checked the area but the male was gone upon arrival. The Lewisburg Police Department was alerted.

ACT 64 VIOLATION/UNFOUNDED - RA's reported to a PSO that they suspected an individual of using marajuana in Trax Hall. A poster advertising a sale was displayed on the door of the room. When PSO arrived the room door was closed and the poster was removed. In consultation with the Office of the Dean of Students, it was determined that no action should be taken at the time.

September 5, 1996

INFORMATION/CHEMICAL SPILL - A PSO was advised that a chemical spill of a moderately hazardous material had occurred in Biology, Room 219. The University Safety Manager advised proper cleaning methods and the spill was removed by a custodian without incident.

September 6, 1996

INFORMATION/MEDICAL ASSIST - A PSO responded to the Langone Center to assist a Dining Service employee who had received an electrical shock. An ambulance transported the individual to Evangelical Hospital for treatment and later he returned to work.

TAMPERING WITH FIRE EQUIPMENT - BUPS responded to third floor kitchen area of Harris Hall for a reported fire alarm. Upon arrival, the officers discovered that some unknown person(s) had set off a fire extinguisher in the kitchen area. Investigation is continuing.

INFORMATION/MINOR VEHICLE ACCIDENT - PSO responded to the west side of the stadium for a minor vehicle accident involving a BU dining service van and a visitor's van.

ALCOHOL/UNDERAGE CONSUMPTION - PSO observed a BU student lying on the ground behind Chi Phi Fraternity. The underage student admitted to having consumed beer. A University citation was issued.

TAMPERING WITH FIRE EQUIPMENT - BUPS responded to third floor kitchen area of Harris Hall for areported fire alarm. Upon arrival, the officers discovered that some unknown person(s) had set off a fire extinguisher in the kitchen area. Investigation is continuing.

INFORMATION/MINOR VEHICLE ACCIDENT - A PSO responded to the west side of the stadium for a minor vehicle accident involving a BU dining service van and a visitor's van.

ALCOHOL/UNDERAGE CONSUMPTION - A PSO observed a BU student lying on the ground behind Chi Phi Fraternity. The underage student admitted to having consumed beer. A University citation was issued.

DISORDERLY CONDUCT - A Bucknell student was observed by A PSO urinating against a tree in front of Hunt Hall. A University citation was issued.

ALCOHOL/OPEN CONTAINER - A BU student was stopped in front of Delta Upsilon Fraterinty because she was carrying an open can of beer. The student immediately deposited the can in the trash can. It was determined that the student was under the age of 21 years. A University citation was issued.

INFORMATION/FOUND BU PROPERTY - While responding to a fire alarm activation at Bucknell West, PSO found two signs belonging to the Rooke Chemistry building. The residents of the Mod will be questioned as the investigation continues.

ALCOHOL/OPEN CONTAINER - A BU student was observed carrying an open container of beer at the rear of Dana Engineering. A University citation was issued.

ALCOHOL/OPEN CONTAINER - A PSO observed a BU student carrying an open container of beer at the rear of the Dana Engineering Building. A University citation was issued.

ALCOHOL/OPEN CONTAINER - A BU student was observed carrying an open container of beer on St. George St. in front of Hulley House. A University citation was issued.

ALCOHOL/OPEN CONTAINER - A PSO observed a BU student, on St. George St. by Larison Hall, carrying an open container of beer. A University citation was issued.

ALCOHOL/OPEN CONTAINER - A BU student was observed on Fraternity Road at the rear of Dana Engineering building carrying an open container of beer. A university citation was issued.

September 8, 1996

DISORDERLY CONDUCT - A PSO observed a female Bucknell student lying in the roadway on S. 7th St. A male BU student was attempting to assist her. When the PSO stopped to speak with the individuals, the male became hostile and had to be restrained. East BuffaloBuffalo Township PD responded and issued citations to both for Public Drunkenness. The male was also cited for Disorderly Conduct.

DISORDERLY CONDUCT - PSO observed a Bucknell student carrying an open can of beer on Fraternity Road, near Coleman Hall. When confronted by the officers, the student attempted to flee and had to be restrained. East Buffalo Township Police cited the male for Underage Drinking.

BU PROPERTY DAMAGE - Public Safety Officers responded to Swartz Hall for a broken window pane in the front exterior door of B Wing. The window was patched.

ALCOHOL/UNDERAGE CONSUMPTION - A BU student was stopped by Public Safety Officers because she was he was carrying an open container of beer. The student was under the age of 21 years. A University citation was issued.

ALCOHOL/UNDERAGE POSSESSION - An underaged BU student was found by Public Safety Officers to be in possession of an open can of beer. He admitted to consuming beer while under the age of 21 years. A University citation was issued.

ALCOHOL/ UNDERAGE CONSUMPTION - PSO observed two BU students breaking pieces of slate from the steps leading from Dent Drive to the Academic Quad. When the students were questioned, one individual had the strong odor of alcohol on his breath. This male was issued a University citation. Additional charges are pending.

MEDICAL ASSIST - PSO responded to Vedder Hall for a BU student who injured her ankle while jogging. A Student Health Service driver took the female to Evangelical Hospital for treatment.

September 9, 1996

RECKLESS DRIVING - A Public Safety Officer observed a vehicle driving toward Dent Drive at a high rate of speed. Another vehicle was forced to leave the road to avoid being struck. The vehicle was later identified and PSO spoke with the operator was issued University citations for reckless driving and speeding.

DELIVERY OF PROTECTION FROM ABUSE ORDER -A PSO assisted the Union County Sherrif in delivering a "Protection from Abuse Order" to a male Bucknell student.

RUSH

From page 1

a month and serves as a viable link between the school and community.

The rush process on campus is significant, although not everyone participates. Slightly less than half of all sophomores opted to take part this year, according to Myra Legg, the new acting director of greek affairs. The system itself is ever-present and incites both positive and negative reactions on campus.

For Jessica Powers '99, Bid Day was a great day. She was accepted into Alpha Chi Omega and is optimistic about what her future in the sorority means.

"I rushed because people said that you get to meet a lot of new friends," Powers said. "The more time I spent with the sisters during rush, the more I liked it and the thought of the new friendships that can be formed."

Legg, however, contends that rush and Greek life are, "not for everyone."

"Greek life is like the crew team and other sports teams, it can enhance your time in college. But it really depends on the individual and what you're into," Legg said.

A sophomore girl, who asked to remain anonymous, did not rush for a number of reasons. She said: "I didn't feel the whole process was me—being in a group that is generalized. It seemed like a formal way of forming cliques. It seems weird to pay money when there are other organizations to be involved in the community. I can meet friends other ways. I do not feel left out."

Bid Day, however, can be upsetting for some. David Jacks '97 rushed his sophomore year but was disappointed.

"I felt bad on Bid Day because I did not get a bid from the fraternity I wanted," Jacks said. "I received some bids, but I didn't want to compromise just to be in a frat."

Rush participants have the option to withdraw early. Jackie Laible '99 took advantage of the loophole.

"I liked rush as I was doing it," Laible said. "I just didn't feel comfortable anywhere and didn't see a need to be a part of the Greek system."

Although a lower percentage of students are pledging this year, the Greek system itself is not likely to fade on campus.

"We have a good number of pledges this year," said Jeff Martin '98, a member of Chi Phi fraternity. "Rush is a part of life here at Bucknell."

Search for University Chaplin expected to end by November

BY KARIN DAVIDSON
Bucknellian Staff Writer

The search for a new University Chaplain is in full swing and an appointment should be made by the end of November.

Four Sundays in September and October have been reserved for the final three or four candidates to preach in Rooke Chapel.

The Search Committee, chaired by William Becker, professor of religion, narrowed the 100 applications received to 16 at the end of August. The files still remaining will be narrowed to eight or 10, and telephone interviews will be conducted.

Since former Chaplain Alison Boden left the University in the spring of 1995, there have been two interim chaplins appointed by the President's Office.

Ian Oliver will be the interim University Chaplain until June; Charles Berthoud held this position last year.

Becker said the Search Committee was formed in February and is made up of 10 people including a cross section of students, faculty, and administrators.

The committee is looking for "a person with experience in campus ministry, a person who demonstrates good rapport with students and faculty, a strong preacher, a person who is interested in developing a wide range of programs," Becker said.

Sept. 29, Oct. 6, Oct. 20, and Oct. 27 are the dates set for candidates to deliver messages during Sunday worship at Rooke Chapel.

Cara Mickelson —The Bucknellian

The Rooke Chapel pulpit sits empty, awaiting the appoinment of a permanent University Chaplin.

Sculpture or parking place?

Rebecca Klingler—The Bucknellian

Sighted outside the music and art building down the hill from Old Main, this half-buried blue bicycle grabs the attention those who pass by. Art work or parking spot, the idea is original.

PUBLIC SAFETY LOG

September 3, 1996

VEHICLE DAMAGE - A male Bucknell student reported to PSO that he returned to his vehicle to find scratches on the rear quarter panel. Investigation is continuing.

September 4, 1996

HARASSMENT BY COMMUNICATION - A BU student reported to a PSO that he had received two harassing phone calls in his dorm room. A phone trap was requested for this telephone line. The investigation is continuing.

THEFT - A BU employee reported to a PSO that unknown persons(s) had stolen an electronic scale from the Rooke Chemistry building. Investigation is continuing.

INFORMATION/SUSPICIOUS PERSON - While looking out her room window in Hunt Hall, a Bucknell student observed a suspicious male sitting in a vehicle and, later, walking along the exterior of the building. PSO checked the area but the male was gone upon arrival. The Lewisburg Police Department was alerted.

ACT 64 VIOLATION/UNFOUNDED - RA's reported to a PSO that they suspected an individual of using marajuana in Trax Hall. A poster advertising a sale was displayed on the door of the room. When PSO arrived the room door was closed and the poster was removed. In consultation with the Office of the Dean of Students, it was determined that no action should be taken at the time.

September 5, 1996

INFORMATION/CHEMICAL SPILL - A PSO was advised that a chemical spill of a moderately hazardous material had occurred in Biology, Room 219. The University Safety Manager advised proper cleaning methods and the spill was removed by a custodian without incident.

September 6, 1996

INFORMATION/MEDICAL ASSIST - A PSO responded to the Langone Center to assist a Dining Service employee who had received an electrical shock. An ambulance transported the individual to Evangelical Hospital for treatment and later he returned to work.

TAMPERING WITH FIRE EQUIPMENT - BUPS responded to third floor kitchen area of Harris Hall for a reported fire alarm. Upon arrival, the officers discovered that some unknown person(s) had set off a fire extinguisher in the kitchen area. Investigation is continuing.

INFORMATION/MINOR VEHICLE ACCIDENT - PSO responded to the west side of the stadium for a minor vehicle accident involving a BU dining service van and a visitor's van.

ALCOHOL/UNDERAGE CONSUMPTION - PSO observed a BU student lying on the ground behind Chi Phi Fraternity. The underage student admitted to having consumed beer. A University citation was issued.

TAMPERING WITH FIRE EQUIPMENT - BUPS responded to third floor kitchen area of Harris Hall for areported fire alarm. Upon arrival, the officers discovered that some unknown person(s) had set off a fire extinguisher in the kitchen area. Investigation is continuing.

INFORMATION/MINOR VEHICLE ACCIDENT - A PSO responded to the west side of the stadium for a minor vehicle accident involving a BU dining service van and a visitor's van.

ALCOHOL/UNDERAGE CONSUMPTION - A PSO observed a BU student lying on the ground behind Chi Phi Fraternity. The underage student admitted to having consumed beer. A University citation was issued.

DISORDERLY CONDUCT - A Bucknell student was observed by A PSO urinating against a tree in front of Hunt Hall. A University citation was issued.

ALCOHOL/OPEN CONTAINER - A BU student was stopped in front of Delta Upsilon Frateринty because she was carrying an open can of beer. The student immediately deposited the can in the trash can. It was determined that the student was under the age of 21 years. A University citation was issued.

INFORMATION/FOUND BU PROPERTY - While responding to a fire alarm activation at Bucknell West, PSO found two signs belonging to the Rooke Chemistry building. The residents of the Mod will be questioned as the investigation continues.

ALCOHOL/OPEN CONTAINER - A BU student was observed carrying an open container of beer at the rear of Dana Engineering. A University citation was issued.

ALCOHOL/OPEN CONTAINER - A PSO observed a BU student carrying an open container of beer at the rear of the Dana Engineering Building. A University citation was issued.

ALCOHOL/OPEN CONTAINER - A BU student was observed carrying an open container of beer on St. George St. in front of Hulley House. A University citation was issued.

ALCOHOL/OPEN CONTAINER - A PSO observed a BU student, on St. George St. by Larison Hall, carrying an open container of beer. A University citation was issued.

ALCOHOL/OPEN CONTAINER - A BU student was observed on Fraternity Road at the rear of Dana Engineering building carrying an open container of beer. A university citation was issued.

September 8, 1996

DISORDERLY CONDUCT - A PSO observed a female Bucknell student lying in the roadway on S. 7th St. A male BU student was attempting to assist her. When the PSO stopped to speak with the individuals, the male became hostile and had to be restrained. East BuffaloBuffalo Township PD responded and issued citations to both for Public Drunkenness. The male was also cited for Disorderly Conduct.

DISORDERLY CONDUCT - PSO observed a Bucknell student carrying an open can of beer on Fraternity Road, near Coleman Hall. When confronted by the officers, the student attempted to flee and had to be restrained. East Buffalo Township Police cited the male for Underage Drinking.

BU PROPERTY DAMAGE - Public Safety Officers responded to Swartz Hall for a broken window pane in the front exterior door of B Wing. The window was patched.

ALCOHOL/UNDERAGE CONSUMPTION - A BU student was stopped by Public Safety Officers because she was he was carrying an open container of beer. The student was under the age of 21 years. A University citation was issued.

ALCOHOL/UNDERAGE POSSESSION - An underaged BU student was found by Public Safety Officers to be in possession of an open can of beer. He admitted to consuming beer while under the age of 21 years. A University citation was issued.

ALCOHOL/ UNDERAGE CONSUMPTION - PSO observed two BU students breaking pieces of slate from the steps leading from Dent Drive to the Academic Quad. When the students were questioned, one individual had the strong odor of alcohol on his breath. This male was issued a University citation. Additional charges are pending.

MEDICAL ASSIST - PSO responded to Vedder Hall for a BU student who injured her ankle while jogging. A Student Health Service driver took the female to Evangelical Hospital for treatment.

September 9, 1996

RECKLESS DRIVING - A Public Safety Officer observed a vehicle driving toward Dent Drive at a high rate of speed. Another vehicle was forced to leave the road to avoid being struck. The vehicle was later identified and PSO spoke with the operator was issued University citations for reckless driving and speeding.

DELIVERY OF PROTECTION FROM ABUSE ORDER -A PSO assisted the Union County Sherrif in delivering a "Protection from Abuse Order" to a male Bucknell student.

RUSH

From page 1

a month and serves as a viable link between the school and community.

The rush process on campus is significant, although not everyone participates. Slightly less than half of all sophomores opted to take part this year, according to Myra Legg, the new acting director of greek affairs. The system itself is ever-present and incites both positive and negative reactions on campus.

For Jessica Powers '99, Bid Day was a great day. She was accepted into Alpha Chi Omega and is optimistic about what her future in the sorority means.

"I rushed because people said that you get to meet a lot of new friends," Powers said. "The more time I spent with the sisters during rush, the more I liked it and the thought of the new friendships that can be formed."

Legg, however, contends that rush and Greek life are, "not for everyone."

"Greek life is like the crew team and other sports teams, it can enhance your time in college. But it really depends on the individual and what you're into," Legg said.

A sophomore girl, who asked to remain anonymous, did not rush for a number of reasons. She said: "I didn't feel the whole process was me—being in a group that is generalized. It seemed like a formal way of forming cliques. It seems weird to pay money when there are other organizations to be involved in the community. I can meet friends other ways. I do not feel left out."

Bid Day, however, can be upsetting for some. David Jacks '97 rushed his sophomore year but was disappointed.

"I felt bad on Bid Day because I did not get a bid from the fraternity I wanted," Jacks said. "I received some bids, but I didn't want to compromise just to be in a frat."

Rush participants have the option to withdraw early. Jackie Laible '99 took advantage of the loophole.

"I liked rush as I was doing it," Laible said. "I just didn't feel comfortable anywhere and didn't see a need to be a part of the Greek system."

Although a lower percentage of students are pledging this year, the Greek system itself is not likely to fade on campus.

"We have a good number of pledges this year," said Jeff Martin '98, a member of Chi Phi fraternity. "Rush is a part of life here at Bucknell."

Search for University Chaplin expected to end by November

BY KARIN DAVIDSON
Bucknellian Staff Writer

The search for a new University Chaplain is in full swing and an appointment should be made by the end of November.

Four Sundays in September and October have been reserved for the final three or four candidates to preach in Rooke Chapel.

The Search Committee, chaired by William Becker, professor of religion, narrowed the 100 applications received to 16 at the end of August. The files still remaining will be narrowed to eight or 10, and telephone interviews will be conducted.

Since former Chaplain Alison Boden left the University in the spring of 1995, there have been two interim chaplins appointed by the President's Office.

Ian Oliver will be the interim University Chaplain until June; Charles Berthoud held this position last year.

Becker said the Search Committee was formed in February and is made up of 10 people including a cross section of students, faculty, and administrators.

The committee is looking for "a person with experience in campus ministry, a person who demonstrates good rapport with students and faculty, a strong preacher, a person who is interested in developing a wide range of programs," Becker said.

Sept. 29, Oct. 6, Oct. 20, and Oct. 27 are the dates set for candidates to deliver messages during Sunday worship at Rooke Chapel.

The Rooke Chapel pulpit sits empty, awaiting the appoinment of a permanent University Chaplin.

Faculty chair to promote mutual understanding

Kathryn Wrightson—The Bucknellian

John Peeler, professor of political science, is the new faculty chair.

BY KATHRYN WRIGHTSON
Bucknellian Staff Writer

The first faculty meeting of the school year opened Monday with a fairly routine agenda; the introduction of new faculty and remarks by the president and his staff. However, this year there was a new faculty chair directing the meeting. John Peeler, the new faculty chair and professor of political science, was elected last spring to a four year term.

Peeler, a professor for 29 years, sees his main goal as "simply to preside over the meetings that occur" with faculty and administration during the months of September through December and February through April.

"In addition to that, I am a faculty spokesperson where needed," said Peeler. Peeler represents the faculty, "at the semi-annual Board of Trustees meetings and with the president and administration."

"I expect to spend a lot of time with the president and the chairman of the Board of Trustees. Informally this will be a very important part of my job," Peeler said.

During his term, Peeler plans to work closely with the faculty to promote "mutual understanding among the different constituencies within the University." Faculty, administration, the Board of Trustees and students have "different concerns and perspectives. They are not negative, but mutual respect and mutual confidence" must be encouraged, Peeler said.

In this way all the factions will be "able to realize the common interest we all have in making Bucknell University successful," Peeler said.

Peeler recognized the very central role faculty has at the University. "The Faculty is at the very center of what the University does, and bears an obligation to strengthen and defend the academic focus of the University," said Peeler. "I will also devote much energy to promoting communication and cohesion among us [faculty members]," Peeler said

Peeler has been spending time in the past weeks, "talking with faculty chairs and departments to learn faculty concerns." This semester the major focus of the faculty will be the "results of the strategic financial planning process which has taken place over the past year and a half," Peeler said.

Special meetings will be held to discuss this issue on Sept. 25 and Oct. 21 and 28.

PBS from page 1

ment and community leaders will be given 100 tickets.

To reserve a ticket, each student must present their ID at the Weis Center box office. One ticket will can be reserved per student, and they are available on a first come, first served basis. Students can pick up their individual ticket only. Faculty and staff tickets are available beginning Monday at noon in the Weis Center box office.

Each employee may receive two tickets after showing his or her Bucknell ID. Those with Bucknell IDs, but not employed by the University, are not entitled to tickets with their ID's. Faculty and staff must also pick up their own tickets. The night of the broadcast, television screenings of the debate will be shown in the Vaughn Literature Auditorium and on other screens to accommodate the overflow crowd.

In celebration of Bucknell's Sesquicentennial year, the alumni association petitioned to have the debate at Bucknell. Ben Eliot '67 and other alumni wanted something to bring national attention to the University.

The board requested simply to have the show air here, but with the timing so close to the presidential election and the fact that Pennsylvania is a key state, PBS decided to film the debate here instead. "A lot of things came together to make this event possible," Eliot said.

The Bucknell Alumni Association is excited to be sponsoring such an event. "We are tremendously excited about the "Firing Line" debate at Bucknell," said Sharon Poff, co-chair of the Sesquicentennial Steering Committee and director of public relations and publications.

"The debate will give the Bucknell community a wonderful opportunity to see and hear some of the major political players of our time."

See OPS

APPLESEEDS from page 1

A central focus of the deli has been to provide an alternative for students says Stilin. It is a change from institutional-style cafeteria food. Appleseeds tries to serve what Stilin refers to as "comfort food," the type of food you get at home.

Created out of the vision of three Bucknell alumni, Kate (Ulmer) Stilin '76, Bob Reicherter '76 and Betsey Reicherter '73, Appleseeds opened its doors in November 1991. Although the area had several delis at the time, these three entrepreneurs wanted to offer the community something it didn't already have—a New York style deli that served both ethnic and vegetarian items.

For the past two years, Stilin has been the sole proprietor of Appleseeds. Having been in Lewisburg for 24 years, Stilin said, "I came to Bucknell in 1972 and never left."

On Sept. 28, Appleseeds' last day of business, Stilin is having a "good-bye" party for all of her old "apple-people."

News Briefs

National News

More U.S. fighters sent to the Persian Gulf

WASHINGTON — Defense Secretary William Perry said Yesterday afternoon F-117 "Stealth" fighters are being sent to the Persian Gulf region in preparation for possible military responses to new provocations by Saddam Hussein. Pentagon sources said eight of theradar-evading planes are involved.

Yesterday, Iraq fired a surface-to-air missile at a pair of U.S. F-16s. The fighter jets on patrol over the northern no-fly zone were not hit. In separate incidents, an Iraqi MiG-25 jet fighter and a military helicopter defied U.S. warnings and flew into the no-fly zone in southern Iraq. No U.S. action was taken, however, Iraq will "very soon learn' the U.S. is not playing games," Perry said Wednesday.

Bruton appeals for final end to IRA violence

WASHINGTON — Irish Prime Minister John Bruton called yesterday for a final end to violence by the Irish Republican Army so that peace might finally be achieved in Northern Ireland. "That can only happen when everyone has been convinced that violence will never again be used to intimidate opponents, or to control supporters. Never again," Bruton said in a speech delivered to a joint meeting of the U.S. Congress.

Bruton said that differences — such as the centuries-old conflict between Catholics and Protestants in Northern Ireland — should not be barriers to a democratic coming-together of the region's peoples for common benefit. "We're not asking Unionists to cease to be loyally British," he said. "Nor are we asking nationalists to cease to be loyally Irish." Instead, he said, the peoples of Northern Ireland should acknowledge their differences and move beyond procedure toward a genuine negotiation for peace.

Same-sex marriage trial opens in Hawaii

HONOLULU — Hawaii prosecutors have returned to court to defend the state's ban on same-sex marriages, putting on a psychiatrist who testified that children do best when parents have a genetic stake in their progress. Biological parents "have an instant kind of feeling for the child and are willing to do anything for that baby," Dr. Kyle Preutt of Yale University School of Medicine told a Circuit Court judge on Tuesday.

Preutt's testimony was meant to bolster defense of the state's refusal to grant marriage licenses to same-sex couples, a policy Hawaii's Supreme Court all but declared unconstitutional three years ago.

The trial is being closely watched around the country. Because the U.S. Constitution requires states to recognize one another's laws, gay marriages performed in Hawaii might well have to be recognized in other states.

However, the trial opened just as the U.S. Senate gave final congressional approval to the Defense of Marriage Act, which would bar federal recognition of same-sex marriages and allow states to do the same.

Fewer Americans get health insurance at work

WASHINGTON (AP) — American work life has changed, but health insurance hasn't changed with it, the American Hospital Association charged in releasing a new report. The report shows that 73.9 percent of Americans had health insurance from their employers in 1995, down from a high of 77.7 percent in 1990. The percentage is likely to keep dropping, the study concluded.

The decline can be traced to a fundamental change in American work life, with more Americans working part time, working in service industries, working for more than one employer and changing jobs more frequently, said Carmela Coyle, the association's vice president for policy. This makes them less likely to have insurance, she explained.

World News

Rabin's assassin, two others convicted

TEL AVIV, Israel — The convicted killer of Yitzhak Rabin, his brother and a friend were found guilty yesterday of conspiring to kill the Israeli prime minister. Yigal Amir, 26, is serving a life sentence for killing Rabin at a Tel Aviv peace rally last November. The Tel Aviv District Court convicted him, his brother Hagai and their friend Dror Adani for plotting against Rabin.

The three men were also found guilty yesterday of illegal weapons possession and conspiring to attack Palestinians. "We have decided unanimously to convict all three suspects of all the charges brought against them," said Judge Amnon Strashnov, head of the three-judge panel. Sentences will be handed down October 3.

U.N. endorses nuclear test ban treaty

UNITED NATIONS — The United Nations General Assembly endorsed a landmark ban on all nuclear test blasts Tuesday, but pivotal opposition could block it from being technically enforceable. The five declared nuclear powers — the United States, Russia, France, Britain and China — supported the Comprehensive Nuclear Test Ban Treaty. They also are the U.N. Security Council's permanent members. President Clinton is expected to sign the treaty when he visits New York for the General Assembly in two weeks. But India and rival Pakistan have said they will not sign it. The treaty must be signed and ratified by the 44 nations known to have nuclear reactors, including India and Pakistan, to have the force of law.

The overwhelming support for the treaty could pressure countries to honor the ban even if they refuse to sign the agreement.

Free abortions stir controversy in Russia

MOSCOW—Every year, millions of Russian women undergo an abortion. A typical Russian woman will have between three and five abortions in her lifetime, health officials say. Limited and expensive contraceptive choices have made abortions an often sad but relatively acceptable birth control method in Russian society.

In this society, recent legislation has provoked deep controversy.

Russia's government is making free abortions available to women who fall into several newly-defined categories, through their 22 week of pregnancy. The group includes: the homeless, those living beneath the poverty line and registered refugees. "Why are we doing this? Because such cases have become a reality of life," said Russian deputy health minister Nikolay Vaganov. "We cannot neglect them."

Teachers protest in their underwear

NEW DELHI, India (AP) —Thousands of teachers from the eastern state of Bihar gathered for a demonstration in Delhi Thursday, protesting against non-payment of salaries for the last 15 years. Clad only in their underwear, the teachers planned to march to the President's residence. They said they were on the verge of starvation and blamed the state government of Bihar. Their protest fell on Teacher's Day, when the Indian President acknowledges some of the country's outstanding educators.

Bihar is notorious for government mismanagement and frequent corruption scandals. The educators said the partially nude protest was to highlight how they not only felt stripped of cash—but also felt stripped of their pride. More than a hundred teachers have reportedly committed suicide in frustration.

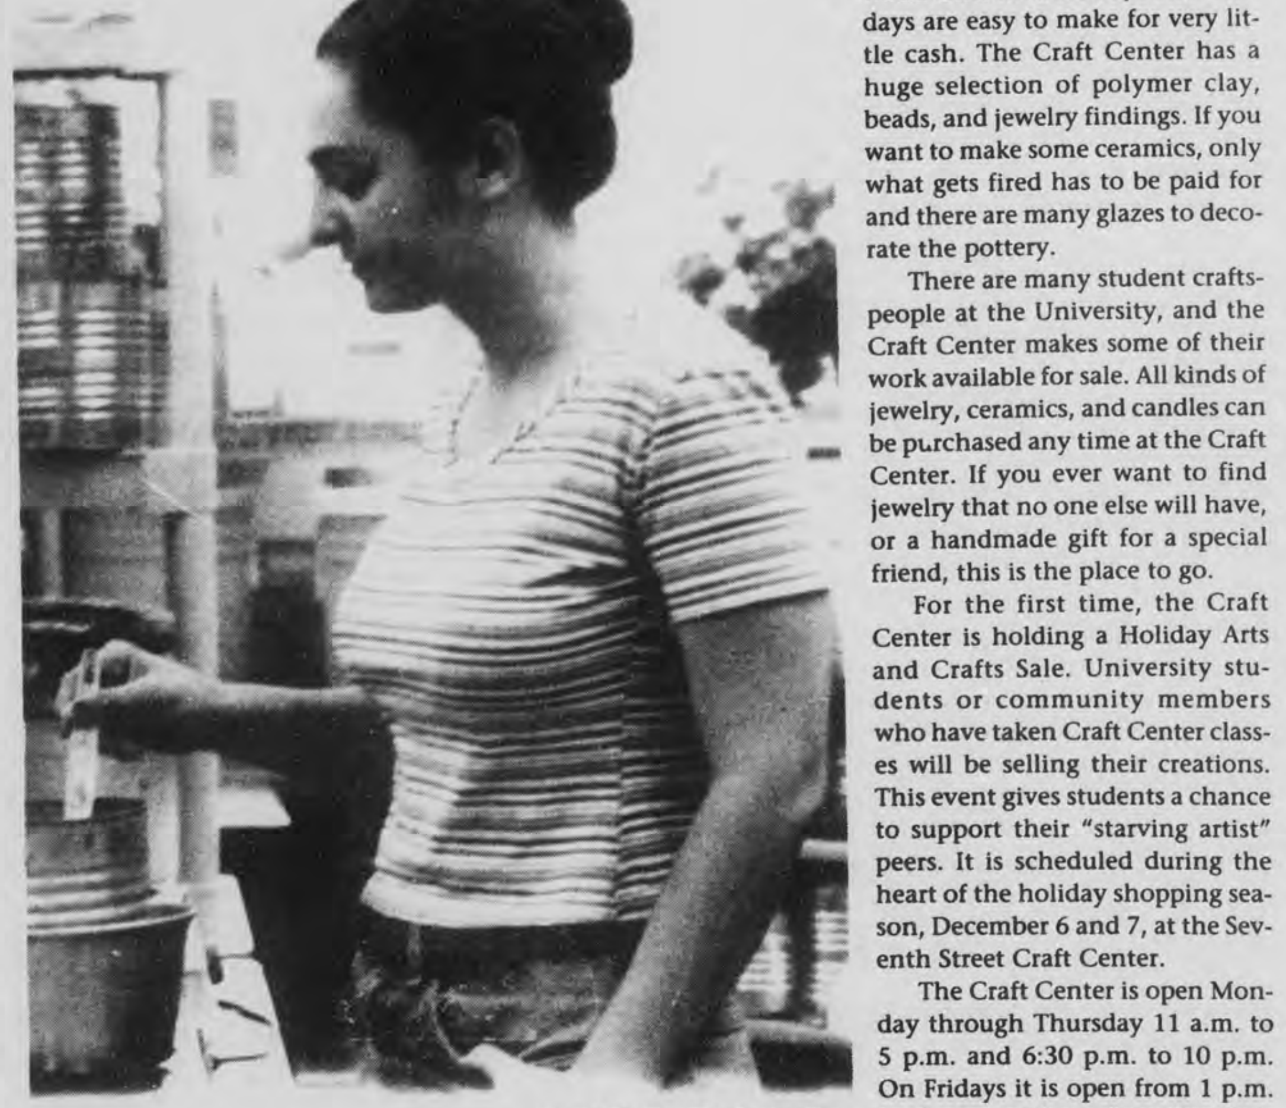
Craft Center celebrates 25th anniversary

Dustin Riccio—The Bucknellian



Dustin Riccio—The Bucknellian

Above: *There are a variety of crafts that can be made in the University's Craft Center. The center is celebrating it's 25th anniversary this year.*

Right: *Carmen Murphy '97 focuses on stirring the ingredients for a creative product. Classes are offered in the Craft Center, as well as the tools for independent projects.*

BY CARMEN MURPHY

This year marks the 25th anniversary of the University Craft Center. In 1971, Director Molly Ross opened the "Craft Shop" in the University Center as a place for students to make crafts and learn new skills. It remained there for 18 years. In 1989, the center moved to Hunt Hall for the next three years. Finally, the Craft Center was relocated to the "Old Bison" on the corner of Seventh Street and Moore Avenue, where it can be found today.

Ross has spent 25 years making the Craft Center a place where students can be creative and learn skills that they will keep for their entire life. Anyone who has been involved with the center can see that she has a huge job keeping the shop running for the use of all students. This is not only the Craft Center's 25th anniversary, but Ross' 25th anniversary as director.

The Craft Center is a place where University students and community members can meet. Pennsylvanians from about 24 counties subscribe to the Craft Shop's mailing list. Classes and activities incorporate both students and community members and lead to relationships that may not have been formed otherwise.

Every year the Craft Center offers a variety of classes. This year, there is everything from basketmaking to pastel portraits to leather working to polymer clay jewelry. There are even cooking classes including Italian cooking, tortillas and chili pepper cookery, and holiday cookies. For only the cost of supplies, there are one-day mini-classes for tie-dying, candle-making, and jewelry. The Craft Center also provides several youth classes. Most of the classes cost between $14 and $16 plus supplies. The classes are for the enjoyment and benefit of the participants. It is an opportunity for students to learn crafts and life-long skills when they might not otherwise have the chance.

These classes are open to all students and those affiliated with the University. Community members who are not affiliated with the University may use the Craft Center when they buy a class membership. Sign-ups for classes will be held in the Langone Center Monday through Friday from11 a.m. to 1 p.m. or in the Craft Center during any hours.

You don't have to take a class to come down and use the Craft Center. You can use many of the tools and supplies free of charge. There are dyes for tie-dying, all kinds of paints, pottery wheels, woodworking equipment, a kitchen, and much more.

There are many craft supplies that can be purchased at a low cost. Sheets and T-shirts are popular for tie-dying and painting, especially during Greek big/little week! Gifts for birthdays and holidays are easy to make for very little cash. The Craft Center has a huge selection of polymer clay, beads, and jewelry findings. If you want to make some ceramics, only what gets fired has to be paid for and there are many glazes to decorate the pottery.

There are many student craftspeople at the University, and the Craft Center makes some of their work available for sale. All kinds of jewelry, ceramics, and candles can be purchased any time at the Craft Center. If you ever want to find jewelry that no one else will have, or a handmade gift for a special friend, this is the place to go.

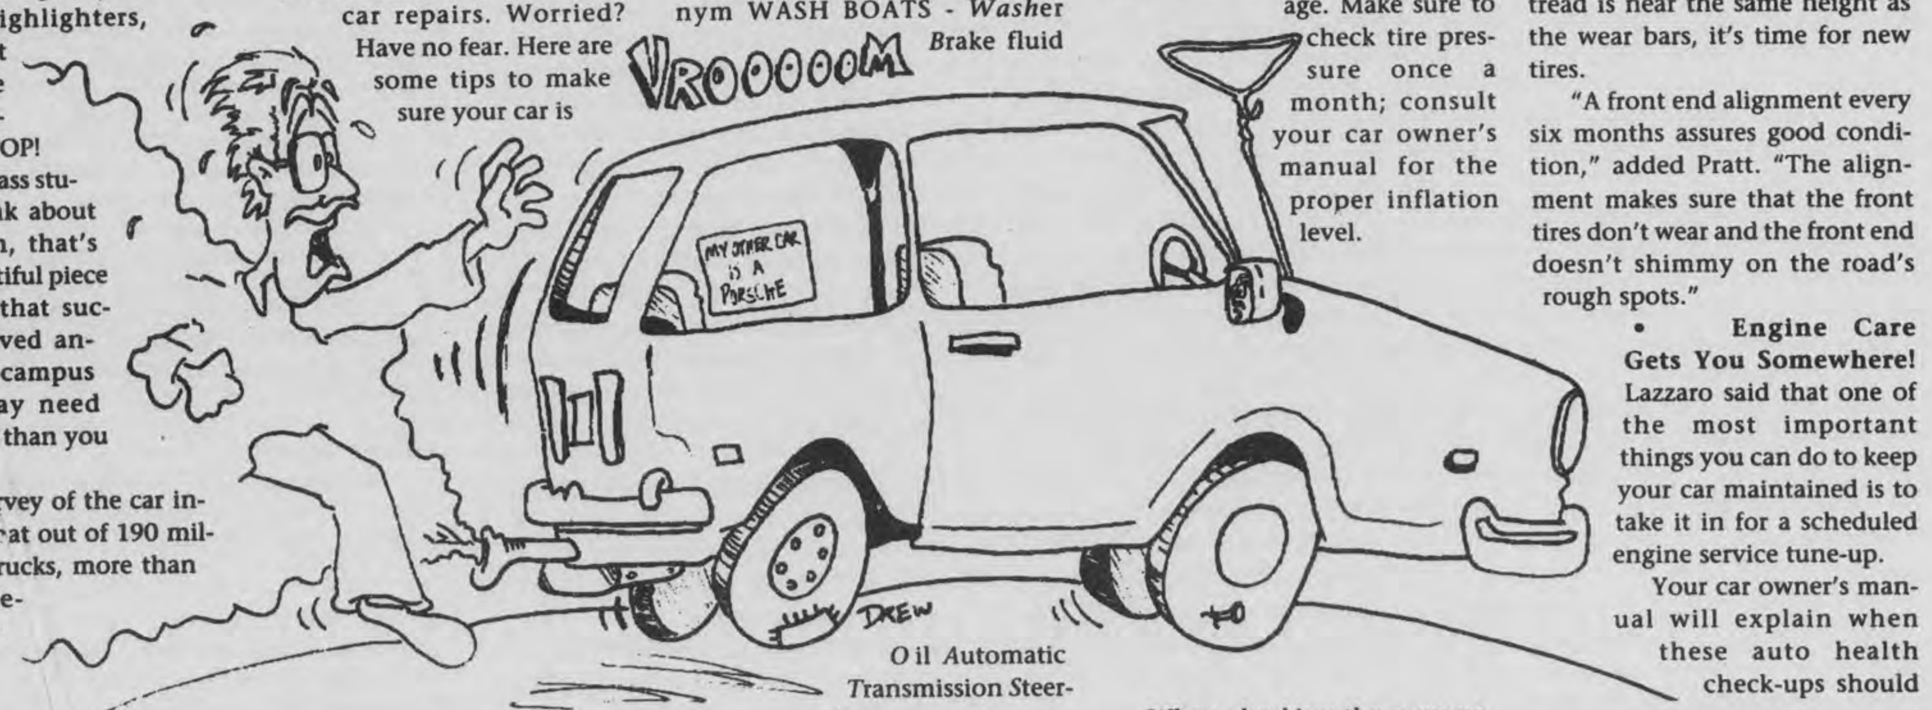
For the first time, the Craft Center is holding a Holiday Arts and Crafts Sale. University students or community members who have taken Craft Center classes will be selling their creations. This event gives students a chance to support their "starving artist" peers. It is scheduled during the heart of the holiday shopping season, December 6 and 7, at the Seventh Street Craft Center.

The Craft Center is open Monday through Thursday 11 a.m. to 5 p.m. and 6:30 p.m. to 10 p.m. On Fridays it is open from 1 p.m. to 5 p.m. and on Saturdays it is open 11 a.m. to 5 p.m. There are certain supplies that can only be purchased when Ross is on sight. Her hours are 11 a.m. to 5 p.m. Monday through Wednesday, and Thursday nights.

So, this year celebrate the Craft Shop's 25th anniversary by taking some classes, buying some students' work, or by just coming in and being creative.

Keep your car happy and healthy this year

BY TED BURNES



VROOOOOM
MY OTHER CAR IS A PORSCHE
DREW

Okay, so you're back at school. You've got your books, your highlighters, your Perkins gift certificate...the year is going superbly, right? STOP! Did you upperclass students ever think about your car? Yeah, that's right, that beautiful piece of machinery that successfully survived another back-to-campus nightmare may need more attention than you think.

A recent survey of the car industry shows that out of 190 million cars and trucks, more than 50 percent require some kind of emergency service each year, mostly due to lack of upkeep and failure to see warning signs of the automobile's disrepair.

"By following a regularly scheduled maintenance service schedule, consumers may avoid many breakdowns and costly repairs," said Pat Lazzaro, a race car driver and mechanic who teaches car care workshops around the country.

Lazzaro says that following a regularly scheduled maintenance program could save Americans as much as a half a billion dollars per year in emergency service and car repairs. Worried? Have no fear. Here are some tips to make sure your car is running smoothly:

- **Change the' fluids.** Whether you do it yourself, or have an automotive shop do it for you, the fluids in your car must be in good condition and remain at the proper levels.

"Coolant should be kept up to make sure the car does not overheat during long trips. Also, if the car is an automatic, the transmission fluid should be maintained regularly," advised Bob Pratt, a service mechanic at the Mifflinberg Amaco.

Lazzaro remembers what fluids need changing by using the acronym WASH BOATS - *Wash*er *B*rake fluid *O*il *A*utomatic *T*ransmission *S*teering.

Pratt agrees that a regular oil change is essential to keep your car in good working condition. "Have the oil changed every 3,000 to 4,000 miles, and make sure to get a fresh filter put in with every oil change," he said.

- **Check the tires regularly.** Tires are extremely important, and, as Lazzaro stated, "One does not have to be a mechanic to know what to inspect."

The single greatest cause of tire damage is improper inflation. Everyday stress from the road causes tires to lose pressure, resulting in irregular tread wear and poor mileage. Make sure to check tire pressure once a month; consult your car owner's manual for the proper inflation level.

When checking the pressure, first observe the tread depth of the tire. Most commercial tires have wear bars—some raised points of rubber on the grooves that show up when tires are worn. If your tread is near the same height as the wear bars, it's time for new tires.

"A front end alignment every six months assures good condition," added Pratt. "The alignment makes sure that the front tires don't wear and the front end doesn't shimmy on the road's rough spots."

- **Engine Care Gets You Somewhere!** Lazzaro said that one of the most important things you can do to keep your car maintained is to take it in for a scheduled engine service tune-up.

Your car owner's manual will explain when these auto health check-ups should take place. Follow it just as you would take a prescription for your own physical health!

- **Need more info? Not a problem!** If your car does need emergency attention or a special part, look no further—information is practically staring you in the face. Check out the web site http://www.autohelp.com.

An auto-illiterate person's dream, Autohelp has lots of reference information about spare parts (directories, prices, etc.), car care tips and even used and new car price guides and car export services. You can also write to: Car Care Tips, Bridgestone/Firestone, 2550 W. Golf Rd., Rolling Meadows, IL 60008.

Following the tips above should give your car a long and happy life. Just remember that it's your car who got you and your junk up here—it deserves a little attention too!

Faculty chair to promote mutual understanding

Kathryn Wrightson—The Bucknellian

John Peeler, professor of political science, is the new faculty chair.

By Kathryn Wrightson

Bucknellian Staff Writer

The first faculty meeting of the school year opened Monday with a fairly routine agenda; the introduction of new faculty and remarks by the president and his staff. However, this year there was a new faculty chair directing the meeting. John Peeler, the new faculty chair and professor of political science, was elected last spring to a four year term.

Peeler, a professor for 29 years, sees his main goal as "simply to preside over the meetings that occur" with faculty and administration during the months of September through December and February through April.

"In addition to that, I am a faculty spokesperson where needed," said Peeler. Peeler represents the faculty, "at the semi-annual Board of Trustees meetings and with the president and administration."

"I expect to spend a lot of time with the president and the chairman of the Board of Trustees. Informally this will be a very important part of my job," Peeler said.

During his term, Peeler plans to work closely with the faculty to promote "mutual understanding among the different constituencies within the University." Faculty, administration, the Board of Trustees and students have "different concerns and perspectives. They are not negative, but mutual respect and mutual confidence" must be encouraged, Peeler said.

In this way all the factions will be "able to realize the common interest we all have in making Bucknell University successful," Peeler said.

Peeler recognized the very central role faculty has at the University. "The Faculty is at the very center of what the University does, and bears an obligation to strengthen and defend the academic focus of the University," said Peeler. "I will also devote much energy to promoting communication and cohesion among us [faculty members]," Peeler said

Peeler has been spending time in the past weeks, "talking with faculty chairs and departments to learn faculty concerns." This semester the major focus of the faculty will be the "results of the strategic financial planning process which has taken place over the past year and a half," Peeler said.

Special meetings will be held to discuss this issue on Sept. 25 and Oct. 21 and 28.

PBS from page 1

ment and community leaders will be given 100 tickets.

To reserve a ticket, each student must present their ID at the Weis Center box office. One ticket will can be reserved per student, and they are available on a first come, first served basis. Students can pick up their individual ticket only. Faculty and staff tickets are available beginning Monday at noon in the Weis Center box office.

Each employee may receive two tickets after showing his or her Bucknell ID. Those with Bucknell IDs, but not employed by the University, are not entitled to tickets with their ID's. Faculty and staff must also pick up their own tickets. The night of the broadcast, television screenings of the debate will be shown in the Vaughn Literature Auditorium and on other screens to accommodate the overflow crowd.

In celebration of Bucknell's Sesquicentennial year, the alumni association petitioned to have the debate at Bucknell. Ben Eliot '67 and other alumni wanted something to bring national attention to the University.

The board requested simply to have the show air here, but with the timing so close to the presidential election and the fact that Pennsylvania is a key state, PBS decided to film the debate here instead. "A lot of things came together to make this event possible," Eliot said.

The Bucknell Alumni Association is excited to be sponsoring such an event. "We are tremendously excited about the "Firing Line" debate at Bucknell," said Sharon Poff, co-chair of the Sesquicentennial Steering Committee and director of public relations and publications.

"The debate will give the Bucknell community a wonderful opportunity to see and hear some of the major political players of our time."

APPLESEEDS from page 1

A central focus of the deli has been to provide an alternative for students says Stilin. It is a change from institutional-style cafeteria food. Appleseeds tries to serve what Stilin refers to as "comfort food," the type of food you get at home.

Created out of the vision of three Bucknell alumni, Kate (Ulmer) Stilin '76, Bob Reicherter '76 and Betsey Reicherter '73, Appleseeds opened its doors in November 1991. Although the area had several delis at the time, these three entrepreneurs wanted to offer the community something it didn't already have—a New York style deli that served both ethnic and vegetarian items.

For the past two years, Stilin has been the sole proprietor of Appleseeds. Having been in Lewisburg for 24 years, Stilin said, "I came to Bucknell in 1972 and never left."

On Sept. 28, Appleseeds' last day of business, Stilin is having a "good-bye" party for all of her old "apple-people."

National News

More U.S. fighters sent to the Persian Gulf

WASHINGTON — Defense Secretary William Perry said Yesterday afternoon F-117 "Stealth" fighters are being sent to the Persian Gulf region in preparation for possible military responses to new provocations by Saddam Hussein. Pentagon sources said eight of theradar-evading planes are involved.

Yesterday, Iraq fired a surface-to-air missile at a pair of U.S. F-16s. The fighter jets on patrol over the northern no-fly zone were not hit. In separate incidents, an Iraqi MiG-25 jet fighter and a military helicopter defied U.S. warnings and flew into the no-fly zone in southern Iraq. No U.S. action was taken, however, Iraq will "very soon learn' the U.S. is not playing games," Perry said Wednesday.

Bruton appeals for final end to IRA violence

WASHINGTON — Irish Prime Minister John Bruton called yesterday for a final end to violence by the Irish Republican Army so that peace might finally be achieved in Northern Ireland. "That can only happen when everyone has been convinced that violence will never again be used to intimidate opponents, or to control supporters. Never again," Bruton said in a speech delivered to a joint meeting of the U.S. Congress.

Bruton said that differences — such as the centuries-old conflict between Catholics and Protestants in Northern Ireland — should not be barriers to a democratic coming-together of the region's peoples for common benefit. "We're not asking Unionists to cease to be loyally British," he said. "Nor are we asking nationalists to cease to be loyally Irish." Instead, he said, the peoples of Northern Ireland should acknowledge their differences and move beyond procedure toward a genuine negotiation for peace.

Same-sex marriage trial opens in Hawaii

HONOLULU — Hawaii prosecutors have returned to court to defend the state's ban on same-sex marriages, putting on a psychiatrist who testified that children do best when parents have a genetic stake in their progress. Biological parents "have an instant kind of feeling for the child and are willing to do anything for that baby," Dr. Kyle Preutt of Yale University School of Medicine told a Circuit Court judge on Tuesday.

Preutt's testimony was meant to bolster defense of the state's refusal to grant marriage licenses to same-sex couples, a policy Hawaii's Supreme Court all but declared unconstitutional three years ago.

The trial is being closely watched around the country. Because the U.S. Constitution requires states to recognize one another's laws, gay marriages performed in Hawaii might well have to be recognized in other states.

However, the trial opened just as the U.S. Senate gave final congressional approval to the Defense of Marriage Act, which would bar federal recognition of same-sex marriages and allow states to do the same.

Fewer Americans get health insurance at work

WASHINGTON (AP) — American work life has changed, but health insurance hasn't changed with it, the American Hospital Association charged in releasing a new report. The report shows that 73.9 percent of Americans had health insurance from their employers in 1995, down from a high of 77.7 percent in 1990. The percentage is likely to keep dropping, the study concluded.

The decline can be traced to a fundamental change in American work life, with more Americans working part time, working in service industries, working for more than one employer and changing jobs more frequently, said Carmela Coyle, the association's vice president for policy. This makes them less likely to have insurance, she explained.

Rabin's assassin, two others convicted

TEL AVIV, Israel — The convicted killer of Yitzhak Rabin, his brother and a friend were found guilty yesterday of conspiring to kill the Israeli prime minister. Yigal Amir, 26, is serving a life sentence for killing Rabin at a Tel Aviv peace rally last November. The Tel Aviv District Court convicted him, his brother Hagai and their friend Dror Adani for plotting against Rabin.

The three men were also found guilty yesterday of illegal weapons possession and conspiring to attack Palestinians. "We have decided unanimously to convict all three suspects of all the charges brought against them," said Judge Amnon Strashnov, head of the three-judge panel. Sentences will be handed down October 3.

U.N. endorses nuclear test ban treaty

UNITED NATIONS — The United Nations General Assembly endorsed a landmark ban on all nuclear test blasts Tuesday, but pivotal opposition could block it from being technically enforceable. The five declared nuclear powers — the United States, Russia, France, Britain and China — supported the Comprehensive Nuclear Test Ban Treaty. They also are the U.N. Security Council's permanent members. President Clinton is expected to sign the treaty when he visits New York for the General Assembly in two weeks. But India and rival Pakistan have said they will not sign it. The treaty must be signed and ratified by the 44 nations known to have nuclear reactors, including India and Pakistan, to have the force of law.

The overwhelming support for the treaty could pressure countries to honor the ban even if they refuse to sign the agreement.

Free abortions stir controversy in Russia

MOSCOW—Every year, millions of Russian women undergo an abortion. A typical Russian woman will have between three and five abortions in her lifetime, health officials say. Limited and expensive contraceptive choices have made abortions an often sad but relatively acceptable birth control method in Russian society.

In this society, recent legislation has provoked deep controversy.

Russia's government is making free abortions available to women who fall into several newly-defined categories, through their 22 week of pregnancy. Commercialism threatens Lewisburg

Incoming national franchise threatens Lewisburg's small town atmosphere

Imagine a Market Street decorated with flashing lights and neon signs. Just think about Lewisburg, which has traditionally been hailed for its quaint shops and small-town atmosphere, transformed into a road lined by fast food chains and big-name franchises.

With the small additions of McDonalds and Subway, this scenario may not seem plausible. But a commercialism trend may be starting. The popular Appleseeds, a New York-style deli, recently lost its lease and could be replaced by a fast food-style cafeteria line.

Another chain? Granted, it's hard for students without a car or extra time to get to Route 15 for fast food. Many students welcomed McDonalds and Subway to Market Street. But enough is enough.

One of the attractions of Bucknell is the small town atmosphere that surrounds it. Because of the recent trend of commercialism, Lewisburg's quaintness is in jeopardy. The town's atmosphere is being threatened by the number of outside businesses that are beginning to appear on Market Street.

As the University gains a positive repu tation on a national scale, it is only understandable that more businesses will attempt to make money off its rising image. Popular chains will undoubtedly enjoy a better financial success than local businesses because their names are known among students and they have the capital to offer competitive prices. These outside stores will cater to students in their quest for quick service and increased convenience. Some students may very well agree that whatever is made for them obviously benefits them.

But these students need to take a look at the facts. Appleseeds was created by Bucknellians for Bucknellians. Three graduates of the University decided it was time for Lewisburg to broaden its eating appeal with a New York-style deli, and Appleseeds was born. Like Appleseeds, many local businesses are geared toward students.

As Appleseeds goes out of business, members of the University and Lewisburg need to take strides to stop the rise of commercialism in the town before the trend becomes impossible to reverse. Students and citizens need to advocate small-town businesses in order to maintain Lewisburg charm.

The Town Planning Committee should place a cap on the number of franchises that can be located on Market Street. Because these outside businesses are looking for students to be their main source of revenue, Bucknellians need to voice their opposition to any additional chains.

If we do not act now, five years down the road, we may come back to a town we do not recognize.

OPINIONS

Rush excludes those found unsuitable

Greek system overshadows the individuality and self-awareness of its members

BY ELLEN MCWHORTER

Bucknellian Staff Columnist

Rush in '96. It's not what you might be thinking. As an advocate of self-awareness and honesty, I have no interest in politics. The "rush" I am referring to is the well-known yet rarely understood Greek system of induction into the fraternities and sororities of Bucknell University. For the past two weeks I have silently witnessed what I consider to be an embodiment of the destructive societal constructs, rush, as individuality is (as usual) bastardized. As I sat pondering what I had seen (and why one would willingly subject themselves to this bastardization), the pledge class '96 continued to put itself to the test. Here are my thoughts and observations on a ritual that I find most upsetting.

Am I good enough to be made a sister/brother in the sorority/fraternity of my choice? Was I witty enough? Attractive enough? Were they impressed by anything I did? Did they realize that I am more special than the others? Will I get the bid?

The Greek system is designed to include those persons most suitable to uphold the standards of each respective fraternity or sorority, while excluding those persons deemed unacceptable. Each fraternity and sorority sets its own individual standards, on which the pledges will be judged. It is a fact that as an elitist society, there will be exclusions. If there is space for 10 sisters and 15 "suitable" women apply, the standards will be raised so that only 10 of the 15 survive round three. The five women who were rejected are then left to lick their own wounds as they question what made the others *more* suitable.

Why bother subjecting oneself to this kind of sacrifice? It seems as if each potential sister/brother forfeits his/her individual reason (and sensitivity) for the possibility of becoming one of the chosen few. Think about it. They are essentially setting out to be judged on the basis of a few brief conversations, along with whatever might be easily observed during these conversations (appearance, mannerisms etc.).

Is this logical? Can one bare their soul in an uncomfortable three minutes and walk away feeling well understood? And by offering oneself to the collective judge, it is recognized that if one is deemed more suitable, then another will be rejected. Selfish desire, collective acceptance and validation's gem of complacency seemingly shines brighter than that of self-awareness and compassion.

A group of self-aware individuals joined by a bond of common interest, feeling, understanding, etc. is a beautiful thing. Understanding oneself, one's motivations, one's passions, and one's beliefs is the bridge which so many people seem to avoid. It links the honest self with the consolidated non-self, thus freeing one from the pains of low self-confidence, the need for collective social acceptance, the confusion of truth and parasitic dishonesty.

This is what the Greek system should aspire to be. I suggest that it promote individual understanding, which would necessarily lead to the assimilation of actual similar individuals rather than those who appear "similar" after the three minute conversation. The elitist principle would be eliminated, as each member would be as valuable as the next. Individuality would remain within the group, and the bastardization would end, at least in this social arena of life.

Student body burned by the 'Firing Line'

Proposed ticket distribution numbers for televised PBS debate are unevenly skewed

BY NICOLE MAESTRI

Bucknellian Staff Columnist

Who would have thought that Campaign '96 would come to Bucknell's campus? The "Firing Line," a PBS election debate, is going to be broadcast live on October 19 from the Weis Center. Free tickets are being given away starting Saturday morning. Although the entire panel has not yet been confirmed, it is scheduled to include William Buckley, Jr., founder of "Firing Line," Henry Kissinger and Newt Gingrich. It's just too bad most of us are not going to be able to attend it.

A system has been devised to distribute tickets for this debate. Saturday morning, 350 tickets will be made available to students on a first-come, first-served basis. Remember, you must have your BU ID and you can only pick up your individual ticket. On Monday, faculty and staff will be allowed to pick up their allocated 150 tickets. Of the 550 tickets remaining, 350 are being offered to alumni and parents, 100 go to the Bucknell Board of Trustees, and 100 are set aside for government and community leaders.

Roughly, that means that only 10 percent of our student body is going to have a chance to see this live broadcast. The other 90 percent of us can watch it on television like the rest of the country. Never mind that this event is being taped 100 feet from your dorm room, just flip on your television and watch it in the comfort of your own room. Oh whoops, considering the fact that there is no cable in the dorms, that is going to be a little bit difficult. Well, feel free to pack the lounges, it's as close as you are going to get to the action.

It is understandable that tickets have to be limited. Seating in the Weis Center had to be restricted to 1,050 in order to accommodate the television camera crews videotaping the event.

But Bucknell, before being anything else, is an educational institution. We, the students, should be given any and every opportunity possible to take advantage of the resources this University has available. A little piece of history is going to happen right on our campus and the vast majority of us are not going to be able to witness it.

If tickets must be limited then they should be limited fairly. Why is that tickets are available for 15 percent of staff and faculty, but only 10 percent of the entire student body? If television is good enough for the majority of students to watch the debate on, than so too should it be good enough for staff, faculty, alum, Trustees, and community leaders to watch it on.

No solution is perfect in a situation such as this and it is hard to accommodate everyone's needs. But we are the student body, the thousands of people who have chosen Bucknell as the place we want to pursue our education. We should at least be given an equal opportunity to see this once-in-a-lifetime broadcast.

No solution is perfect in a situation such as this and it is hard to accommodate everyone's needs. But we are the student body, the thousands of people who have chosen Bucknell as the place we want to pursue our education. We should at least be given equal opportunity to see this once-in-a-lifetime broadcast.

Orientation overemphasizes diversity

First-Year students should be encouraged to concentrate on future and not the past

BY NORA DANIELS

Since the first day of orientation, my fellow freshmen and I have been overwhelmed with talk of diversity and the importance of acceptance. We have all been involved in discussions about the problems of prejudice and bias. I think that while these issues are important, it is now time for us to turn our backs on our differences and diversities, and instead look toward our future.

We share the obvious common link of Bucknell, and we share the community of Lewisburg. Now we can find out what else we have shared in the past, share today, and will share in the future. Appreciating that we have differences, we will dwell not on how they separate us, but how they bring us together in school, in life, and in thought.

Basically, to me, it comes down to this: Does someone's background, especially ethnicity, education, and race, need to preclude new relationships here?

> ***Appreciating that we have differences, we will dwell not on how they separate us, but how they bring us together in school, in life, and in thought.***

Most of us will agree that this is not necessary, but it has happened here. Groups form, formally and informally, along these perceived lines, excluding interaction and encouraging continued stratification.

Yes, this happens in the 'real world' too. People's diversity and differences may dictate everything from employment to home location.

While we are in college, though, we have the opportunity to change our views on these topics. This time of our lives has been traditionally set aside for us to find ourselves, but can it not be a time to also find others?

What would Bucknell be like if each of us, freshmen through seniors, looked the problems of diversity in the face and smiled, knowing that here we can learn to accept others for what they are and will be, unbiased by their differences and background? Then, when we all enter the 'real world,' we will have a new understanding of diversity.

OPINIONS

The Bell Curve is headed on a downward slope

BY THOMAS NGUYEN

Bucknellian Staff Columnist

While perusing through the current issue of *Vanity Fair* (September 1996), I came across an article poking fun at Mensa, "the semi-exclusive organization of the highly IQ'd" which celebrated its 50th birthday this summer. Imagine my surprise and excitement to see a photograph of a friend of mine, who is a (non-active) member, scattered among others throughout the irreverent piece.

The column's satirical punches were aimed directly at Mensa's closed circle of intellectuals, some of whom many would consider to be "thoughtful" fanatics. One pun in particular raises the question, "If its members are so smart, how come the organization serves mainly as a dating service for dorks?"

In reading the article, I learned that Mensa means in Latin, of all things, "table." Even the invitation printed across the society's application sounds somewhat of an old cliché, "JOIN A SOCIETY WHERE NO TWO PEOPLE THINK ALIKE. BUT THEY DO THINK A LOT."

All of this ribbing is to be expected when any group is singled out for some of its unconventional ideals and practices. But aside from all the jokes and insults, the article did address some heavy issues that have been around for quite some time now, in this case, the differences in cognitive ability among people and whether or not IQ scores are reliable indicators of a person's intelligence. Perhaps this is why a couple of days after the whole issue of IQ was raised in my mind, I decided to checkout from the library a book I've been meaning to read for a while now.

When Richard Herrnstein and Charles Murray's *The Bell Curve* first hit the bookshelves in 1994, it immediately aroused great debate and skepticism among social scientists, journalists, and politicians over the validity of its content. And as expected, publication eventually rose to the top of *The New York Times* best-sellers list.

Some hot topics discussed in *The Bell Curve* are affirmative action, crime, welfare, and (supposed) ethnic differences in cognitive ability. The book in its entirety is about the differences in intellectual capacity among groups of people and what these variations mean for America's future.

It is important to note that *The Bell Curve* is written with regard to the Classicists' view of human intelligence. The book's findings are based on six basic (and questionable) assumptions.

First, there is such a thing as a general factor of cognitive ability on which human beings differ from one another. Second, the IQ test is a reliable source for measuring this g-factor. Third, IQ scores match whatever it is that people mean when they use the word "intelligent" or "smart" in ordinary language. Fourth, IQ scores remain stable over much of a person's life. Fifth, administered properly, IQ tests are unbiased against social, economic, or racial groups. And finally, cognitive ability is substantially inheritable between 40 and 80 percent.

One may be wondering what service Herrnstein and Murray expect to offer society by writing a book such as *The Bell Curve*? Well, there's no need to think of an answer, the authors extend one that they consider to be significant.

Herrnstein and Murray would like their readers to imagine, for a moment, our population dividing into two segments as the 20th century draws to a close. One group is made up of those who are welcomed at the best universities and graduate schools, and eventually move on to acquire the most prestigious and highest paying jobs. As their standard of living improves from year to year, these individuals begin to seek the company of others with similar status, and eventually isolate themselves from the rest of society. This is America's better half.

In the other segment, we see the opposite happening. Unfortunately for this group, life never seems to get better, and most of the time, things just get worse. These individuals acquire the most menial and underpaid jobs, if they are lucky to find any at all. Poverty, drugs, crime, and deviant behavior are commonplace, and "the traditional family all but disappears."

As the rift between the wealthy and poor widens, the presence of the latter and all the immoral qualities it embodies will eventually begin to pose a serious threat to the well-being of society's privileged half and the future of this country as a whole. When this happens, economists and law-makers working together will pass resolutions aimed at better education, economic growth, and greater job opportunity. Sounds reasonable. But according to Herrnstein and Murray, they will be ignoring one underlying factor- human intelligence. And there it is, a perfect rationale for writing a book such as *The Bell Curve*...... or is it?

Initially, this may seem to be somewhat of a valid reason for writing *The Bell Curve*, but eventually, it resembles nothing of the sort. If one thinks about it, Herrnstein and Murray are themselves guilty of looking at the dynamics of a class society in a skewed manner. Their reasoning is at best based on mere speculation. They unwittingly assume that the fate of our society rests in the hands of the despairing masses and that social disorder will likely arise from acts of persons of "lower cognitive ability." But it should seem reasonable to assume that such chaos Herrnstein and Murray refers to is just as likely to emanate within the confines of "the cognitive elite." In this way, Herrnstein and Murray's convictions lose their integrity.

Historians and social scientists look to the past in order to interpret the dynamics of our present society. I know of no one who would (openly) disagree with the assertion that most, if not all of humanity's past tragedies and sufferings are directly or indirectly attributed to persons of notable intelligence- Adolf Hitler and the inventors of the atom bomb come to mind. Maybe in this respect, IQ plays a role in determining the fate of society.

This is only one of many inconsistencies present in *The Bell Curve* that are worth mentioning. Most of the controversy surrounding this book stems from its view on affirmative action, crime, and ethnic differences in cognitive abilities. These topics and how they are linked to IQ as presented in *the Bell Curve* will be addressed in next issue of *The Bucknellian*.

Enthusiastic football team deserves equally enthusiastic student body

BY AMY YOUNGGREN

Bucknellian Staff Columnist

As we enter into the first Saturday of football season here at Bucknell, I find it appropriate to emphasize how important the support from the students and faculty of Bucknell is to our football team. Football at Bucknell seems to suffer greatly from lack of support from the University's students and faculty members.

Last season, with the arrival of eight new football coaches, including our new head coach Tom Gadd, our football team improved greatly. Specifically, the 1995 football Patriot League standings were at seven wins and four losses whereas in 1994 we were at five wins and six losses. The team has expressed great enthusiasm for this upcoming season, and they hope that because of this improvement the stands will be at least partially filled this season and eventually packed the season after that.

I sincerely hope that this Saturday we do not let them down, but surprise them instead with our overwhelming support for our school and our football program. In many of my experiences at sporting events, I have seen the spirit of the crowd significantly uplift the players and give them the competitive edge to win. Even if this does not always prove true, what does it hurt?

Many opinions have circulated as to why the spirit for Bucknell football seems so deficient. Some would say that the size of Bucknell inhibits participation and support, that because of our small student population we could never expect to have huge numbers in our stadiums.

It is true that we will never experience a raging crowd like that of Penn State, but it is all relative. If our stadium was filled with even half of the student body, games would be significantly different and support for Bucknell football would be obvious.

Some claim that the enormous size of our stadium for a school of 3,500 makes it impossible to fill with fans and disperses the so-called "cheering section" so that is loses all effect. However, after traveling to many of the away games last season, it became apparent that our stadium is perfectly adequate, that is, if it were filled. Also, efforts were made years ago to improve the concentration of the crowd when the entire semi-circle region on the side was replaced with the green Bucknell inscription.

Another concern, I believe, is the extent of the football tailgates at our home games. Last season, on average, the Bucknell tailgates ranged from about 10 to 20 cars. These consisted mostly of alumni, parents and families of the team.

At many, and most, universities around the country, tailgates are a popular way to socialize before the football game. Many Greek organizations and school sponsored groups organize tailgates for their members. It would show great school spirit and support for our team if the Greeks and other organizations could get involved in this way on Saturdays before the games.

I find it disturbing that as I read through the "What's Happening" and my email, there are so many groups that sponsor activities on Saturdays when there are home football games. I realize that there is more to life than just football and other things must carry on, however, it is saying something about the amount of support our students show for football.

My personal feeling is not that everyone has to be into football, but that everyone should be into the school of which they are a part. We definitely pay too much money to go to college not to get involved, especially when it's free. Yes, every home football game is free to all students with their student ID card. Also, the games do not start until 1:00, so this will not inhibit you from sleeping in.

The turnout at university football games most definitely reflects school spirit and overall support from the university. It is unfortunate that at Bucknell football games it looks as if most of the campus is hiding out in their rooms. This is probably not what most students are doing, but it does not convey a proper message to the team, parents, locals and visitors about the students of Bucknell.

This Saturday, September 14th is our first home game against Towson State, so come show your support and establish your own opinion about Bucknell and its school spirit.

Dole lags behind in race as Clinton seems guaranteed four more years

TODD ZERANSKI

Bucknellian Staff Columnist

As U.S. politics have been in a state of flux for the past two years, with Democrats fighting for the preservation of the status quo and Republicans for its dissolution, I think that it would be both mildly entertaining and beneficial to the country's welfare (possibly more than usual 25 percent of the polity may vote) if a competitive and tight Presidential race were now underway. Yet that seemingly isn't going to be happening this election year.

DEMOCRATS
CLINTON GORE

Barring some sort of major political upheaval, such as a renewal of the same spontaneous conservative fervor that swept across the country during the Congressional races of 1994, Clinton seems unbeatable. Or at least Dole is overly fallible. While it should come as no surprise that I am by and large a proponent of Clinton and his policies (his callously reckless welfare overhaul notwithstanding), I am not blinded by partisan rhetoric.

Dole just doesn't come across as an adroit challenger for the Presidency. While I am thankful for his years of service to the U.S. Congress, and awed by his wartime valor and accomplishment, he presents to me little in the way of a coherent and cogent message.

Coupled with his seeming obsession with character as a determinant of Presidential ability (this while he showcases none of it-when asked by a mother how he would advise her children on how to be good Americans, he cited the 10th Amendment), Dole stands alone, hopeless and lost.

This is not to say that I refuse to vote Republican solely because of Dole. Their social message is exclusionary, mean-spirited, and abhorrent—most obviously a consequence of the demagogues that run the party. Their official foreign-policy initiatives, such as in Bosnia and during the Mexican peso crisis, seem counter-intuitive. Finally, their incessant "investigations" into any instance that even smells slightly of possible political scandal—Nannygate, Travelgate, Whitewater, etc. is dubious at best and political prostitution at worst.

So as Dole and Clinton make the final turn into the home stretch with the former limping far behind, brace yourselves for the worst. It may get truly desperate.

Dole has already reconciled his past aversion to supply side economics by endorsing a 15 percent tax cut and choosing perhaps the most prominent and influential supply-side political economist out there in Jack Kemp. Just recently, he quietly fired his top two ad men because their ads weren't "tough" enough.

Clinton, on the other hand, is riding high at this stage of the game. According to Newsweek columnist Jonathan Alter, Clinton made about 175 campaign promises four years ago, and has kept about two thirds of them. Not bad.

The current political indication is that he will have four more years to work through the rest. But, until then, remember the absentee ballot and try to steer clear of the mud.

ARTS & ENTERTAINMENT

Contemporary, classical sound artist to perform

BY EMILY THORNE

The University's Gallery Series will embark upon its 12th season with a performance by the dynamic composer and performer Joan La Barbara.

The program, "New Sounds for the New Voice: The Viruosa in the Electronic Age," will include three pieces: "Conversations," for amplified voice only; "In the Dreamtime," for voice and multitrack tape; and "Shamansong," for voice, percussion and tape.

Joan La Barbara, one of the great vocal virtuosas of our time, performs one of her original acoustical compositions.

"One of the great vocal virtuosos of our time," according to the *San Francisco Examiner*, La Barbara is an established pioneer in the field of contemporary music and soundart.

"In the Dreamtime" is a collage of 17 of La Barbara's works created over the past 14 years. According to La Barbara, "it is arranged in 'dreamtime,' the illogical way one event follows another in dreams, instead of in chronological order."

"'Shamansong,'" La Barbara explained, "is a concert suite from a film score I composed for 'Anima,' which tells of a woman's journey into the desert, carrying the baggage of a lifetime. As there was no dialogue to the film, I wanted to create music that would correspond to the visual perspective of the film, done on location in the White Sands National Monument in New Mexico. The sound recordings reflect the natural acoustical situation, with ravens and echoes, wind and thunder."

La Barbara has devoted her career as a composer, performer, and sound artist to exploring the human voice as a multifaceted instrument.

She creates works for multiple voices, chamber ensembles, music theater, orchestra and interactive technology.

She has produced seven recordings of her own work, served as producer on recordings of music by John Cage and Morton Feldman, and has premiered landmark compositions written for her by reputable American composers such as Robert Ashley, John Cage, Philip Glass and Alvin Lucier.

Grants from Meet the Composer and the University's department of music help to fund the continuing series of performance art and experimental music that feature various artists including La Barbara.

Meet the Composer funding is provided with support from American Society of Composers, Authors and Publishers, the Metropolitan Life Foundation and the Pennsylvania Council on the Arts.

La Barbara's performance is free to the public. She will be performing in the Center Gallery at 8 p.m. on Tuesday. For more information, contact the department of music at 717-524-1239.

> ***"I wanted to create music that would correspond to the visual perspective of the film, done on location in the White Sands National Monument in New Mexico. The sound recordings reflect the natural acoustical situation, with ravens and echoes, wind and thunder."***

Sextet offers diversity and a night of a Capella music

Colorado group to perform in Terrace Room

BY ANNE PUTNAM

Six Colorado natives are making the trip the trip to Lewisburg.

Traveling all the way from Denver, the diverse a cappella group, Graffiti Tribe, will entertain Bucknellians in the Terrace Room on Monday at 9 p.m.

Members Derrick Pope, Dan Perkins, Tim Rosendo, Zac Freeman and Ray Paris began singing together at Englewood High School and would practice with the sixth member of their group, Manuel Martinez of nearby Lakewood, CO. during their precious free time.

Yet, these talented young men have branched off significantly since then to manage various activities along with their musical entertainment lifestyles. While assisting in musical direction, Paris also majors in vocal music at Metropolitan State College. Nursing takes up Rosendo's time, while Perkins and Freeman work at Denver's Rock Bottom Brewery. The two remaining members, Pope and Martinez, founded Sigma Phi at Colorado State University and manage Graffiti Tribe.

This group's success has been recognized in the Harmony Sweepstakes A Cappella Festival where they became 1995 champions in the Denver Regional Favorite Award. They obtained further success during the National Finals '95 Sweeps and received an ovation following their Runner Up Award. Most recently, Graffiti Tribe became the first act for Yin Yang Records (Warner Bros. all-a cappella label.)

This a cappella sextet previously convinced several Bucknellians of its singing talents at a Nashville conference, said Audrey Jaeger, Assistant Director of Student Activities. Because of the high recommendations, BAC decided to sponsor Graffiti Tribe as one of the many free events open to Bucknell students, faculty, and staff.

This group of six men will entertain with an award winning performance with all types of musical venue such as pop, rock, Gospel and funk.

Traveling United States Army show band to entertain at the Weis center

Milton Daily Standard groundwork results in the return of the Volunteers

BY RACHEL DOEBBER
Bucknellian Staff Writer

It all started two years ago when the Milton Daily Standard decided to apply to the Department of Defense to have Milton and 11 other surrounding towns become official World War II communities. This would honor World War II veterans for their courage in fighting for the United States.

According to Amy Moyers, advertising manager of the Daily Standard and organizer of the Official WWII Community Committee, "The Standard Journal likes to recognize its veterans." As part of the application process, the local newspaper was required to plan several events for the veterans. These events included a picnic at which several Piper club jets flew over the crowd, then landed to pay tribute to the brave soldiers of WWII and to show the Moving Wall Memorial exhibit.

In order to raise money to show this exhibit, the Standard sponsored an Army Show Band, called the Volunteers, that came and performed for the veterans and their communities in the area. The concert had far better turnout than expected with 1,400 attending, said Moyers. "Since the band had such a wonderful time performing, and received such a great response from the local area, they said they would come back again in the near future," Moyers continued to say.

Recently, the Volunteers contacted the Daily Standard and said they would be in the Lewisburg area in September. According to the Daily Standard, the five man band would be very willing to perform another concert because of the wonderful support it had experienced before.

Tonight, the Volunteers will be performing in the Weis Center at 7 p.m., returning as they had promised. They will be playing selections spanning many styles including jazz, country and rock, and many eras.

This five piece band is part of the United States Army Field Band of Washington, D.C. which has entertained audiences in all fifty states and also Canada, Puerto Rico, and Nicaragua since its founding in 1981. The Volunteers have performed at many well-known events including New Orleans' Mardi Gras, the Indianapolis 500, and numerous state festivals and fairs all over the country, in addition to performing on the Nashville Network.

The band features many instruments including the trombone, trumpet, keyboard, electric bass, guitar, drums, and of course, vocals.

This event is sponsored by the Milton Daily Standard and the Bucknell ROTC program. Tickets are free and can be picked up at the Weis Center Box Office. For more information, call the Weis Center Box Office at 524-1000.

Movie Reviews

BY CHRIS NICHOLS

Lonestar **** 1/2
Directed by John Sayles

This movie was easily one of the best movies of the summer. Unfortunately, for such a great movie, it had a small distribution. Because it was limited in many areas to smaller independent movie theaters, a lot of people may have missed this film. The movie follows a border-town sheriff in his investigation of a murder over 20 years old. The story twists when it becomes apparent that the sheriffs father was involved in the crime.

A significant portion of the movie takes place in flashbacks that serve to fill in a lot of the story. Matthew McConaughey plays the father of the sheriff (too bad more people couldn't see him in his good movie of the summer as opposed to his mediocre media hype *A Time to Kill*). Through the course of the movie several great themes are explored: family values (choke on that expression), racial tension, relationships between multiple generations of parents and their children, along with an interesting view of law in this Texas town and how it has developed and changed over the years.

It's interesting how well this movie succeeds at all of these whereas the aforementioned *A Time to Kill* wasn't really able to scratch the surface. So grab your newspaper, look under the independent theater section, and go see this movie. If you want to see a great film on video by the same director, rent *The Secret of Roan Inish.*

Trainspotting ****

Thanks be to Miramax for taking the initiative to bring successful foreign films to the United States and give them a shot, despite their differences to mainstream U.S. films. We need a dose of change. At the outset this is probably a movie that wouldn't appeal to many. For change's sake, go out and see a movie that you don't think you'll like but might really enjoy.

Don't think about it as a movie about heroin; think about it as a movie about a young man's struggle against an early crisis and his efforts to overcome this. What is refreshingly unique about the film is the way in which it depicts his struggle in humanistic terms. The movie is not about an addict; it is about a human. So if you're reading this, chances are it's about someone like you. It's a movie that portrays the choices of college-aged people and shows the thought process a young adult might go through while facing those choices. It also addresses the issues of family and friends (as opposed to people we hang out with) in a way that really makes one think about who they identify with.

So if you're in the mood for something different, in the mood for a little shock that might actually do some good, check this one out. Otherwise, head for the Christmas section at the video store.

Multiplicity *** 1/2
Starring Michael Keaton and Andie MacDowell

Hands down, this was one of the biggest surprises of the summer. I wasn't expecting much; in fact, I thought it looked pretty stupid. Needless to say, I changed my mind.

What was so impressive was Keaton's portrayal of four totally unique characters all stemming from the same person. The different clones take on new personalities based on the experiences that they go through. The first clone, named 2, goes to work in place of the original man, 1, in the contracting business and spends a little too much time with the boys and ends up with an overstated masculine side. The second copy, 3, who ends up working at home, becomes much more in touch with his emotions. A copy of one of the other copies, 4, is by far the funniest. Think back to Steve Martin's performance as Ruprick in *Dirty Rotten Scoundrels.* Clone 4 is at least four times as funny. Keaton then loses himself (the original) as the clones start to take over his life.

I was very impressed by the movie when I left. It still remains a mystery to me why this film wasn't received better this summer. I think there were just too many Big Box Office films and some of the less popular ones took back seat.

Ratings:

★★★★★:	Excellent: A must see.
★★★★:	Very Good: Very entertaining.
★★★:	Good: Worth the price.
★★:	Not so good: Limited scope and/or some significant flaws.
★:	Pretty bad: If you consciously see this movie, you probably need help.

Contemporary, classical sound artist to perform

BY EMILY THORNE

The University's Gallery Series will embark upon its 12th season with a performance by the dynamic composer and performer Joan La Barbara.

The program, "New Sounds for the New Voice: The Viruosa in the Electronic Age," will include three pieces: "Conversations," for amplified voice only; "In the Dreamtime," for voice and multitrack tape; and "Shamansong," for voice, percussion and tape.

> *"I wanted to create music that would correspond to the visual perspective of the film, done on location in the White Sands National Monument in New Mexico. The sound recordings reflect the natural acoustical situation, with ravens and echoes, wind and thunder."*
>
> *—Joan La Barbara*

Joan La Barbara, one of the great vocal virtuosas of our time, performs one of her original acoustical compositions.

"One of the great vocal virtuosos of our time," according to the *San Francisco Examiner*, La Barbara is an established pioneer in the field of contemporary music and soundart.

"In the Dreamtime" is a collage of 17 of La Barbara's works created over the past 14 years. According to La Barbara, "it is arranged in 'dreamtime,' the illogical way one event follows another in dreams, instead of in chronological order."

"'Shamansong,'" La Barbara explained, "is a concert suite from a film score I composed for 'Anima,' which tells of a woman's journey into the desert, carrying the baggage of a lifetime. As there was no dialogue to the film, I wanted to create music that would correspond to the visual perspective of the film, done on location in the White Sands National Monument in New Mexico. The sound recordings reflect the natural acoustical situation, with ravens and echoes, wind and thunder."

La Barbara has devoted her career as a composer, performer, and sound artist to exploring the human voice as a multifaceted instrument.

She creates works for multiple voices, chamber ensembles, music theater, orchestra and interactive technology.

She has produced seven recordings of her own work, served as producer on recordings of music by John Cage and Morton Feldman, and has premiered landmark compositions written for her by reputable American composers such as Robert Ashley, John Cage, Philip Glass and Alvin Lucier.

Grants from Meet the Composer and the University's department of music help to fund the continuing series of performance art and experimental music that feature various artists including La Barbara.

Meet the Composer funding is provided with support from American Society of Composers, Authors and Publishers, the Metropolitan Life Foundation and the Pennsylvania Council on the Arts.

La Barbara's performance is free to the public. She will be performing in the Center Gallery at 8 p.m. on Tuesday. For more information, contact the department of music at 717-524-1239.

Sextet offers diversity and a night of a Capella music

Colorado group to perform in Terrace Room

BY ANNE PUTNAM

Six Colorado natives are making the trip the trip to Lewisburg.

Traveling all the way from Denver, the diverse a cappella group, Graffiti Tribe, will entertain Bucknellians in the Terrace Room on Monday at 9 p.m.

Members Derrick Pope, Dan Perkins, Tim Rosendo, Zac Freeman and Ray Paris began singing together at Englewood High School and would practice with the sixth member of their group, Manuel Martinez of nearby Lakewood, CO. during their precious free time.

Yet, these talented young men have branched off significantly since then to manage various activities along with their musical entertainment lifestyles. While assisting in musical direction, Paris also majors in vocal music at Metropolitan State College. Nursing takes up Rosendo's time, while Perkins and Freeman work at Denver's Rock Bottom Brewery. The two remaining members, Pope and Martinez, founded Sigma Phi at Colorado State University and manage Graffiti Tribe.

This group's success has been recognized in the Harmony Sweepstakes A Cappella Festival where they became 1995 champions in the Denver Regional Favorite Award. They obtained further success during the National Finals '95 Sweeps and received an ovation following their Runner Up Award. Most recently, Graffiti Tribe became the first act for Yin Yang Records (Warner Bros. all-a cappella label.)

This a cappella sextet previously convinced several Bucknellians of its singing talents at a Nashville conference, said Audrey Jaeger, Assistant Director of Student Activities. Because of the high recommendations, BAC decided to sponsor Graffiti Tribe as one of the many free events open to Bucknell students, faculty, and staff.

This group of six men will entertain with an award winning performance with all types of musical venue such as pop, rock, Gospel and funk.

SCIENCE AND TECHNOLOGY

Animal behaviorists mark squirrels

By Michael Pereira

Strolling down or climbing up the hill behind Old Main, one is bound to notice squirrels scampering to and fro underneath the White Oak trees.

There are either hundreds of these working and playing eastern gray squirrels (*Sciurus carolinensis pennsylvanicus*), or else the same few are constantly on the move foraging the hillside.

Pedro Pedro '97, Kevin Sours '98, Diana Leech '97, and Andrew Hust '97 decided to find out how many gray squirrels share the University campus. Last spring, four students conducted independent observational research on various aspects of the squirrels' behavior, such as midday sunning and anti-predator behavior and how accompaniment by weaning pups changes mothers' responses to other adults in their neighborhoods.

But these studies could provide only a general idea of ranges of behavior in the university's squirrel population. Nothing could be determined about the activities and relationships of specific individuals, or particular classes of animals, such as the juveniles or elderly animals of a given sex, because the squirrels could not be recognized as individuals.

Identifying the animals is not a problem in research on large animals such as the baboons at the Animal Behavior Lab because human observers are easily able to pick out the animals' unique visual characteristics. But, just as the University's tiny squirrel monkeys must wear beaded necklaces before most researchers can distinguish them, unaided recognition of even just a few gray squirrels by eye is impossible for most observers.

To learn more about the lives of the campus' gray squirrels, researchers needed to decide how to mark the creatures so they could be identified. A top priority in making this decision was that the squirrels should suffer minimal trauma in the process.

Of four approaches popular among mammalogists, only one involving fur marking suited this research ideally. Common methods — toe-clipping, attachment of ear tags and use of hair dyes — were rejected either because they posed the potential for causing undue pain or stress or because the approach was imperfect for animals which completely replace their fur, by molting, twice each year.

Beetna Kim— The Bucknellian

Assistant biology professor Michael Pereira and a group of students spent the summer marking squirrels near Roberts and Taylor Halls.

The method known as freeze-marking was chosen. If something very cold is applied to a spot on the skin of most mammals, the hair on that part of the body will forever grow back white, instead of its former color. This is because cells accompanying the hair follicles, called melanocytes, responsible for coloring the hair are damaged and do not get replaced.

Many field researchers have taken advantage of this phenomenon to individually mark their subjects. We know far more about the natural lives of various species of ungulates, squirrels, other social rodents, mongooses, and many other wild mammals because this quirk of biology allows biologists to mark animals in a way that is not lost each time an animal molts.

This method was optimal because it is permanent, but not dangerous or painful. The experience is much like the freezing procedure used today in dermatology to remove warts.

The skin at the marked site is instantaneously numbed. Aside from the possibility of some itchiness during the rapid healing and hair replacement, the animals seem to experience no discomfort. Marked animals look a little funny for a few weeks as spots shaved for marking make them look, briefly, a bit like urban poodles.

Another significant advantage of the technique from the squirrels' point of view is that each animal must only be captured once during its life for marking, rather than the two or three times that would be required annually if the hair dye method was used.

Beetna Kim— The Bucknellian

Eastern gray squirrels were marked using a method known as freeze marking. The process causes no harm to the animal but produces permanent results.

Marking method chosen, summer research student, Kevin Sours '98 and I set out to individually mark all the squirrels that live among the oaks between Old Main and the Gateways—from the Student Health Center to Larison Hall. After 10 days of work, 159 squirrels were marked, weighed, and measured.

An estimated 85 % of the population on the study site was marked. To continue monitoring the soap opera of these animals' lives, more live-trapping and marking needs to be done in the fall.

Annually at this time of year, some adult squirrels shift ranges and squirrels born in July emerge from their nests. The research team hopes to mark the remaining unmarked squirrels by Thanksgiving.

To safely and humanely catch squirrels for research going up a tree and acting like a nut is not the best approach.

Traps closely resemble the "Hav-a-hart" traps many people use to evacuate mice from their homes without harming them. Most gray squirrels encountered in a park or on a campus are quite bold. Their comfort level with humans extends to greater calmness in traps and in hand than is seen in work with forest-living squirrels.

Campus squirrels remain calm in the traps unless they are approached by humans or their dogs. To minimize squirrel stress and still watch the process, observers should stay at least 20 yards away from any animal waiting briefly in the traps. Our research team never leaves traps that are not locked open unattended.

By investigating campus squirrels, researchers will be in position to discover why they seem so successful in park-like settings, and the pros and cons of squirrels living in such close contact to people.

Eastern gray squirrels are large-brained, extremely athletic, courageous mammals. In many ways they are the nonhuman "primates" of today's North America.

For animal behavior and biology students, and for others interested in extra-curricular studies, there is opportunity to conduct long-term research on the lives of individual gray squirrels.

This year, by maintaining a marked population of animals, questions including whether all squirrels born in one place stay there their whole lives and whether male and female squirrels differ in this regard can be investigated.

Also, questions such as the development of sex differences in behavior, effects of age on dominance rank, and effects of dominance, in turn, on reproductive success can now be addressed.

As research continues, the question of what makes the University's campus so attractive to gray squirrels should get preliminary answers.

Michael Pereira is an assistant professor of biology and animal behavior.

Logging on to email has changed

Two weeks ago, every PINE user was confronted with a change. PINE itself asked for a username and password. To most users, this seemed like an odd request considering they had just entered their username and password moments earlier when they logged onto pinebox. The reason for this additional login is that the storage of all email has been moved to a newer and more robust computer. This new computer requires PINE itself to login.

Prior to the beginning of this semester, almost all email was kept on a computer named coral. In order to read email in a university computer lab, it was necessary to first connect to a computer called pinebox. Then using either a program called telnet or WTNVT, the user logged into pinebox and ran the email program PINE. Because pinebox and coral were intimately connected, PINE was able to directly access the email stored in coral. This was a very convenient configuration because users had to login only once in order to read email.

Now that email has been moved to a new location, however, this is not the case. Instead of being stored in coral, email is now being kept on a new computer called mail.bucknell.edu. Unlike coral, which used to act as the central brain for all of the university's email and internet activities, the "mail" server is used solely for email. As a result, mail will be much faster and more reliable than the old, over-worked coral.

One consequence of this new computer, however, is that mail does behave a little differently than coral. As some may remember, coral would sometimes "crash". When this happened, it was impossible to get mail. Since loss of email capability was unacceptable, it was decided to separate the computers, such as mail, pinebox, and coral, so that if any one computer "crashed" it would not take the other ones down with it. In general, this is a very hearty arrangement which will ensure that email will always be available.

The down-side to the system is that PINE cannot directly access email on mail as it could on coral. Instead, PINE must have the username and password so that it can log into mail and retrieve messages.

While the additional login in PINE may seem like an unnecessary inconvenience, the added stability of the new email server should prove more than worthwhile to all users.

Geology department turns to environmental studies

By Jamie Krauk

Bucknellian Staff Writer

Within this University's department and nationwide, the discipline of geology is taking a distinct turn toward a new emphasis on the environmental aspects of the science.

Those individuals involved in the field are striving to have geology recognized as an environmental science rather than strictly a social science as it has been thought of in the past.

The University's geology history began relatively recently when compared to other institutions of the same age.

"Even though the second president of the University, Justin Loomis, wrote a geology textbook, he never taught the discipline here. It was not until 1959 that the department came into existence," said Edward Cotter, professor of geology.

Cotter was one of only three faculty members in the department from that time until 1989.

"Beginning in 1990 with the addition of two new faculty in the environmental arenas, the department has been able to create opportunities for broader horizons of study and employment," he said.

Over the last few years students, under the direction of department head Craig Kochel, have been involved with an ongoing project across the river in Montandon. There, a large wetland is located just 200 yards east of the Susquehanna.

Initial work was done at the site three years ago by drilling wells with huge drill rigs so that the underground water flow could be mapped and identified. The study of these underground water systems as they flow through rock and sediment is known as hydrogeology, a course taught by Benjamin Hayes, professor of geology.

Hayes, who is in his first year of a three year appointment to University's geology department, said, "There are many opportunities on the rise for students to find interest in interdisciplinary fields. The old concepts of paleontology and evolution are no longer the limits. Students are now using 'biology critters' as indicator species in determining the health of watersheds and other supersensitive sites in the area."

With wells drilled, and monitoring sites set up, students have turned their attention to testing water quality and water level.

The fact that the site sits so close to the river however, does put it at a potential risk for hazards. Changes in the river could have a magnified effect on the small wetland. Also, damage caused by removal of any part of the underlying gravel bed could lead to the wetland drying out. Indicator species such as weeds and bacteria act as determinant factors for the health of the wetland.

With each step in the shift from traditional geology to environmental geology, there are more and more links to other fields. Numerous students are combining civil engineering studies with their environmental geology major. A few are pursuing a double major program to further integrate the two studies. There is also significant cross over between geology and biology as evidenced in the use of indicator species. Doors are being opened for employment opportunities in the new concentration of the field.

"It used to be that the only jobs in the geological field were found in the Petroleum industry. Since the east coast does not offer many jobs in that arena, students were shying away from entering the field for fear that they would not be able to pursue their interests near home," Cotter said.

With the advent of hydrogeology, geologists are now working in the industrialized eastern states. That means more jobs closer to home.

"What we have to remember is that it is man who is changing the environment," added Hayes. "We have altered our air and water systems. Those changes are a reflection of our actions. With our new focus, we can better monitor the adverse effects of natural disasters and man-made damage."

Brad Jordan, lab specialist for the geology department, keeps track of the water level of the Montandon Marsh wetlands.

Volleyball completes weekend sweep

Bison defeat Delaware for first time in 16 year-old series, record improves to 5-2

By Jacob Lipman

Bucknellian Staff Writer

It's that time of year again, that time when the Bison stampede and crush anything and everything in their path. Well, at least that's the case with Bucknell's women's volleyball team. The Bison won all three of their matches this past week to up their record to 5-2.

Bucknell opened up the week facing a Delaware team they had never beaten.

The series between the two teams began back in 1980 and up until last week, the Blue Hens had won all 21 matches. The Bison quickly put an end to that ugly streak though, with a huge 16-14, 5-15, 15-11, 15-12 victory.

Melissa Wharton '98 led the way with 17 kills and a personal best 9 digs. Also hitting well for the Bison were Emily Pomeroy '99 with 15 kills, and Susie Teitsworth '97 and Tristen Voget '99 with 12 kills each.

Without the help of setter Amy Turnshek '98, however, this kind of offensive firepower wouldn't have been possible. Turnshek had a season-high 65 assists. Allison Morris '97 was outstanding defensively, recording a team best 28 digs.

In Bucknell's home opener this past Saturday, the Bison trounced an overmatched St. Francis (NY) team, 15-3, 15-5, 15-5.

Turnshek got the Bison off to a good 2-0 start in the first game with a service ace, one of the team's five aces in the game. Bucknell never looked back as they took an 11-0 lead before St. Francis could get on the scoreboard.

In the second game, St. Francis took a 2-0 lead early on, but the Bison then rambled off eight straight points to make it 8-2. Following another pair of points for the opposition, Bucknell ended the game with a 7-1 run. Pomeroy, with her powerful jump serve, finished this one off with yet another ace.

The third game was no different from the previous ones. Bucknell went on a 12-0 run to start the game before St. Francis was able to score a few points. Wharton was particularly dominant in this game, with three kills over four plays at one point in the game.

Overall for the match, Wharton led the team with 11 kills and 6 blocks. Pomeroy had 10 digs and Michelle Lesh '00 also had a solid game, recording 4 kills and 6 digs.

The Bison continued their winning ways in the next match with another impressive victory. St. Francis (PA) showed a little more skill than Bucknell's previous opponent but the result was the same. The Bison won handily, 15-4, 15-3, 15-3.

With the Delta Gamma sorority cheering the Bison on, Bucknell easily took game one, using a pair of 7-0 runs to put this one away.

Wharton opened the second game with a monster spike and on the following play, a huge block. From there, the Bison took a 9-0 lead before conceding a few points to St. Francis (PA).

The Bison once again had the lead early on in the third game. This time, they led by a 5-0 margin to open the game. St. Francis scored a couple of meager points making it 5-2. But once again Bucknell pulled away, with the help of Wharton's excellent blocking.

Wharton had double digits in both kills and blocks, as she had 23 kills and 10 blocks in the match. Pomeroy had another consistent effort, with 13 kills and 10 digs.

Heather Rendle '97 was also sharp on the court, adding 10 kills for the Bison. Once again though, it all began with the playmaker Amy Turnshek, who assisted her teammates 48 times. As for the defense, Morris and Teitsworth led Bucknell with 18 and 15 digs respectively. Jen Post '00 also added 9 digs, many of which were spectacular diving plays to keep the rally alive.

Also this past week, Melissa Wharton won Patriot League offensive player of the week honors. Wharton, who was second in the nation in hitting percentage last year with a .445 percentage, is currently hitting .447. She also has 123 kills and 52 total blocks in the team's first 26 games.

This weekend, the Bison will host the Bucknell Invitational. The team will face Dartmouth at 6:00 p.m. Friday evening. Saturday, the Bison will go against Rider at noon. St. Bonaventure will be Bucknell's final opponent of the tournament, at 4:00 p.m.

Jonah Half— The Bucknellian

The volleyball team had plenty to celebrate in their three game sweep this week. Bucknell beat Delaware for the first time in 22 meetings over 16 years.

A Footnote in Sports History

Last Saturday saw the passing of a Bucknell legend and a footnote in football history. Arda C. Bowser '23 was an All-East and All-American fullback at Bucknell, but he was best known as the last surviving member of the inaugural NFL championship team, the Canton Bulldogs. He was 97.

Bowser earned distinction as the Bison team captain in 1921 and is still regarded as one of the greatest kickers in school history. The Danville native and World War I Naval veteran led Bucknell to a 5-3-1 record as captain, including a 62-7 trouncing of Susquehanna, which still ranks in the top five margins of victory in school history.

Bowser was an innovator as well as a leader. He was the originator of the kicking tee, a device he popularized in the NFL.

A fierce competitor from the days of leather helmets, Bowser scraped together money in his senior year at Bucknell by playing for two professional teams. On Saturdays he suited up for the Frankford Yellow Jackets, who later became the Philadelphia Eagles, and then took an overnight train ride to Canton in order to play for the Bulldogs on Sunday. He once played four complete games — offense and defense — in a single Thanksgiving weekend.

Men's soccer continues streak with back to back shutouts

By E.J. Crawford

Bucknellian Staff Writer

The men's soccer team boosted their record to 3-1 with back-to-back 2-0 victories over Manhattan and St. Peter's this past week.

The squad has now won its last three games convincingly, allowing no goals as Corey Harbold '97 has registered two shutouts. In addition to their suffocating defense, the offense has also produced nine goals in their past three games, including two this past week by freshman Scott Gilroy.

On Saturday against Manhattan, the Bison controlled the ball throughout the game in the first ever meeting between the two schools, and notched a goal at the midpoint of each half for their second consecutive victory.

Gilroy scored the first goal, the first one of his college career, 17 minutes into the game off a feed from Myles Perkins '98, who posted his second assist of the year. This lone goal would prove to be all the Bison would need, as their stellar defense again took over, limiting the Jaspers to nine shots, as opposed to 30 for Bucknell.

But the Bison were not done. With about 21 minutes remaining in the game, the men added an insurance goal by Michael Thomas '98, assisted by Kevin McClure '98, which put the game clearly out of reach.

Buoyed by the victory over Manhattan, the Bison took the field on Tuesday night for a battle against St. Peter's. The Bison again dominated the game, but were unable to score until junior captain Wright Ramsey's goal with 15 minutes remaining in the first half.

The Bison struck again in the second half as Gilroy registered his second goal in as many games. Brian Ruddy '98 and Michael Thomas '98 were credited with the assists.

See SOCCER, Page 13

Michael Morris — The Bucknellian

Scott Gilroy '00 scored in both of the Bison's victories this week. He is tied for the team lead in goals.

Flash in the Pan

Graf, Sampras Take Titles: Number one seeds Steffi Graf and Pete Sampras both repeated as tennis champions at the U.S. Open champions this past weekend. Graf did not lose a set over the whole tournament, which culminated with a 7-5, 6-4 victory over second seeded Monica Seles. The victory was Graf's fifth U.S. Open title and 21st overall, a total which trails only Margaret Court's 24 titles. Sampras' road to the title was a little tougher, although he too won the final in straight sets, a 6-1, 6-4, 7-6 victory over second seeded Michael Chang. Sampras' march to the title included a stunning five set match in which the eight-time grand slam title winner battled cramps, nausea, and fatigue to win a four hour battle over Alex Corretja.

New York, New York: The second week of the NFL season was highlighted by a return to last season's form by the Dallas Cowboys and the Pittsburgh Steelers, who easily dispatched the N.Y. Giants and the Baltimore Ravens. But the talk of the weekend was the ineptitude of New York's two teams, the Jets and Giants, who combined to score seven points, and both fell to 0-2. The two teams play in two weeks, with the loser probably on their way to securing next year's first round draft pick.

Upset: Last year's Cinderella team in college football, Northwestern, were upset 28-27 to a lowly Wake Forest team that went 1-10 last season, including a 77-0 defeat at the hands of Florida St. Last year it was the Wildcats that pulled a stunning upset of Notre Dame on their way to a Rose Bowl berth.

Tyson Tramples Seldon: In the tradition of the Mike Tyson-Michael Spinks bout, Bruce Seldon fell to Tyson in the first round of Saturday evening's matchup in Las Vegas. Seldon went down early in the fight when Tyson grazed his cheek, and later was sent to the canvas for good 107 seconds into the first round. The fight was promptly stopped, giving Tyson the technical knockout and the WBA heavyweight crown to go along with his WBC title. Tyson's next opponent will be Evander Holyfield.

Records and Milestones: Eddie Murray became the third man in history to hit 500 home runs and collect 3,000 hits on Friday, exactly one year after Cal Ripken, Jr. broke Lou Gehrig's record for consecutive games played.

The Major League record for total home runs in a season also fell last week with a homer from Dodger Mike Piazza. The record was broken with three full weeks remaining in the season. Also, Baltimore is on the verge of breaking the team record for home runs in a single season.

College Football Top 10

1. Nebraska (1-0)
2. Tennessee (2-0)
3. Florida State (1-0)
4. Florida (2-0)
5. Colorado (2-0)
6. Penn State (2-0)
7. Ohio State (1-0)
8. Texas (2-0)
9. Michigan (1-0)
10. Notre Dame (1-0)

SCIENCE AND TECHNOLOGY

Animal behaviorists mark squirrels

By Michael Pereira

Strolling down or climbing up the hill behind Old Main, one is bound to notice squirrels scampering to and fro underneath the White Oak trees.

There are either hundreds of these working and playing eastern gray squirrels (*Sciurus carolinensis pennsylvanicus*), or else the same few are constantly on the move foraging the hillside.

Pedro Pedro '97, Kevin Sours '98, Diana Leech '97, and Andrew Hust '97 decided to find out how many gray squirrels share the University campus. Last spring, four students conducted independent observational research on various aspects of the squirrels' behavior, such as midday sunning and antipredator behavior and how accompaniment by weaning pups changes mothers' responses to other adults in their neighborhoods.

But these studies could provide only a general idea of ranges of behavior in the university's squirrel population. Nothing could be determined about the activities and relationships of specific individuals, or particular classes of animals, such as the juveniles or elderly animals of a given sex, because the squirrels could not be recognized as individuals.

Identifying the animals is not a problem in research on large animals such as the baboons at the Animal Behavior Lab because human observers are easily able to pick out the animals' unique visual characteristics. But, just as the University's tiny squirrel monkeys must wear beaded necklaces before most researchers can distinguish them, unaided recognition of even just a few gray squirrels by eye is impossible for most observers.

To learn more about the lives of the campus' gray squirrels, researchers needed to decide how to mark the creatures so they could be identified. A top priority in making this decision was that the squirrels should suffer minimal trauma in the process.

Of four approaches popular among mammalogists, only one involving fur marking suited this research ideally. Common methods — toe-clipping, attachment of ear tags and use of hair dyes — were rejected either because they posed the potential for causing undue pain or stress or because the approach was imperfect for animals which completely replace their fur, by molting, twice each year.

Beetna Kim— The Bucknellian

Assistant biology professor Michael Pereira and a group of students spent the summer marking squirrels near Roberts and Taylor Halls.

The method known as freeze-marking was chosen. If something very cold is applied to a spot on the skin of most mammals, the hair on that part of the body will forever grow back white, instead of its former color. This is because cells accompanying the hair follicles, called melanocytes, responsible for coloring the hair are damaged and do not get replaced.

Many field researchers have taken advantage of this phenomenon to individually mark their subjects. We know far more about the natural lives of various species of ungulates, squirrels, other social rodents, mongooses, and many other wild mammals because this quirk of biology allows biologists to mark animals in a way that is not lost each time an animal molts.

This method was optimal because it is permanent, but not dangerous or painful. The experience is much like the freezing procedure used today in dermatology to remove warts.

The skin at the marked site is instantaneously numbed. Aside from the possibility of some itchiness during the rapid healing and hair replacement, the animals seem to experience no discomfort. Marked animals look a little funny for a few weeks as spots shaved for marking make them look, briefly, a bit like urban poodles.

Another significant advantage of the technique from the squirrels' point of view is that each animal must only be captured once during its life for marking, rather than the two or three times that would be required annually if the hair dye method was used.

Beetna Kim— The Bucknellian

Eastern gray squirrels were marked using a method known as freeze marking. The process causes no harm to the animal but produces permanent results.

Marking method chosen, summer research student, Kevin Sours '98 and I set out to individually mark all the squirrels that live among the oaks between Old Main and the Gateways—from the Student Health Center to Larison Hall. After 10 days of work, 159 squirrels were marked, weighed, and measured.

An estimated 85 % of the population on the study site was marked. To continue monitoring the soap opera of these animals' lives, more live-trapping and marking needs to be done in the fall.

Annually at this time of year, some adult squirrels shift ranges and squirrels born in July emerge from their nests. The research team hopes to mark the remaining unmarked squirrels by Thanksgiving.

To safely and humanely catch squirrels for research going up a tree and acting like a nut is not the best approach.

Logging on to email has changed

Two weeks ago, every PINE user was confronted with a change. PINE itself asked for a username and password. To most users, this seemed like an odd request considering they had just entered their username and password moments earlier when they logged onto pinebox. The reason for this additional login is that the storage of all email has been moved to a newer and more robust computer. This new computer requires PINE itself to login.

Prior to the beginning of this semester, almost all email was kept on a computer named coral. In order to read email in a university computer lab, it was necessary to first connect to a computer called pinebox. Then using either a program called telnet or WTNVT, the user logged into pinebox and ran the email program PINE. Because pinebox and coral were intimately connected, PINE was able to directly access the email stored in coral. This was a very convenient configuration because users had to login only once in order to read email.

How it Works

Chip Audette
Bucknellian
Columnist

Now that email has been moved to a new location, however, this is not the case. Instead of being stored in coral, email is now being kept on a new computer called mail.bucknell.edu. Unlike coral, which used to act as the central brain for all of the university's email and internet activities, the "mail" server is used solely for email. As a result, mail will be much faster and more reliable than the old, over-worked coral.

One consequence of this new computer, however, is that mail does behave a little differently than coral. As some may remember, coral would sometimes "crash". When this happened, it was impossible to get mail. Since loss of email capability was unacceptable, it was decided to separate the computers, such as mail, pinebox, and coral, so that if any one computer "crashed" it would not take the other ones down with it. In general, this is a very hearty arrangement which will ensure that email will always be available.

The down-side to the system is that PINE cannot directly access email on mail as it could on coral. Instead, PINE must have the username and password so that it can log into mail and retrieve messages.

While the additional login in PINE may seem like an unnecessary inconvenience, the added stability of the new email server should prove more than worthwhile to all users.

Geology department turns to environmental studies

By Jamie Krauk

Bucknellian Staff Writer

Within this University's department and nationwide, the discipline of geology is taking a distinct turn toward a new emphasis on the environmental aspects of the science.

Those individuals involved in the field are striving to have geology recognized as an environmental science rather than strictly a social science as it has been thought of in the past.

The University's geology history began relatively recently when compared to other institutions of the same age.

"Even though the second president of the University, Justin Loomis, wrote a geology textbook, he never taught the discipline here. It was not until 1959 that the department came into existence," said Edward Cotter, professor of geology.

Cotter was one of only three faculty members in the department from that time until 1989.

"Beginning in 1990 with the addition of two new faculty in the environmental arenas, the department has been able to create opportunities for broader horizons of study and employment," he said.

Over the last few years students, under the direction of department head Craig Kochel, have been involved with an ongoing project across the river in Montandon. There, a large wetland is located just 200 yards east of the Susquehanna.

Initial work was done at the site three years ago by drilling wells with huge drill rigs so that the underground water flow could be mapped and identified. The study of these underground water systems as they flow through rock and sediment is known as hydrogeology, a course taught by Benjamin Hayes, professor of geology.

Hayes, who is in his first year of a three year appointment to University's geology department, said, "There are many opportunities on the rise for students to find interest in interdisciplinary fields. The old concepts of paleontology and evolution are no longer the limits. Students are now using 'biology critters' as indicator species in determining the health of watersheds and other supersensitive sites in the area."

With wells drilled, and monitoring sites set up, students have turned their attention to testing water quality and water level.

The fact that the site sits so close to the river however, does put it at a potential risk for hazards. Changes in the river could have a magnified effect on the small wetland. Also, damage caused by removal of any part of the underlying gravel bed could lead to the wetland drying out. Indicator species such as weeds and bacteria act as determinant factors for the health of the wetland.

With each step in the shift from traditional geology to environmental geology, there are more and more links to other fields. Numerous students are combining civil engineering studies with their environmental geology major. A few are pursuing a double major program to further integrate the two studies. There is also significant cross over between geology and biology as evidenced in the use of indicator species. Doors are being opened for employment opportunities in the new concentration of the field.

"It used to be that the only jobs in the geological field were found in the Petroleum industry. Since the east coast does not offer many jobs in that arena, students were shying away from entering the field for fear that they would not be able to pursue their interests near home," Cotter said.

With the advent of hydrogeology, geologists are now working in the industrialized eastern states. That means more jobs closer to home.

"What we have to remember is that it is man who is changing the environment," added Hayes. "We have altered our air and water systems. Those changes are a reflection of our actions. With our new focus, we can better monitor the adverse effects of natural disasters and man-made damage."

Brad Jordan, lab specialist for the geology department, keeps track of the water level of the Montandon Marsh wetlands.

Volleyball completes weekend sweep

Bison defeat Delaware for first time in 16 year-old series, record improves to 5-2

By Jacob Lipman

Bucknellian Staff Writer

It's that time of year again, that time when the Bison stampede and crush anything and everything in their path. Well, at least that's the case with Bucknell's women's volleyball team. The Bison won all three of their matches this past week to up their record to 5-2.

Bucknell opened up the week facing a Delaware team they had never beaten.

The series between the two teams began back in 1980 and up until last week, the Blue Hens had won all 21 matches. The Bison quickly put an end to that ugly streak though, with a huge 16-14, 5-15, 15-11, 15-12 victory.

Melissa Wharton '98 led the way with 17 kills and a personal best 9 digs. Also hitting well for the Bison were Emily Pomeroy '99 with 15 kills, and Susie Teitsworth '97 and Tristen Voget '99 with 12 kills each.

Without the help of setter Amy Turnshek '98, however, this kind of offensive firepower wouldn't have been possible. Turnshek had a season-high 65 assists. Allison Morris '97 was outstanding defensively, recording a team best 28 digs.

In Bucknell's home opener this past Saturday, the Bison trounced an overmatched St. Francis (NY) team, 15-3, 15-5, 15-5.

Turnshek got the Bison off to a good 2-0 start in the first game with a service ace, one of the team's five aces in the game. Bucknell never looked back as they took an 11-0 lead before St. Francis could get on the scoreboard.

In the second game, St. Francis took a 2-0 lead early on, but the Bison then rambled off eight straight points to make it 8-2. Following another pair of points for the opposition, Bucknell ended the game with a 7-1 run. Pomeroy, with her powerful jump serve, finished this one off with yet another ace.

The third game was no different from the previous ones. Bucknell went on a 12-0 run to start the game before St. Francis was able to score a few points. Wharton was particularly dominant in this game, with three kills over four plays at one point in the game.

Overall for the match, Wharton led the team with 11 kills and 6 blocks. Pomeroy had 10 digs and Michelle Lesh '00 also had a solid game, recording 4 kills and 6 digs.

The Bison continued their winning ways in the next match with another impressive victory. St. Francis (PA) showed a little more skill than Bucknell's previous opponent but the result was the same. The Bison won handily, 15-4, 15-3, 15-3.

With the Delta Gamma sorority cheering the Bison on, Bucknell easily took game one, using a pair of 7-0 runs to put this one away.

Wharton opened the second game with a monster spike and on the following play, a huge block. From there, the Bison took a 9-0 lead before conceding a few points to St. Francis (PA).

The Bison once again had the lead early on in the third game. This time, they led by a 5-0 margin to open the game. St. Francis scored a couple of meager points making it 5-2. But once again Bucknell pulled away, with the help of Wharton's excellent blocking.

Wharton had double digits in both kills and blocks, as she had 23 kills and 10 blocks in the match. Pomeroy had another consistent effort, with 13 kills and 10 digs.

Heather Rendle '97 was also sharp on the court, adding 10 kills for the Bison. Once again though, it all began with the playmaker Amy Turnshek, who assisted her teammates 48 times. As for the defense, Morris and Teitsworth led Bucknell with 18 and 15 digs respectively. Jen Post '00 also added 9 digs, many of which were spectacular diving plays to keep the rally alive.

Also this past week, Melissa Wharton won Patriot League offensive player of the week honors. Wharton, who was second in the nation in hitting percentage last year with a .445 percentage, is currently hitting .447. She also has 123 kills and 52 total blocks in the team's first 26 games.

This weekend, the Bison will host the Bucknell Invitational. The team will face Dartmouth at 6:00 p.m. Friday evening. Saturday, the Bison will go against Rider at noon. St. Bonaventure will be Bucknell's final opponent of the tournament, at 4:00 p.m.

Jonah Half— The Bucknellian

The volleyball team had plenty to celebrate in their three game sweep this week. Bucknell beat Delaware for the first time in 22 meetings over 16 years.

A Footnote in Sports History

Last Saturday saw the passing of a Bucknell legend and a footnote in football history. Arda C. Bowser '23 was an All-East and All-American fullback at Bucknell, but he was best known as the last surviving member of the inaugural NFL championship team, the Canton Bulldogs. He was 97.

Bowser earned distinction as the Bison team captain in 1921 and is still regarded as one of the greatest kickers in school history. The Danville native and World War I Naval veteran led Bucknell to a 5-3-1 record as captain, including a 62-7 trouncing of Susquehanna, which still ranks in the top five margins of victory in school history.

Bowser was an innovator as well as a leader. He was the originator of the kicking tee, a device he popularized in the NFL.

A fierce competitor from the days of leather helmets, Bowser scraped together money in his senior year at Bucknell by playing for two professional teams. On Saturdays he suited up for the Frankford Yellow Jackets, who later became the Philadelphia Eagles, and then took an overnight train ride to Canton in order to play for the Bulldogs on Sunday. He once played four complete games — offense and defense — in a single Thanksgiving weekend.

Men's soccer continues streak with back to back shutouts

By E.J. Crawford

Bucknellian Staff Writer

The men's soccer team boosted their record to 3-1 with back-to-back 2-0 victories over Manhattan and St. Peter's this past week.

The squad has now won its last three games convincingly, allowing no goals as Corey Harbold '97 has registered two shutouts. In addition to their suffocating defense, the offense has also produced nine goals in their past three games, including two this past week by freshman Scott Gilroy.

On Saturday against Manhattan, the Bison controlled the ball throughout the game in the first ever meeting between the two schools, and notched a goal at the midpoint of each half for their second consecutive victory.

Gilroy scored the first goal, the first one of his college career, 17 minutes into the game off a feed from Myles Perkins '98, who posted his second assist of the year. This lone goal would prove to be all the Bison would need, as their stellar defense again took over, limiting the Jaspers to nine shots, as opposed to 30 for Bucknell.

But the Bison were not done. With about 21 minutes remaining in the game, the men added an insurance goal by Michael Thomas '98, assisted by Kevin McClure '98, which put the game clearly out of reach.

Buoyed by the victory over Manhattan, the Bison took the field on Tuesday night for a battle against St. Peter's. The Bison again dominated the game, but were unable to score until junior captain Wright Ramsey's goal with 15 minutes remaining in the first half.

The Bison struck again in the second half as Gilroy registered his second goal in as many games. Brian Ruddy '98 and Michael Thomas '98 were credited with the assists.

Michael Morris — The Bucknellian

Scott Gilroy '00 scored in both of the Bison's victories this week. He is tied for the team lead in goals.

Flash in the Pan

Graf, Sampras Take Titles: Number one seeds Steffi Graf and Pete Sampras both repeated as tennis champions at the U.S. Open champions this past weekend. Graf did not lose a set over the whole tournament, which culminated with a 7-5, 6-4 victory over second seeded Monica Seles. The victory was Graf's fifth U.S. Open title and 21st overall, a total which trails only Margaret Court's 24 titles. Sampras' road to the title was a little tougher, although he too won the final in straight sets, a 6-1, 6-4, 7-6 victory over second seeded Michael Chang. Sampras' march to the title included a stunning five set match in which the eight-time grand slam title winner battled cramps, nausea, and fatigue to win a four hour battle over Alex Corretja.

New York, New York: The second week of the NFL season was highlighted by a return to last season's form by the Dallas Cowboys and the Pittsburgh Steelers, who easily dispatched the N.Y. Giants and the Baltimore Ravens. But the talk of the weekend was the ineptitude of New York's two teams, the Jets and Giants, who combined to score seven points, and both fell to 0-2. The two teams play in two weeks, with the loser probably on their way to securing next year's first round draft pick.

Upset: Last year's Cinderella team in college football, Northwestern, were upset 28-27 to a lowly Wake Forest team that went 1-10 last season, including a 77-0 defeat at the hands of Florida St. Last year it was the Wildcats that pulled a stunning upset of Notre Dame on their way to a Rose Bowl berth.

Tyson Tramples Seldon: In the tradition of the Mike Tyson-Michael Spinks bout, Bruce Seldon fell to Tyson in the first round of Saturday evening's matchup in Las Vegas. Seldon went down early in the fight when Tyson grazed his cheek, and later was sent to the canvas for good 107 seconds into the first round. The fight was promptly stopped, giving Tyson the technical knockout and the WBA heavyweight crown to go along with his WBC title. Tyson's next opponent will be Evander Holyfield.

Records and Milestones: Eddie Murray became the third man in history to hit 500 home runs and collect 3,000 hits on Friday, exactly one year after Cal Ripken, Jr. broke Lou Gehrig's record for consecutive games played.

The Major League record for total home runs in a season also fell last week with a homer from Dodger Mike Piazza. The record was broken with three full weeks remaining in the season. Also, Baltimore is on the verge of breaking the team record for home runs in a single season.

College Football Top 10

1. Nebraska (1-0)
2. Tennessee (2-0)

Soccer rallies in second half

BY MATT ANSLEY

Bucknellian Staff Writer

After pausing for halftime locked in a tie, the Bucknell women's soccer team came on strong in the second half to defeat St. Joseph's College by a 3-1 margin. This was the Bison's first away game and first win on the road, giving them a 2-1 record overall.

Katie McElligott '00 and Maura Diorio '97 each scored in the second half, adding to Lindsay Founds' '99 goal scored only thirteen minutes into the game. McElligott found the back of the net five minutes after play resumed with the game-winning goal on an indirect kick by Amy Riviere '98.

Diorio then sealed the victory with an assist from Katie Fink '99. These were McElligott and Founds' second goals of the season, while Liz Woodrow '98 and Katie Senderowitz '00, the Bison's goals and assists leaders respectively, had a quiet, defensive game for Bucknell.

Goalkeeper Dana Rofey '00 played the full 90 minutes for the Bison, recording three saves. Becky Snover '97 had started the season for Bucknell, but has missed two games with a concussion.

Both Bucknell and its host, St. Joseph's, had eight shots on goal during Tuesday night's game. This was a much less aggressive game in contrast with the Bison's 29 scoring attempts on Saturday against St. Francis.

Bucknell beat St. Francis 4-2, after leading 3-0 at the half. St. Francis had never scored against Bucknell before this loss, which dropped them to 0-1 on the season. McElligott, Founds, and Woodward each scored once. Leigh Raymont '98 added one goal and an assist. Senederowitz had two assists. Rofey played goalie for the entire game and had five saves in her first collegiate start.

Bucknell will host local opponent Lehigh this Saturday at 11 a.m. in both schools' Patriot League opener.

HOOPSTERS TOUR

From Page 14

changing planes at London's Heathrow Airport. After getting settled, the group toured the scenic city by foot, stopping at the famous Tivoli Amusement park. The first game of the tour was played on the 14th in Copenhagen. After a day of bus touring, the Bison faced Horsholm BBC, a Danish national team, and won handily, 97-82. The teams exchanged gifts afterwards, according to international custom, and then joined each other for dinner.

The Bison's next challenge came at the four-team Scandic Cup tournament in Boras, Sweden. Bucknell knocked off M7, their Swedish first round opponents, 72-63. Later that evening, both teams attended "Dream Team Night" at McDonald's. There, the children of the Boras area had a chance to talk basketball and enjoy some fast food with the players and coaches of professional and collegiate teams.

The Bison experienced their first setback the following day, as a Finnish professional team, TUP Honka, handed them a 73-64 defeat. Bucknell didn't stay down long, and came back with a 72-65 victory over Kvarnby Evergreens (Sweden) to advance to the championship game.

The Scandic Cup Championship game was held in Goteborg, Sweden on August 18. Unfortunately TUP Honka stood in the way of the Bison, and captured the Scandic Cup with an 80-76 victory over Bucknell. The tour was not over, however, and for the next few days, the Bison made their way through Sweden and Denmark, sightseeing and shopping. The group reached the city of Horsens, Denmark on Wednesday, August 21. There, Bucknell topped off their trip with an easy 82-55 victory over Horsens (HIC), the city's club team.

The day after their final victory, the traveling party returned to Copenhagen, the city where they had started out 11 days and six games ago. This allowed the group to enjoy some sightseeing before departing on August 23, taking with them memories of a trip that provided both cultural and athletic enrichment.

SPORTS

X-country runs with hopes to win

BY CHRIS ELLIS

Bucknellian Staff Writer

Last year's men's and women's cross country teams ran solidly throughout the year and finished second and third, respectively, in the Patriot League Championships. Despite these showings this year figures to be a season filled with thoughts of redemption for both teams. The Bucknell cross-country tradition dictates that nothing but first place is quite good enough, and the talent level of both of this year's squads make the expectations and pressure even more intense.

The men's team breezed through its dual meet season, extending its winning streak to 25 in such meets, but ran one of their worst races of the season in being routed, 19-64, by Army in the Patriot League Championship.

"We were just abominable in that meet; I didn't coach well, they didn't run well, it just wasn't our day," head coach Art Gulden said. "Last year, they [Army] stomped everybody — including us. That just shouldn't have happened. And it won't happen again."

Gulden, as well as a poll of Patriot League coaches, pins Army as the league favorite, but Bucknell has an excellent shot at the title with one of its most balanced teams in years.

Jim Mack, Dave Granger, and Steve Roeser lead a strong corps of seniors, all of whom have the ability to seize control of a meet. The team's ten seniors will fill a much more important role than simply running, though. They will face the daunting task of keeping the primarily underclassmen team together mentally.

"We might have been obsessed with beating them last year, and when you're obsessed with something, you usually don't get very far with it," Gulden said. "We forgot what 'team' meant last year."

Todd Malligan '98, Chris Kearney '99 and Wally Dietrich '99 are all returning letter winners who figure to play a key role as well.

Bucknell's schedule will adhere to a "stepping stone" format this year, beginning with two dual meets which are expected to be the least taxing tests of the season. An invitational at Lafayette, the course where the Patriot League Championship are held, is up next, followed by an Oct. 20 Invitational at Penn State which will feature at least a dozen national-caliber teams.

"Our potential is greater and our depth is better than ever before," Gulden said. "We've recaptured the enthusiasm we lost a little last year. We'd definitely like another chance at Army."

The men's schedule gets underway Sept. 14 vs. Manhattan and Rutgers.

The women's cross-country team finished a solid third in the Patriot League last year, but finished far behind Army and Colgate, which occupied the top two spots. The 1996 squad has only three seniors.

Julie Shafer '97, who finished a team-best 12th in the Patriot League Championship last year, will combine with fellow seniors Heather Houseknecht and Karen Eastman to anchor a team that will need solid performances by underclassmen to survive. Charlotte Shurell '99 and Julie Sweitzer '99 will be relied on heavily as well.

Manhattan and George Mason will visit Bucknell Sept. 14 to open the women's dual-meet season.

Dustin Riccio—The Bucknellian

The men's cross country team takes a training run in preparation for this week's meet.

SOCCER

From Page 11

But again it was the defense, led by sophomore Ryan Cummings and Patriot league defensive player of the week Brendan Whitworth '98, that shined. The defense, which has allowed only one goal this season, permitted St. Peter's only six shots and consistently kept the ball from even reaching Harbold, who posted two saves in his second shutout of the season.

Said Ruddy, the team's leading scorer, "the defense has been real solid all year, and were again this week."

"I think this team is really improving, and is showing a lot of confidence as compared with last season."

Despite the Bison's success, there is still some concern about scoring, as "there is still a definite weakness in the attacking third," said Ruddy. "We need to do a better job of finishing."

The men's team, and their offense, will face tougher tests this upcoming week. The Bison begin their Patriot League season on Saturday against a "much improved" Lehigh squad, and then face a stern test next Tuesday, as they take on defending Ivy League champion Cornell.

Michael Morris—The Bucknellian

Michael Thomas '98 battles for the ball against Manhattan. Thomas had a goal in the Bison's 2-0 victory.

Soccer rallies in second half

Kristin Feldner—The Bucknellian
Lindsay Founds '99 battles a St. Francis midfielder.

BY MATT ANSLEY
Bucknellian Staff Writer

After pausing for halftime locked in a tie, the Bucknell women's soccer team came on strong in the second half to defeat St. Joseph's College by a 3-1 margin. This was the Bison's first away game and first win on the road, giving them a 2-1 record overall.

Katie McElligott '00 and Maura Diorio '97 each scored in the second half, adding to Lindsay Founds' '99 goal scored only thirteen minutes into the game. McElligott found the back of the net five minutes after play resumed with the game-winning goal on an indirect kick by Amy Riviere '98.

Diorio then sealed the victory with an assist from Katie Fink '99. These were McElligott and Founds' second goals of the season, while Liz Woodrow '98 and Katie Senderowitz '00, the Bison's goals and assists leaders respectively, had a quiet, defensive game for Bucknell.

Goalkeeper Dana Rofey '00 played the full 90 minutes for the Bison, recording three saves. Becky Snover '97 had started the season for Bucknell, but has missed two games with a concussion.

Both Bucknell and its host, St. Joseph's, had eight shots on goal during Tuesday night's game. This was a much less aggressive game in contrast with the Bison's 29 scoring attempts on Saturday against St. Francis.

Bucknell beat St. Francis 4-2, after leading 3-0 at the half. St. Francis had never scored against Bucknell before this loss, which dropped them to 0-1 on the season. McElligott, Founds, and Woodward each scored once. Leigh Raymont '98 added one goal and an assist. Senederowitz had two assists. Rofey played goalie for the entire game and had five saves in her first collegiate start.

Bucknell will host local opponent Lehigh this Saturday at 11 a.m. in both schools' Patriot League opener.

HOOPSTERS TOUR

From Page 14

changing planes at London's Heathrow Airport. After getting settled, the group toured the scenic city by foot, stopping at the famous Tivoli Amusement park. The first game of the tour was played on the 14th in Copenhagen. After a day of bus touring, the Bison faced Horsholm BBC, a Danish national team, and won handily, 97-82. The teams exchanged gifts afterwards, according to international custom, and then joined each other for dinner.

The Bison's next challenge came at the four-team Scandic Cup tournament in Boras, Sweden. Bucknell knocked off M7, their Swedish first round opponents, 72-63. Later that evening, both teams attended "Dream Team Night" at McDonald's. There, the children of the Boras area had a chance to talk basketball and enjoy some fast food with the players and coaches of professional and collegiate teams.

The Bison experienced their first setback the following day, as a Finnish professional team, TUP Honka, handed them a 73-64 defeat. Bucknell didn't stay down long, and came back with a 72-65 victory over Kvarnby Evergreens (Sweden) to advance to the championship game.

The Scandic Cup Championship game was held in Goteborg, Sweden on August 18. Unfortunately TUP Honka stood in the way of the Bison, and captured the Scandic Cup with an 80-76 victory over Bucknell. The tour was not over, however, and for the next few days, the Bison made their way through Sweden and Denmark, sightseeing and shopping. The group reached the city of Horsens, Denmark on Wednesday, August 21. There, Bucknell topped off their trip with an easy 82-55 victory over Horsens (HIC), the city's club team.

The day after their final victory, the traveling party returned to Copenhagen, the city where they had started out 11 days and six games ago. This allowed the group to enjoy some sightseeing before departing on August 23, taking with them memories of a trip that provided both cultural and athletic enrichment.

X-country runs with hopes to win

BY CHRIS ELLIS
Bucknellian Staff Writer

Last year's men's and women's cross country teams ran solidly throughout the year and finished second and third, respectively, in the Patriot League Championships. Despite these showings this year figures to be a season filled with thoughts of redemption for both teams. The Bucknell cross-country tradition dictates that nothing but first place is quite good enough, and the talent level of both of this year's squads make the expectations and pressure even more intense.

The men's team breezed through its dual meet season, extending its winning streak to 25 in such meets, but ran one of their worst races of the season in being routed, 19-64, by Army in the Patriot League Championship.

"We were just abominable in that meet; I didn't coach well, they didn't run well, it just wasn't our day," head coach Art Gulden said. "Last year, they [Army] stomped everybody — including us. That just shouldn't have happened. And it won't happen again."

Gulden, as well as a poll of Patriot League coaches, pins Army as the league favorite, but Bucknell has an excellent shot at the title with one of its most balanced teams in years.

Jim Mack, Dave Granger, and Steve Roeser lead a strong corps of seniors, all of whom have the ability to seize control of a meet. The team's ten seniors will fill a much more important role than simply running, though. They will face the daunting task of keeping the primarily underclassmen team together mentally.

"We might have been obsessed with beating them last year, and when you're obsessed with something, you usually don't get very far with it," Gulden said. "We forgot what 'team' meant last year."

Todd Malligan '98, Chris Kearney '99 and Wally Dietrich '99 are all returning letter winners who figure to play a key role as well.

Bucknell's schedule will adhere to a "stepping stone" format this year, beginning with two dual meets which are expected to be the least taxing tests of the season. An invitational at Lafayette, the course where the Patriot League Championship are held, is up next, followed by an Oct. 20 Invitational at Penn State which will feature at least a dozen national-caliber teams.

"Our potential is greater and our depth is better than ever before," Gulden said. "We've recaptured the enthusiasm we lost a little last year. We'd definitely like another chance at Army."

The men's schedule gets underway Sept. 14 vs. Manhattan and Rutgers.

The women's cross-country team finished a solid third in the Patriot League last year, but finished far behind Army and Colgate, which occupied the top two spots. The 1996 squad has only three seniors.

Julie Shafer '97, who finished a team-best 12th in the Patriot League Championship last year, will combine with fellow seniors Heather Houseknecht and Karen Eastman to anchor a team that will need solid performances by underclassmen to survive. Charlotte Shurell '99 and Julie Sweitzer '99 will be relied on heavily as well.

Manhattan and George Mason will visit Bucknell Sept. 14 to open the women's dual-meet season.

The men's basketball team smiles for the camera in Helsinborg, Sweden during their 12-day tour of Europe this summer.

Men's basketball gains global exposure on European vacation

By Jeff Campagna
Bucknellian Staff Writer

The Bucknell men's basketball team received some global exposure several weeks ago, as the Breakin' Bison went on a six-game, 12-day tour of Northern Europe.

The 30-person group left from Newark, New Jersey on August 12th, and spent time in Denmark and Sweden touring, sightseeing, and playing some hoops. The players, coaches, and other assistants spent many hours a day together, and by the end of the trip, they had all grown quite close. The team was joined by two familiar veteran faces, Kihlon Golden and Dave Steigerwald, who returned for the European vacation after graduating in May.

Even though Division I basketball teams are permitted to go overseas once every three years, this summer's European vacation was the team's first appearance abroad. Since head coach Pat Flannery had toured in Europe before, he was familiar with the benefits of traveling abroad together as a team.

"I like to take the kids to give them exposure to different cultures. It can be quite enlightening. By traveling together, the players have a chance to bond as a team," commented Coach Flannery.

Though Flannery had been to Europe before, the fact that the referees "actually spoke to him and explained their calls" still amazed him. After all, Flannery doesn't always get that courtesy in the Patriot League.

Players raised money for the trip by selling tickets for a contest in which ticket-purchasers guessed the combined win total of all of the Bucknell athletic teams. Additionally, players worked in the community to help contribute to the fund raising efforts.

The team arrived in Copenhagen on August 13th, after

See HOOPSTERS TOUR, Page 12

Tiger, Tiger, Burning Bright

To the casual observer, the recent media attention paid to the debut of professional golfer Tiger Woods may seem a bit overblown, but for golf fans, it seems impossible to overstate the potential of the 20-year-old phenomenon.

Woods has been compared to the two most prominent golfers of the past 50 years, Jack Nicklaus and Arnold Palmer. Both comparisons are well grounded, but realistically, Woods' role in the golf world seems to be falling into the Palmer mold. The personable Palmer was a crowd favorite and ambassador of the game who helped to popularize the sport in the 1960s. Although he only won seven major championships, Palmer continues to be highly regarded as a golf legend because of what he did for the game.

Nicklaus, on the other hand, is simply the greatest professional golfer of all-time. Woods is already one step ahead of Nicklaus with three U.S. Amateur titles compared to Nicklaus' two. However, Nicklaus won all four majors by the age of 25, a feat that Woods will be hard pressed to match. In all, Nicklaus won 20 majors, a seemingly unapproachable feat given the parity on the PGA tour today. Woods will have his share of major crowns, but it is doubtful that he will ever be the new Jack Nicklaus.

Commentary

Brett Tomlinson

Brett Tomlinson
Co-Sports Editor

Like Palmer, Woods is seen as someone with the chance to change the game of golf and attract a wide audience. In this respect, Woods could do more for golf than Palmer ever dreamed possible. First of all, Woods attracts fans of all ages, but more importantly, he draws young fans. People are fascinated with the talent, power, and grace of the young superstar, and quite frankly, they ought to be. In three consecutive pressure-packed U.S. Amateur Championships, Woods suffered plenty of shaky moments, but he always regained his composure. In the few instances when he could not avoid disaster, like in the first round of the U.S. Open this year, he still remained calm and showed maturity beyond his years when talking with the press.

Woods' physical skills on the golf course, however, are even more remarkable than his personality. With a smooth, effortless swing on the first tee of his first professional tournament, Woods calmly smoked a 335-yard drive down the center of the fairway, and there are plenty more where that shot came from. Woods is even longer than Long John Daly, and he has a deft touch around the greens. Add those skills to a million-dollar smile and it becomes obvious that Woods is the most marketable youngster in all of sport. Or at least Phil Knight of Nike thinks so, and he has a $40 million contract with Woods to support that hunch.

There are plenty of people who will benefit from a successful Tiger Woods, including Knight, the sponsors of the PGA Tour and the Skins Game, and Woods himself. However, the biggest potential benefactors are the fans, who have had to put up with impersonal, unemotional superstars like Nick Faldo, Nick Price, and Greg Norman. Golf needs Tiger Woods much like hockey needed Wayne Gretzky to revitalize the sport. And even if he is not the next Jack Nicklaus, he could be the most important figure in the future of golf.

Lemon leads quest for league title

Senior tailback is on pace to break a plethora of NCAA rushing records

By Brett Tomlinson
Bucknellian Staff Writer

Bucknellian File Photo

Rich Lemon '97 is already the career rushing leader at Bucknell. In three years he has gained 339 yards against this week's opponent, Towson State.

Bucknell football opens the season this Saturday against Towson State in the first of a record-tying seven home games at Christy Mathewson Memorial Stadium, where the Bison were an impressive 3-1 last year.

The Bison return several solid performers on both sides of the ball, but there are still many questions to be answered by head coach Tom Gadd's squad.

Rich Lemon '97 will be the focal point of most defenses, including Towson State's, which has been burned by the talented tailback for 339 yards on the ground over the past three years. If the Tigers can contain Lemon, which is a considerable but not impossible task, the weight of the offense will fall on a young offensive line and an untested group of receivers.

Quarterback Jim Fox '97 completed 192 passes last year, but only 63 of them were caught by receivers who are returning this season. Over half of those 63 went to Lemon, mainly on screen passes, which means that this year's receivers have had minimal varsity experience. Ken Scholtz '98, Ardie Kissinger '99, Paul Lima '99 and Ron Rockett '99 will all have their chance to step into the spotlight at wide receiver. Rockett, who has the size to be a prime target at 6-2, 190-pounds, had six catches last year for 83 yards.

The offensive line has two returning starters but no seniors in the starting lineup. Senior leaders like Lemon and Fox will have their hands full, at least at the start of the season.

The good news for the Bison is that they have plenty of time to develop as a team before the Patriot League section of the schedule begins on October 26. Also, Bucknell has four home games to begin the season, which should help to build confidence.

The bad news is that three of the Bison's first four opponents posted winning records last year, including William and Mary, ranked 19th in Division I-AA at the end of last year, and Ivy-League power Penn.

Towson State gave the Bison solid competition last year in a 14-7 Bucknell win, and the Tigers return 8 offensive starters, including quarterback Kevin Smith. Smith is a sophomore who had a solid performance (13-27, 154 yards, 0 int.) against the nationally ranked Bucknell pass defense as a freshman last year.

Smith returns two of his top receivers, Shawn Ward and Amadi Eze, along with a solid running game. The Tiger rushing game could be the major concern for the Bison, who will be playing with a rebuilt defensive front. Last week the Tigers racked up 315 yards on the ground in their 14-3 opening win over Butler. Maurice Snydor had a career-high 173 rushing yards.

The Bison will get their chance to answer many early season doubts against the Tigers on Saturday. Kickoff is at 1 p.m.

Rich Lemon Needs...

- 890 yards for the Patriot League rushing record

- 1000 yards to become the first 4-time 1000-yard rusher in Division 1-AA history

- 1054 yards for 5000 career rushing yards

-1389 yards for the Division I-AA career rushing record

Double murder/suicide shocks community

BY REBECCA KLINGLER

Bucknellian Staff Writer

The University is still struggling to make sense of the tragic deaths of three former students earlier this week.

Robin Meredith-Golder '82 and her partner, Dominic Giorgi Jr., a member of the class of '79, were believed to have been shot by Meredith-Golder's estranged husband, Ronald Golder, also a former University student, at his home in Buffalo Township Sunday evening. Golder then took his own life in Lewisburg later that night.

Bucknellian File Photo

Robin Meredith-Golder was one of two victims in a double murder/ suicide. Meredith-Golder graduated from the University in 1982.

"This is a tragedy of such dimensions," said Harold Schweitzer, associate professor of English. "It's so tragic and so unthinkable that I just can't say anything about it now."

Schweitzer said he and his wife knew both Golder and Meredith-Golder, whom they admired and loved.

Operator of the Wellspring Whole Life Education Center, Meredith-Golder touched the lives of many students. From its establishment in 1994, Wellspring, which is located on North 2nd Street, was designed to foster alternative types of thinking, exercise, entertainment, health practices and enjoyment of the arts.

"Wellspring was important for a lot of reasons," said Rich Dionne GR. "I think what she was trying to do there was really important."

Describing Meredith-Golder as "very energetic," Dionne recalled the crucial role she played in his life. When he and his girlfriend, Amy Sass '96, were having trouble finding a place to complete their community theatre work, Meredith-Golder willingly offered the center.

Dionne knew both Golder and Meredith-Golder from his work at Wellspring.

"Ron was, from what I could tell, a really gentle person," Dionne remembered, stressing that he certainly was not the "bad guy" that everyone is making him out to be. "When they were together, they were really good together. They had their tensions, but who doesn't?"

Glenda D'Urso, of Dining Services, echoed Dionne's sentiments. Together, Golder and Meredith-Golder made an excellent couple from the time they were married in 1990. He was the "thinker" and she was the "dream maker," D'Urso said.

Golder became a part of D'Urso's life almost two decades ago while she was still a student at the University.

"He was my mentor," she said. "He has been my friend for 17 years."

Golder was a philosopher, D'Urso said. He was disillusioned with the bureaucracy of the courts and what he felt was the double standard it created. Golder believed, for example, that representation and a fair trial is only available when it can be paid for.

When Golder-Meredith filed for divorce in June, a divorce which Golder did not want, D'Urso said he became caught up in the system he "fought against all his life."

"Everything was being taken away from this man," D'Urso said.

Meredith-Golder was suing for custody of their 5-year-old son. She also had two other sons from a previous marriage. D'Urso said that Golder was terrified of the children being taken away from him.

"That's what broke Ron. Not that she left him.," she said. "He just couldn't cope anymore."

"He wanted to be a good guy. He wanted to do the right thing ... that's the worst part of it," she added.

Meredith-Golder and Giorgi lived at 236 N. Front Street with the 3 children.

According to accounts cited in yesterday's Daily Item, Golder shot Meredith-Golder and Giorgi in their car Sunday evening when the couple was picking up the children. Golder then fled the scene in the car with Meredith-Golder still in it.

Golder's body and the abandoned car were found Monday morning in an Appletree Alley yard, right behind the South Third Street office of Graham Showalter law firm.

The tragedy has affected everyone in the community, especially those who knew the victims.

"It really makes us all wonder how we can survive," D'Urso said. "Looking at Ron and knowing he did what he did makes me feel hopeless. And I think that's how it makes us all feel."

To help the community grieve, Susquehanna Valley Women in Transition is holding a vigil for the victims at 7:30 p.m. tonight near the Market Street Post Office.

"It's to mourn and remember the victims of the double slaying/ suicide," said Janice Butler, director of the women's resource center.

The vigil is also being held to protest violence.

"This is the second woman who was killed by her husband in less than a month in Union County," Butler explained.

Sunflower Daycare gets replanted

BY KATHRYN ARDINGER

Bucknellian Staff Writer

After 18 years on Bucknell's campus, Sunflower, the Lewisburg area child care center, has a new home.

Sunflower opened its doors on Monday at its new Smoketown Road location, next to the entrance to Bucknell Golf Club. The center had been located in Tustin Gymnasium, below the dance studio, for the past 18 years.

Its affiliation with the University is one of a tenant-landlord relationship, said Pat Ringkamp, director of Sunflower.

"The building was built with money allocated by the Bucknell University Board of Directors," Ringkamp said. "The site was chosen by Bucknell," she added.

Sunflower was established and incorporated in 1978 by a group of parents employed by the University. They were in need of child care and realized that there was nothing in the area that met their needs, Ringkamp said.

Eugenia Gerdes, dean of the college of arts and sciences, one of the founding parents, said that the group of parents made a case to people in the administration who were favorable to their needs. As a consequence, the parents were able to get space on campus at a reasonable rent.

The center was set up as a parent-run, non-profit child care center, which it continues to be, Gerdes said.

Gerdes pointed out that the lease with the University has certain advantages for people within the University.

For instance, priority enrollment is given to the children of University faculty, students and staff, Ringkamp and Gerdes both acknowledged.

"We do serve the whole community," Ringkamp said. She estimated that close to 50 percent of the children enrolled at Sunflower are those of University faculty, students and staff. There are about

University ranked 31st among liberal arts schools

BY ERIC BLOEM

U.S. News and World Report has released its listing of the top national universities and colleges. This year the University ranked 31st among "best national liberal arts colleges," a slip from last years ranking of 30th place and 1994's ranking of 25th. The University received a ranking of fifth for the school of engineering.

There were many factors that *U.S. News and World Report* took into consideration when ranking. First, the presidents, deans, and directors of admissions were asked to rank all schools within their quartile. Each school acquired points when it was chosen. This process accounted for 25 percent of the overall score.

Other areas taken into account were selectivity, faculty resources, financial resources, retention, alumni satisfaction, and value added. Value added is based on the difference between a school's predicted graduation rate and its educational expenditures per student in relation to its graduation rate.

Mark Davies, director of admissions, was not concerned with the University's one place drop in rank. He stated, "just because we dropped one place does not make us a lesser school."

Davies added he is "concerned about survey ranking in this nature." These surveys do not look at the entire picture of a University. A lot of very crucial information is missing, said Davies.

"The dilemma is the criteria they utilize," said Davies. Davies said that families need to look at schools for themselves and judge which school would be best for them. A school with the best numbers is not necessarily the best school for everyone.

Davies said that he was "pleased to be in the top forty schools."

Eugenia Gerdes, dean of the college of arts and sciences, said, "The important thing to keep in mind is that every year there is a change in how the different factors measured by *U.S. News and World Report* are weighed."

> ***"just because we dropped one place does not make us a lesser school."***
> *–Mark Davies*

She continued to say that what is "most important is the reputation of an academic institution." In the Oct. 23 edition of *U.S. News and World Report,* which appeared in newsstands Monday, the University retained its position as 25th for "best value" among national liberal arts schools.

Gerdes believes that the one point drop from 30 to 31 in overall ranking is meaningless to prospective first-year students.

She stated that this survey "tends to obscure the real differences" in colleges. One-tenth of a point difference in ranking does not mean much for a prospective student compared to the environ-

Athlete graduation rate 4th in Nation

BY REBECCA KLINGLER

Bucknellian Staff Writer

The 90 percent graduation rate for University student athletes is the fourth best among Division I schools, according to the National Collegiate Athletic Association (NCAA) statistics.

Of the athletes who entered the University since 1986, 90 percent have graduated within 6 years, the time span used for the statistics. On average, University student athletes have only taken 4.1 years to complete their studies.

The figures are based on those athletes who received financial aid from the University.

Women athletes, with a total of 42 individuals over four classes, had a 100 percent graduation rate. Out of 152 male athletes across four classes, 88 percent graduated.

Bucknell's overall four-year graduation rate is 92 percent.

Rick Hartzell, athletic director, said that while the University's ranking is something to be proud of, it is nothing exceptional.

"That's exactly how it should be," he said. "We're just doing what we're supposed to do be doing, and the students are doing what they're supposed to be doing."

The selective admissions process is one reason why Hartzell believes the University's student athletes are successful. When the department recruits athletes, the importance of academic studies is emphasized as the University's main mission from the beginning.

"When we recruit students, that's the first thing we talk about, what Bucknell is about...and then we go from there. If students don't want that, then we tell them point blank they should go somewhere else," he said.

The philosophy of the athletic

Task force formed to investigate assaults

BY ROB BOYCE

Bucknellian Staff Writer

Due to a string of sexual assaults and attempted assaults, a task force has been formed to consolidate police efforts. Watsontown Detective Dennis Derr will serve as the coordinator of the effort.

Over the past 17 days, there have been seven sexual assaults or attempted assaults in Northumberland County.

The most recent incident occurred on September 11. A woman had gotten into her car in Century Village, outside Lewisburg. The woman locked the doors and then a man attempted to enter her car. Among other incidents, a 21-year-old Watsontown woman was abducted and raped at 11:30 p.m. on August 25.

"The task force will pretty much be concentrating on the crimes in Northumberland County, but also paying attention to those outside the county," said Derr.

Any information should be reported to Derr at 538-2773 (police department) or 742-8771 (Union County Emergency Services).

Jewish community celebrates new year

BY KARIN DAVIDSON

Bucknellian Staff Writer

It is the start of a new year.

Rosh Hashanah (last Saturday) and Yom Kippur (Monday) mark the beginning of the Jewish year, and for Karen Reiser '97, "It's a new beginning,"

These holy days are prominent in the Jewish religious calendar. Besides marking the beginning of the new year, they also signify the traditional period of self-scrutiny and repentance.

Yom Kippur, or the day of atonement, is the day of repentance and reconciliation between man and God and between man and his neighbor. It is the culmination of the penitential season.

This day is observed by many Jews, regardless of their religious activity the rest of the year.

Reiser said that Yom Kippur finishes a 10-day period that started with Rosh Hashanah.

On Yom Kippur "you are supposed to be thinking about the past year and ask for forgiveness for your sins," Reiser said.

To celebrate Yom Kippur, Brad Fixman '99 said, "I will go to the service at the meditation chapel."

At home, he would "go to temple and fast for 24 hours."

Fixman is planning to fast from sundown this Sunday until sundown on Monday. Fasting has been a historical tradition since Biblical times.

On Monday at 8 p.m., Fixman will break his fast at Martin House. "We break fast with bagels and lox (fish)," he said.

The day before Yom Kippur is devoted to preparing for the fast. Festive meals are eaten to gain strength for the fast and to celebrate the pardon Yom Kippur brings.

According to Talmudic teaching, Yom Kippur only brings atonement for offenses against other people if the victims have pardoned the offenders. For this reason, it is typical for people to ask for forgiveness of one another on the day before the fast.

Reiser said that it's a little trickier to celebrate while at school. "At Bucknell it's kind of hard. This is the second year in a row I've had a test on a high holiday," she said, adding that "Usually professors are flexible."

Reiser also mentioned that it's hard to sit in classes when she has been fasting all day.

Reiser pointed out that the next major Jewish holiday is Sukkot, which is a celebration of the harvest. She said it starts Friday the 27th.

To celebrate a group of students will be gathering at Martin House at 6 p.m. that Friday. They will be building a Sukkah which is an outdoor house-type structure that represents the structures Jewish people built in Biblical times when crossing the desert for 40 years. The event is open to the campus.

Cara Mickelson—The Bucknellian

Rick Hartzell, Director of Physical Education and Athletics.

GRADES

from page 1.

department is simple: "You can excel as a student and you can excel as an athlete, but our priority is you excel as a student first," Hartzell said.

Hartzell said that there are no specific programs on campus that tailor to the academic needs of student athletes. The workshops that the athletic department does sponsor are campus-wide events and are often held in conjunction with other departments.

Mandatory study sessions are instituted by some coaches, but it is not common. Hartzell estimated that only seven or eight of the 16 sports teams have such programs.

But simply having a coach may be another reason why student athletes are able to succeed.

"Athletes have an advantage," Hartzell said. "They have a coach keeping an eye on them in all sorts of ways, and one of the ways is to be sure they are on top of their studies."

The NCAA statistics show Bucknell trailing only behind Holy Cross and Providence, who shared first place with a 94 percent student athlete graduation rate, and Duke, who boasted a 91 percent rate. Over 300 universities and colleges are in Division I. The national average for all Division I athlete graduations was 58 percent.

September 11, 1996

INFORMATION/PHONE CALLS - An office in the Athletic Department has been receiving "hang-up" phone calls during the last week. A trap has been placed on the line.

THEFT - A University student reported the theft of a bicycle, between 7:30-9:30 p.m. on September 8, from the bike rack at the annex to the Field house.

INFORMATION - Two males, soliciting used books, were instructed by VP Maxwell to obtain permission to sell their books.

INFORMATION - A Public Safety Officer responded to an anonymous report of juveniles in the computer lab at Taylor Hall. Four of the juveniles were on the premises without authorization and left without incident.

HARASSMENT BY COMMUNICATION - A Bucknell student reported to a Public Safety Officer having received phone calls, repeatedly, from an unknown person. Investigation is continuing.

September 12, 1996

INSTITUTIONAL VANDALISM - A University employee reported that flagstones, barricades, and tape on Dent Drive were damaged overnight. Investigation is continuing.

DISORDERLY CONDUCT - East Buffalo Township Police Department cited a juvenile for disorderly conduct for rollerblading on campus. The youth was also warned by a Public Safety Officer not to come on University property.

ALCOHOL/UNDERAGE CONSUMPTION - An underage University student was cited by a Public Safety Officer for consuming beer at a party at Gateway-Silberman.

UNREGISTERED PARTY/UNDERAGE CONSUMPTION/POSSESSION - A Public Safety Officer confiscated a keg of beer from a room in Gateway-Silberman. Several citations were issued for underage consumption.

September 13, 1996

INFORMATION/SUSPICIOUS PERSON - A Public Safety Officer received a report of an unknown person attempting to enter a room in Swartz Hall on September 4. The investigation is continuing.

September 14, 1996

ALCOHOL/UNDERAGE CONSUMPTION - A Public Safety Officer stopped a vehicle for a stop sign violation on Fraternity Road. The underage passenger in the vehicle was cited, when he admitted to consuming beer.

ALCOHOL/UNDERAGE CONSUMPTION - A Public Safety Officer stopped a vehicle for a traffic violation on Fraternity Road. The underaged vehicle operator was cited for the alcohol and traffic violations.

UNIVERSITY PROPERTY DAMAGE - A Public Safety Officer located a broken window on B wing, Swartz Hall. The window was repaired.

INFORMATION - East Buffalo Township Police advised a Public Safety Officer that a University student would be receiving a citation for attempt to purchase alcohol by a minor with a false ID.

INFORMATION/LOST UNIVERSITY IDENTIFICATION CARD - A University student reported having lost an ID card between September 13 and September 14.

INFORMATION/DUMPSTER FIRE - A Public Safety Officer responded to a dumpster fire at Gateway-Malesardi. A Physical Plant employee extinguished the fire which was caused by hot charcoal.

INFORMATION/ASSIST RA - A Public Safety Officer responded to Smith Hall to assist an RA in approaching the occupant(s) of a room-where incense were being burned. A report was filed with Residential Life.

UNREGISTERED PARTY/ALCOHOL VIOLATIONS - A Public Safety Officer responded to Swartz Hall for the report of an unregistered party in progress. A plain-view search of the room was conducted and the unopened containers of beer were confiscated. The occupants were under 21 years of age. Internal charges are being filed.

September 15, 1996

ALCOHOL/UNDERAGE CONSUMPTION - An underaged University student was cited at the rear of Phi Gamma Delta Fraternity for possessing and admitting to consuming beer.

INFORMATION/RESIDENCE HALL ROOM LOCK CHANGE REQUEST - A Public Safety Officer responded to Vedder Hall to meet with a University student requesting to have the room lock changed since another occupant had moved out. A locksmith responded and made the necessary repairs.

RECOVERED BICYCLE - A bicycle, left unattended, at Swartz Hall was delivered to Public Safety.

Investment advice offered at financial roundtable

BY KATHRYN WRIGHTSON

Bucknellian Staff Writer

Tomorrow evening at 7:30 p.m. in the Weis Center, a panel of top financial experts will give financial and investment advice at the University's second annual investment roundtable.

WVIA Public Television in Scranton will tape the roundtable discussion for broadcast in October.

First held last April, the roundtable session was organized by George Kester, professor of management. "I've wanted to do it for a number of years. I've increasingly begun to bring speakers from the financing and investing world into my classes," said Kester.

The roundtable will provide advice about stocks, bonds, and the 7,000 mutual funds that are available on the market. The topic of discussion will focus on "growth stock investing with a global perspective," said William J. Crerend, the moderator for the roundtable.

"When I grew up it was only wealthy people who bought stocks and bonds, rather than the average individual," Kester said.

There are now over 7,000 mutual funds which are accessible to any investor through their 401(k) accounts or through direct investments, Kester said.

"Decisions about this will be made by anyone. I think there is a big need in the community in general to understand the world of financing and investments," said Kester.

"Investing is part of everyone's life...It is an immensely complex subject; with the globalization of markets, learning and information are the first steps in successful investing," Crerend said.

The roundtable is "an opportunity to bring people with a lot of experience and insight to Bucknell and it will raise overall awareness about what is going on in the financial world," said Kester.

"This is a wonderful opportunity not only to benefit our students, but to help keep alumni in touch with Bucknell," Kester said.

The four panelists are alumni who are executives of "organizations that manage portfolios that tend to be growth oriented," Kester said. "We hope as much as possible to pick people with Bucknell connections. The panelists are Bucknell graduates and the moderator is the father of two Bucknell alums," said Kester.

Ron Baron '65, is the founder, president and chief investment officer of Baron Capitol Inc. He manages two mutual funds, Baron Asset Fund and Baron Small Growth & Income Fund. Baron Small Growth & Income Fund was ranked first out of 426 growth and income funds for 1995.

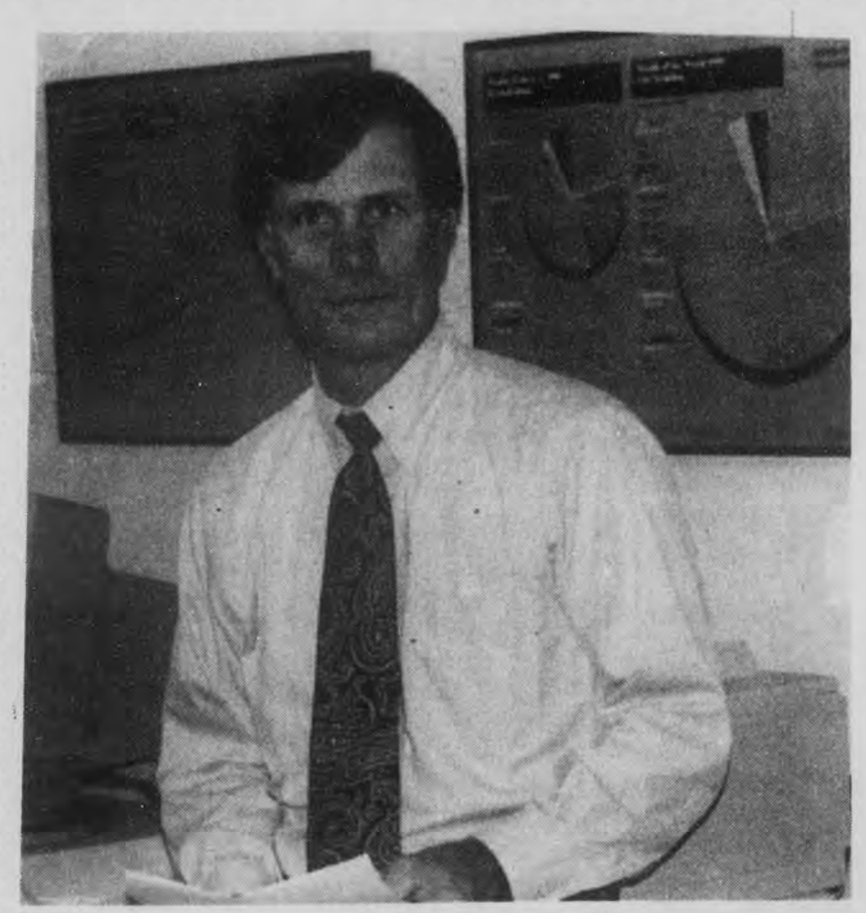
Peter H. Mottoon '84 is the managing director of Scudder International of Scudder, Stevens & Clark Inc., one of the United States' oldest and largest investment management firms, founded in 1928.

George A. Needham '65 founded, and is now the chairman of the board and chief executive officer of, Needham & Co. Inc. The Needham Growth Fund was ranked first out of 2,093 general equity funds for 1996.

Nancy B. Prial '80 is the vice-president and portfolio manager for Twentieth Century Mutual Funds. Prial works with a team who focuses on the Heritage Investors Fund.

William J. Crerend, the event moderator, is the co-founder and chairman emeritus of Evaluation Associates Capitol Markets Inc. (EAI). EAI works with 150 investors to help structure personal investment programs.

The event is free and open to the public and a question and answer session will follow the discussion.



Maggie McCormick—The Bucknellian

George Kester, professor of management, is the organizer of the investment roundtable.

William J. Crerend, co-founder of Evaluation Associates Capitol Markets. will moderate the investment roundtable on Sept. 20.

RANKING

from page 1

ment of a university.

The University's engineering department was ranked as fifth among all non-Ph.D. engineering schools in the nation. Trudy Cunningham, the associate dean of the college of engineering, was happy with the news. Cunningham stated, "This is good news for the (engineering) college and Bucknell." She also added that she "would not be surprised if there was an increase in applications."

Cunningham stated this was the "first year we were ranked. Up until this year, the only engineering schools that were ranked were those with Ph.D. programs." Many of the non-Ph.D. engineering schools have been working with *U.S. News and World Report* to get a listing of top non-Ph.D schools published.

Although pleased with the results, Cunningham also demonstrated disapproval for the rating system which is used. She said that a rating of five this year could translate to being unlisted next year even though the engineering school has not changed.

Shana Hagan '99, who works for the office of annual giving, was not pleased with the University's ranking this year. "I think that it's disappointing that even though Bucknell's annual giving from alumni has gone up this past year, our ranking has dropped." Alumni giving is part of the Alumni Satisfaction rate that *U.S. News and World Report* uses to evaluate universities.

U.S. News and World Report "America's Best Colleges" appears in the Sept. 16th edition and will be in newsstands until June 2.

SUNFLOWERS

from page 1

Jeanne Futoyma—The Bucknellian

The new building which will house Sunflower Daycare is located near the University golf course.

50 children enrolled in the Sunflower program which accepts children ranging in age from six weeks to six years.

The move has been in the works for at least five years, Ringkamp said.

"Tustin gym was too small for the number of children and for the state licensing requirements," Gerdes said.

Anticipating this move for the past several years, Ringkamp cannot believe that they are really at the new location. "We're ecstatic," she said.

The new facility is completely in accordance with the Americans with Disabilities Act, (ADA), Ringkamp said.

There are windows in the new building which is a major change from the previous situation in Tustin. Also, there has been an increase in the number of "adult" areas. These include staff and conference rooms, as well as real offices, instead of just a desk in a corner, Ringkamp said.

The main drawback in the move from Tustin to the other side of Route 15 has been the lack of access to town, according to Ringkamp. However, on the positive side, there is more green space, she said. A new playground is going to be built, including new sandboxes and equipment, Ringkamp said.

"In general, the kids are enjoying it and of course, once we get the playground completed, they will enjoy it even more," Ringkamp said.

She said that they will not be walking along Smoketown Road. "Kids like at times to walk over to campus to visit different moms and dads, so we'll use the tunnel for things like that," Ringkamp said.

Aside from the obvious parent—day care provider relationship, there are other interactions between the University and Sunflower. For instance, students enrolled in the child development class taught at the University fulfill part of the course requirement by observing and volunteering at the center one hour per week.

Ringkamp said that other students from the University, specifically education and sociology majors, have used Sunflower to meet different requirements.

Though the child care areas have expanded, the number of children enrolled is not increasing in size.

The Outing Club will be moving into the space that Sunflower occupied in Tustin. The club was on the look-out for a new meeting place, when the space was vacated. Jim Hostelter, the advisor for the Outing Club and builder of the new Sunflower facility, made a proposal to the space committee for this location and it was approved.

The office is twice as big as the Club's current space, located in the basement of Swartz Hall, Lou Skenderis '98, president of the Outing Club said. The club, which has over 100 members, is going to utilize this additional space, Skenderis said.

"We wanted to make it a homey place for members because we really don't have that now," he said.

Firing Line tickets sellout quickly

BY ROB BOYCE

Bucknellian Staff Writer

All of the tickets for the filming of "Firing Line" that were available to faculty and students are gone. A total of 500 tickets took less than three hours to distribute.

Three hundred and fifty tickets were available to students starting at 9 a.m. on Saturday morning. By 11:30, all of the tickets were gone. Kathy Dibell, associate director of public relations, was on hand for the distribution. "Some students got there at 2 a.m. They had their comforters and Dunkin' Donuts. They really wanted tickets." According to Dibell, everyone that was in line at 9 a.m. was able to get a ticket. However, some students who arrived later were turned away.

For the faculty, the 150 tickets that had been allotted were made available at noon on Monday. Twenty minutes later, the last tickets were given out. Fourteen faculty members were left without seats.

Although some were concerned that the number of tickets allotted would not be sufficient, there have been no serious complaints. "We have only had a handful of calls, students asking if there were any tickets available," said Dibell.

These concerns were partly due to the need to use 120-150 seats to situate the cameras at angles appropriate to the proposed set-up of the stage. The positioning of these cameras in the audience is not expected to interfere with the view of the audience.

Although the arrangement of the panelists on stage for the broadcast has not yet been finalized, according to Dibell, there will likely be two tables in a "v" with the moderator at the point. This will mean that the panelists will not be facing the audience. "They will be kitty-corner... the audience will pretty much have a side view."

Jewish community celebrates new year

By Karin Davidson
Bucknellian Staff Writer

It is the start of a new year.

Rosh Hashanah (last Saturday) and Yom Kippur (Monday) mark the beginning of the Jewish year, and for Karen Reiser '97, "It's a new beginning."

These holy days are prominent in the Jewish religious calendar. Besides marking the beginning of the new year, they also signify the traditional period of self-scrutiny and repentance.

Yom Kippur, or the day of atonement, is the day of repentance and reconciliation between man and God and between man and his neighbor. It is the culmination of the penitential season.

This day is observed by many Jews, regardless of their religious activity the rest of the year.

Reiser said that Yom Kippur finishes a 10-day period that started with Rosh Hashanah.

On Yom Kippur "you are supposed to be thinking about the past year and ask for forgiveness for your sins," Reiser said.

To celebrate Yom Kippur, Brad Fixman '99 said, "I will go to the service at the meditation chapel."

At home, he would "go to temple and fast for 24 hours."

Fixman is planning to fast from sundown this Sunday until sundown on Monday. Fasting has been a historical tradition since Biblical times.

On Monday at 8 p.m., Fixman will break his fast at Martin House. "We break fast with bagels and lox (fish)," he said.

The day before Yom Kippur is devoted to preparing for the fast. Festive meals are eaten to gain strength for the fast and to celebrate the pardon Yom Kippur brings.

According to Talmudic teaching, Yom Kippur only brings atonement for offenses against other people if the victims have pardoned the offenders. For this reason, it is typical for people to ask for forgiveness of one another on the day before the fast.

Reiser said that it's a little trickier to celebrate while at school. "At Bucknell it's kind of hard. This is the second year in a row I've had a test on a high holiday," she said, adding that "Usually professors are flexible."

Reiser also mentioned that it's hard to sit in classes when she has been fasting all day.

Reiser pointed out that the next major Jewish holiday is Sukkot, which is a celebration of the harvest. She said it starts Friday the 27th.

To celebrate a group of students will be gathering at Martin House at 6 p.m. that Friday. They will be building a Sukkah which is an outdoor house-type structure that represents the structures Jewish people built in Biblical times when crossing the desert for 40 years. The event is open to the campus.

Cara Mickelson—The Bucknellian

Rick Hartzell, Director of Physical Education and Athletics.

GRADES

from page 1.

department is simple: "You can excel as a student and you can excel as an athlete, but our priority is you excel as a student first," Hartzell said.

Hartzell said that there are no specific programs on campus that tailor to the academic needs of student athletes. The workshops that the athletic department does sponsor are campus-wide events and are often held in conjunction with other departments.

Mandatory study sessions are instituted by some coaches, but it is not common. Hartzell estimated that only seven or eight of the 16 sports teams have such programs.

But simply having a coach may be another reason why student athletes are able to succeed.

"Athletes have an advantage," Hartzell said. "They have a coach keeping an eye on them in all sorts of ways, and one of the ways is to be sure they are on top of their studies."

The NCAA statistics show Bucknell trailing only behind Holy Cross and Providence, who shared first place with a 94 percent student athlete graduation rate, and Duke, who boasted a 91 percent rate. Over 300 universities and colleges are in Division I. The national average for all Division I athlete graduations was 58 percent.

PUBLIC SAFETY LOG

September 11, 1996

INFORMATION/PHONE CALLS - An office in the Athletic Department has been receiving "hang-up" phone calls during the last week. A trap has been placed on the line.

THEFT - A University student reported the theft of a bicycle, between 7:30-9:30 p.m. on September 8, from the bike rack at the annex to the Field house.

INFORMATION - Two males, soliciting used books, were instructed by VP Maxwell to obtain permission to sell their books.

INFORMATION - A Public Safety Officer responded to an anonymous report of juveniles in the computer lab at Taylor Hall. Four of the juveniles were on the premises without authorization and left without incident.

HARASSMENT BY COMMUNICATION - A Bucknell student reported to a Public Safety Officer having received phone calls, repeatedly, from an unknown person. Investigation is continuing.

September 12, 1996

INSTITUTIONAL VANDALISM - A University employee reported that flagstones, barricades, and tape on Dent Drive were damaged overnight. Investigation is continuing.

DISORDERLY CONDUCT - East Buffalo Township Police Department cited a juvenile for disorderly conduct for rollerblading on campus. The youth was also warned by a Public Safety Officer not to come on University property.

ALCOHOL/UNDERAGE CONSUMPTION - An underage University student was cited by a Public Safety Officer for consuming beer at a party at Gateway-Silberman.

UNREGISTERED PARTY/UNDERAGE CONSUMPTION/POSSESSION - A Public Safety Officer confiscated a keg of beer from a room in Gateway-Silberman. Several citations were issued for underage consumption.

September 13, 1996

INFORMATION/SUSPICIOUS PERSON - A Public Safety Officer received a report of an unknown person attempting to enter a room in Swartz Hall on September 4. The investigation is continuing.

September 14, 1996

ALCOHOL/UNDERAGE CONSUMPTION - A Public Safety Officer stopped a vehicle for a stop sign violation on Fraternity Road. The underage passenger in the vehicle was cited, when he admitted to consuming beer.

ALCOHOL/UNDERAGE CONSUMPTION - A Public Safety Officer stopped a vehicle for a traffic violation on Fraternity Road. The underaged vehicle operator was cited for the alcohol and traffic violations.

UNIVERSITY PROPERTY DAMAGE - A Public Safety Officer located a broken window on B wing, Swartz Hall. The window was repaired.

INFORMATION - East Buffalo Township Police advised a Public Safety Officer that a University student would be receiving a citation for attempt to purchase alcohol by a minor with a false ID.

INFORMATION/LOST UNIVERSITY IDENTIFICATION CARD - A University student reported having lost an ID card between September 13 and September 14.

INFORMATION/DUMPSTER FIRE - A Public Safety Officer responded to a dumpster fire at Gateway-Malesardi. A Physical Plant employee extinguished the fire which was caused by hot charcoal.

INFORMATION/ASSIST RA - A Public Safety Officer responded to Smith Hall to assist an RA in approaching the occupant(s) of a room-where incense were being burned. A report was filed with Residential Life.

UNREGISTERED PARTY/ALCOHOL VIOLATIONS - A Public Safety Officer responded to Swartz Hall for the report of an unregistered party in progress. A plain-view search of the room was conducted and the unopened containers of beer were confiscated. The occupants were under 21 years of age. Internal charges are being filed.

September 15, 1996

ALCOHOL/UNDERAGE CONSUMPTION - An underaged University student was cited at the rear of Phi Gamma Delta Fraternity for possessing and admitting to consuming beer.

INFORMATION/RESIDENCE HALL ROOM LOCK CHANGE REQUEST - A Public Safety Officer responded to Vedder Hall to meet with a University student requesting to have the room lock changed since another occupant had moved out. A locksmith responded and made the necessary repairs.

RECOVERED BICYCLE - A bicycle, left unattended, at Swartz Hall was delivered to Public Safety.

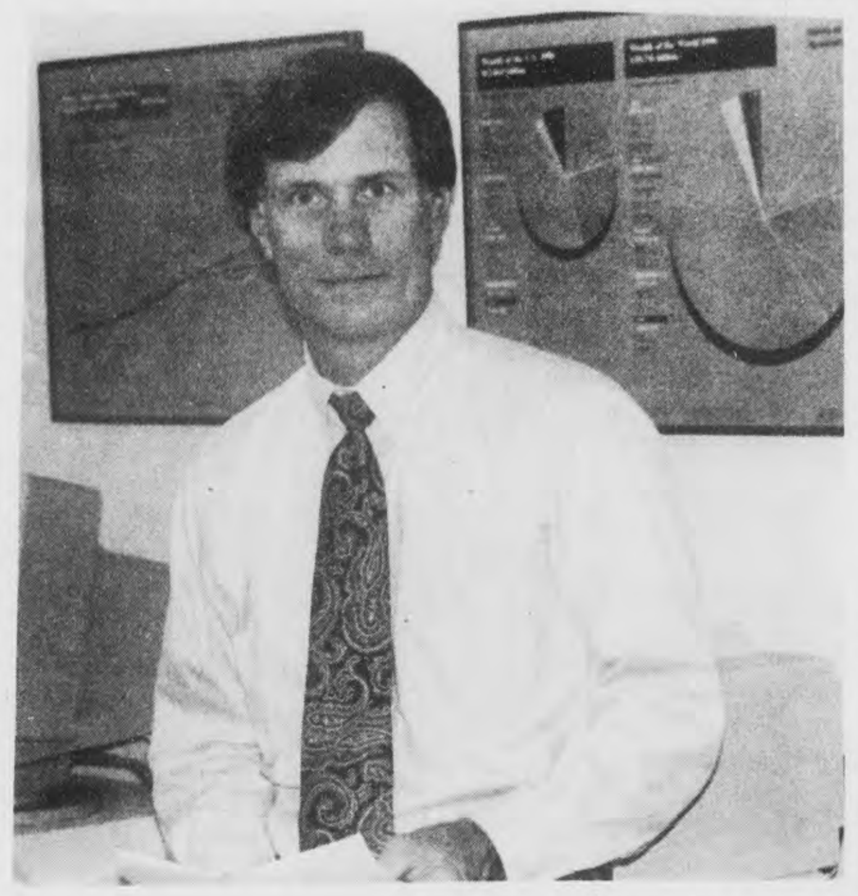
Investment advice offered at financial roundtable

By Kathryn Wrightson
Bucknellian Staff Writer



Maggie McCormick—The Bucknellian

George Kester, professor of management, is the organizer of the investment roundtable.

Tomorrow evening at 7:30 p.m. in the Weis Center, a panel of top financial experts will give financial and investment advice at the University's second annual investment roundtable.

WVIA Public Television in Scranton will tape the roundtable discussion for broadcast in October.

First held last April, the roundtable session was organized by George Kester, professor of management. "I've wanted to do it for a number of years. I've increasingly begun to bring speakers from the financing and investing world into my classes," said Kester.

The roundtable will provide advice about stocks, bonds, and the 7,000 mutual funds that are available on the market. The topic of discussion will focus on "growth stock investing with a global perspective," said William J. Crerend, the moderator for the roundtable.

"When I grew up it was only wealthy people who bought stocks and bonds, rather than the average individual," Kester said.

There are now over 7,000 mutual funds which are accessible to any investor through their 401(k) accounts or through direct investments, Kester said.

"Decisions about this will be made by anyone. I think there is a big need in the community in general to understand the world of financing and investments," said Kester.

"Investing is part of everyone's life...It is an immensely complex subject; with the globalization of markets, learning and information are the first steps in successful investing," Crerend said.

The roundtable is "an opportunity to bring people with a lot of experience and insight to Bucknell and it will raise overall awareness about what is going on in the financial world," said Kester.

"This is a wonderful opportunity not only to benefit our students, but to help keep alumni in touch with Bucknell," Kester said.

The four panelists are alumni who are executives of "organizations that manage portfolios that tend to be growth oriented," Kester said. "We hope as much as possible to pick people with Bucknell connections. The panelists are Bucknell graduates and the moderator is the father of two Bucknell alums," said Kester.

Ron Baron '65, is the founder, president and chief investment officer of Baron Capitol Inc. He manages two mutual funds, Baron Asset Fund and Baron Small Growth & Income Fund. Baron Small Growth & Income Fund was ranked first out of 426 growth and income funds for 1995.

Peter H. Mottoon '84 is the managing director of Scudder International of Scudder, Stevens & Clark Inc., one of the United States' oldest and largest investment management firms, founded in 1928.

George A. Needham '65 founded, and is now the chairman of the board and chief executive officer of, Needham & Co. Inc. The Needham Growth Fund was ranked first out of 2,093 general equity funds for 1996.

Nancy B. Prial '80 is the vice-president and portfolio manager for Twentieth Century Mutual Funds. Prial works with a team who focuses on the Heritage Investors Fund.

William J. Crerend, the event moderator, is the co-founder and chairman emeritus of Evaluation Associates Capitol Markets Inc. (EAI). EAI works with 150 investors to help structure personal investment programs.

The event is free and open to the public and a question and answer session will follow the discussion.

William J. Crerend, co-founder of Evaluation Associates Capitol Markets. will moderate the investment roundtable on Sept. 20.

Study abroad accusations are found baseless

BY TRACY THIFFAULT
Bucknellian Staff Writer

An anonymous letter, postmarked July 28, 1996, was sent throughout the country from a group of students claiming that their study abroad experience at Cambridge University via the INSTEP program with Butler University was misrepresented to them. The letter stated concerns about the program, particularly in reference to the housing and academic environments and the possible misuse of tuition money.

After careful examination, David Gray, director of Overseas Operations at the Institute for Study Abroad and members of the Butler University/Institute for Study Abroad National Advisory Council concluded that the letter was not from students. It falsely accused the Institute for Study Abroad and Butler University of misleading students about their programs, in particular the Cambridge University INSTEP program. It also misrepresented the relationship between the Institute for Study Abroad and Butler University.

The letter did not include a return address or phone number where the writer could be reached. Furthermore, the letter was unsigned.

Bucknell has an excellent reputation for studying abroad. Approximately 280 or 35 percent of students per class study abroad for one or two semesters each year. The University has used the INSTEP Cambridge program for many years, and there has never been a problem. Barbara Rowe, director of international education, said that all feedback she has heard from this program has been positive.

Amber Griffin '97 studied through the INSTEP Cambridge program. She said, "I had the time of my life. It was exactly what I wanted." Nikki Blaschak '97, another participant in the INSTEP Cambridge program, said, "I had a wonderful time. I would definitely recommend it to others."

The Office of International Education's relationship with Butler is positive. Currently, 11 Bucknell students are studying in Australia and New Zealand through the program at Butler University.

The Office of International Education constantly monitors its study abroad programs. Rowe mentioned that she or one of her staff makes a site visit once a year to any new area or program or to areas where students have initiated complaints. When visiting, directors pay a portion of the cost and stay in the university dorms or hotels. This past spring the INSTEP London program was dropped because of its isolation from the university and student involvement activities.

FDA nearing approval of abortion drug

WASHINGTON — The FDA said yesterday it will approve the controversial drug RU 486, used in Europe to induce non-surgical abortions, pending receipt and review of further information regarding the drug's labeling and manufacturing, saying that the drug appeared safe and effective when used under close medical supervision.

RU 486 has been approved in France, Great Britain and Sweden, and has been used by about 200,000 women to terminate pregnancy. Use of the drug for abortions requires a combination of pills and three trips to the doctor's office.

Getting speedy consideration of the drug has been a priority of the Clinton administration, but anti-abortion forces have fought to keep the pill out of the United States.

U.S. troops leave Texas for Gulf

FORT HOOD, Texas — The first of 3,500 troops being deployed to strengthen U.S. military forces in the Gulf left Fort Hood army base for Kuwait early yesterday. President Clinton ordered the deployment to keep up the pressure on Iraq's president, Saddam Hussein.

The formal mission of the Fort Hood troops was to provide training for Kuwaiti forces, but they could be used in any new military action against Iraq. The troops will join 1,200 troops from Fort Hood already conducting exercises there.

"The bottom line is, we will not tolerate any threatening activities against our air crews," Defense Secretary William Perry said Tuesday, referring to the allied aircraft patrolling no-fly zones in northern and southern Iraq.

Spiro Agnew, Nixon VP, dies

OCEAN CITY, Maryland — Spiro T. Agnew, a relatively unknown governor who rose to become Richard Nixon's vice president on the strength of his die-hard conservatism before resigning in disgrace in 1973, died Tuesday. He was 77.

Agnew was the little-known governor of Maryland when Nixon picked him as his running mate in 1968. Agnew established himself as a national political force by employing a colorful phraseology in criticizing anti-war protesters, liberals, and the media.

While many of his controversial comments were planned, some were not. He was criticized as insensitive and racist after using racial epithets. At one point in the campaign, he canceled a trip to an inner-city neighborhood, saying "When you've seen one slum, you've seen them all."

Eisenhower knew POWs remained in Korea

WASHINGTON — Newly disclosed documents suggest that as many as 900 U.S. servicemen were left behind in North Korea after the United States exchanged prisoners following the Korean War. The declassified papers were released by the Dwight D. Eisenhower Presidential Library.

The public did not know about those left behind, but it is clear that Eisenhower did. Five months after the war, in a document dated December 22, 1953, Army Secretary Robert Stevens met with President Eisenhower and told him the Defense Department had the names of 610 Army people and over 300 Air Force prisoners still held by the North Koreans.

A former Czechoslovakian general and Soviet intelligence agent, Jan Sejna, who defected to the United States before the end of the Cold War, told Congress Tuesday that he saw some of the prisoners being used in gruesome medical experiments.

"The top-secret purpose of the hospital was medical experimentation on Americans and South Koreans. The POWs were used to test the effects of chemical and biological weapons, and test the effects of atomic radiation," Sejna said, while the Pentagon maintains that there is nothing new in the declassified documents.

Sniper kills student, wounds another

STATE COLLEGE, Pennsylvania — A 19-year-old woman opened fire on the Penn State University campus Tuesday morning, killing one student and wounding another, police said.

Jillian Robbins was finally subdued by student Brendon Malovrh, who realized, while on his way back to the dorm, that shots were being fired from nearby bushes. Robbins slashed at him with a knife, hitting herself in the thigh. Malovrh used his belt to stop the bleeding until the police arrived and arrested Robbins.

Robbins, a State College resident and high school dropout, reportedly had a history of mental problems. Police know of no motive for the shooting.

World News

Muslim to head Bosnia's three-man presidency

SARAJEVO, Bosnia-Herzegovina — Alija Izetbegovic, a Muslim who was president of Bosnia during the 43-month war, won the race to head Bosnia's new three-member presidency, defeating Momcilo Krajisnik, a supporter of Bosnian Serb independence, election organizers said yesterday. As the top vote-getters from each of Bosnia's three main ethnic groups, Izetbegovic, Krajisnik and Zubak will serve on the divided country's three-way presidency.

U.N. special human rights official Elisabeth Rehn urged the acceptance of the election results despite their imperfections, a statement from her office said. "There is no more time to lose in propelling forward the peace process," said the statement, dated Tuesday.

Anti-Japan mood fosters Chinese unity

BEIJING — Chinese protesters in Taiwan, Hong Kong and Macao demonstrated again yesterday against Japanese claims to a chain of potentially oil-rich islets in the East China Sea. The demonstrations came 65 years to the day after the Japanese invaded the Chinese province of Manchuria, beginning a chain of events leading to World War II.

In the weeks since right-wing Japanese activists set up a lighthouse on one of the disputed islands, the Chinese government and its state-run press have unleashed a flurry of anti-Japanese critiques. And whether in Hong Kong, Macao, Taiwan or on the mainland, Chinese people — who have not forgotten the past — eagerly echo those critiques.

China claims the islands are an inseparable part of its sovereign territory, and has hinted it may use force if Japan does not take action against the lighthouse-builders.

Mother Teresa recovers from head injury

CALCUTTA, India — Mother Teresa reportedly slept well Monday night and spoke with doctors Tuesday after suffering a minor head injury that forced her to spend the night in an intensive care unit at Calcutta's Woodlands Nursing Home.

The 86-year-old Nobel Peace laureate fell and hit her head Monday while trying to rise from a chair. She suffered no cuts or bruises, but doctors performed CAT scans on her Monday and Tuesday. The tests found no significant damage. Doctors will keep her for two more days of observation.

Mother Teresa was released from the nursing home on September 6 after being treated for malaria, a chest infection and cardiac problems.

Apparent North Korean infiltrators found dead

SEOUL, South Korea — South Korea's Defense Ministry said yesterday that 11 suspected North Korean infiltrators who arrived by submarine have been found dead, apparently by murder-suicide.

Officials said it appeared that one member of the group shot the others and then turned the gun on himself. One North Korean was captured alive. The prisoner, officials said, told them that another eight or nine were still at large.

The bodies were found about 15 hours after the search began, about five miles from the submarine, officials said. The North Koreans are believed to have been killed by their comrade rather than risk capture.

Gen. Chung Hwa-un told the South Korean parliament that officials had not determined if the submarine's crew members were spies, or if they had become grounded while on a training mission. He said searchers had found a piece of paper bearing the statement "We accomplish (the) mission without fail."

Brazilians suspect goat was assassinated

BRASILIA, Brazil — Police Sunday were investigating the suspicious death of a goat running for mayor in a northeastern Brazilian town, newspapers reported.

Frederico the goat had been leading in opinion surveys in Pilar, 24 miles from the city of Maceio, since his owner Petrucio Maia launched the animal on the campaign trail as a protest candidate in October's municipal elections.

Maia told the Folha de Sao Paulo newspaper he thought his goat had been poisoned by a political rival. "He had a lot of foam in his mouth," he said.

Last weekend inhabitants of Pilar drove in a convoy of 50 vehicles through town in support of Frederico's candidacy. Newspapers said the election bandwagon was fired upon.

EDITORIAL

Applaud national ranking, but keep in perspective

Bucknell is once again among the top national universities and colleges according to the Sept. 16 edition of *U.S. News and World Reports*.

This a routine we could get used to.

Dropping only one place from last year's ranking of 30th and six notches from 1994's 25th place, this University has nothing to hang its head about.

For the first time, Bucknell was ranked for its engineering school this year—an impressive feat for our non-Ph.D. programs. This is especially commendable considering we are a liberal arts school.

The University also retained its ranking of 25 for best value among national liberal arts schools.

Undoubtedly our national recognition will encourage interest in the University, regardless of the slip in ratings. In fact, more interest will most likely be generated because of the Engineering school's accomplishments.

Even without making the charts, most students and faculty members know about the caliber of our institution. However, the report's public and positive reinforcement can serve to bolster morale and spirits.

And that is exactly how we should receive our ranking of 31. These rankings serve the purpose of letting institutions know where they stand in relation to others. They are good for people within the University, as well as for those looking in.

However, it is all too easy to allow the shortcomings of rankings to take precedence over their merits. The inadequacies of ratings become evident when they serve not to bolster moral or constructively encourage improvement, but as an admonishment and something of which to be ashamed.

Sure, we dropped one place, but look where we were to begin with. It is good to set goals high and strive to achieve them, but it is also important to keep things in perspective.

As a University, we are obviously reaching some goals, as evidenced by our first-time appearance in the engineering section. We are also working our way towards others. *U.S. News and World Reports'* rankings are useful to gauge our accomplishments, but not to live faithfully by.

OPINIONS

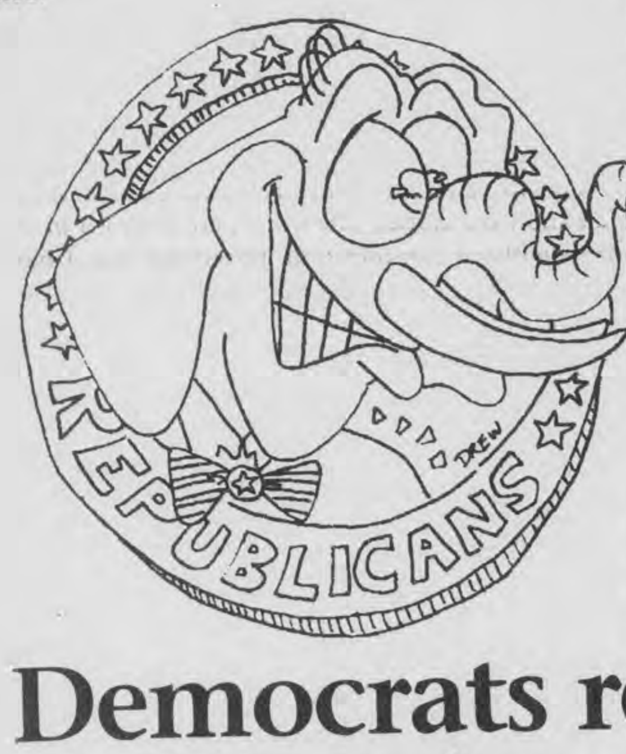
Dole's tax cuts and balanced budget needed to stimulate economic growth

BY CAROLYN CHRISTENSON

Bucknellian Staff Writer From Abroad

It takes a lot of courage (stupidity?) to write a newspaper column. My willingness to write about many topics for which I have little knowledge sets me up for great criticism.

As I will attempt to write about economics, I beg those of you majoring in the field to remember that I have not studied Samuelson, Friedman, and Galbraith. I do, however, have common sense and believe my opinion on the matter is educated and justified.



We live in a time of unparalleled and unrealized promise, because America today is competing in the most dynamic world economy we have ever seen. Why then, is our economic growth so slow?

The Democrats are saying that the economy is moving forward, and it is. But it is moving like President Clinton on his morning jog—high taxes, big government, and excessive regulation being the fatty Big Mac he stopped for on his way home.

The funny thing is we were growing fifty percent faster in 1992 when Bill Clinton described the economy then as the worst in five decades. That's when the economy, by way of life, was rolling out of a recession. We were growing at a 3.7 percent rate before the Clinton big government policies put on the brakes and dropped to 2.3 percent. The economy was strong in 1992, and should have gotten stronger.

Clintonomics has produced an economy that is squeezing the middle class between high taxes and low growth. This administration has spent staggering sums on domestic programs that have not delivered. It's time to unshackle the U.S. economy from big government and Bob Dole has the solution: first, balance the budget; second, cut taxes; third, remove the dead weight of government.

Balance the budget. The budget deficit is a stealth tax that pushes up interest rates and costs the typical family $36,000 on an average mortgage, $1400 on an ordinary student loan, and $700 on a car loan. Every time you use your credit card, you're paying a stealth tax to the Federal Government. The solution? Balance the budget by reducing the size of the federal government.

President Clinton says a balanced budget is impossible—at the same time, he's vetoed two balanced budgets, proposed one of the biggest pork-barrel spending programs in American history, and passed the biggest tax hike in history. What seems impossible for a Democratic president captured by liberal special interest groups is possible for a Republican president.

Cut taxes. History has shown that tax cuts, by stimulating growth, bring in more revenue. Bob Dole is promising a 15 percent across-the-board tax cut that will return total taxes to where they were when Ronald Reagan left office. In case anyone's forgotten, during the Reagan years we vanquished inflation, brought interest rates down from double digits, and averaged four percent economic growth in the largest peace-time expansion in history. His tax cut helped restore America's economic greatness.

Remove dead weight of government. The purpose of government, as designed by our founding fathers, was for waging wars and providing for national security. Governments are incapable of running an economy, picking winners and losers in cutting-edge industries and technologies, transforming the nature of human beings, or creating a social utopia. The fallacy of contemporary liberalism is its assumption that every problem has a government (expensive?) solution. It does not.

Economic growth advocates say cut taxes first. Fiscal conservatives say balance the budget first. Bob Dole says they're both right. I agree.

Democrats represent the vision and compassion voters are searching for

BY ALLISON PRICE AND PAULA ZIMMERMAN

Eleven thousand workers. Eleven thousand human beings. That was how many workers were "let go" when Al Dunlop was hired to take over the Scott corporation.

This was of course to save the company, argues Dunlop, as well as the jobs of the remaining lucky and frightened employees. He, on the other hand, can rest easy. In the wake of his proud miracle work at Scott, Dunlop took home to his Boca Raton mansion a cool 100 million. The news magazine also mentioned Dunlop's next venture, at the Sunbee corporation. News of his hiring sent their stock soaring. Dunlop made a killing before he spent a day in the office. Harder work than that could not save the Scott employees, nor will it save those who will be "downsized" next.

In a world where workers have become so disposable, it is no wonder voters are forced to vote the way they do. Political parties can perform all they want to the alter of image manipulation. However, voters still pray to the gods of policy and fairness. This has relatively little to do with compassion. Ironically, no political party has a monopoly on these commodities this political season. In the end, for many Americans the Democrats still embody these virtues, or represent the best possible choice when citizens vote according to the new reality set forth in this country by the likes of Al Dunlop.

Throughout this season, the GOP has continually drawn into question many policy incentives that most Americans do not, and cannot question in this reality. I do not believe the Republicans realize this. Unpaid leave seems so minor, so necessary, so full of moral fortitude. Maybe they do not realize that most Americans want the minimum wage to rise because they depend upon the money. Most Americans do not feel the need to interpret the Second Amendment to mean they can own their own Uzi. Polls show most Americans do respect a woman's right to control her reproductive destiny, including many Republican women. Voters know it takes a village to raise a child. Of course parents accept that the responsibility is theirs, but how many parents keep their kids at home 24 hours a day?

As the candidates get closer to election day, one would hope that the real issues are discussed, rather than Oprah-style floorshows, age, and charisma. Although if the conventions were any indication, we might be asking too much. Both conventions were little more than a pep rally for the respective candidates, and the three major networks are reconsidering future coverage.

A healthy democracy requires an educated populace. However, conventions aside, candidates still want to discuss anything but the issues. Walter Mondale committed political suicide when admitting that he would raise taxes, and politicians seemed to have learned from that. Rather than facing our difficult future head on, we are being offered a 15% tax cut with no cut in entitlements and increased military spending. Has anyone thought to ask HOW this is possible?

What is also not being addressed during this campaign is compassion. The Democrats are traditionally viewed as having more compassion for the middle and working classes. Even the Family and Medical Leave act and Minimum Wage law also receive the majority of their support from the Democrats. While the Republicans use "family values" as a rhetorical tool, the Democrats, by and large, are looking for ways to help families spend more time together, especially when it is needed most.

DEMOCRATS
CLINTON GORE
DREW

The Democrats as well certainly have their shortcomings. Clinton did sign the welfare reform bill, albeit a watered-down version from what the Republicans were proposing, but the bill was still signed. People are championing this as a way to break the cycle of poverty, when in reality it does not even address the root of the problem.

It all comes down to policy which must address that root, regardless of who does or does not want to hear it. This quandary is typified by Clinton's compromise on the gay marriage issue. He was elected as a man compassionate to gay, lesbian, and bisexual Americans. However, his willingness to put into law the policy of banning gay marriages, does not mesh with his principles of justice. The monogamy embodied by the institution of marriage is perfectly meshed with any type of lifestyle. This issue goes beyond compassion into the heart of what vision government is supposed to embody individually, as well as our collective destiny in the nation.

Al Dunlop does not understand this, and we can only hope that as they have seized the lead in the polls thus far, that the Democrats will have the courage to follow this vision.

Something bothering you? Don't be shy. Write a letter to the Editor and tell everyone about it.

EDITORIAL POLICY

The editorials of The Bucknellian *reflect the consensus of the Editorial Board as to the topics and general position. If a consensus could not be reached, the opinions expressed are those of the Editor in Chief.*

All other opinion material represents the views of the author and not necessarily those of The Bucknellian.

PUBLISHING POLICY

The Bucknellian *is written, edited, and published each Thursday during the academic year entirely by Bucknell University students.* The Bucknellian's *fiscal affairs are overseen by an Advisory Board comprised of faculty, staff, and administrators. All published material is chosen by the paper's Editorial Board without any prior review by its advisors, the University, or the Bucknell Student Government.*

The editorial content of The Bucknellian *does not necessarily reflect the opinions and attitudes of Bucknell University's administration, faculty, or trustees.*

The Bucknellian *is produced using Aldus PageMaker version 5.0a on Apple Macintosh computers. ITC Stone Sans and ITC Stone Serif are the paper's principal typefaces. Page mechanicals are printed on a Imager Plus 12, NewGen Systems Corporation laser printer at 1200 x 1200 dots per inch.* The Bucknellian *is reproduced at the Milton Standard, Milton, Pennsylvania.*

ADVERTISING POLICY

The Editorial Board of The Bucknellian *reserves the right to deny advertisements if offensive, illegal, or in bad taste. For advertising rates, please contact the advertising manager at (717) 524-1085.*

LETTERS POLICY

The Bucknellian *welcomes readers' comments on important campus, national, and international issues. Letters must be submitted by 5 p. m. Tuesday to appear in Thursday's issue. All letters must be typewritten in 12 point New York font and signed by the author.* ***Letters must contain less than 750 words.*** *We reserve the right to edit letters for length or libel. We attempt to publish all responsible material, but we reserve the right not to publish due to spacing, technical, legal, or other problems.*

Authors wishing to remain anonymous must make arrangements with the advisor to The Bucknellian, *Katherine Wheatcroft.*

Address letters to The Bucknellian, *Box C–3952, Bucknell University, Lewisburg, PA 17837, bring them to our offices in the basement of the central wing of Roberts Hall, or submit them electronically to bucknellian@bucknell.edu. On campus submissions by Macintosh users may also be placed in* The Bucknellian *"drop box," accessible by guest login to the computer "Schubert" in the "Acad" AppleTalk zone.*

SUBSCRIPTIONS POLICY

Subscriptions are available at $45 per year, $30 per semester. To subscribe, send payment and address to The Bucknellian *Subscriptions, Box C–3952, Lewisburg, PA 17837. Subscriptions are mailed first-class on the Friday following publication. Please send change-of-address information to the above location as well.*

OPINIONS

Campus involvement offers a connection

BY NORA DANIELS

I'm one of over 900 first-year students at Bucknell, but I think that as a commuter, I have a somewhat unique perspective of life here.

No, I haven't lived in Lewisburg all my life, but since I have lived in Williamsport, a town 25 miles away, for many years, I am familiar with the school and the town. At first I was hesitant about coming here, especially after my parents announced that they were buying a house five minutes away from campus. How could I be a commuter and still fit in?

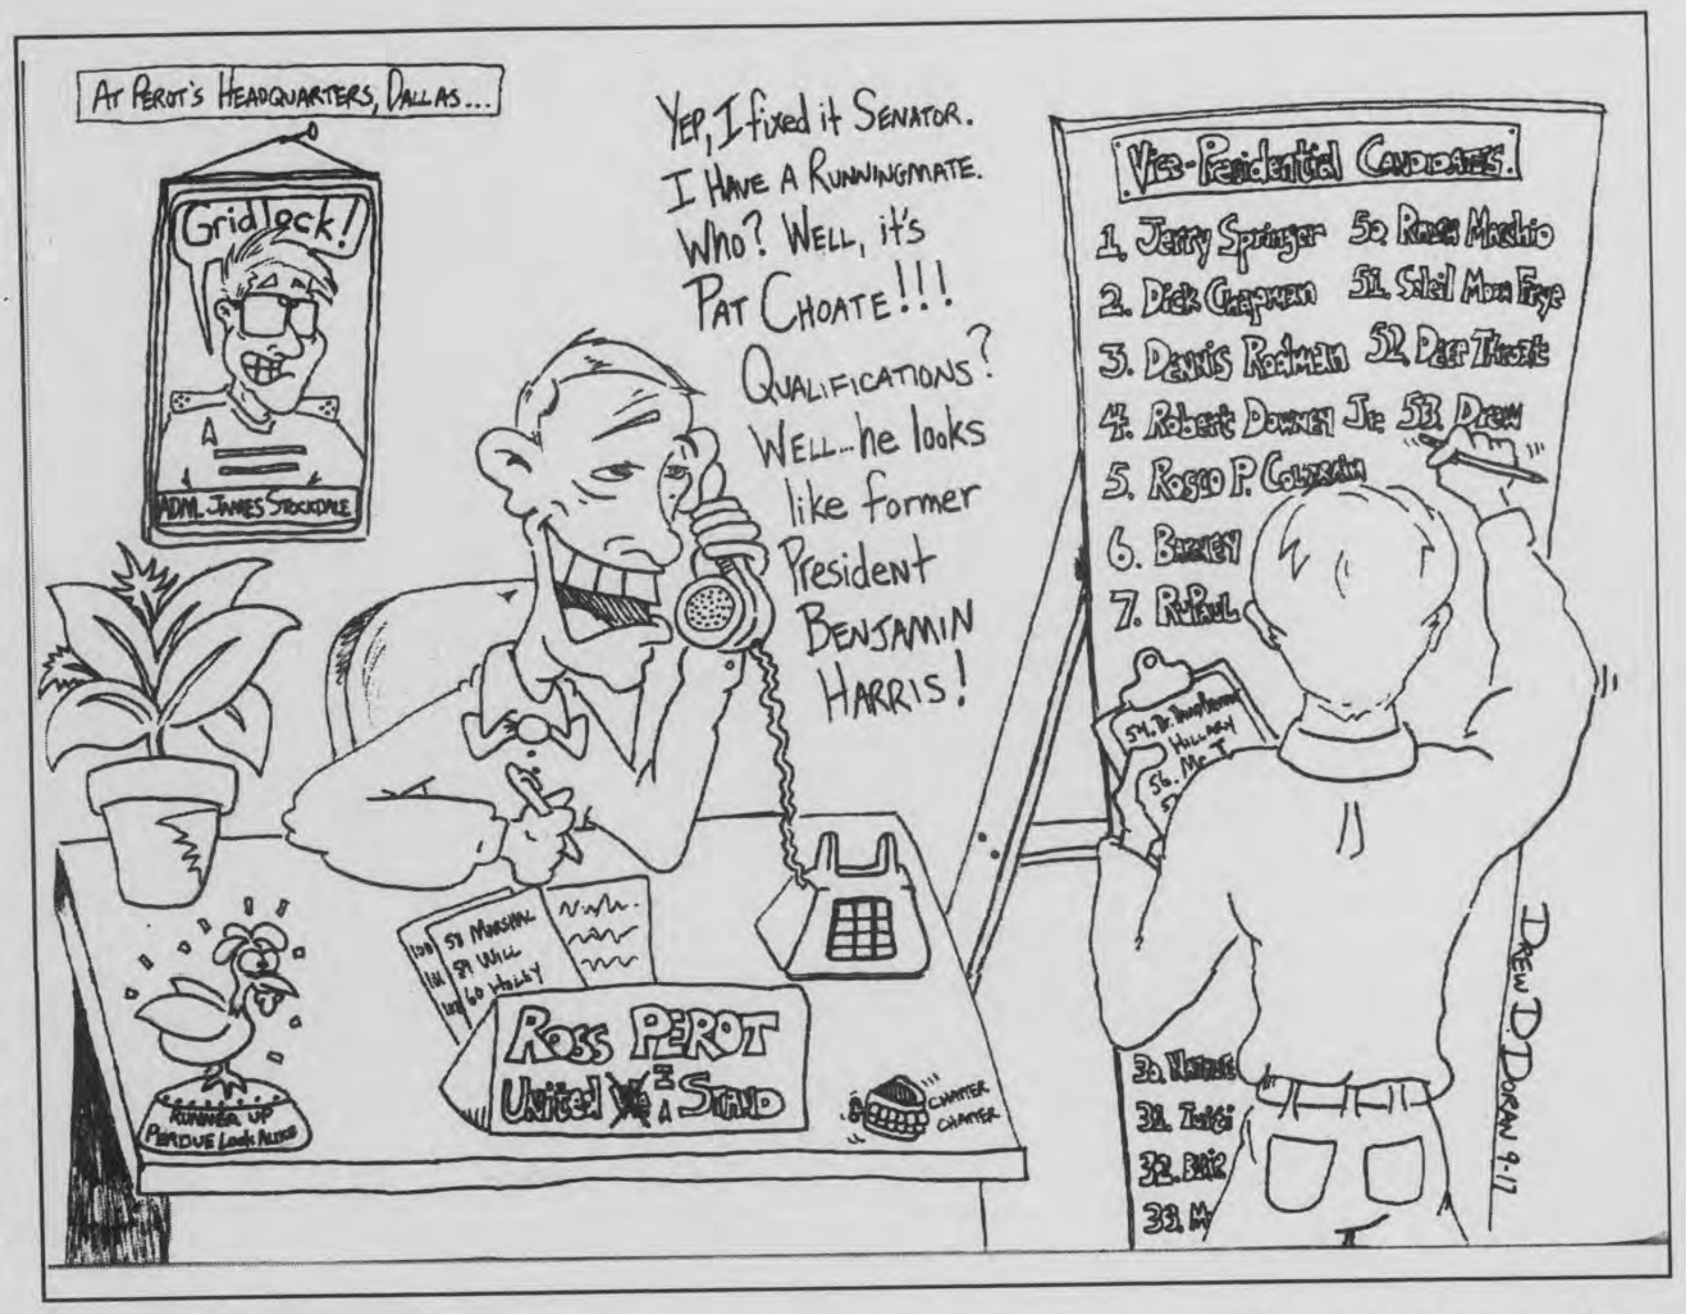
Well, now I've been here for a few weeks, and I feel very connected on campus. I have friends, I am active in other activities, and I have a good on-campus job. Still, when I meet people and explain that I live off-campus, they wonder if I fit in. And some express that they don't feel connected here themselves. I have thought about this, and come to a few conclusions. I have narrowed my thoughts into two rules.

First, get involved. Volunteer with BISON Volunteers of the Community Service Office. Write for the newspaper or join one of the numerous clubs. Play a sport. Go to aerobics or craft classes. Look for new opportunities to explore your interests. As trite as the saying seems, "getting involved" does make a difference in our lives.

Second, make eye contact. Think about how much of a difference it makes when someone really looks at you and then go from there. When we make eye contact, we make a bond, and no matter how small this is, it is still a connection.

These rules are generalized and won't guarantee that you'll have a bus load of friends by Friday. But if you think for just a minute and try to expand your horizons just a little, maybe the connection to our lives here will truly begin to form. Granted, I'm an 'outsider' as far as fitting in with roommates and dormmates, but I think that maybe the same guide would apply in this part of life at college, too.

We'll only be first-year students once, and that is probably once too many for some of us. But next year, when a new group of freshmen enter their lives here, we can watch them meet the challenge of connecting in their own unique ways just as we did this year.



Alienated workers are becoming an economic trend

BY ALLISON PRICE

Bucknellian Staff Writer

Emily* came to Bucknell Dining Services in 1989. She and her husband were splitting up and she needed a job to support her three children. At first, Bucknell offered her part-time work, and eventually she joined the staff full time. She enjoyed her job and there were some real advantages to working in the Bucknell community. You see, Emily's kids are going places, and with working full time at Bucknell came a tuition benefit for both her and her children, plus health coverage. Emily gets a little choked up talking about all this, now that it is in the past. Who knows, she muses philosophically, the way things turned out for her, that benefit may have been gone even if she had stuck with Bucknell until retirement. There are no guarantees.

Wood Industries acquired Bucknell Dining Services in 1993, shortly before Emily departed. The staff is currently employed by the University, while Wood Industries runs the institution. Before this change, Emily described her bosses as being the "best," the kind that made you feel like you were all in this together to do the best job possible. Those bosses were let go as Wood Industries swept in.

That January, the decline began. The cafeteria was rearranged, which was a great idea but inevitably more workers were required. However, they were not hired and more tasks fell upon the same amount of workers. Then there was the huge snowstorm. Dining services remained open (could anyone even make it to the caf those couple of days?). Staff were required to stay, overnight, from Saturday until Tuesday upstairs in the L.C.. Emily remembers fondly the student group that brought them soap and blankets. She was glad her kids could stay with her mother, as others were not so lucky.

These people have lives beyond the caf. For their trouble, for what they did for students, they received a thirty dollar gift certificate. Emily lost all respect for her employers. Then, she quit. Ironically, she followed her former boss and currently works for him.

This real life incident illustrates problems in both American society and economics. This is not the stereotypical anti-boss sentiment — the bosses used to be great. This is a phenomenon across the U.S. workplace. Bosses used to care and they and their workers were united in a common mission. This has been replaced with alienation and a hesitance to believe that the people who work for you are in fact a lot like yourself.

It has been said by people in positions of power in the University hierarchy that all this does represent a problem in modern society - the breakdown of the work ethic. How could people opt for welfare instead of a job with no benefits? We know in our hearts quite easily every time we notice how much our prescription medication would cost without coverage. Once again, any connection, any iota of understanding breaks down. A job is a job, whether it is with GE or Dining Services and we all know what a job means in a person's life.

The overwhelming complaint of former and current Dining Service employees is the conduct of Bucknell students. Doing research for this piece, I got to witness a student's amusement as an employee had to throw a sandwich away because it was made incorrectly. We all know the stories. The worst part of this is in the end, Dining Services reportedly takes the side of students without consideration. In writing this, I have spoken to Bucknell students who have noticed this themselves. Dining Services has noted that in past years, in light of the variety of jobs on campus, not many students have opted to work in the cafeteria. They know.

Student workers represent another economic problem which will have long term ramifications in this country as well as this University. Student, temporary, and other part time workers are referred to as "casual staff." As part-time help, they are the ones that receive no benefits. These workers are a trend in many service industries, as well as Bucknell's staff. Employees pointed out to me that many temp workers do not work out, because they lack the work ethic of others.

Then there are the conscientious part-timers and the employee who told me she wanted nothing more than to work full time, was encouraged to apply months ago and has not heard anything She clearly has whatever work ethic has come to mean today, and it will not be rewarded. It seems that if you are willing to work, you cannot because it costs management more.

Wood Industries has formulated positive change within Dining Services, and I am not discounting the need for efficiency and increased productivity. However, high temp turnover rates and a lack of any connection between workers and management in the end foster neither. There is also an argument to be made for how far one can go in keeping costs down. This hurts us all. After all, we are the Bucknell community, and community is an ideal which every university strives to attain. With community comes fairness and opportunity. The saddest realization Emily has come to is that after all she has seen from Bucknell students, she isn't sure whether this school would have been the best thing for her children and the development of the values she has taught them through hard work as well as common decency.

**Name has been changed*

Speak Out

What would you think of a universal draft which would draft both men and women to serve the country?

Jennifer Anderson, '00

"If women want to be treated as equally as men then they have to take on the responsibilities that men face, which means being drafted."

Kyle Cooper, '99

"I'm for it. I think it is great. If women want to be treated equally, that means being drafted."

Peter Coughlin, '99

"I wouldn't have a problem with that. If you want equal rights, then there you go."

Dana Cull, '99

"I don't think it's necessary because there are plenty of people to serve the country now. But if it was necessary, then we should go for it because we want equal rights and we should be able to fight just like men."

Liz Slagus, '97

"There is no reason why women can't be in combat as far as I'm concerned, but how would they decide who would stay home? I don't think it would have to be the woman, but who would have the right to decide?"

Bring back the Draft

Men and women should serve their country in war and peace time

BY TOBY ANDERSON

Bucknellian Staff Writer

"The Draft?!" You say, outraged at the very thought. It is an evil institution that should be completely abolished.

At least, that is the popular belief.

The idea of having to put on a military uniform to defend your country, or its interests, is abhorrent to many of our generation.

That is understandable, because it has never been something to which a population reacted well. However, it is a good and healthy sacrifice for people to make.

In many countries, service to the country is an obligation of every male citizen. This is often an obligation to military service, but in many countries there is a choice.

The choice is to serve in the military, or for conscientious objectors, to serve in the civil service sector.

It allows both those who wish to be a defender of the society, and those who wish to be an upholder of the society to serve their country and its people.

Which is which? Perhaps, one could claim, they both serve the same purposes in different manners. They are both honorable duties to perform. Nobody should claim that to serve your country in a peaceful profession is less worthy than to devote your time to the military, and few would.

Our country leaves its citizens the right to many choices in their lives. Why not this one?

It would make obligatory service more palatable, and give every citizen, male or female, a common bond.

It is a sacrifice for our society that we would all share.

Yes, I did say male or female. In a country of equality, obligatory service is not something which should be discriminatory.

After all, both men and women currently work in the civil and military sectors of society. Therefore, there is absolutely no reason that the draft should be anything less than universal.

As it stands, though, only males register for selective service. In case of a war, many men (not women) would be called up for service, unless they received an educational deferment.

Instead, everyone (rich or poor, male or female) could be required to serve for a year after high school.

It would give people a chance to work in the real world, and mature a bit more before entering college.

We could all use more time to mature. It would also broaden many people's horizons, allowing them to encounter people from all parts of the country, and all levels of society.

Many people attack the class discrimination of the draft as it has traditionally been instituted during wartime, because the upper class and middle class were more likely to be in college than the working class.

A universal draft straight out of high school would help solve that problem. It isn't a popular idea, but it has a lot of merits that many people don't think about.

The idea of serving your country may seem outdated to many people, but it is one of the many things that can give everyone in this country a shared experience, and a common bond.

ARTS & ENTERTAINMENT

Library exhibit captures timeless moments of the University's 150 years of existence

BY RACHEL DOEBBER
Bucknellian Staff Writer

Anne Ravert—The Bucknellian

The special archives exhibit on display at the Bertrand Library brings different moments in the University's history to life. These interesting facts help in the celebration of the Sesquicentennial anniversary.

How would you like to have been a first year student during the 1930s and 1940s when they had to wear large signs around their necks, signaling to the rest of the University they were freshmen?

Did you know that the Music and Art building, constructed in 1890, used to house the Chemical and Physical Laboratories?

Were you aware that the University's first place of worship was Bucknell Hall until Rooke Chapel was built?

All of these interesting facts and more can be learned by visiting the new library exhibit entitled, "Images of Bucknell: Now and Then."

The idea for this exhibit was formulated last spring as another way to continue the celebration of the University's Sesquicentennial. The exhibit centers around the contrast and comparison of different eras and activities that epitomize the University's long successful history as an institution.

The comparisons include the evolvement over the years of the structures of academic and residential buildings, uniforms of athletic teams, first- year student orientations, the Greek system, student activities, the appearance of diplomas and the yearbook, L'Agenda, the commencement ceremonies, Bucky the mascot's costume and many other images.

The contrasts are made possible through many photographs, literary publications, books and other memorabilia, all of which come from the Special Collections/University Archives department of the Bertrand Library.

According to Doris Dysinger, curator of the University Archives, the exhibit has "high appeal to summer visitors, first year students and returning upperclassmen."

The preparation for this exhibition began last spring and continued into the summer. It was completed by student assistants and Dysinger. "The students worked together as a team to research and prepare the materials for display", she said.

Many of the exposition's memorabilia were donated by University alumni. To prevent light damage from destroying the photographs and literary publications, UVI film (which filters out the harmful rays of the sun and artificial light) was placed on all objects in the exhibit

The exhibit is based upon the book written for the University's 150th Anniversary, *Bucknell, Now and Then,* which was published through Public Relations and can be purchased in the bookstore.

The book is a compendium of essays and includes letters, essays and manuscripts from faculty, administration and students, both past and present.

Edited by Robert E. Streeter '38, former professor of history, the book was a project of the History Subcommittee of which he currently chairs.

Bucknell, Now and Then covers many topics ranging from a section on the admission of female students to the University by Lois Stevenson, former faculty member of the University's English Department, to a chapter on Christy Mathewson written by Philip K. Eberly, freelance writer and New York Giants baseball fan.

"Images of Bucknell: Now and Then" will be on display in the main lobby of Bertrand Library until December 31.

Philip Roth poet brings talent with him to residency

With a recently released collection of poetry, Joe Wenderoth is well-published

BY DAVID CARPENTER

The Philip Roth residency gives young poets a chance to work on their own writing while being a part of the University community. This year's recipient of the prestigious creative writing award is Joe Wenderoth.

He states, "I started writing around my sophomore or junior year at Loyola. I write because I have a compulsion to have a more vivid sense of where I am."

Last year, Wenderoth applied for the opportunity to work on his creative writing here. He believes the reason he was selected was "I was unique because I already had my own book out and many who apply for this program don't."

A graduate of Loyola College and Warren Wilson College, Wenderoth is a well published poet with one completed book entitled *Disfortune*, which appeared last year in book stores. Other of works of his have appeared in the *American Poetry Review*, *Triquarterly* and *Connecticut Poetry*. In addition, Wenderoth's poetry has been exhibited in the Contemporary Authors Series at the Rosenbach Museum in Philadelphia.

Wenderoth earned his bachelor of arts degree in English and Creative Writing at Loyola College in Baltimore, Maryland. He went on to obtain a Master of Fine Arts in Creative Writing from Warren Wilson College in Swannanoa, North Carolina.

In addition to working on his own material, Wenderoth has taught at numerous colleges and universities including NYU, Catonsville Community College, Hartford Community College and the Center for Talented Youth at Johns Hopkins University.

The poet in residence program has given Wenderoth a chance to work on his next book of poems and criticism of poetry in America today, tentatively called *Obscenery*.

"I don't think American poetry is very good right now. It is mired in a sad situation.," he said while talking about his new book. "I think that the average person who has not had contact with poetry or poets doesn't understand the power of poetic speech and doesn't know what real power is."

Wenderoth will be reading from his book *Disfortune* and many of his new unpublished poems at 8 p.m. Sunday in Bucknell Hall. The reading is open to the public and there will be a reception afterwards.

Terrace Room to be transformed into glamourous Las Vegas

Evening will be gambled away with Casino Night

BY SHETAL MITHANI

High-risk bets, a ritzy atmosphere, smooth dealers and daring gamblers are just some of the many things students will experience at the fourth annual Bucknell Activities Council's Casino Night.

Mark Amatrucola, BAC's student president, feels that students really enjoy this event because they can come away with some really big, expensive prizes that usually include stereo systems, TV entertainment system and CD players.

Audrey Jaeger, assistant director of student activities, said this is the fourth year that BAC is sponsoring the event.

Casino Night has been very successful in the past with some 300 to 400 students attending the event every year.

Jaeger continued to say the reason why Casino Night has been sponsored is "because it's extremely successful, it's a lot of fun, it gets people involved and its very interactive."

However, according to Amatrucola, because this year's Casino Night is considered to be first-year student entertainment, the program will be a bit different.

"This event may be on the first-year program, but it is open to the entire Bucknell community. I think BAC put this event on the first-year program this year to entice students to become involved and have fun with these events," Amatrucola said.

Summing up the purpose of Casino Night, Jaeger said, "This program is there for students to enjoy and have a great time."

Casino Night will take place on Friday starting at 9:30 p.m. in the Terrace Room of the Langone Center.

Student poets awarded with Smithson Memorial prizes

BY EMILY THORNE

Since 1979, the English department has had the task of selecting the best submitted pieces of poetry and prose by undergraduates. Those few chosen recipients are then awarded the Julia Fonville Smithson Memorial Prizes.

The 1996 prize winner is Angelita Hogan GR, for her poem "Selling the Farm." Honorable Mentions in poetry include: Jeremy Finkelman '96; Lauren Gagliardi '96; and Michael Kaufmann '98. Copies of all their poems can be found in the English department office.

Julia Fonville Smithson was a 1976 Bucknell graduate with a major in English. She died in a car accident the following year, leaving behind her new husband and her parents. They set up a fund in her name in order to reward students who are as dedicated to the sharing and the creation of literature as Julia Fonville Smithson was. The prize-winning poetry and fiction are distributed to Smithson's parents, her husband and to the donors of the Fonville-Smithson fund.

A prize of 50 dollars is awarded for the best work in each of the poetry and prose categories.

Rachel Doebber— The Bucknellian

Angel Hogan GR was awarded the 1996 Julia Fonville Smithson Memorial prize.

Choosing the single best piece of work from among the University's most gifted writers is not always easy. Assistant English Professor Cynthia Hogue can vouch for the difficulty of this task.

As a judge of the pieces submitted for the 1996 Award, Hogue said, "The overall quality of poetry submissions was extremely high. We had a terrible time choosing a winner."

Unfortunately, the prose pieces did not impress the judges as they have in past years. There was no prize awarded in the prose category in 1996. "The fiction submissions were less impressive than the poetry. We didn't award a prize in the prose category because there was no story strong enough," explained Hogue.

The English department received about 100 poems for the 1996 Award from approximately 25-30 authors. Last year, some students submitted up to 17 pieces. Because of this enormous amount, a limit will probably be set this year on the amount of pieces one is allowed to submit.

On the other hand, only eight authors submitted works of fiction. Professor Hogue suggests students spend more time on revising their prose pieces in order to obtain a higher quality of work for next year's contest.

The 1997 contest will be announced, according to tradition, immediately before spring break. Entries are usually due on or before the first of April.

Last semester's winner, Hogan submitted "Selling the Farm" on the final day of the contest, one hour before the cut off time.

"I never expected to win because it was such a last minute thing. It was a tremendous honor to win," Hogan explained.

"Selling the Farm," Hogan's sole submission to the contest, is a beautiful poem, rich in imagery. It was inspired by her family's move from their horse farm to Philadelphia when Hogan was 16 years old.

A 1996 graduate, Hogan is currently working toward a Ph.D. in English. In the future, Hogan hopes to teach English at the university level.

Michael Kaufmann '98 received an Honorable Mention for his poem, "Graveyard", an interesting piece about the continuous cycle of life and death, as part of an assignment. He is an English major with interests in cinema, photography and stage.

Kaufmann said, "Everyone has an inherent artist in them and everyone has the desire to create. The difference between the artist and the non-artist is that the artist is someone who realizes their potential."

Rachel Doebber—The Bucknellian

Michael Kauffman '98 won an Honorable Mention for the poetry he submitted.

Many of the winners of the Julia Fonville Smithson Prizes from previous years have continued to be highly successful. The first recipient of the award, Mindy Weinreb, is a professor in Canada. Jan Balakian, a 1983 winner, has had an anthology of her poetry published, and David Hancock, a winner in 1984 is a playwright in New York. The 1995 prose award recipient was Richard Dionne '96. He is now a graduate student in English and hopes to write a creative thesis for his masters thesis. His story, "323 Willow Lane Knoxville, Tennessee," was inspired by one of Walt Whitman's "Calamus" poems from Leaves of Grass.

In addition to being a professor, Hogue is also the Director of the Stadler Semester for Younger Poets. This is a program that allows gifted undergraduate students the chance to study poetry intensely for almost four months while earning a semester of academic credit.

Bucknell Hall is dedicated to poetry and is the home of the Stadler Center for Poetry. Visiting poets, as well as students, can be heard reciting their work in the building throughout the year.

Movie Reviews

BY CHRIS NICHOLS
BUCKNELLIAN STAFF WRITER

Bulletproof ***
Starring Adam Sandler, Damon Wayans and James Caan

This movie follows the story of two small time criminals and best friends played by Wayans and Sandler with a twist. Wayans plays an undercover cop who's out to get Caan's character, who happens to be Sandler's underworld boss. Marketed as an action comedy, this movie does a good job of delivering a little bit of both. Sandler is funny but not nearly as hilarious as he has been in his other two recent movies (*Happy Gilmore* and *Billy Madison*). Wayans plays a tough-guy character so his screen humor isn't really able to shine through, though he definitely has his moments. Caan's character, whose legitimate life as a car dealership owner, is not too terribly interesting or believable. By the end of the movie, everybody thinks everybody is back-stabbing them and wants everybody else dead. This does make for an interesting climax, though not particularly spectacular. All in all, it's a decent movie but nothing to write home about.

The Island of Dr. Moreau *** 1/2
Starring Marlon Brando and Val Kilmer

This movie is weird. It's a composite of the Mos Eisely Cantina, The Planet of the Apes, Frankenstein, and the Lord of the Flies. The story follows a British serviceman who is lost at sea until he is found by a passing ship. On the ship he is brought back to health by Kilmer's character, who appears to be knowledgeable about medicine. The boat arrives at Kilmer's port, a small tropical island owned by a man named Moreau. Once on the island, the stranger finds things to be a little eerie.

Kilmer's personality is absolutely uncanny. One minute he seems comical, the next, serious and frightening. Moreau (played by Brando, who for some reason didn't look anything like the Brando we've come to know), was a noble prize winning scientist that disappeared (presumed dead) and relocated to the island to pursue his work on a hybrid between humans and animals unhindered by modern legislation and activist groups.

The results are scary to say the least. Moreau has combined almost every different type of animal with humans: cats, dogs, hyenas, and a bunch that you can hardly even recognize. The movie does manage to address some interesting questions though. It puts the close relationship between man and animals in a perspective that many still deny. Likewise, it questions the motives and ethics of the scientist and the issue of who, if anyone, has the right to tamper with these things. The creatures all refer to Moreau as The Father, which reminded me of the question that Frankenstein asked of his creator: Why did he make him and did he think about the repercussions of what he was doing? The movie closes with a very interesting comment on the animal side of man.

All in all, it's an interesting movie: a little scary at parts, a little bloody in others, but interesting nonetheless.

Ratings:

★★★★★:	Excellent: A must see.
★★★★:	Very Good: Very entertaining.
★★★:	Good: Worth the price.
★★:	Not so good: Limited scope and/or some significant flaws.
★:	Pretty bad: If you consciously see this movie, you probably need help.

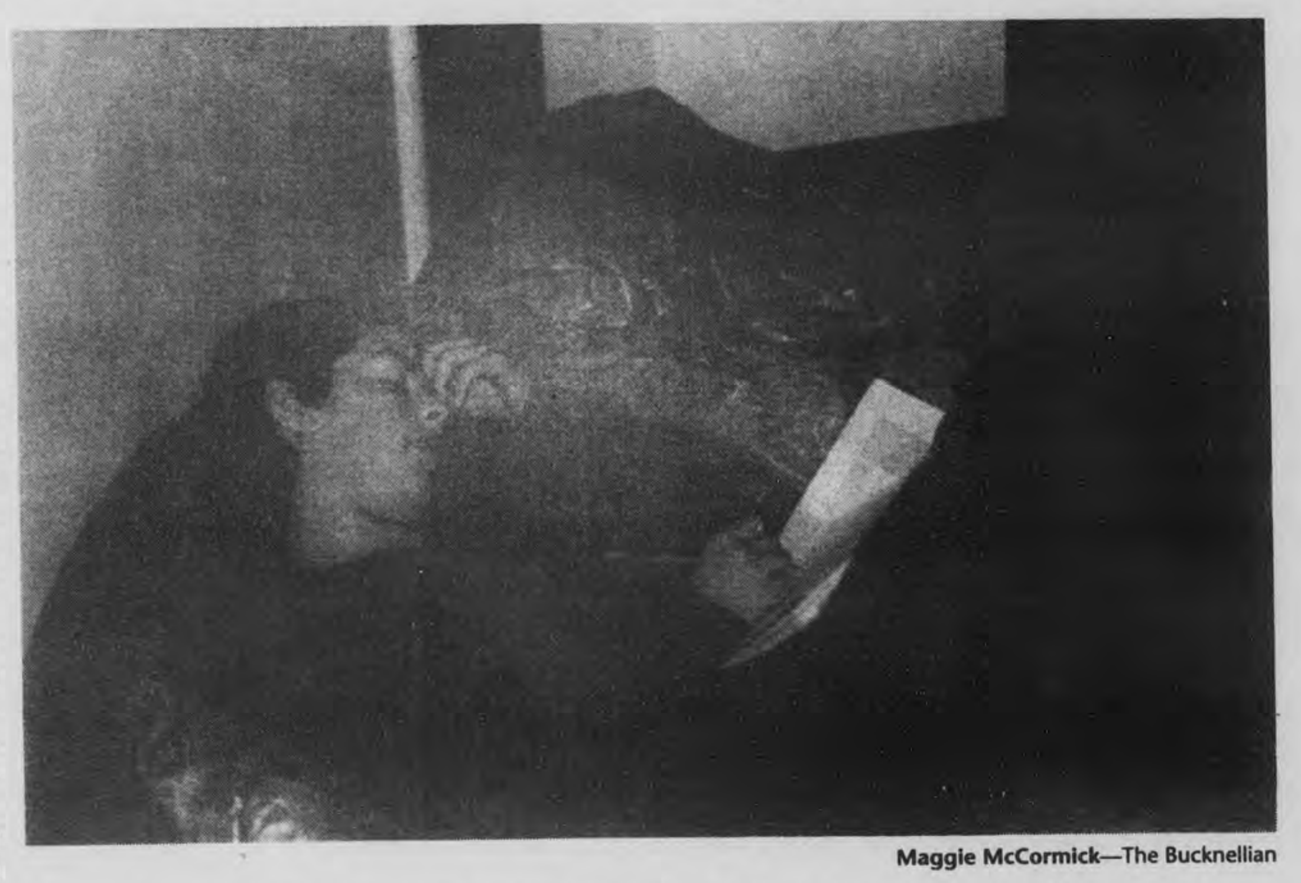
Bedtime at Bucknell:

When warm milk isn't enough: the secrets to sleep success

BY MELISSA RENZI



Maggie McCormick—The Bucknellian

Shannon Sardelly '00 sleeps soundly on the beanbags under the stairs of the Bertrand library. Many students enjoy taking naps in comfortable places outside of their bedroom

Only as college students can we rationalize sleeping habits that could be mistaken for a roller coaster ride. We come up with witty comebacks to our parents when they call us "Sleeping Beauty" or "Rip Van Winkle" for sleeping until 10 a.m. our first day home for fall break.

We're a rare breed. And we deserve our very own set of rules and regulations for the game. While there is definitely a method to our sleeping madness, it takes a true student to realize that we are only as productive as the amount of healthy sleep that we get.

Okay, we'll get it out in the open. We humans sleep one third of our lives. While each individual's need for sleep differs, the moral of the story is that sleep is something we all need.

Amidst hectic class and study schedules, jobs, sports, clubs and responsibilities, we must pay close attention to the amount and productivity of our sleep. So what happens when the aforementioned thieves invade on our sleep time? Read on for some secrets of sleep success prescribed by Associate Director of Psychological Services, Rosaria Gabriele.

Gabriele is convinced that "the major reason students have problems sleeping is because of irregular schedules." She believes that keeping your sleep schedule regular within one or two hours will ease the process of both falling asleep and waking up.

Oh, but it's not that simple. There are more vices that we impose on our passage to sleep. "Students function at 88 m.p.h. all day and expect to hit zero right away, without taking time to slow down. Their minds are still racing. When you're in bed it's not time for an examination of your conscience. Rethinking everything you've done all day will only wake you up."

So what do we do when a living, breathing version of our Filofax monopolizes our thoughts? "Whatever it takes to relax, even if just for ten minutes," says Gabriele. "There's a way to pull yourself away from thinking: focus on breathing." And if we're still wide awake? Gabriele recommends not staying in bed after a half an hour, "it creates frustration." Most importantly Gabriele suggests talking to a friend or even a professional "if it's the same thing on your mind every night."

For conversation's sake let's say you've fallen into a beautifully deep sleep. You have a huge day tomorrow full of places to go and people to see. How can we ensure that you will wake up on time?

For starters, Gabriele advises "before going to sleep say to yourself 'I want to wake up tomorrow at 8 a.m.' ...or 10 a.m., whatever fits your schedule." Gabriele says "speak to your unconscious, establish your intent to wake up on time."

If the unconscious route fails for you, Gabriele has even more advice, for all kinds of sleepers:

- put your alarm clock across the room, so you have to physically get up to turn it off
- set multiple alarm clocks
- have a friend call you and engage in conversation long enough to wake you up
- set your alarm earlier than you want to wake up, some people like to get up gradually

Still snoozing? Are you bargaining with the alarm clock and adopting the snooze button as next of kin? It's helpful to recognize that you are not the only one who wakes up this way. "I think the snooze button is essential" admits Gabriele.

Problem sleepers, you are probably the only ones who have read this far. Give yourselves a pat on the back for trying to get cured and keep on reading:

- make a habit of stretching and breathing in the morning (watch any cat sometime for a how-to) this will bring energy and oxygen that your body needs to get moving
- weather permitting, stand by your window and soak in the sunlight
- during the winter months, set a timer on a light next to your bed (this has proven successful in patients of Seasonal Affective Disorder and will provide simulation for the natural light from outdoors)

Whatever it takes, just remember that some of us are morning birds and the rest of us night owls. Gabriele suggests to "figure out which one you are and develop rituals in your life."

It may take a finely-tuned regimen of talking to yourself, stretching, soaking in sunlight and setting timers throughout your room on lights, stereos and clocks, but more power to you for successfully discovering what you need to accomplish healthy and timely sleeping.

Snoozing suggestions

So what do Bucknellians have to say about their sleeping habits? Read on for some home-grown, Bucknell-style suggestions on easier and more peaceful ways to fall asleep:

"I drink hot herbal tea, read my statistics book or sing to myself!"
—*Jennifer Drury* GR

"I usually write a letter, most likely email."
—*Alison Kenny* '99

"I try to think of anything but work, responsibilities, etc..."
—*Melissa Roverts* '98

"I listen to music."
—*Amanda DeArmitt* '98

And how about waking up?

"I get up and go running so I'm used to it."
—*Miriam Lopez* '99

"I set three alarm clocks."
—*Jennifer Drury* GR

"I wash my face right away."
—*Kristen Oliver* '98

"I force myself out of bed. My roommate would kill me if I hit snooze."
—*Melissa Roverts* '98

Survey compiled by Melissa Renzi and Aimee Ferris

Insomnia steals the night away

BY DAWN LONSINGER

Maggie McCormick—The Bucknellian

Stephanie Eliseuson '00 slumbers while writing a paper in the computer lab. Not getting enough rest can cause a person to fall asleep at inconvenient times.

You hustle from class to class... if you're lucky you have time to grab something to eat just before you go to another meeting before you hit the books. Your day is a continual motion.

Finally, you are done—and dead tired. But no sooner are you comfortable when you realize it's happening again.

You lie in bed, wide awake. Your mind is racing a mile a minute. You recall the sheep counting techniques *Sesame Street* always encouraged, but no matter how hard you try, your exhausted self cannot fall sleep. You would do anything to escape this cycle of nocturnal restlessness.

While waging these personal wars with your pillow, tossing and turning with the ticking of the clock, know that you are not alone. Nearly 30 million Americans regularly experience sleepless nights. Jim Bush '98 believes he is an insomniac: "I can never fall asleep right away. I'm awake for at least a couple of hours just thinking, even when I'm really tired."

Some students may see this as an advantage. One student, who wishes to remain anonymous, says, "I wish I was an insomniac; I have sleep drunkenness—I can never get up, and sleep addiction—the more I get the more I want... all of which can't be as good for my grades as insomnia would be."

This is not an unheard of sentiment. Studies done on "ultimate insomniacs" (those who live on one hour of sleep a night) reveal such attitudes: "I don't see any reason to want to sleep; I think it's a dreadful waste of time." Many who suffer from insomnia regard their inadequate sleep with a touch of triumph. One man even calculated that he had added 3,000 days to his waking life since his insomnia began.

Nonetheless, insomnia by definition is the "chronic inability to sleep" and can become a serious problem for some. Poor sleep and the ensuing exhaustion the next day can create an enormous physical and psychological burden, especially when it is a continual occurrence. For the Bucknellian insomniac, the LC steps may become a considerable task; staying alert in classes, an inevitable chore; patience with crowds, a constant trial.

Sleep researchers have attempted to find the causes of insomnia and have come up with several categories: situational factors, medical conditions, psychological factors, aging and drug abuse. Basically, this includes those things that cause just about all our problematic reactions to the world. But despite the generalization about what causes insomnia, many suggestions have been made as to potential "cures." The actions most commonly prescribed by doctors are these: set a regular sleep schedule, try to sleep only when you're tired, and try not to reflect on the day's activities before you go to bed.

In these terms, there is some behavior which is common to students, yet obviously pernicious. For example, a bottomless cup of java is probably not such a good idea at 10 p.m. Actually, doctors say try not to consume coffee, colas, and chocolate after 4 p.m. A late night snack may be the alternative to keep going, but if it is high in sugar it will excite your system too much. Mentally, you should focus your thoughts on something peaceful and nonthreatening. This will alleviate a considerable amount of distraction.

Here are some of the rather bizarre methods which are often prescribed to help with insomnia: Take a hike. Exercise will help trigger the deep, nourishing sleep that the body craves for replenishment. Take a bath. Raising the temperature of your body allows for a quick drop in temperature and into sleep. And try sex before bedtime. The hormonal mechanisms triggered enhance sleep.

When asked which of the remedies most appealed to her as a student, Cathy Bartch '98 answered, "Well, I don't have a problem with sleeping... but to insomniacs I would suggest a daily nap... there is a lot of rejuvenation to be found in a nap." Any simple sampling of this rejuvenation Bartch talks about would be a treat to the insomniac.

They do not ask for much—to be given allowance to escape the grim statistics of life and the pressures of day-to-day living with a few scant hours of sleep. Sleep is an inevitable part of the 24-hour cycle and yet this is something which is not constant for many people. In light of any temptations insomnia may present to the student, most of us would still opt for regular nights of sound sleep. If you find yourself enjoying the aggravations of insomnia, you may want to consider some of the treatments suggested.

Insomnia is not a permanence you must accept. It is a condition which you can overcome, so please, above all else, don't lose sleep over it.

Did you ever wonder how you could control your own dreams?

BY CATHY BARTCH
Bucknellian Staff Writer

Composed, confident, and rational in the daytime, at night you become a prisoner of a tumultuous, erratic mind.

You are constantly shuffling in and out of foreign places, meeting familiar and odd faces, baffled by the strangest thoughts. Your mind does not know what just happened; it may have been ravaged or pleasantly surprised by some unknown force.

If you are distressed you insist it is the wrong side of the bed (as if a bad omen is cast upon one side). If you are elated you want to believe the experience is real, although you are uncertain of its existence.

Yearning to remember fragments of last night's dreams you are uneasy at the pile of unconnected, jumbled thoughts with no sense of order. You want to regain control of your mind, but dreams keep you spinning in an emotional whirlpool.

Enter the world of lucid dreaming. The term "lucid dreaming" means that during the dream state one is conscious that he/she is dreaming. The sleeper achieves awareness that his/her thoughts and actions are solely a dream, and it is possible for the person to change the course of events, or consciously choose what to dream.

It almost seems impossible to control such an altered state. Surveys show that about 50 percent of people (and in some cases more) have had at least one lucid dream in their lives. Still, surveys are misleading, especially when people are answering questions they aren't quite sure about.

How do you know if you had a lucid dream? First of all there are physiological differences in your sleeping. Lucidity starts with patterned eye signals, and could provoke pauses in breathing, changes in heart rate and skin response changes. Yet, no specific combinations allow lucidity to be recognized by an observer. Research shows that lucid dreams most often occur a half an hour into the REM period and toward the end of a burst of rapid eye movements.

Lucidity could be stirred by a dose of anxiety or stress during the dream. You usually realize that there is something surreal happening, and to attain a clear picture of the dream state you would ask yourself "Is this a dream?" If the answer is "No" then this is a prelucid dream; if the answer is "Yes" then it is a true lucid dream.

Molly Depner '97 claims she's experienced this phenomenon. She describes the moment as, "I'm panicked and then I know it's only a dream." Yet, Molly claims she has never determined the outcome of her dream.

Has this amazing feat ever been accomplished? We've seen the tremendous willpower of the kids of Elm Street who defeat Freddy Krueger at the end of each movie (only to have him return for eternal sequels). The *Nightmare on Elm Street* movies, whether conscious of it or not, are strictly about lucid dreaming; the people fall asleep knowing they can control the fate of their nights, and in many cases their lives.

Outside the silver screen, lucid dreaming is not a race for survival of the fittest, and it can actually be fun. There are a number of methods you can choose to become a lucid dreamer. First of all, experimental work shows that high levels of physical and emotional activity during the day tend to precede lucidity at night. It can also be provoked if you wake during the night and perform some kind of activity before resuming sleep.

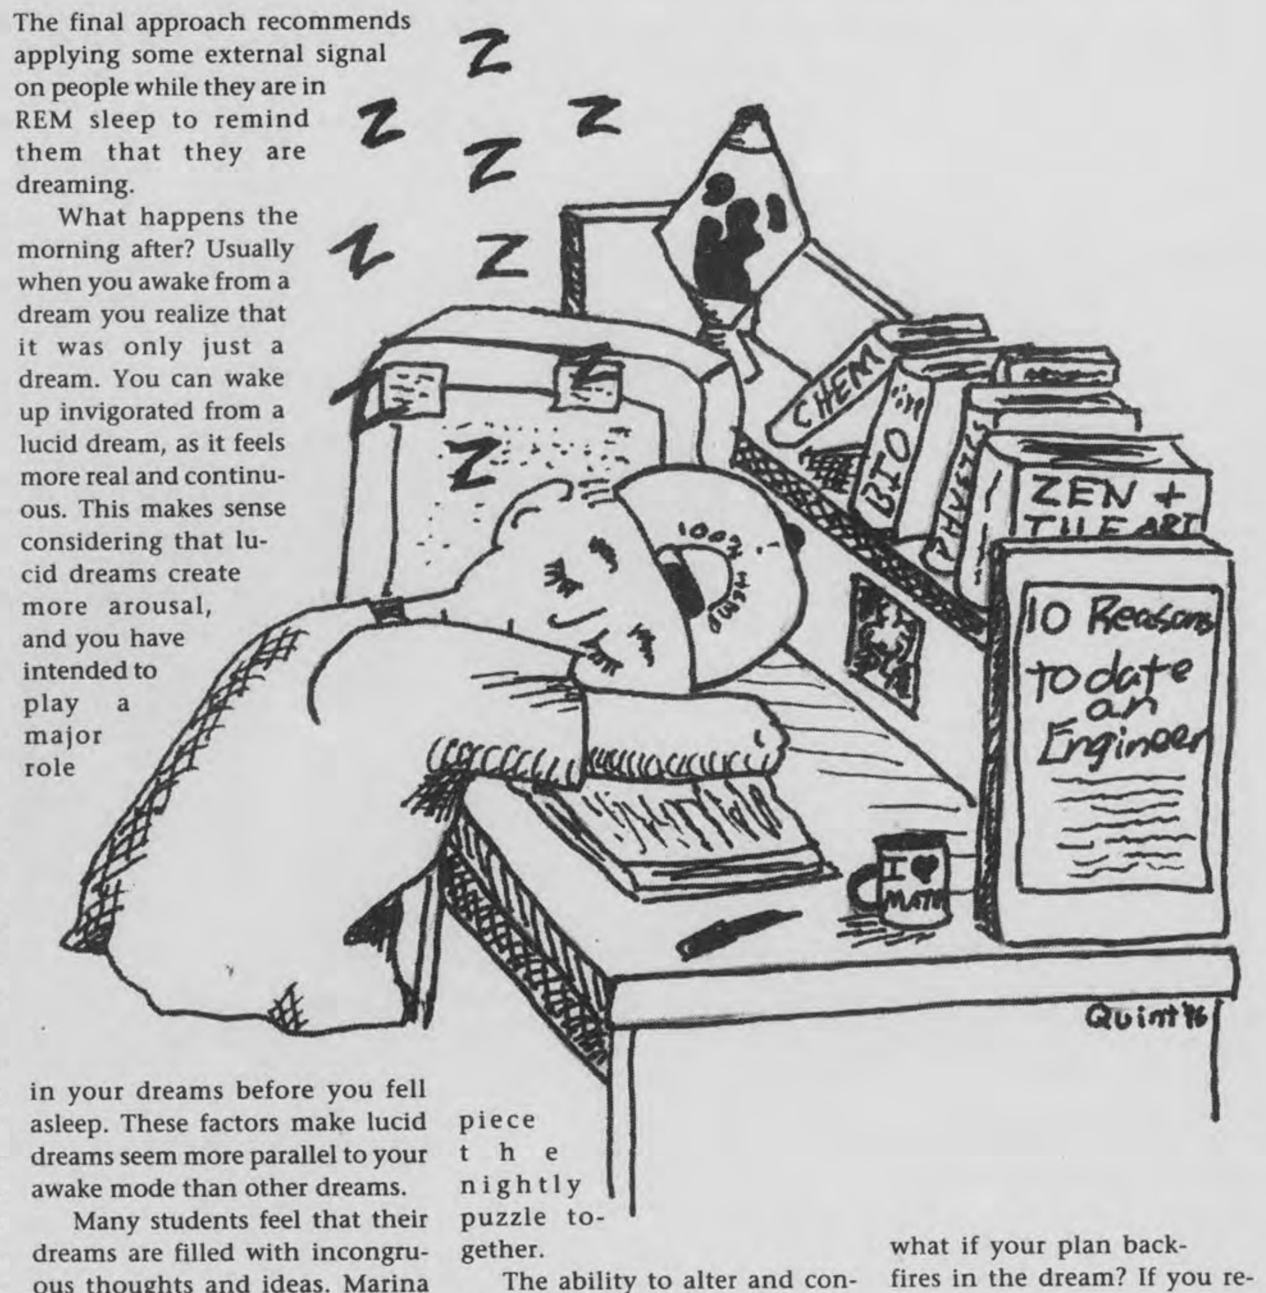
For example, one well known method is LaBerge's Mnemonic Induction of Lucid Dreaming. MILD suggests you should wake up early and engage in some activity like reading and walking. Then you should lie down to sleep again, imagine yourself asleep and dreaming, rehearse the dream from which you woke and remind yourself, "Next time I dream this I want to remember I'm dreaming."

Another approach says you should become lucid throughout the day. Escape that fogged vision, and ask yourself if you are dreaming or not. It may seem ridiculous, but a French researcher named Clerc suggests writing a large "C" on your hand for "conscious" to remind yourself you are awake.

Along with this proposal, research suggests that meditation can increase the level of lucidity.

The final approach recommends applying some external signal on people while they are in REM sleep to remind them that they are dreaming.

What happens the morning after? Usually when you awake from a dream you realize that it was only just a dream. You can wake up invigorated from a lucid dream, as it feels more real and continuous. This makes sense considering that lucid dreams create more arousal, and you have intended to play a major role in your dreams before you fell asleep. These factors make lucid dreams seem more parallel to your awake mode than other dreams.



Many students feel that their dreams are filled with incongruous thoughts and ideas. Marina Gershman '98 says she rarely recalls her dreams. "If I do I only remember fragments that don't seem to make any sense."

Lucid dreams may help to piece the nightly puzzle together.

The ability to alter and control what was perceived an untouchable realm may appear a bit frightening.

Lucid dreaming can bring relief to those restless nights, but what if your plan backfires in the dream? If you recall, not everyone escaped alive from their encounters with Freddy Krueger... just when you thought it was safe to sleep.

Nap nooks

Maggie McCormick—The Bucknellian

A lot of sleeping takes place outside of people's bedrooms. Meredith Dodson '99, above, likes the library, but here are several other places you can nab a nap.

"Dana, 'cause I'm there."
—*Tracy Huber* '97

"the cafe"
—*Amanda DeArmitt* '98

"in class"
—*Mike Diamond* '00

"Archès Lounge beckons to me"
—*Sanatan Golden* '99

"library under the stairs on the bean bags"
—*Doug Welty* '00

"Smith Hall RA/JF office"
—*Jennifer Drury* GR

"the ultimate field sideline"
—*Alison Kenny* '99

"the bison, the library, or somebody's couch"
—*Toby Anderson* '97

"in front of the TV in my sorority's suite—but that's rare"
—*Melissa Roverts* '98

"when it's sunny out, I sleep outside on the grass"
—*Jenni Schmitt* '99

Survey compiled by Melissa Renzi and Aimee Ferris

The four phases of sleep—Open your eyes to the technical side

BY STEPHANIE L. KARDOHELY

Relax, close your eyes, and take a deep breath... ah, that's better.

Did you know that doing something as simple as closing your eyes will change the electrical wave pattern of your brain? If you're still skeptical, check out an electroencephalogram. An EEG is a measure of electrical activity in the brain.

This activity shows up on paper as a wave pattern. Right now, being awake and alert, you're EEG would look like a tightly packed irregular pattern of waves called beta waves. Relax with eyes closed and you get an alpha pattern. When you relax, your brain is responding to fewer stimuli so the wave pattern is less tightly packed and more regular in form.

Now try to sleep. What kind of waves would you see? Nothing? Guess again. The brain uses just as much energy in sleep as it does when awake and alert. So, let's see what happens as we... fall... asleep......

There are actually four distinct stages of sleep. Each of them are categorized by different brain wave patterns and muscular responses. Not everyone makes it all the way to stage four every night, but it is the deepest, most restful stage. The following are detailed explanations of each stage.

Stage one. Plenty of alpha waves and the covers feel cozy. You try to remember what you learned in psychology that morning, while your favorite song plays over and over in your head, and the name of someone you were supposed to call...

Stage two. Theta waves, chaotic, but not as tightly packed as beta waves, flit across an EEG. The phone rings, but what is a phone?

Stage three. Large, lazy delta waves amble across an EEG. Vital signs slow and muscles relax. Oh, there's a theta wave, now back to delta.

Stage four. Delta waves and more delta waves. Your vitals slow even more and your muscles are still relaxed.

Finally, the stages reverse and you find yourself somewhere in Stage two. Now, you enter Rapid Eye Movement sleep. Most dreaming occurs in REM sleep. Vitals increase in rate, the brain uses phenomenal amounts of oxygen, and, believe it or not, a pattern resembling beta waves, which is usually seen when someone is alert, makes its way onto an EEG.

In five-ten minutes you're drowsily cycling through Stages two, three, etc.. This pattern of going through the stages of sleep and back again to REM sleep repeats every 90 minutes. With each repetition, REM sleep becomes longer (up to 50 minutes). At last, you wake up naturally from an REM sleep.

Curiously, although you awaken naturally from an REM sleep, this is the hardest time for someone else to wake you up. And, remember those nightmares where you're desperately trying to escape a green monster and can't seem to move a muscle.

You truly can't move a muscle in REM sleep. Voluntary muscle groups (except eye muscles) are all inhibited during REM sleep. Thus, try as you might, the green monster will always catch you.

No one is sure of the exact function of sleep. The four stages of sleep are probably important for physical restoration, while REM sleep seems to be important for mental health.

So, the next time you have trouble falling asleep, remember: relax, close your eyes, and think alpha waves. Your brain will do the rest.

Did you ever wonder how you could control your own dreams?

BY CATHY BARTCH
Bucknellian Staff Writer

Composed, confident, and rational in the daytime, at night you become a prisoner of a tumultuous, erratic mind.

You are constantly shuffling in and out of foreign places, meeting familiar and odd faces, baffled by the strangest thoughts. Your mind does not know what just happened; it may have been ravaged or pleasantly surprised by some unknown force.

If you are distressed you insist it is the wrong side of the bed (as if a bad omen is cast upon one side). If you are elated you want to believe the experience is real, although you are uncertain of its existence.

Yearning to remember fragments of last night's dreams you are uneasy at the pile of unconnected, jumbled thoughts with no sense of order. You want to regain control of your mind, but dreams keep you spinning in an emotional whirlpool.

Enter the world of lucid dreaming. The term "lucid dreaming" means that during the dream state one is conscious that he/she is dreaming. The sleeper achieves awareness that his/her thoughts and actions are solely a dream, and it is possible for the person to change the course of events, or consciously choose what to dream.

It almost seems impossible to control such an altered state. Surveys show that about 50 percent of people (and in some cases more) have had at least one lucid dream in their lives. Still, surveys are misleading, especially when people are answering questions they aren't quite sure about.

How do you know if you had a lucid dream? First of all there are physiological differences in your sleeping. Lucidity starts with patterned eye signals, and could provoke pauses in breathing, changes in heart rate and skin response changes. Yet, no specific combinations allow lucidity to be recognized by an observer. Research shows that lucid dreams most often occur a half an hour into the REM period and toward the end of a burst of rapid eye movements.

Lucidity could be stirred by a dose of anxiety or stress during the dream. You usually realize that there is something surreal happening, and to attain a clear picture of the dream state you would ask yourself "Is this a dream?" If the answer is "No" then this is a pre-lucid dream; if the answer is "Yes" then it is a true lucid dream.

Molly Depner '97 claims she's experienced this phenomenon. She describes the moment as, "I'm panicked and then I know it's only a dream." Yet, Molly claims she has never determined the outcome of her dream.

Has this amazing feat ever been accomplished? We've seen the tremendous willpower of the kids of Elm Street who defeat Freddy Krueger at the end of each movie (only to have him return for eternal sequels). The *Nightmare on Elm Street* movies, whether conscious of it or not, are strictly about lucid dreaming; the people fall asleep knowing they can control the fate of their nights, and in many cases their lives.

Outside the silver screen, lucid dreaming is not a race for survival of the fittest, and it can actually be fun. There are a number of methods you can choose to become a lucid dreamer. First of all, experimental work shows that high levels of physical and emotional activity during the day tend to precede lucidity at night. It can also be provoked if you wake during the night and perform some kind of activity before resuming sleep.

For example, one well known method is LaBerge's Mnemonic Induction of Lucid Dreaming. MILD suggests you should wake up early and engage in some activity like reading and walking. Then you should lie down to sleep again, imagine yourself asleep and dreaming, rehearse the dream from which you woke and remind yourself, "Next time I dream this I want to remember I'm dreaming."

Another approach says you should become lucid throughout the day. Escape that fogged vision, and ask yourself if you are dreaming or not. It may seem ridiculous, but a French researcher named Clerc suggests writing a large "C" on your hand for "conscious" to remind yourself you are awake.

Along with this proposal, research suggests that meditation can increase the level of lucidity. The final approach recommends applying some external signal on people while they are in REM sleep to remind them that they are dreaming.

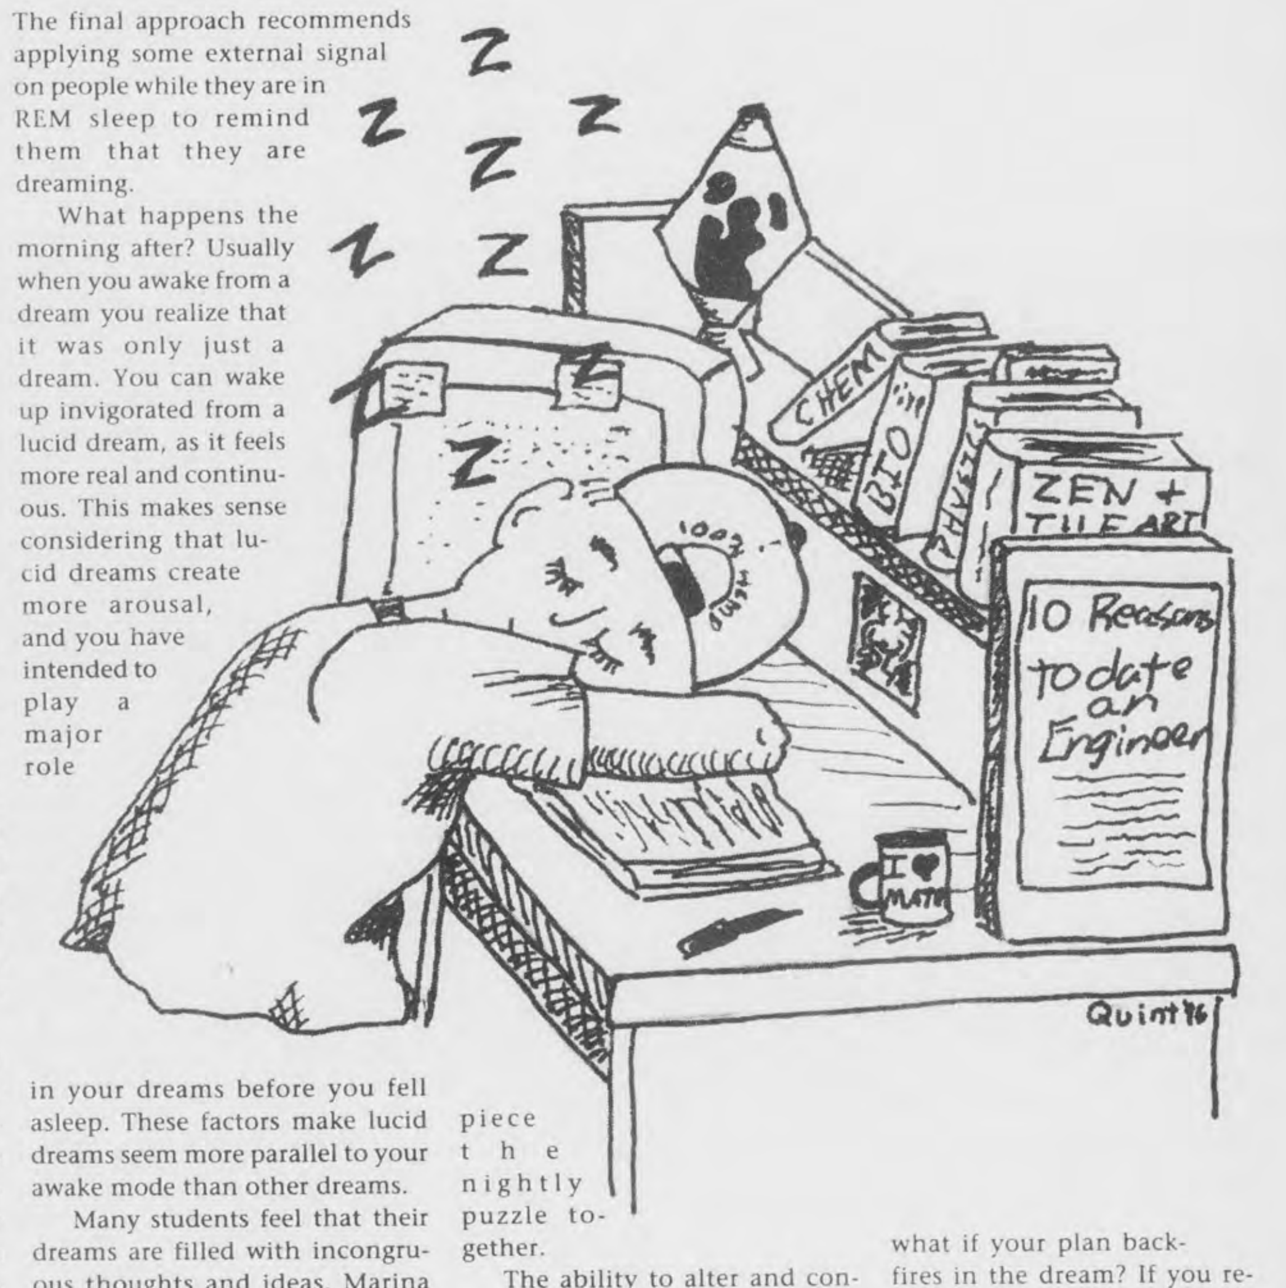
What happens the morning after? Usually when you awake from a dream you realize that it was only just a dream. You can wake up invigorated from a lucid dream, as it feels more real and continuous. This makes sense considering that lucid dreams create more arousal, and you have intended to play a major role in your dreams before you fell asleep. These factors make lucid dreams seem more parallel to your awake mode than other dreams.

Many students feel that their dreams are filled with incongruous thoughts and ideas. Marina Gershman '98 says she rarely recalls her dreams. "If I do I only remember fragments that don't seem to make any sense."

Lucid dreams may help to piece the nightly puzzle together.

The ability to alter and control what was perceived an untouchable realm may appear a bit frightening.

Lucid dreaming can bring relief to those restless nights, but what if your plan backfires in the dream? If you recall, not everyone escaped alive from their encounters with Freddy Krueger... just when you thought it was safe to sleep.



Nap nooks

Maggie McCormick—The Bucknellian

A lot of sleeping takes place outside of people's bedrooms. Meredith Dodson '99, above, likes the library, but here are several other places you can nab a nap.

"Dana, 'cause I'm there."

Survey compiled by Melissa Renzi and Aimee Ferris

The four phases of sleep—Open your eyes to the technical side

BY STEPHANIE L. KARDOHELY

Relax, close your eyes, and take a deep breath... ah, that's better.

Did you know that doing something as simple as closing your eyes will change the electrical wave pattern of your brain? If you're still skeptical, check out an electroencephalogram. An EEG is a measure of electrical activity in the brain.

This activity shows up on paper as a wave pattern. Right now, being awake and alert, you're EEG would look like a tightly packed irregular pattern of waves called beta waves. Relax with eyes closed and you get an alpha pattern. When you relax, your brain is responding to fewer stimuli so the wave pattern is less tightly packed and more regular in form.

Now try to sleep. What kind of waves would you see? Nothing? Guess again. The brain uses just as much energy in sleep as it does when awake and alert. So, let's see what happens as we... fall... asleep......

There are actually four distinct stages of sleep. Each of them are categorized by different brain wave patterns and muscular responses. Not everyone makes it all the way to stage four every night, but it is the deepest, most restful stage. The following are detailed explanations of each stage.

Stage one. Plenty of alpha waves and the covers feel cozy. You try to remember what you learned in psychology that morning, while your favorite song plays over and over in your head, and the name of someone you were supposed to call...

Stage two. Theta waves, chaotic, but not as tightly packed as beta waves, flit across an EEG. The phone rings, but what is a phone?

Stage three. Large, lazy delta waves amble across an EEG. Vital signs slow and muscles relax. Oh, there's a theta wave, now back to delta.

Stage four. Delta waves and more delta waves. Your vitals slow even more and your muscles are still relaxed.

Finally, the stages reverse and you find yourself somewhere in Stage two. Now, you enter Rapid Eye Movement sleep. Most dreaming occurs in REM sleep. Vitals increase in rate, the brain uses phenomenal amounts of oxygen, and, believe it or not, a pattern resembling beta waves, which is usually seen when someone is alert, makes its way onto an EEG.

In five-ten minutes you're drowsily cycling through Stages two, three, etc.. This pattern of going through the stages of sleep and back again to REM sleep repeats every 90 minutes. With each repetition, REM sleep becomes longer (up to 50 minutes). At last, you wake up naturally from an REM sleep.

Curiously, although you awaken naturally from an REM sleep, this is the hardest time for someone else to wake you up. And, remember those nightmares where you're desperately trying to escape a green monster and can't seem to move a muscle.

You truly can't move a muscle in REM sleep. Voluntary muscle groups (except eye muscles) are all inhibited during REM sleep. Thus, try as you might, the green monster will always catch you.

No one is sure of the exact function of sleep. The four stages of sleep are probably important for physical restoration, while REM sleep seems to be important for mental health.

So, the next time you have trouble falling asleep, remember: relax, close your eyes, and think alpha waves. Your brain will do the rest.

Features are fun! Call Aimee & Melissa x1520.

SCIENCE AND TECHNOLOGY

Observatory to be used to view lunar eclipse

Class and professionals to watch outer-space phenomenon from observatory.

By Jamie Krauk
Bucknellian Staff Writer

Above Swartz field, at the far end of fraternity row, sits a building that appears to be virtually untouched. It is the campus observatory, and it is in use.

The University is home to the Susquehanna Valley Amateur Astronomers club, a group of students and adults who meet once a month to learn about and view the skies. On the third Friday of every month, the observatory is active and the group opens their doors for anyone who shows an interest in discovering what lies beyond visual detection.

Next Thursday, the 26th, there will be a full lunar eclipse. Beginning at 8:12 p.m., Earth's shadow will be visible around the edges of the moon. From 10:19 p.m. until 11:29 p.m., the moon will be totally covered. The eclipse should be easily visible because the moon is positioned high in the sky.

This eclipse comes at an interesting time for astronomers for two reasons. Not only is the moon at a great height, but it is the first time since April 1968 that the eclipsed moon has been in such close proximity to a bright object, in this case Saturn.

Margaret Chester, professor of physics, spoke of a few points of interest to look for during the eclipse. "Depending on the atmosphere, the color of the glow surrounding the moon will change. Try to notice the hue. If a medium bright reddish orange shade is emitted, that is a signal that the earth's atmosphere is relatively clear of dust. When too much pollution and dust are the way of the sun's rays, the color changes to a less vivid reddish black or brown."

Not only is the eclipse on its way, the Hale-Bopp comet is quickly approaching. Named after Alan Hale, founder of the Southwest Institute of Space Studies, and amateur astronomer Tom Bopp, it is visible now but will be easier to detect as the fall progresses. The Hale-Bopp comet is estimated to be twice, and even 10 times as large as Halley's Comet. It last visited our neighberhood 5900 years ago.

Over the course of the next year, the comet will be studied by astronomers all over the world.

The comet will pass closest to the sun during the months of March, April and May. During that time, sunspots will be seen alongside the comet's blaze. The local astronomy club will be on hand viewing and taking note of both of these events as they occur.

From 8 until 11 p.m. on Oct. 5, and then again from 7 until 10 p.m. on Nov. 16, the observatory will be open for visitors. It will be a time for instruction and viewing the in-house slides and museum.

"The club is really what you make of it," says David Lien, astronomy and physics professor and advisor of the club. "There have been times when a member of the club has just called me up to let me know they were coming over to the observatory to spend a few hours. It's so nice to see people get absorbed into what they're doing. The club offers a great opportunity for those who love astronomy to learn and investigate on their own."

At 8 p.m. tomorrow evening, Lien will be giving a lecture in the Observatory entitled "Life on Mars." The talk will be in reference to the recent discovery of ancient organic matter on the planet. The event is open to all who are interested can attend.

Former President Sojka returns to the classroom

After 12 years in office, biologist is enthusiastic about completing "Plan A", an attack on "scientific illiteracy"

By Tim Parrott

One year after the completion of his 12 year term as president of the University, Gary Sojka Ph.D. can be found in a small office on the second floor of the Biology Building. He proclaimed his contentment in the Fall 1996 Biology Newsletter when he stated "I'm eagerly anticipating the next step in the plan that I shared with the Bucknell community over 12 years ago."

As the president-elect, Sojka made it clear that after his presidential term had elapsed he wished to teach full-time in the biology department here. This plan, which Sojka has coined as his "Plan A" has unfolded as he designed, and for this, Sojka feels "extremely fortunate."

This semester he is teaching two sections of Biology 121 and one section of Biology 191. Sojka asserted that Biology 191, an entry level Biology course for majors, has impressive objectives and he enjoys the opportunity to teach the small class, but that his true enjoyment comes from teaching Biology 121, an entry level course for non-majors. This course which is commonly known as "baby bio" has large sections of between 95 and 97 students who are not interested in biology as a career.

Sojka explained that he received a great amount of enjoyment out of teaching non-majors because he feels that is an area which is sometimes overlooked. Sojka feels that the "scientific literacy" of this country is very poor, and he is excited about playing a part in remedying that educational problem.

Sojka is not involved with any research this semester but has given much thought to a personal project involving nearly extinct breeds of sheep. He hopes to involve this personal project with research opportunities on campus within the next few years.

Sojka deals with some leftover responsibilities from his presidency by continuing to be active in organizations on campus and in the Lewisburg area. These responsibilities, he says, preclude him from being as involved as he would like to be in the research arena.

Prior to 1980, Sojka worked at Indiana University in the research intensive biology department. He looks at his opportunity to teach as potentially the "most pleasant part of [his] Bucknell experience." He is enthusiastic about his chance to complete his "Plan A" and have an impact on the biology department at the University.

Gary Sojka, former president of the University, is currently teaching what is commonly known as "baby bio" and a biology course for majors.

Web site developed by Bucknell graduates wins national award

Bucknellian File Photo
Dave Maher '96, and Jeff Boulter '96, worked together to design CRAYON.

CRAYON (CReAte Your Own Newspaper), a web site created by two Bucknell alumni while they were students, has received one of the three Best-of-Net Awards in 1996 by MACWORD Expo and Your Personal Net.

CRAYON won the best in the news and money category. The winners in the other two categories were, CyberMad in entertainment and TerraQuest in living. More than 2,000 nominations were submitted.

"We are delighted to win this prestigious award," said Jeff Boulter '96, CRAYON creator. "Many news sites are 'personalized' now, but CRAYON takes personalization to a much higher level. We are not tied to any specific content. People like the fact that CRAYON is a one-stop shop for the best of news online," Boulter said.

The award is just the latest received by Boulter and Dave Maher '96, who designed CRAYON in their junior years at the University. Computer science majors, both Boulter and Maher worked on *The Bucknellian*, the student newspaper. Boulter was editor-in-chief in the fall of 1995.

They wanted a free source of national news, so they created a free site that accessed hundreds of news sources on the Web, including everything from national and international newspapers to television networks. Users can customize their Internet newspaper by selecting the news they want to receive. They can pick and choose from 15 news departments—i.e., world news, entertainment, even the comics. The address is:

`http://crayon.net`

"CRAYON also gives people the power to get the news from many different angles," Boulter said. "For example, if something of global importance happens in Israel, normally you would have to read it from your local or national paper. With CRAYON, you can get it right from *The Jerusalem Post*. There are many different perspectives around the world. With CRAYON, you have the power to leverage these perspectives to your personal taste. In the process, maybe, just maybe, you'll find the truth."

CRAYON was launched in the spring of 1995. Soon after the release Netscape designated it one of its "What's Cool" sites. PointCom Review named it as among the "Top 5% of All Web Sites". Magellan listed it as a Featured Site.

Several syndicated computer writers featured CRAYON, and their columns appeared in scores of newspapers all over the country. Major newspapers and national magazines also carried separate stories about the Web site. "We have been overwhelmed by all the publicity and response that CRAYON has received," Boulter noted.

Boulter and Maher graduated from Bucknell in May. Boulter is now working for Agents Inc., in Cambridge, Mass., developing software for the Internet. Maher is an Internet consultant for Walcoff & Associates in Fairfax, Va.

Science and Technology Calendar

Sept. 24	Chemistry Lecture 7:30 p.m. in Rooke Auditorium Professor C. Robert Matthews of the chemistry department at Penn State University will speak on "Chemical and Biochemical approaches towards solving the protein folding problem."
Sept. 24	Physics Coffee Talk 12:00 noon in 264 Olin Science Astronomy professor David Lien will speak of "Life on Mars," based on the recent discovery of ancient organic matter on the planet.
Sept. 26	Mathematics Luncheon 12:00 noon 302 Langone Center An informal lunch gathering for faculty and mathematics students.
Sept. 26	Total Lunar Eclipse 10:19 p.m. - 11:29 p.m. The moon will be high in the sky for easy viewing. For the first time since 1968, the eclipse falls at a time when the moon is aligned with another planet, in this case Saturn.
Sept. 27	Biology Seminar 4:00 p.m. in Rooke Auditorium Dr. Jack Schultz, Professor of Entomology at Penn State University will speak on "Chemical ecology of a tritrophic interaction: Oaks, viruses, and the gypsy moth."
Sept. 30	Physics Lecture 7:30 p.m. in Rooke Auditorium Professor Jerry Gollub of the physics department at Haverford College will speak on "Patterns in moving fluids: Symmetry and Chaos

Free one-year Apple warranty.

Save $100 when you purchase a qualifying Macintosh computer and Apple printer; offer valid through October 11, 1996. No payment of interest or principal will be required for 90 days. Interest accruing during this 90-day period will be added to the principal and will bear interest, which will be included in the repayment schedule. For example, the month of May 1996 had an interest rate of 12.15% with an Annual Percentage Rate (APR) of 13.93%. A monthly payment of $80.37 for the Power Mac 8500/150 system is an estimate based on a total loan amount of $4,680.85, which includes a sample purchase price of $4,369 and a 6% loan origination fee. Interest is variable based on the Prime Rate as reported on the 5th business day of the month in The Wall Street Journal, plus a spread of 3.9%. Monthly payment and APR shown assumes deferment of principal and does not include state or local sales tax. The Apple Computer Loan has an 8-year loan term with no prepayment penalty and is subject to credit approval. Monthly payments may vary depending on actual computer system prices, total loan amounts, state and local sales taxes and a change in the monthly variable interest rate. ©1996 Apple Computer, Inc. CRAYON was launched in the spring of 1995. Soon after the release Netscape designated it one of its "What's Cool" sites. PointCom Review named it as among the "Top 5% of All Web Sites". Magellan listed it as a Featured Site.

Several syndicated computer writers featured CRAYON, and their columns appeared in scores of newspapers all over the country. Major newspapers and national magazines also carried separate stories about the Web site. "We have been overwhelmed by all the publicity and response that CRAYON has received," Boulter noted.

Boulter and Maher graduated from Bucknell in May. Boulter is now working for Agents Inc., in Cambridge, Mass., developing software for the Internet. Maher is an Internet consultant for Walcoff & Associates in Fairfax, Va.

Science and Technology Calendar

Sept. 24 Chemistry Lecture 7:30 p.m. in Rooke Auditorium
Professor C. Robert Matthews of the chemistry department at Penn State University will speak on "Chemical and Biochemical approaches towards solving the protein folding problem."

Sept. 24 Physics Coffee Talk 12:00 noon in 264 Olin Science
Astronomy professor David Lien will speak of "Life on Mars," based on the recent discovery of ancient organic matter on the planet.

Sept. 26 Mathematics Luncheon 12:00 noon
302 Langone Center
An informal lunch gathering for faculty and mathematics students.

Sept. 26 Total Lunar Eclipse 10:19 p.m. - 11:29 p.m.
The moon will be high in the sky for easy viewing. For the first time since 1968, the eclipse falls at a time when the moon is aligned with another planet, in this case Saturn.

Sept. 27 Biology Seminar 4:00 p.m. in Rooke Auditorium
Dr. Jack Schultz, Professor of Entomology at Penn State University will speak on "Chemical ecology of a tritrophic interaction: Oaks, viruses, and the gypsy moth."

Sept. 30 Physics Lecture 7:30 p.m. in Rooke Auditorium
Professor Jerry Gollub of the physics department at Haverford College will speak on "Patterns in moving fluids: Symmetry and Chaos

Water Polo opens strong at Navy

By Erica Friedlander and Jay O'Neil

The Bucknell men's water polo team kicked off their season this past weekend with a tournament at Annapolis, MD. Their first game was against the University of Massachusetts "B" team. The Bison played well against UMASS and lead Bucknell to a quick victory 17-6. Alex Lunding '98 led the team in scoring followed by Jeremy Kish '98.

Coach Mike Wooster was impressed with Kish's contribution on the offensive end since Kish is known for his excellent defensive play.

The next challenge of the weekend was against a very strong Queens team. Bucknell did not play as well as they had hoped and were trailing 6-9 at the start of the fourth quarter. The Bison men rallied to tie the score at 9-all. Despite the team's mighty comeback, they fell to Queens by the score of 9-10.

The Bison continued their quest for victory the following day when they faced the University of Richmond. Bucknell came out sluggish against the team which was considered to be of lesser talent and trailed 2-3 at the end of the first quarter. After a motivational speech by Coach Wooster, the team pulled ahead and never looked back. They finished off the Richmond Spiders with a score of 13-8.

Due to a request from Slippery Rock University, the Bison played again no less than 15 minutes after the end of the Richmond game. Both teams were tired but, they played hard. The game was even throughout the entire game and was forced into overtime with a score of 9-9 at the end of regulation time.

After the first three minutes of overtime play the score was holding steady at 9-9. Both teams were showing signs of fatigue and were missing relatively easy shots on goal. The score remained 9-9 until the clock showed four seconds remaining in overtime play. At this point Slippery Rock was awarded a penalty shot which they scored, causing them to defeat the Bison 10-9 in the final game of the weekend.

The Bucknell water polo team finished off the weekend with a record of 2-2. They will be heading to Slippery Rock University this coming weekend where the Bison will face Princeton and Johns Hopkins University.

Bison trample hapless Tigers

Terence Parham's 99-yard kick return ignites a second-half rally; Bucknell rolls, 44-7

By Brett Tomlinson
Bucknellian Staff Writer

Fall arrived overnight this year in Lewisburg, and just as the crisp autumn weather swept into town, Bucknell football also arrived with a resounding opening victory over Towson State on Saturday.

On a day that seemed made for football, the young Bison lineup started strong, forcing a Towson State fumble in the Tigers' first possession and quickly took the lead with a 26-yard pass from Jim Fox '97 to Paul Lima '99.

Bucknell's defense kept the Tigers in check until the second quarter, when redshirt first-year quarterback Joe Lee engineered an 80-yard scoring drive, topped off by a 19-yard touchdown toss to Shawn Ward.

Lee, who started in place of suspended sophomore Kevin Smith, was calm and collected in the first half, passing for 104 yards. Meanwhile, Fox impressed the Bison fans with a strong first half, putting Bucknell ahead late in the second quarter with a 74-yard strike to Ardie Kissinger '99.

In the second half, the Bison took absolute control of the game on both sides of the ball, stuffing the Tigers' offense and moving the ball swiftly on offense.

Terence Parham '97 got the half started with an explosive 99-yard kickoff return, which tied a school record for the longest scoring play. Parham gave credit to his blockers for the game-breaking play.

"[Special teams] can change momentum at the snap of a finger," said Parham. "You just have to relax, stay poised, and have confidence in the 10 guys around you."

The momentum carried over as Parham and his defensive teammates took the field. The defensive line was solid throughout the game, with strong play from defensive end Hunter Adams '98 and outside linebacker Brandon Little '97. Tiger runners were held to just 48 yards on 40 attempts, and the line provided relentless pursuit of Lee on passing plays.

The pressure got to Lee in the second half as the Bison secondary spoiled his debut with three interceptions. Jack Boyle '97 had two picks, while Little snagged the third on a tipped pass.

With the defense holding strong, the Bison began to attack on offense, working on the ground with the hard-nosed running of tailback Rich Lemon '97 Lemon finished the game with 104 yards and surpassed the 4,000 yard barrier for his career on "Rich Lemon Poster Day."

Lemon appreciated the promotion, and gave the crowd plenty to appreciate with two second half touchdowns. "It's great to know that the community supports you," Lemon commented after the game.

Bucknell's lead stood at 23-7 after a 29-yard-Rich Miller '97 field goal, and Lemon quickly took control.

He scampered into the end zone from three yards out, capping a 62-yard fourth quarter drive and slashed through the Tigers' defense in the next possession with a 38 yard touchdown, setting the score at 37-7.

The scoring seemed to be over as Bucknell quarterback Jim John '99 entered the game for clean-up duty, but John surprised the crowd as well as the Tigers by dropping a perfect pass into the arms of Ken Scholtz '98 for a 32-yard touchdown. The play put Bucknell ahead 44-7, and that score would stand.

Fox finished the game with 196 passing yards and only one interception, while Kissinger led all receivers with 97 yards on four catches.

Mark Carollo—The Bucknellian
Quarterback Jim Fox threw for 197 yards and two touchdowns as the Bison routed Towson State 44-7.

Volleyball spikes guests at Invitational

By Jacob Lipman
Bucknellian Staff Writer

The women's volleyball team slammed the competition this past weekend en route to winning the Bucknell Invitational. The Bison started out slowly on Friday, but then elevated their play and steam-rolled over their opponents the following day. The three victories give the Bison an overall record of 8-2 heading into the Boston College tournament this weekend. Bucknell is currently on a six-match winning streak, and has only lost three games during those six victories.

Dartmouth, coached by former Bucknell assistant Ann-Marie Larese, was the first opponent for the Bison. Last season, the two teams squared off twice. Bucknell won in the first meeting at last year's Bucknell Invitational, but Dartmouth upended the Bison later in the season, handing Bucknell one of its seven losses.

This time around, the Bison emerged victorious, though it took a grueling five set, 15-6, 10-15, 15-13, 10-15, 15-6 win to do so.

The first game was knotted at 3-2 in favor of Bucknell early on, but the Bison pulled away with some excellent blocking to take an 11-2 lead. In control the rest of the game, Heather Rendle '97 finished with a powerful cross-court spike.

The two teams were at a standstill early on once again, in the second game. Dartmouth slowly inched away, taking a 7-0 lead before Bucknell could get on the score board. However, this game was far from over. After winning a long rally in which Emily Pomeroy '99 had two key digs, the Bison scored five straight points, cutting the deficit to 8-7. That was the closest Bucknell would get though, as Dartmouth outscored them 7-3 in the remainder of this game.

Dartmouth, using their momentum from game two, propelled themselves to a 5-1 lead to begin game three. They then widened the margin even further to an 11-3 score. Coach Cindy Opalski called for a time-out to talk things over with her team. Following the time-out, Susie Teitsworth '97 served two aces in a row and from there the Bison went on a rampage, scoring nine straight points. This gave Bucknell a 12-11 lead, the first time in the game they had led since it was 1-0. Dartmouth scored two points to regain the lead but they never regained control of the game. Bucknell scored the final three points behind solid blocking from the front line, to cap off the improbable comeback.

In the fourth game, Dartmouth jumped out to a 3-0 lead. Bucknell used a 6-0 run to make it 6-3 but Dartmouth matched the Bison with their own 6-0 run. This time, Bucknell couldn't quite come back as they fell 15-10, sending the match to a fifth game.

In the tie-breaking fifth game, Bucknell took hold of the reins of their destiny, and squashed Dartmouth's hopes of an upset. The Bison needed no comeback this time as they cruised to the 15-6 win.

Melissa Wharton '98 was fantastic as usual, with a season-high 30 kills. She had a lot of help from Rendle and Pomeroy, who had 18 and 16 kills respectively. Turnshek did an excellent job of setting up her teammates, assisting them 66 times. Defensively Allison Morris '97 and Jen Post '00 had 23 and 16 digs respectively, while Teitsworth had 24 digs and also served four aces.

Though this match was not the team's best performance, the Bison showed a high level of intensity and perseverance, that enabled them to defeat Dartmouth.

"It was one of those weekends where you start at a medium pace," Opalski said.

The Bison may have struggled a little on Friday, but Saturday was a different story.

Heather Montaperto '97 made her return to the court, after missing all of last season due to knee surgery, and missing the first few

Jonah Half — The Bucknellian
Melissa Wharton '98 and the Bison spiked all three of their opponents in the Bucknell Invitational

Flash in the Pan

Miracle on Ice, Part 2: The United States Hockey team bounced back from a game one loss to defeat Canada in two straight games in Montreal, and take Hockey's World Cup. The USA dropped the first game in Philadelphia, and had to travel to Montreal with the seemingly insurmountable task of winning two games on Canada's home turf. However, the USA bounced back strong with a victory in game two to set-up the final game. Canada took a 2-1 lead with just over seven minutes left, before the USA stormed back by scoring two goals in under a minute, and cruised to a 5-2 victory with two open net goals.

Golfers Retain President's Cup: U.S. team hero Fred Couples sank a 25-foot putt on the 17th hole to defeat Vijay Singh of Fiji, and lead the United States to a 16.5-15.5 victory over an international squad boasting such players as Greg Norman and Nick Price. The U.S. also won the inaugural President's Cup in 1994.

Molitor Joins Elite: The Minnesota Twin's Paul Molitor became the 21st player in major league history to register 3,000 career hits with a triple against the Kansas City Royals this past week. Molitor is having another fine season at 40 years old, and currently leads the majors in hits, and is third in the AL in batting.

More Baseball Records: The Baltimore Orioles broke the 1961 New York Yankees record for home runs in a season this week, as Cal Ripken launched a three run homer over the right field wall to break the Yankees record of 240.

Joyner-Kersee to Try Basketball: World-record setting heptathalete and defending Olympic medalist Jackie Joyner-Kersee has made plans to play in the new American Basketball League, a women's pro league that begins play next month. The three-time gold medalist was the starting forward for four years at UCLA. She will be joining the Richmond Rage.

Leyland Leaves Bucs: Pittsburgh Pirates manager Jim Leyland, widely regarded as one of the finest minds in baseball, announced his resignation effective at the end of the year. Leyland decided to step down after the Pirates made plans to cut their payroll from a league-low $21 million to $18 million. The Pirates have already lost their two top players, Charlie Hayes and Denny Nagle, in trades this year.

Game of the Weak: The New York Jets and New York Giants will face off this Sunday with each of the two struggling teams looking for their first win of the season.

Elsewhere in the NFL, the Green Bay Packers visit the Minnesota Vikings, and the Indianapolis Colts face the Miami Dolphins in two matchups of 3-0 teams. In addition, the 2-0 San Francisco 49ers face the 2-0 Carolina Panthers in another battle of unbeatens.

Women's rugby tackles opponents, wins opener

By Karen Dziuma

Bucknellian Team Correspondent

This past weekend, the Women's Rugby Club traveled to Penn State to take on Penn State's B and C teams, as well as Bloomsburg University's A team. Bucknell's ruggers gave a remarkable performance as they dominated all of their matches.

All games were considered a learning experience since the teams were not up to Bucknell's level of play. New players gained playing experience as they were mixed in with returning players to allow for all to have considerable playing time.

Coaches Jim Mathias and Bob Langton were extremely pleased with the way Bucknell played and said, "We are very optimistic for our team this season. If the team continues to play as well as they did on Saturday, we should have no trouble going to the Conference finals."

Although the team lost some key players to graduation and study abroad programs, Bucknell is a young team with a lot of promise. Ranked third in their conference, Bucknell faces competitive teams such as Princeton, who won the National Championship last year. Returning players Heather Leaf '97, Bridget Lewis '97, Deb Yates '98, Andrea Maas '98, Megan Kull '98, Alyssa Gady '98 and captains Jessie Liddell '99 and Megan McCarthy '99 form a strong backbone supported by numerous first-year students and returning sophomores.

This weekend Bucknell begins their quest for the Conference title at fifth-ranked Swarthmore.

Field Hockey tops Columbia, improves to 3-2

By Haley Futterknecht

Bucknellian Staff Writer

The field hockey team demonstrated their determination, skill and spirit as they came up big this past weekend with back to back wins. Senior co-captain Dani Johnston scored two goals for Bucknell as they glided past Columbia for their second straight win on Saturday.

The Bison held a 4-1 lead at halftime, with juniors Tina Jones, Susan LeFevre and Jaime Paldin scoring one goal each. Paldin also contributed two assists. Said junior defender Sarah Catlin, "The forward line has been extremely impressive this year. They really have set a new standard for Bucknell field hockey offense."

Goaltending duties for the game were split between Maureen Breslin '99, who played the first half, and Kanda Kratzer '00, who took over for the second. Both goalkeepers made two saves each.

Junior Kristin Soto was on fire Sunday, helping Bucknell to beat Hofstra 3-2, for the Bison's third straight win. Paldin and Soto each scored in the first half, giving Bucknell a 2-0 lead at halftime.

Hofstra closed the gap in the second half, putting two goals in the net to tie the score. However, Johnston answered with a goal aided by an assist from Soto. The Bison were then able to hold the Flying Dutchwomen scoreless and came up with the win.

Breslin tended the goal for Bucknell and finished with five saves. The Bison outshot Hofstra 32-9.

Bucknell will open up Patriot League play on Saturday at Holy Cross.

Tina Jones '98 said, "With every practice I can actually see the team improving, and our games thus far have demonstrated this. We are all really excited and feel that we're prepared for opening up our Patriot League play this Saturday at Holy Cross."

The team currently enjoys the undivided attention of head coach Heather Lewis, who is flanked by assistant Gina Lucido and new assistant Barb Jordon.

Senior co-captain Megan Bossuyt said, "We're a small, close-knit team that works well on and off the field. Our play has really elevated to a new level this year. From the coaching staff down to the team there is such a positive atmosphere. I'm having so much fun."

The team has definite future goals that they are determined to attain. Lewis said, "I think winning a league championship is a realistic expectation. It will take a commitment from our players, but there is more talent here than we've ever had before. It's also a great team to coach in terms of their ability and their enthusiasm."

Mike O'Donnell — The Bucknellian

Jaime Paldin '98 (front) scored a goal and recorded an assist in the Bison's 4-1 win over Columbia

Women's tennis learns from early losses

By Beth Coale

Bucknellian Staff Writer

This past weekend, the women's tennis team played in the West Virginia University Tennis Invitational. Despite a series of disappointing losses in the second rounds, Bucknell played hard against incredibly skilled women from extremely strong tennis programs.

Bucknell competed against the women's teams from Duquesne, Fairfield, Hofstra, Illinois State, Kenyon, Marist, Maryland-Baltimore County, Pittsburgh and Villanova.

Senior Rebecca Korb's match against Tracy Wolfe (West Virginia University) was one of the first completed resulting in a discouraging 6-0, 6-1 loss in the first round of the D-flight of singles. Susan Vincent '97 moved on to the second round by way of a first round bye. She too met with defeat in a 6-4, 6-2 loss to Molly Harris of Marist.

In the C-flight, Holly Shue '98 received a first round bye only to encounter a disappointing three set loss to UMBC's Danielle Martinez, 6-4, 4-6, 6-0.

In the B-flight both Blakely Lauria '00 and Laura Grossman '99 advanced to the second round via byes. Grossman met defeat with a 6-0, 6-0 loss to Dana Adams from West Virginia University. Lauria was also beaten in the second round 6-1, 6-2 by Karolina Krajewska, also from West Virginia University.

In the A-flight, Wendy Eason '98 lost her first round match to Kenyon's Ali Vincent, 6-2, 6-3. Katie Roland '99 advanced to the second round due to a first round bye. Unfortunately, Roland was defeated in the second by Stacey Sparlin from Illinois State, 6-1, 6-2.

In D-flight doubles, Shue and Lauria advanced to the second round through a first round bye. They went on to defeat a team from Duquesne 8-4 to go on to the third round where they were defeated by Kenyon, 8-0.

In A-flight doubles, Korb and Vincent beat UMBC in the first round. Disappointingly, they were defeated in the second round by Marshall, 8-2.

Bucknell's women's tennis team was scheduled to have a match against Shippensburg this past Tuesday, but because of rain, the match has been rescheduled at 4 p.m. Sunday, October 22.

Soccer tops Mountain Hawks at home

Lovecchio prepares 3-1 squad for tough competition in the next two weeks

By Matt Ansley

Bucknellian Staff Writer

Rain forced the rescheduling of a game which was slated to be played on Tuesday at Army, but the Bucknell women's soccer team pulled off an impressive 3-1 home victory over Lehigh on last Saturday to give them a 3-1 record overall and a 1-0 record within the Patriot League.

Although the game was knotted in a scoreless tie at halftime, the Bison offense played an aggressive game, with 17 shooting attempts. Liz Woodrow '98 scored two goals in under two minutes to begin the second half on the right foot.

Lehigh was able to get on the board soon thereafter, but with just under 21 minutes remaining in the game, Amy Riviere '97 scored again for the Bison. The win was particularly important for the Bison considering the quality of the competition.

"This was a better Lehigh team than I have seen in recent years, both in its intensity and work ethic," said coach Toby Lovecchio.

While they boast a three game winning streak, there is tougher competition ahead, with Army, Holy Cross, Penn, Colgate, and Cornell right around the corner.

Early season results against St. Francis and St. Joseph's have little bearing in match-ups with tough Patriot League competition. The Bison can expect to be tested in the weeks to come.

"The competition is picking up," said Lovecchio. "That means we'll have to step it up and start to play better, although we're not playing poorly now."

Through their ball-handling and field position, the Bison managed to dominate the Lehigh game. They have all of the necessary skills and are in good shape as far as conditioning.

"I thought our team played fairly well," said Lovechhio. "Even though it was 0-0 at the half, we controlled the first half through our positioning and scoring opportunities."

Becky Snover '97 returned as goalie for the Bison. After missing two games with a concussion, she stepped in to make five saves for the Bison against Lehigh's eight shots on goal. Having logged 12 saves already this season, she is only 56 saves short of Bucknell's all-time record.

Bucknell faces Patriot League foe Holy Cross at home this Saturday at 11:00 a.m.

VOLLEYBALL

From Page 13

weeks of competition this season due to a sprained ankle. On the first play, she hit a beautiful cross-court spike and from there the Bison jumped out to a 7-2 lead behind the superb hitting of Wharton. Rider was able to close the gap some, making it 7-5. However, the Bison only gave up one more point the rest of the game, while serving four aces.

The second game was similar to the first as the Bison raced to a 9-1 lead. The team used its depth well, as many members contributed to the offensive attack.

In the third game, Bucknell once again took an early 7-2 lead. After exchanging a few points with each other, the Bison were primed to sweep Rider in three games. Rider was able to mount a comeback though, scoring seven straight points to take a 14-13 lead over Bucknell.

The Bison denied them any more points. Cameron Adams '99 put the finishing touches on the win with two of her five kills in the match.

Wharton led the balanced offensive attack with 14 kills. Morris and Teitsworth were standouts on defense, recording 14 and 12 digs respectively.

In the final match of the invitational, Bucknell faced St. Bonaventure. The two teams met in last year's Bucknell Invitational as well. In that match, Bucknell took a two games to none lead, but then folded and St. Bonaventure won the last three games to win the match.

This year Bucknell was looking to even the score. With Turnshek serving an ace to start the first game, the Bison took a 4-0 lead. St. Bonaventure kept it close trailing only 8-5. However, Pomeroy had two huge kills that widened the margin, as the Bison won game one. Wharton and Rendle also played fantastically, hitting and blocking for points.

Wharton opened the second game with a smashing hit that set the tone for the rest of the match. The Bison had three blocks in a row to take a 5-0 lead. With the score 6-3, Michelle Lesh '00 had a spike that started the Bison on a tear. The following play, Adams tapped one into a gap in the Bonnies defense. Teitsworth served yet another ace on the next play, and that was that as Bucknell finished the game with ten unanswered points.

Turnshek, who has shown a knack for getting service aces to open the game, did just that in the third game, serving three aces in a row to spot the Bison to a 3-0 lead. St. Bonaventure scored a few points to tie the game at 4-4. Then Pomeroy took matters into her own hands with a solo block and a kill to propel the Bison to a 9-4 lead. Montaperto helped add to that lead with two of her four kills in the match and Pam Scovill '00 served the final point in the three game sweep of the Bonnies.

Once again, Wharton led the team with 12 kills and 10 blocks. However a major key to the victory was the serving of the acing queens, Teitsworth and Turnshek, who had a combined nine aces for the match and twenty for the tournament.

Teitsworth was rewarded for her outstanding defensive play, with Defensive Player of the Bucknell Invitational honors. She also garnered this week's Patriot Defensive Player of the Week. Wharton who had 56 kills and 26 blocks in the three matches, was named to the All-Tournament team of the Bucknell Invitational.

This weekend, Bucknell will travel to compete in the Boston College Tournament. The Bison will go up against Providence, Cincinnati and Minnesota, all of which are scholarship programs in major conferences.

"Going against some of the better teams in the nation this weekend should be fun for us." Opalski said.

The Bison will then return home to play Drexel next week.

Sports Feature

Gulden legend keeps building

By Ron Glaz

Bucknellian Staff Writer

To some he is a legend.

To others, he's just "Coach."

Spend one minute talking to Art Gulden, head coach of both the men's and women's cross country and track and field teams, and the unparalleled success he has achieved throughout his 27-year tenure no longer remains a mystery.

"I'm not the legend. They're the legends," says an amused Gulden.

After a brief pause, Gulden's disposition changes to a fatherly fashion as he points to one of his own on the track.

"They're the ones doing all the work. They're the ones running and winning the races. They're why our program is where it is today."

However, greatness didn't fall upon Gulden overnight. In fact, running wasn't even Gulden's first true love.

"Growing up in New York City, it was always football in the fall and wrestling in the winter. Once spring came around, you had two choices, baseball or track. My left eye just couldn't keep up with the ball so I chose track."

Blessed with above average speed, Gulden became a talented sprinter, talented enough to run for Rutgers University.

There, Gulden joined the ROTC and pursued a degree in medicine. En route to graduation, Gulden developed a close relationship with his track coach, a man whom Gulden claims influenced his life in more ways than imaginable. When Gulden's father died two days prior to his graduation, Gulden turned to his coach for support.

"He had such a tremendous influence on all of us. He was much more than just a coach. He was a father figure to me. I wanted to have the same influence on the kids that he had on me."

So Gulden stayed an extra year at Rutgers to complete his master's degree. But Gulden had his own agenda.

"I owed the army two years of my service. But before I went, I wanted to see what coaching was all about."

Gulden assisted the men's cross country and track and field team, wetting his feet in the coaching ranks.

"It's like education. You can take as many classes as you want teaching you how to educate people, but until you actually stand in front of a class, you have no idea what you're getting yourself into. After that year, I knew that coaching was what I wanted to do with my life."

After Gulden finished serving as a lieutenant in the US Army for two years, a spot opened up for the main assistant coaching position at Rutgers University. Reunited with his mentor, Gulden served apprentice under his coach for three years, gaining invaluable coaching experience along the way.

In 1970, Gulden heard of the coaching vacancy at Bucknell. At the time, Bucknell was still a mystery to Gulden. After considering several options, Gulden decided to accept the coaching position at Bucknell, becoming the first full-time track coach in school history.

"Originally, I thought Bucknell would be a stepping stone for me. I considered the prospects of moving on to Michigan State. I wanted the Big Ten and its glamour."

Gulden knew that academics would always take top priority at a school were scholarships were a nonentity. Ironically, though, this aspect is what has kept Gulden at Bucknell for 27 years.

"I found out that what I really enjoyed was the day-to-day association that I had with the kids. The kind of kids that came into our program year in and year out were not only tremendous people, but exceptional athletes. It was a perfect fit for me."

As time went by, Gulden created his own legacy, gaining national prowess throughout the running world. Gulden's men's cross country teams won 18 straight conference titles between 1975-92. amassing an overall 256-11 dual-meet record. Success came so naturally to the program that at one point the men's team had won 169 straight meets. But not even success could change Gulden's approach to the sport.

"I really hope that the kids know that I care about them in more ways than just their individual times or the team's overall success. I've always been a demanding coach. But in all my years, I haven't found a better way to bring out the best in them. I thrive on seeing how each kid will react to intense competition."

As Gulden's teams started receiving national attention, Gulden's name continued to spread. In 1989, Gulden was named coach of the US National Team for the World Cross Country Championships to be held that March in Norway.

"It was a phenomenal experience for me. To be given the opportunity to coach athletes of that caliber was truly amazing. The whole atmosphere in Europe towards running was unlike what I've seen in America. Europeans look at track in such a dignified manner, second to only soccer."

Soon after, Gulden was named a member of the U.S. Olympic Development Committee for Distance Running. Gulden was steadily climbing the ranks, positioning himself to become the distance coach for the United States in this summer's past Olympics.

"Six years ago, I was designated to be the distance coach at Atlanta. That is, of course, if I would have stayed with their program. It was a give and take situation. It would have meant devoting four years of my life to assemble the best possible team.

"I would've spent my summers traveling around Europe, competing in endless meets," he continued. "The time commitment was just too overbearing. At the time, being there to watch my six kids grow up was much more important to me than was pursuing the coaching position. It was a tough personal decision that I had to make."

Looking back on his decision, Gulden knows that he made the right choice six years ago.

"Yeah, it's easy to watch and say, 'Hey, I could have been there.' But, I am a family man. And in the end that's what it came down to. My family was, and still is, the most important part of my life."

Still, Gulden couldn't help but tinker with thoughts of the gold as he sat with his wife, Linda, watching the track and field events at this summer's Olympic games.

"It would have been nice to get a chance to work with the athletes on a personal level. The challenge, in itself, of coaching such high caliber athletes would have been exhilarating. It's like making the switch from the college ranks to the NBA. It's a completely different situation, a whole new level of competition. It's a dream that, maybe, someday I'd like to pursue."

But until then, Gulden will have to settle for being the epitome of a program that he raised from scratch.

"I'm here because I want to be, not because I have to. I enjoy taking these kids fresh out of high school, watching them give themselves to the program, and seeing them develop, both personally and from a running standpoint, over four years. It makes my job extremely rewarding."

And as far as pursuing his own dream, Gulden knows that his time will come.

"In eight years I'll be 62, and my youngest son will have since graduated from college. Who knows? By then, the time might be right. The Olympics might be a realistic goal. But until then, I'm perfectly content here, watching the program progress in the way it has."

Michael Morris —The Bucknellian

Legendary cross-country and track coach Art Gulden

Golfers outlast field, finish 2nd

By Eric Keber

Bucknellian Staff Writer

The Bucknell men's golf team started their fall season with impressive showings at their first two invitational tournaments. On Sept. 7-8, the Bison finished third out of 19 teams in the Colgate/Cornell Invitational and this past weekend they placed second in the 18-team field at the St. Bonaventure Tournament.

"I'm very pleased with the way the boys are playing," said head coach Tommy Thompson '60. "Hopefully we can improve on that this weekend."

After the first day of competition at Cornell, Bucknell was in fourth place with a total of 314 for the first 18 holes, just 11 shots behind the leader, Lehigh. Co-captain Josh Hartman '98 shot a team low 74 while Tony Calandra '99 shot 76. The Bison's other two scores were 81 and 83 shot by Todd Schneider '99 and Eric Shortz '98 respectively.

Calandra went on to shoot a one under par 71 on Sunday at Colgate which gave him a two day total of 147 and allowed him to finish third individually for the weekend.

"He (Calandra) is a guy who can go out and post solid golf scores," remarked Thompson. The Bison needed solid scores to move into third place by the end of the second day.

On Sunday, Hartman shot 78 to bring his two day total to 152, placing him fifth on the list of individual scorers. Shortz and Schneider both finished with totals of 160 which tied them for 26th place in the individuals.

"Eric had a good freshman year but an off sophomore year," notes Thompson, "but he returned with a good solid tournament."

"Schneider has also played very well. We had four scores in the 70s which is what we shoot for," added Thompson in his analysis of the second day.

Bucknell's total was an impressive 619 which placed them in third place with Lehigh shooting 607 and Skidmore at 614.

The Bison were even more impressive this past weekend at the St. Bonaventure Tournament finishing in second place with a 633. St. Bonaventure took first with 605, after shooting 298 on Monday. Shortz finished with a team low 154 which put him at fifth in the individuals. Calandra shot 157 (82-75) and Schneider shot 159 (81-78). Co-captain Mark McGinly '97 shot 165 (83-82) and Hartman shot 164 (84-80).

Thompson, who is in his 16th season as Bucknell's golf coach and a Bucknell alumnus himself, was pleased with the two showings.

Bryan Sun '99 missed the first tournament but will see action in later matches as will Mark Rylak '99, Tommy Martin '97 who spent his junior year in Japan, Joel Shaffer '98, Tim Taubuer '98, and Dan Grossman '99.

There are four new first-year faces on the team this year. Brad Borman, Jon Mull, Bryan Forcino, and Mike Liptak complete Thompson's already well rounded team.

Thompson is preparing the team for this weekend's home tournament, the Bucknell Invitational, which will take place on Friday at 1:00 p.m. and Saturday at 8:00 am. They are also getting ready for the Patriot League Championship at Lehigh, which was moved from April, when it was held last year, to October, because of the rainy weather in the spring.

Bryan Sun '99 and the golf team took second place at St. Bonaventure

Luke and John's Football Preview — Bucknell vs. William & Mary

Bison to face 23rd-ranked Tribe

By Luke David
and John Siris

Expect to see some fireworks this Saturday as the Bison try to continue their winning ways against 23rd ranked William and Mary. Bucknell scored 44 points in their season-opening rout of Towson State and the visiting Tribe (2-1) have averaged 32 points in their first three games.

Sixteenth year Tribe Head Coach Jimmy Laycock's talent for developing young players has been necessary this year more than ever. Graduation left the William and Mary offense with little firepower at the start of camp. Laycock, however, has found new ammunition in the form of sophomore quarterback Mike Cook and junior running back Alvin Porch.

In a close loss to I-A Central Florida, and consecutive victories over Rhode Island and VMI, Cook has performed brilliantly, completing 56 percent of his passes for 737 yards and eight touchdowns. His favorite targets have been physical senior receiver Josh Whipple, who averaged 25.7 yards per catch last season, and junior wideout Billy Commons, another deep threat who had 101 yards against Central Florida and eight catches against the Cadets.

Trying to stop the Tribe's aerial attack will be a Bison secondary that held TSU to a mere 165 passing yards, while intercepting three passes.

Porch, the elusive junior tailback who had to win the starting job in camp, has cemented his role by averaging 123.3 yards per game so far this season. He will need all of his speed and power to penetrate the seemingly impermeable Bison defense, which held Towson to 45 yards on 40 carries.

Offensively, Tom Gadd's unit will need a big day from tailback Rich Lemon. The explosive runner could have a field day against a suspect William and Mary defense that allowed over 150 yards rushing against VMI and has given up 311.3 total offensive yards per game.

If the Tribe hopes to contain Lemon, they will need big days from speedy bookend linebackers, Stefon Moody and Jude Waddy. Although these two can provide outside help, William and Mary may be soft in the middle.

In the air, quarterback Jim Fox may not find as many open targets as he did last week. Last season, William and Mary allowed only seven TD passes and less than 150 yards passing a game. Fox will have to try and throw away from Darren Sharper, a two-time All-American free safety with size and speed.

William and Mary is a very solid I-AA team that is worthy of their top 25 ranking. With three games under their belt, this talented unit has more experience and is coming closer to mid-season form. The Bison, on the other hand, looked a little rusty in their opener and were unable to sustain a long drive, relying on the big play to put points on the board. They will need consistency on both sides of the ball in order to stay on the field with William and Mary.

This week's picks:

***John** William & Mary: 27*
Bucknell: 23
***Luke** William & Mary: 24*
Bucknell: 17

Field Hockey tops Columbia, improves to 3-2

By Haley Futterknecht

Bucknellian Staff Writer

The field hockey team demonstrated their determination, skill and spirit as they came up big this past weekend with back to back wins. Senior co-captain Dani Johnston scored two goals for Bucknell as they glided past Columbia for their second straight win on Saturday.

The Bison held a 4-1 lead at halftime, with juniors Tina Jones, Susan LeFevre and Jaime Paldin scoring one goal each. Paldin also contributed two assists. Said junior defender Sarah Catlin, "The forward line has been extremely impressive this year. They really have set a new standard for Bucknell field hockey offense."

Goaltending duties for the game were split between Maureen Breslin '99, who played the first half, and Kanda Kratzer '00, who took over for the second. Both goalkeepers made two saves each.

Junior Kristin Soto was on fire Sunday, helping Bucknell to beat Hofstra 3-2, for the Bison's third straight win. Paldin and Soto each scored in the first half, giving Bucknell a 2-0 lead at halftime.

Hofstra closed the gap in the second half, putting two goals in the net to tie the score. However, Johnston answered with a goal aided by an assist from Soto. The Bison were then able to hold the Flying Dutchwomen scoreless and came up with the win.

Breslin tended the goal for Bucknell and finished with five saves. The Bison outshot Hofstra 32-9.

Bucknell will open up Patriot League play on Saturday at Holy Cross.

Tina Jones '98 said, "With every practice I can actually see the team improving, and our games thus far have demonstrated this. We are all really excited and feel that we're prepared for opening up our Patriot League play this Saturday at Holy Cross."

The team currently enjoys the undivided attention of head coach Heather Lewis, who is flanked by assistant Gina Lucido and new assistant Barb Jordon.

Senior co-captain Megan Bossuyt said, "We're a small, close-knit team that works well on and off the field. Our play has really elevated to a new level this year. From the coaching staff down to the team there is such a positive atmosphere. I'm having so much fun."

The team has definite future goals that they are determined to attain. Lewis said, "I think winning a league championship is a realistic expectation. It will take a commitment from our players, but there is more talent here than we've ever had before. It's also a great team to coach in terms of their ability and their enthusiasm."

Women's tennis learns from early losses

By Beth Coale

Bucknellian Staff Writer

This past weekend, the women's tennis team played in the West Virginia University Tennis Invitational. Despite a series of disappointing losses in the second rounds, Bucknell played hard against incredibly skilled women from extremely strong tennis programs.

Bucknell competed against the women's teams from Duquesne, Fairfield, Hofstra, Illinois State, Kenyon, Marist, Maryland-Baltimore County, Pittsburgh and Villanova.

Senior Rebecca Korb's match against Tracy Wolfe (West Virginia University) was one of the first completed resulting in a discouraging 6-0, 6-1 loss in the first round of the D-flight of singles. Susan Vincent '97 moved on to the second round by way of a first round bye. She too met with defeat in a 6-4, 6-2 loss to Molly Harris of Marist.

In the C-flight, Holly Shue '98 received a first round bye only to encounter a disappointing three set loss to UMBC's Danielle Martinez, 6-4, 4-6, 6-0.

In the B-flight both Blakely Lauria '00 and Laura Grossman '99 advanced to the second round via byes. Grossman met defeat with a 6-0, 6-0 loss to Dana Adams from West Virginia University. Lauria was also beaten in the second round 6-1, 6-2 by Karolina Krajewska, also from West Virginia University.

In the A-flight, Wendy Eason '98 lost her first round match to Kenyon's Ali Vincent, 6-2, 6-3. Katie Roland '99 advanced to the second round due to a first round bye. Unfortunately, Roland was defeated in the second by Stacey Sparlin from Illinois State, 6-1, 6-2.

In D-flight doubles, Shue and Lauria advanced to the second round through a first round bye. They went on to defeat a team from Duquesne 8-4 to go on to the third round where they were defeated by Kenyon, 8-0.

In A-flight doubles, Korb and Vincent beat UMBC in the first round. Disappointingly, they were defeated in the second round by Marshall, 8-2.

Bucknell's women's tennis team was scheduled to have a match against Shippensburg this past Tuesday, but because of rain, the match has been rescheduled at 4 p.m. Sunday, October 22.

Soccer tops Mountain Hawks at home

Lovecchio prepares 3-1 squad for tough competition in the next two weeks

By Matt Ansley

Bucknellian Staff Writer

Rain forced the rescheduling of a game which was slated to be played on Tuesday at Army, but the Bucknell women's soccer team pulled off an impressive 3-1 home victory over Lehigh on last Saturday to give them a 3-1 record overall and a 1-0 record within the Patriot League.

Although the game was knotted in a scoreless tie at halftime, the Bison offense played an aggressive game, with 17 shooting attempts. Liz Woodrow '98 scored two goals in under two minutes to begin the second half on the right foot.

Lehigh was able to get on the board soon thereafter, but with just under 21 minutes remaining in the game, Amy Riviere '97 scored again for the Bison. The win was particularly important for the Bison considering the quality of the competition.

"This was a better Lehigh team than I have seen in recent years, both in its intensity and work ethic," said coach Toby Lovecchio.

While they boast a three game winning streak, there is tougher competition ahead, with Army, Holy Cross, Penn, Colgate, and Cornell right around the corner.

Early season results against St. Francis and St. Joseph's have little bearing in match-ups with tough Patriot League competition. The Bison can expect to be tested in the weeks to come.

"The competition is picking up," said Lovecchio. "That means we'll have to step it up and start to play better, although we're not playing poorly now."

Through their ball-handling and field position, the Bison managed to dominate the Lehigh game. They have all of the necessary skills and are in good shape as far as conditioning.

"I thought our team played fairly well," said Lovechhio. "Even though it was 0-0 at the half, we controlled the first half through our positioning and scoring opportunities."

Becky Snover '97 returned as goalie for the Bison. After missing two games with a concussion, she stepped in to make five saves for the Bison against Lehigh's eight shots on goal. Having logged 12 saves already this season, she is only 56 saves short of Bucknell's all-time record.

Bucknell faces Patriot League foe Holy Cross at home this Saturday at 11:00 a.m.

VOLLEYBALL

From Page 13

weeks of competition this season due to a sprained ankle. On the first play, she hit a beautiful cross-court spike and from there the Bison jumped out to a 7-2 lead behind the superb hitting of Wharton. Rider was able to close the gap some, making it 7-5. However, the Bison only gave up one more point the rest of the game, while serving four aces.

The second game was similar to the first as the Bison raced to a 9-1 lead. The team used its depth well, as many members contributed to the offensive attack.

In the third game, Bucknell once again took an early 7-2 lead. After exchanging a few points with each other, the Bison were primed to sweep Rider in three games. Rider was able to mount a comeback though, scoring seven straight points to take a 14-13 lead over Bucknell.

The Bison denied them any more points. Cameron Adams '99 put the finishing touches on the win with two of her five kills in the match.

Wharton led the balanced offensive attack with 14 kills. Morris and Teitsworth were standouts on defense, recording 14 and 12 digs respectively.

In the final match of the invitational, Bucknell faced St. Bonaventure. The two teams met in last year's Bucknell Invitational as well. In that match, Bucknell took a two games to none lead, but then folded and St. Bonaventure won the last three games to win the match.

This year Bucknell was looking to even the score. With Turnshek serving an ace to start the first game, the Bison took a 4-0 lead. St. Bonaventure kept it close trailing only 8-5. However, Pomeroy had two huge kills that widened the margin, as the Bison won game one. Wharton and Rendle also played fantastically, hitting and blocking for points.

Wharton opened the second game with a smashing hit that set the tone for the rest of the match. The Bison had three blocks in a row to take a 5-0 lead. With the score 6-3, Michelle Lesh '00 had a spike that started the Bison on a tear. The following play, Adams tapped one into a gap in the Bonnies defense. Teitsworth served yet another ace on the next play, and that was that as Bucknell finished the game with ten unanswered points.

Turnshek, who has shown a knack for getting service aces to open the game, did just that in the third game, serving three aces in a row to spot the Bison to a 3-0 lead. St. Bonaventure scored a few points to tie the game at 4-4. Then Pomeroy took matters into her own hands with a solo block and a kill to propel the Bison to a 9-4 lead. Montaperto helped add to that lead with two of her four kills in the match and Pam Scovill '00 served the final point in the three game sweep of the Bonnies.

Once again, Wharton led the team with 12 kills and 10 blocks. However a major key to the victory was the serving of the acing queens, Teitsworth and Turnshek, who had a combined nine aces for the match and twenty for the tournament.

Teitsworth was rewarded for her outstanding defensive play, with Defensive Player of the Bucknell Invitational honors. She also garnered this week's Patriot Defensive Player of the Week. Wharton who had 56 kills and 26 blocks in the three matches, was named to the All-Tournament team of the Bucknell Invitational.

This weekend, Bucknell will travel to compete in the Boston College Tournament. The Bison will go up against Providence, Cincinnati and Minnesota, all of which are scholarship programs in major conferences.

"Going against some of the better teams in the nation this weekend should be fun for us." Opalski said.

The Bison will then return home to play Drexel next week.

Sports Feature

Gulden legend keeps building

By Ron Glaz

Bucknellian Staff Writer

To some he is a legend.

To others, he's just "Coach."

Spend one minute talking to Art Gulden, head coach of both the men's and women's cross country and track and field teams, and the unparalleled success he has achieved throughout his 27-year tenure no longer remains a mystery.

"I'm not the legend. They're the legends," says an amused Gulden.

After a brief pause, Gulden's disposition changes to a fatherly fashion as he points to one of his own on the track.

"They're the ones doing all the work. They're the ones running and winning the races. They're why our program is where it is today."

However, greatness didn't fall upon Gulden overnight. In fact, running wasn't even Gulden's first true love.

"Growing up in New York City, it was always football in the fall and wrestling in the winter. Once spring came around, you had two choices, baseball or track. My left eye just couldn't keep up with the ball so I chose track."

Blessed with above average speed, Gulden became a talented sprinter, talented enough to run for Rutgers University.

There, Gulden joined the ROTC and pursued a degree in medicine. En route to graduation, Gulden developed a close relationship with his track coach, a man whom Gulden claims influenced his life in more ways than imaginable. When Gulden's father died two days prior to his graduation, Gulden turned to his coach for support.

"He had such a tremendous influence on all of us. He was much more than just a coach. He was a father figure to me. I wanted to have the same influence on the kids that he had on me."

So Gulden stayed an extra year at Rutgers to complete his master's degree. But Gulden had his own agenda.

"I owed the army two years of my service. But before I went, I wanted to see what coaching was all about."

Gulden assisted the men's cross country and track and field team, wetting his feet in the coaching ranks.

"It's like education. You can take as many classes as you want teaching you how to educate people, but until you actually stand in front of a class, you have no idea what you're getting yourself into. After that year, I knew that coaching was what I wanted to do with my life."

After Gulden finished serving as a lieutenant in the US Army for two years, a spot opened up for the main assistant coaching position at Rutgers University. Reunited with his mentor, Gulden served apprentice under his coach for three years, gaining invaluable coaching experience along the way.

In 1970, Gulden heard of the coaching vacancy at Bucknell. At the time, Bucknell was still a mystery to Gulden. After considering several options, Gulden decided to accept the coaching position at Bucknell, becoming the first full-time track coach in school history.

"Originally, I thought Bucknell would be a stepping stone for me. I considered the prospects of moving on to Michigan State. I wanted the Big Ten and its glamour."

Gulden knew that academics would always take top priority at a school were scholarships were a nonentity. Ironically, though, this aspect is what has kept Gulden at Bucknell for 27 years.

"I found out that what I really enjoyed was the day-to-day association that I had with the kids. The kind of kids that came into our program year in and year out were not only tremendous people, but exceptional athletes. It was a perfect fit for me."

As time went by, Gulden created his own legacy, gaining national prowess throughout the running world. Gulden's men's cross country teams won 18 straight conference titles between 1975-92, amassing an overall 256-11 dual-meet record. Success came so naturally to the program that at one point the men's team had won 169 straight meets. But not even success could change Gulden's approach to the sport.

"I really hope that the kids know that I care about them in more ways than just their individual times or the team's overall success. I've always been a demanding coach. But in all my years, I haven't found a better way to bring out the best in them. I thrive on seeing how each kid will react to intense competition."

As Gulden's teams started receiving national attention, Gulden's name continued to spread. In 1989, Gulden was named coach of the US National Team for the World Cross Country Championships to be held that March in Norway.

"It was a phenomenal experience for me. To be given the opportunity to coach athletes of that caliber was truly amazing. The whole atmosphere in Europe towards running was unlike what I've seen in America. Europeans look at track in such a dignified manner, second to only soccer."

Soon after, Gulden was named a member of the U.S. Olympic Development Committee for Distance Running. Gulden was steadily climbing the ranks, positioning himself to become the distance coach for the United States in this summer's past Olympics.

"Six years ago, I was designated to be the distance coach at Atlanta. That is, of course, if I would have stayed with their program. It was a give and take situation. It would have meant devoting four years of my life to assemble the best possible team.

"I would've spent my summers traveling around Europe, competing in endless meets," he continued. "The time commitment was just too overbearing. At the time, being there to watch my six kids grow up was much more important to me than was pursuing the coaching position. It was a tough personal decision that I had to make."

Looking back on his decision, Gulden knows that he made the right choice six years ago.

"Yeah, it's easy to watch and say, 'Hey, I could have been there.' But, I am a family man. And in the end that's what it came down to. My family was, and still is, the most important part of my life."

Still, Gulden couldn't help but tinker with thoughts of the gold as he sat with his wife, Linda, watching the track and field events at this summer's Olympic games.

"It would have been nice to get a chance to work with the athletes on a personal level. The challenge, in itself, of coaching such high caliber athletes would have been exhilarating. It's like making the switch from the college ranks to the NBA. It's a completely different situation, a whole new level of competition. It's a dream that, maybe, someday I'd like to pursue."

But until then, Gulden will have to settle for being the epitome of a program that he raised from scratch.

"I'm here because I want to be, not because I have to. I enjoy taking these kids fresh out of high school, watching them give themselves to the program, and seeing them develop, both personally and from a running standpoint, over four years. It makes my job extremely rewarding."

And as far as pursuing his own dream, Gulden knows that his time will come.

"In eight years I'll be 62, and my youngest son will have since graduated from college. Who knows? By then, the time might be right. The Olympics might be a realistic goal. But until then, I'm perfectly content here, watching the program progress in the way it has."

Golfers outlast field, finish 2nd

By Eric Keber

Bucknellian Staff Writer

The Bucknell men's golf team started their fall season with impressive showings at their first two invitational tournaments. On Sept. 7-8, the Bison finished third out of 19 teams in the Colgate/Cornell Invitational and this past weekend they placed second in the 18-team field at the St. Bonaventure Tournament.

"I'm very pleased with the way the boys are playing," said head coach Tommy Thompson '60. "Hopefully we can improve on that this weekend."

After the first day of competition at Cornell, Bucknell was in fourth place with a total of 314 for the first 18 holes, just 11 shots behind the leader, Lehigh. Co-captain Josh Hartman '98 shot a team low 74 while Tony Calandra '99 shot 76. The Bison's other two scores were 81 and 83 shot by Todd Schneider '99 and Eric Shortz '98 respectively.

Calandra went on to shoot a one under par 71 on Sunday at Colgate which gave him a two day total of 147 and allowed him to finish third individually for the weekend.

"He (Calandra) is a guy who can go out and post solid golf scores," remarked Thompson. The Bison needed solid scores to move into third place by the end of the second day.

On Sunday, Hartman shot 78 to bring his two day total to 152, placing him fifth on the list of individual scorers. Shortz and Schneider both finished with totals of 160 which tied them for 26th place in the individuals.

"Eric had a good freshman year but an off sophomore year," notes Thompson, "but he returned with a good solid tournament."

"Schneider has also played very well. We had four scores in the 70s which is what we shoot for," added Thompson in his analysis of the second day.

Bucknell's total was an impressive 619 which placed them in third place with Lehigh shooting 607 and Skidmore at 614.

The Bison were even more impressive this past weekend at the St. Bonaventure Tournament finishing in second place with a 633. St. Bonaventure took first with 605, after shooting 298 on Monday. Shortz finished with a team low 154 which put him at fifth in the individuals. Calandra shot 157 (82-75) and Schneider shot 159 (81-78). Co-captain Mark McGinly '97 shot 165 (83-82) and Hartman shot 164 (84-80).

Thompson, who is in his 16th season as Bucknell's golf coach and a Bucknell alumnus himself, was pleased with the two showings.

Bryan Sun '99 missed the first tournament but will see action in later matches as will Mark Rylak '99, Tommy Martin '97 who spent his junior year in Japan, Joel Shaffer '98, Tim Taubuer '98, and Dan Grossman '99.

There are four new first-year faces on the team this year. Brad Borman, Jon Mull, Bryan Forcino, and Mike Liptak complete Thompson's already well rounded team.

Thompson is preparing the team for this weekend's home tournament, the Bucknell Invitational, which will take place on Friday at 1:00 p.m. and Saturday at 8:00 am. They are also getting ready for the Patriot League Championship at Lehigh, which was moved from April, when it was held last year, to October, because of the rainy weather in the spring.

Christy Coyle— The Bucknellian

Bryan Sun '99 and the golf team took second place at St. Bonaventure

Luke and John's Football Preview Bucknell vs. William & Mary

Bison to face 23rd-ranked Tribe

By Luke David
and John Siris

Expect to see some fireworks this Saturday as the Bison try to continue their winning ways against 23rd ranked William and Mary. Bucknell scored 44 points in their season-opening rout of Towson State and the visiting Tribe (2-1) have averaged 32 points in their first three games.

Sixteenth year Tribe Head Coach Jimmy Laycock's talent for developing young players has been necessary this year more than ever. Graduation left the William and Mary offense with little firepower at the start of camp. Laycock, however, has found new ammunition in the form of sophomore quarterback Mike Cook and junior running back Alvin Porch.

In a close loss to I-A Central Florida, and consecutive victories over Rhode Island and VMI, Cook has performed brilliantly, completing 56 percent of his passes for 737 yards and eight touchdowns. His favorite targets have been physical senior receiver Josh Whipple, who averaged 25.7 yards per catch last season, and junior wideout Billy Commons, another deep threat who had 101 yards against Central Florida and eight catches against the Cadets.

Trying to stop the Tribe's aerial attack will be a Bison secondary that held TSU to a mere 165 passing yards, while intercepting three passes.

Porch, the elusive junior tailback who had to win the starting job in camp, has cemented his role by averaging 123.3 yards per game so far this season. He will need all of his speed and power to penetrate the seemingly impermeable Bison defense, which held Towson to 45 yards on 40 carries.

Offensively, Tom Gadd's unit will need a big day from tailback Rich Lemon. The explosive runner could have a field day against a suspect William and Mary defense that allowed over 150 yards rushing against VMI and has given up 311.3 total offensive yards per game.

If the Tribe hopes to contain Lemon, they will need big days from speedy bookend linebackers, Stefon Moody and Jude Waddy. Although these two can provide outside help, William and Mary may be soft in the middle.

In the air, quarterback Jim Fox may not find as many open targets as he did last week. Last season, William and Mary allowed only seven TD passes and less than 150 yards passing a game. Fox will have to try and throw away from Darren Sharper, a two-time All-American free safety with size and speed.

William and Mary is a very solid I-AA team that is worthy of their top 25 ranking. With three games under their belt, this talented unit has more experience and is coming closer to mid-season form. The Bison, on the other hand, looked a little rusty in their opener and were unable to sustain a long drive, relying on the big play to put points on the board. They will need consistency on both sides of the ball in order to stay on the field with William and Mary.

This week's picks:

***John** William & Mary: 27*
Bucknell: 23
***Luke** William & Mary: 24*
Bucknell: 17

Summer conditioning pays off for Bison

BY CHRIS ELLIS

Bucknellian Staff Writer

The Bucknell women's cross-country team was expecting a tough test in its opening meet against Manhattan last Saturday. On paper, the Jaspers seemed to present a formidable challenge to the inexperienced Bison, who ran only three seniors. No preseason statistics can indicate summer improvement though, and the Bucknell women took advantage of a lackadaisical effort from Manhattan to record a surprisingly easy 37-19 victory in the season's first meet.

"We expected them to be much better than they were," head coach Art Gulden said. "As individuals and as a team, we did our work over the summer, and it paid off in our first meet."

Manhattan's top runners, perhaps slowed by a light off-season workout schedule, did not present much of a challenge to Bucknell's best. The Jaspers' top finisher, Margaret McPharland, ran the Bucknell course more than a full minute slower than she had last year, and Lisa Edwards, Manhattan's top first-year runner, had her time bettered by three Bison first-years in Saturday's race.

Bucknell took five of the first six places in the meet, which was run in sloppy and wet conditions following Friday's rain. Julie Sweitzer '99 dictated the pace throughout much of the course and was rarely tested near the race's end, cruising to the first-place finish in a time of 19:01, 23 seconds ahead of Manhattan's McPharland.

"The course was just ugly," Gulden said. "The kids said that it was really hard to run. For Julie to run a 19:01 under wraps and on a bad course is very good."

Seniors Julie Shafer and Karen Eastman took third and fourth places in the race, followed by Carly Graytock '00 and Jennifer Hart '00. Denise Cardamone '00 finished tenth.

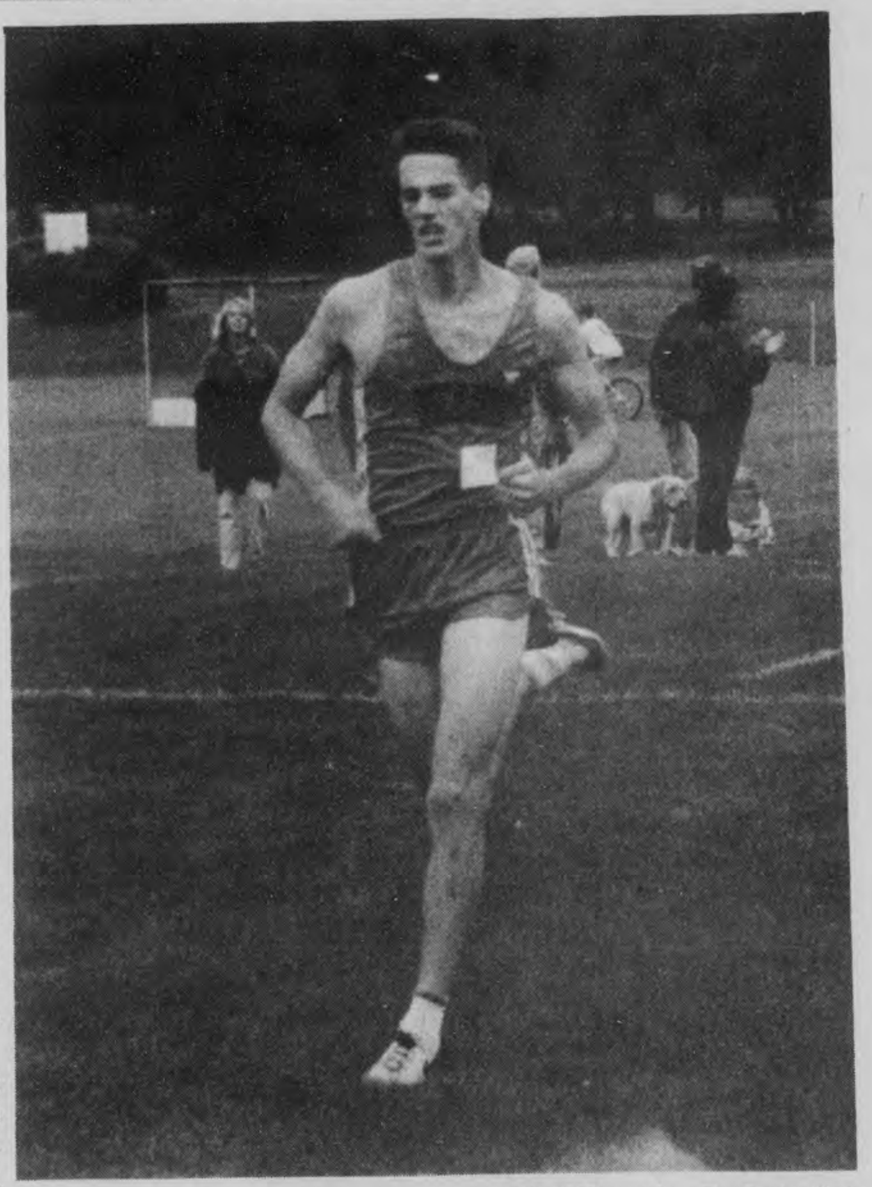
The men's team dominated its way to a pair of season-opening victories, 45-15 over Manhattan and 43-18 over Rutgers. Matt Kodak, a sophomore who was figured to play only a minor role in Bucknell's success this season, recorded a four-second win over teammate Steve Roeser '97. Like Sweitzer, Kodak was in control for virtually all of the race and dictated the pace for the final 1.5 miles.

"[Kodak's win] would surprise a lot of people, but not those who saw what he did over the summer," Gulden said. "I knew when I first saw him that he had the ability, but now he's shown me that he has the commitment to do the work. I'll smile forever about this one."

Bucknell's runners dominated the first 10 places in the three-team meet. In addition to Kodak and Roeser, Wally Dietrich '99 placed third, Bob Chandler '97 fourth, Jason Trollope '99 sixth, and Dave Granger '97 tenth.

Both teams have a week off before their next meets, which are at home against Delaware, Davidson, and Hofstra. Gulden cautions over-optimism following the first exhibition meet, but admits he is encouraged by the performance he witnessed from both teams.

"It's always nice to win, but it's important to learn where you are and where you need to be following that first meet," Gulden said. "We found out where we need to get better, but at as team, this was a very good meet. It's definitely an encouraging start."



Mike O'Donnell — The Bucknellian

Steve Roeser '97 finished second for the Bison, behind surprise medalist Matt Kodak '99. Bucknell's men's and women's teams both won two dual meets last weekend.

Out with the old, in with the new

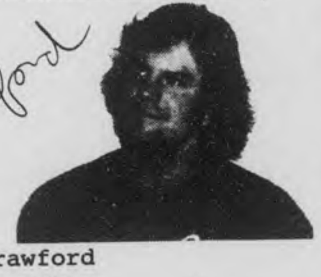
The good old days. In the 1940s and '50s, Bucknell University was a football powerhouse with a huge new stadium and a constant demand for tickets. Well, welcome to the '90s, and the land of no scholarship division I-AA football. The old glory days of Bucknell football are long past, and the stadium has become old, outdated, and far too large and impersonal.

Now, before I go any further, and clearly anger and alienate the entire football team, let me note that Bucknell's football team is annually one of the finest in the Patriot League, and, as evidenced by last year's game against Penn, capable of defeating nearly any team in division I-AA; which is even more of a reason why the present stadium should be ripped down, and replaced with a smaller, more updated, and more intimate stadium.

As the stadium stands now, the crowd (and I use the term crowd in the loosest sense) is near 20 yards off the field, and usually only populates the middle of the stadium on one side. For a casual fan, it is hard to get a sense of the action and play on the field from such a distance. Furthermore, with little national exposure and extremely cold temperatures, students are less and less apt to sit through a whole game, regardless of the score or Bison scoring prowess.

Commentary

E.J. Crawford



E. J. Crawford
Co-Sports Editor

In addition, Bucknell football cannot be expected to draw much attention from the outside community. The Bison lack the kind of media attention that the major division I schools get, and thus people are not likely to march out into a cold Pennsylvania winter to see a team without big national names, regardless of how good those players may be. Also, with Lewisburg being such a small and secluded town, Bucknell has fewer home-town boys, therefore there is not that attention on a local athlete that may attract more local residents. Another detraction of being so secluded and far away from any major metropolitan cities is that people will not be willing to drive two hours to see Bucknell play, as opposed to many schools, either division I or I-AA, where there is a large population in the close proximity of the school, many of whom would be interested in a local college football game. Simply put, we, at Bucknell, have a much smaller population to pull from.

Another possible explanation as to the inability to fill Christy Mathewson Stadium is that Bucknell is first and foremost an academic institution, with a very social atmosphere. Thus, many students use Saturday afternoons to do their work so that they can go out and party at night. With tailgating being for the most part illegal at this university, much of the social aspect of football is eliminated, and people are not as inclined to hang out and party in a dorm room and then attend the game as they would be if they could barbecue, and if of age, drink outside and then enter the game.

So what is the answer? I propose that we rip down the present and outdated stadium, and put up a smaller and more intimate stadium in which there are fewer and more bleacher-type seats behind the sidelines (with both teams on the same side of the stadium, much like our lacrosse and soccer games). There also should be a raised area on the other side with a large "open" area where people can sit within a close proximity of the field. Behind the open area seating there would be more bleachers, with a small set of bleachers behind each end zone. Basically, the only thing that would separate the fans from the field would be the track, and thus the fans would be within 10 yards of the action.

I realize that this proposed set-up is far from any kind of traditional football stadium, but one must remember that all things evolve, and this new stadium, or any such more intimate atmosphere, will add to the enjoyment of both the players and the team, and possibly issue in a new "golden age" of Bison football.

Lehigh spoils league opener in overtime

BY E.J. CRAWFORD

Bucknellian Staff Writer

The Bucknell men's soccer team dropped a heartbreaking loss to league rival Lehigh this past week. The Engineers rebounded from a 2-1 overtime deficit, and scored two goals in a span of two minutes to upend the Bison 3-2 in what co-captain Doug Sweet '97 called "the most frustrating loss I've ever been part of."

The loss ended a three-game Bison winning streak, and puts them at 3-2 for the season, 0-1 in the Patriot League. Lehigh improves to 2-2 overall and 1-0 in the conference.

Bucknell's defense owned the first half of the game, as they looked to register their third consecutive shutout. Those hopes, however, were dashed three minutes into the first half, as senior Corey Harbold gave up his first goal of the season.

Defense restored order after that, as neither team was able to score until the Bison tied the game with about 15 minutes left in the game on junior co-captain Wright Ramsey's penalty kick that sent the game into overtime.

The Bison took control early in the overtime, as Scott Gilroy '00 registered his third goal of the season to put the men's squad up 2-1, a seemingly insurmountable lead considering the Bison defense had allowed only two goals all season, one of which came in this game. In addition, Harbold had been a wall since allowing the opening goal of the game.

Then disaster struck, as Lehigh netted two goals in roughly two minutes to dash the Bison hopes of opening the conference season with a victory.

"We really controlled the game in the second half and in the overtime. The defense really played solid, [Lehigh] just scored a miracle goal, and the second was a result of miscommunication. We could've won the game, and to be up 2-1 and lose, it's very draining," Ramsey said.

Despite the loss, both captains remain optimistic, with Ramsey calling the squad "a very tight team," sentiments which Sweet echoed: "this is a very tough team, and I expect that we'll bounce back."

For the game, Harbold made nine saves in the losing saves, but the Bison were outshot 18-15, and Lehigh had seven more opportunities off corner kicks.

Things don't get any easier for the men, as they next face a Holy Cross team that went undefeated in last season's regular season league play before falling to Navy in the playoffs. Despite the loss of their top scorer from last year, Holy Cross returns a very deep squad, led by last year's Coach of the Year in the Patriot League.

"This is a very important game for us, particularly after losing the first conference game," said assistant coach Brendon Nash. "Hopefully we'll be able to get back on track."

Mary Ellen Kelty— The Bucknellian

Steve DeLuca '00 and the Bison lost their Patriot League opener to Lehigh in overtime, 3-2.

Sports Trivia Quiz

1. Name the only two players to end their careers with exactly 3,000 hits.
2. Name the only AL baseball team to never finish last in their division.
3. True or False: Paul Molitor is the first member of the 3,000 hit club to collect his 3,000th hit with a triple.
4. Who played in the first ever nationally televised college football game?
5. How many states have the New York Giants played home games in?

Answers:

1. Cap Anson and Roberto Clemente, 2. The Kansas City Royals, 3. True 4. Texas Christian and Kansas 5. three (New Jersey, New York, and Connecticut)

BUCKNELL UNIVERSITY — LEWISBURG, PENNSYLVANIA 17837

THE BUCKNELLIAN

New look to come to "old world" hotel

BY KARIN DAVIDSON

Bucknellian Staff Writer

Space and a lot of lounging room will be the mark of the renovated Lewisburg Hotel. The aim is to recapture "a little bit of the old world," said Earl Trevers, the builder for the project.

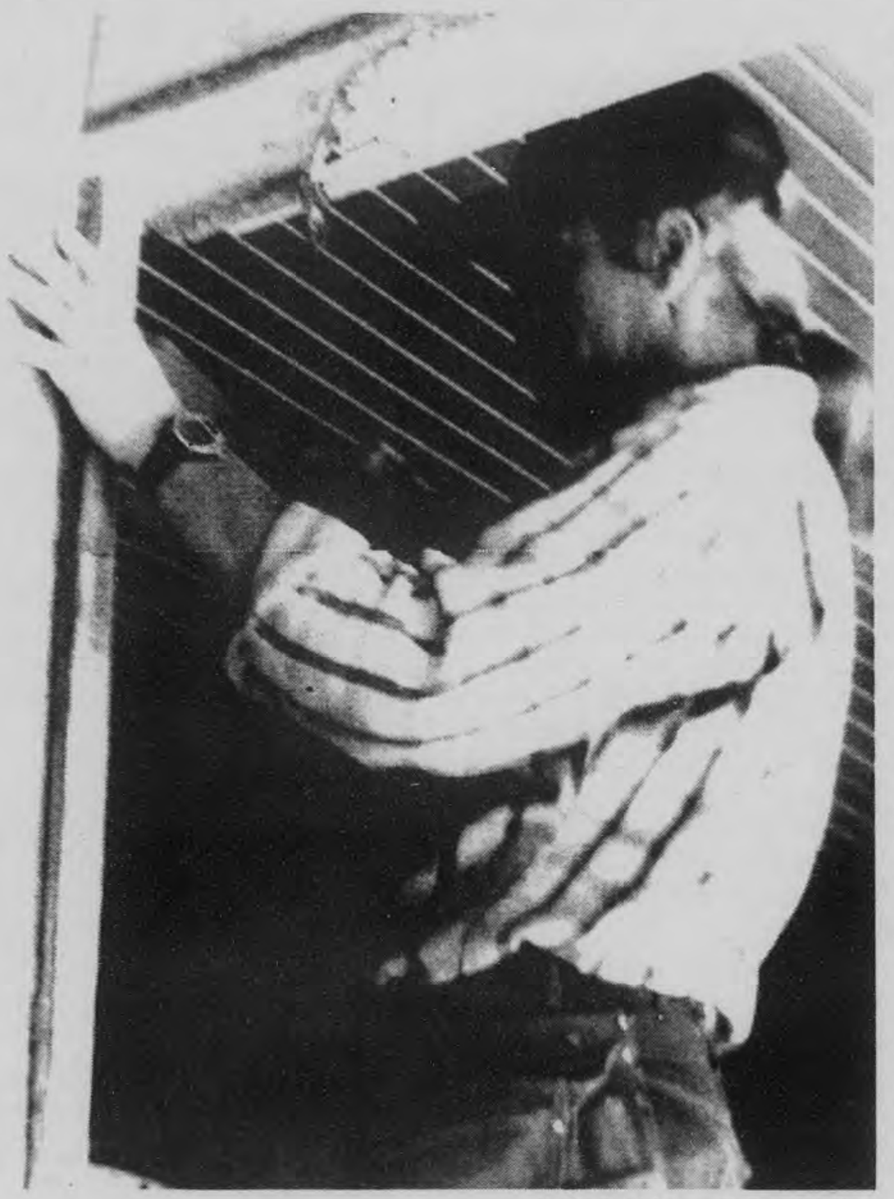
From the outside, construction trucks, building materials and people hard at work on Market Street are evidence of progress towards the goal to reopen the Lewisburg Hotel in reconstructed form.

On the inside, not-yet-built walls section off what will be dining areas, ballrooms and bedroom suites. An elevator has been installed and new stairwells have been built.

Trevers pointed to empty space while he told of overstuffed chairs that will be arranged in the Cameron Lounge and the ornate wood work that will appear in the bar room. The Revere Room will be lighter and airier and serve as a dining room for private parties.

Gesturing to the traditional parking space between the hotel and the addition of rooms behind, Travers spoke of possibilities for a brick-deck courtyard decorated with potted plants and enclosed by a wrought iron fence.

For some, the chance to see these renovations may seem long in coming. Previously, spring 1996 and June 1996 were given as opening dates, but now general manager of the hotel, Dale Walize is reluctant to pin down a date.



Karin Davidson—The Bucknellian

Gary Shoemaker of Watsontown works on the Lewisburg Hotel. No date has been set for opening of the Hotel.

It will open "soon, but I don't know how soon," Walize said. "It depends on how the work goes."

There have been "no surprises. The owner chose to really get into project and revamp the whole hotel," Walize said. "We're taking our time to make sure we get everything the way we want it"

One reason that it is taking so much longer than originally thought is that "we're being permitted to do more than we originally thought we could do," Walize said.

Walize, Travers, Norman Buck, owner of the building, and architect Steven Lindenmuth, are working with the Lewisburg Historical Society and the Labor and Industry Department out of Harrisburg.

Travers said the team motto for the project has been "do it once, do it right. I don't think anyone will be upset when they see it finished."

Walize said they have gotten approval for more changes than originally planned for. For instance, they are now putting in a new roof. The roof was not in good condition and the elevator to be installed would have stuck out eight feet above the original roof.

> *"We're taking our time to make sure we get everything the way we want it."*
>
> *—Dale Walize, general manager of the Lewisburg Hotel*

In addition to the new roof, Walize said the kitchen is being redone and a central air and heating system is being installed.

"Just be patient. It will be well worth it when it opens," Walize advised. "I think it's going to be dynamite."

When it opens, Walize will operate the hotel and restaurant.

The Lewisburg Hotel has been sitting vacant since February of 1993, when the doors were closed after former owner Roger Fetter lost his liquor license because of

Students study in sunny Barbados

BY TARA DRISCOLL

News Feature

Imagine having class in the midst of colorful sun, warm, clear water and inviting beaches and getting credit for it at the same time. The idea is not farfetched for the 17 University students who took advantage of the opportunity.

The three-and-a-half week summer program sends students abroad to Barbados. However, this January will mark the start of the first ever full semester in the Caribbean.

During the summer, students are enrolled in one course with a Caribbean theme. The past summer, the group focused on the economics of the area in which they stayed.

Brook Wharton '99 was not sure what to expect when she signed up, but was pleased with what she gained.

"I learned so much being in a different country, among different cultures," Wharton said. "It was an experience in which I discovered so much outside of the classroom."

The spring semester begins Jan. 19 and ends May 26. Program director Winston Griffith, professor of economics, encourages students to go a week prior to the starting date so that they may familiarize themselves with the area.

Students enroll in the University of the West Indies at the Cave Hill Campus, along with the 2,700 other undergraduates. The campus has four divisions: arts and general studies, social sciences, natural sciences, and law. Students are required to take four courses. The only mandatory class is one that deals strictly with an aspect of Caribbean life, whether it is agriculture, education, literature, or any number of other applicable subjects.

The Caribbean course is taught by the Bucknell professor-in-residence. Of the four classes, only the core course will guarantee the student both transfer credit and Bucknell grades.

While in Barbados, students will live at Sunset Crest in the parish of St. James about four miles from the University. Sunset Crest is a self-contained complex with banks, grocery stores, clothing stores, a pharmacy, restaurants, and a launderette. Each unit has a stove, refrigerator, cooking and eating utensils, and a telephone. This marks a difference when compared with the summer program.

Summer students live in a hotel in mini-apartments and attend class in a lecture room within.

As of the Sept. 15 deadline, six students have signed up for the spring program. However, Griffith said that he will do his best to accommodate any latecomers. "

"This is such a wonderful chance for students to gain knowledge of outside cultures through class work and practical experience. Our objective is to combine the practical education with theory. If we are studying agriculture, we take students to a Caribbean sugar factory, if we are talking about education, the students visit a local school," Griffith said.

Burying the present for the future

BY BETH MARTIN

In late November, the Sesquicentennial Committee will bury a time capsule in the Academic Quad representing the University in 1996, as the culmination to the year long celebration of the University's 150th birthday.

Ruth Burnham, associate dean of students and the ceremonial chair of the Sesquicentennial Committee, is coordinating the project. She said that her committee would like the time capsule to be exhumed in 2046, during the University's Bicentennial celebration.

The committee will soon vote on what to include in the time capsule. There are four criteria that the committee will use to select the items to be placed in the capsule: an item may not be duplicated in the archives, it must preserve well, occupy minimal space and accurately represent the University in 1996.

Burnham said that the time capsule will most likely include "things like the fall and spring course catalogs, the student directory, Gala tickets and information, an aerial photograph of the campus, a message from a representative in each class, articles about Bucknellians, books

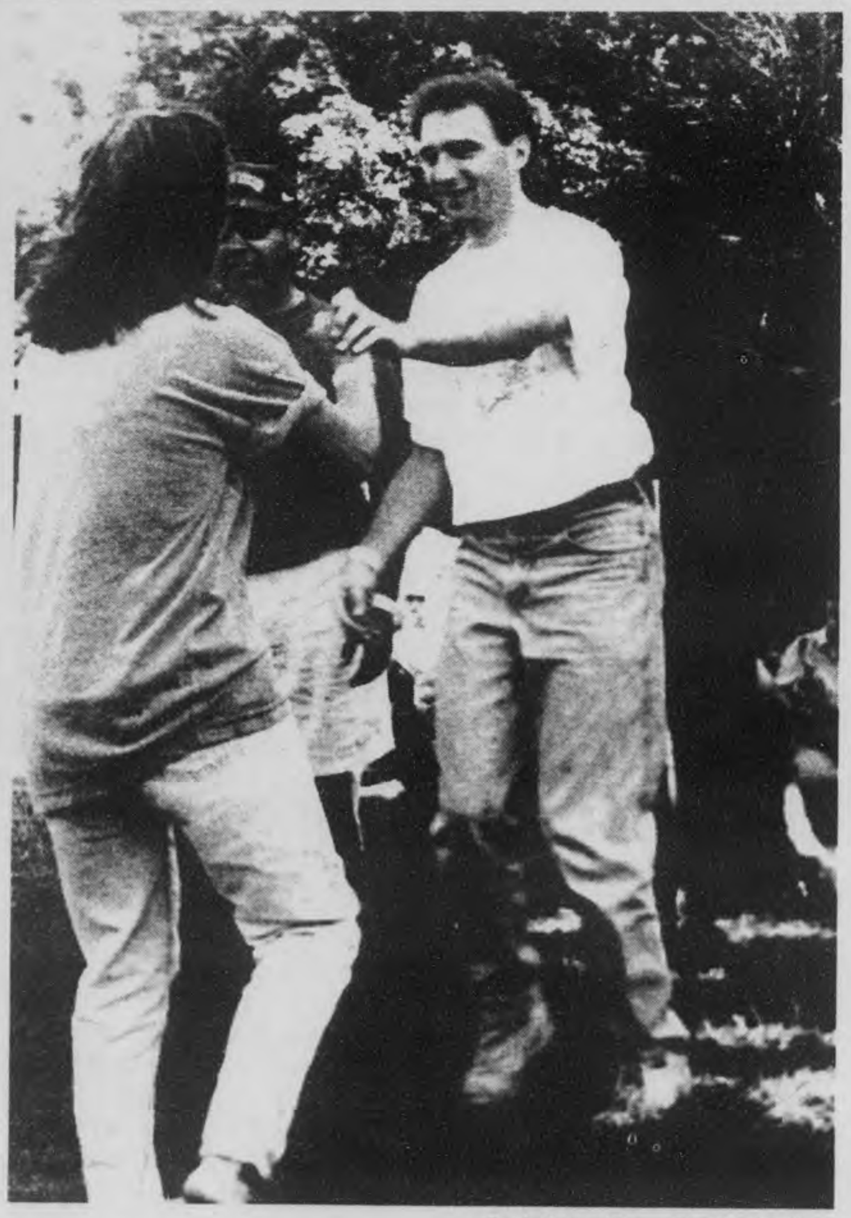
Rachel Doebber—The Bucknellian



Rachel Doebber—The Bucknellian

The merriment of family fun has come to Lewisburg in the form of Contra Dancing, a social dance popular across the Northeast.

Dance, Contra-style

BY RACHEL DOEBBER

Bucknellian Staff Writer

The rhythmic beat, the spinning room, sweaty t-shirts, lively dancing, drinks, and a live band. Sounds like another fraternity party, right?

Wrong!

The newest form of dance, Contra Dancing, has just put Lewisburg on the map.

While students were studying in their rooms or stealing cafeteria trays and going sledding behind Roberts, Laurie Dickson, Deb Slade and Carol Lynch, Bucknell staff members, were planning the first of several Lewisburg Contra Dances. These three Contra dancing aficionados were used to spending their winters dancing away at halls all over the Northeast coast, but the icy conditions of this past winter trapped them inside. Sick with cabin fever, they decided to bring Contra Dancing to them.

You are probably asking, what exactly is Contra Dancing? To answer this, a brief history of contra dancing must covered.

According to Christopher Ricciotti who has written a book on Contra Dancing, it has its origins in pagan religious dances where people celebrated the growth of nature and their crops by dancing in lines which symbolized the column formations their crops grew in. Eventually these line dances developed into the British Longways style of dance (a row of two lines of four couples facing one another) thus becoming more of a social custom than a religious one.

Then other ethnic groups such as the Scottish, Irish and French Canadians added

House passes bill to crack down on immigration

WASHINGTON — Seventy-six Democrats were joined by all but five of the House's 235 Republicans in the 305-123 vote yesterday, passing a bill supporters characterize as the nation's first serious action against illegal immigration in years. The Senate was expected to vote on the bill later this week.

"Every three years enough illegal aliens enter the country permanently to populate a city the size of Boston or Dallas or San Francisco," said Rep. Lamar Smith, R-Texas, who sponsored the bill. "Classrooms bulge, welfare jumps, the crime rate soars."

Some Democratic opponents denounced the bill as too harsh on legal immigrants and too soft on businesses that knowingly hire illegals. They also accused Republicans of trying to score points with voters by whipping up anti-immigrant sentiment weeks before the presidential election and locking Democrats out of negotiations over what to include in the legislation.

"The problem with this bill is that it cons the American people into thinking major new steps are going to be done," said Rep. Howard Berman, D-California.

Navy analyst charged with spying for S. Korea

WASHINGTON — A civilian computer expert working for U.S. Naval intelligence was charged yesterday with passing at least 50 classified documents to his native South Korea.

Robert Chaegon Kim, 56, was arrested Tuesday night at Fort Myer, Virginia, while attending an Armed Forces Day reception sponsored by the South Korean Embassy, officials said.

According to an affidavit released in U.S. District Court, Kim supplied classified documents, many with "secret" or "top secret" designations, to Baek Dong-Il, a naval attaché for the South Korean government.

Kim also is accused of giving South Korea "above top-secret" documents containing political and military intelligence about North Korea and other Asian-Pacific nations.

He faces a 10-year prison sentence if convicted. Prosecutors are considering filing additional espionage charges, which carry life imprisonment penalties.

Study: College costs exceed inflation

WASHINGTON — The soaring cost of attending college has moderated in recent years, but tuition, room and board at both private and public universities keeps going up at rates exceeding inflation — and many students and their families keep feeling the pinch.

According to a study released Wednesday by the College Board, four-year public colleges and universities this year boosted tuition on average by six percent for undergraduates. That compares with double-digit annual increases between 1991 and 1993.

At four-year private schools, students are paying about five percent more in tuition and fees this year, compared with a year ago, the survey said. That's the smallest increase in a decade, but it's still higher than inflation, which is hovering at three percent.

Congress approves two-day maternity coverage

WASHINGTON — Legislation requiring health insurance plans to pay for two-day hospital stays for new mothers passed Congress Tuesday night as part of a broader bill financing veterans, housing, environmental and space programs.

A 388-25 vote by the House sent the measure to President Clinton for his expected signature. The Senate had approved it by voice vote earlier in the evening, without debate. In addition to the provision for new mothers, the bill also would remove some inequalities for mental health coverage. Despite these efforts, however, health plans still could set separate deductibles and co-payments for mental health services, or exclude mental health coverage altogether.

World News

Six confirmed dead in Dutch plane crash

DEN HELDER, Netherlands — Six people were confirmed dead and one person was badly injured after a DC-3 Dakota carrying 26 passengers and six crew members plunged into the sea near the Dutch naval town of Den Helder yesterday, the coastguard said.

"Six bodies have been recovered and one person has been transferred to hospital," coastguard spokesman Gerrit Miedema told Dutch radio. A navy spokesman said the 55-year-old vintage propeller-powered plane was operated by the Dutch Dakota association and had been on a sight-seeing flight over the Netherlands.

A spokesman for the association declined to comment on whether it was their Dakota which had crashed.

Yeltsin surgery delayed at least six weeks

MOSCOW — Russian President Boris Yeltsin will undergo triple or quadruple bypass surgery in six to 10 weeks and will remain hospitalized until then, his heart surgeons announced yesterday.

Dr. Renat Akchurin, head of Yeltsin's surgical team, said if the operation were carried out today, the chance of success would be just 80 percent. But in six weeks or longer, the success rate would increase to nearly 100 percent, he said.

"After reviewing all facts, I am pleased to say that the operation is needed, that it shall provide excellent results," said Dr. Michael DeBakey, 88, an American specialist aiding the team. He said Yeltsin's mental ability to work can go on as before with no real restrictions.

The Communist-led opposition has demanded that Yeltsin step down. Gennady Zyuganov, who ran against Yeltsin in the presidential election, was quoted as saying he would "gladly accept the challenge" of new presidential elections.

Rare Ming dynasty ceramics found in shipwrecks

ENDAU, Malaysia — Divers off the coast of Malaysia have discovered in the wrecks of four ships a precious cargo of ceramics believed to be from China's Ming dynasty period.

Little is known about the ships buried under the South China Sea, but three of them were thought to have been from Thailand and the fourth from China. Located in waters up to 213 feet deep, the wreckage appeared to have rested undisturbed for hundreds of years.

The booty was found after the Malaysian authorities gave Swedish engineer and maritime historian Sten Sjostrand permission to try to find the ships' remains. Volunteer divers first tackled the sunken ship called the Royal Nanhai and have retrieved some 30,000 pieces of ceramics thought to be Celadon, a form of green glazed pottery that predated blue and white porcelain.

First produced in China in the seventh century, Celadon was prized for its jade color and supposed supernatural powers. Initial probes of the other three wrecks, the Nanyang, Xuante and Longquan, indicate they had similar cargo, in addition to Chinese Celadon and blue and white porcelain.

Boxing orangutans attract tourists to Thailand

BANGKOK, Thailand — A wildlife park in Thailand has found a unique way to attract visitors — boxing orangutans.

After undergoing rigorous training in traditional Thai kick boxing for nearly a year, the primates have begun staging preview bouts before adoring audiences at Safari World on the outskirts of Bangkok. The bouts closely follow tradition, with the orangutans even performing the Thai prayer ceremony at ring corners before the start of the bout.

When a Reuters-TV crew visited the show, the day's top billing was between Dan in the red trunks and Mum in the blue trunks. Dan dominated the bout from the start, forcing Mum to take an eight-count in round three. An orangutan doctor who was rushed into the ring to examine Mum declared her unable to continue the fight.

Though the show is open to visitors already, it is still being fine tuned. Trainers say the event will be officially opened only in November.

PUBLIC SAFETY LOG

September 17, 1996

INFORMATION-FIRE - A Public Safety Officer responded to the front of Freas Hall where a light pole was on fire. Officers extinguished the fire and a technician repaired the light.

HARASSMENT BY COMMUNICATION - A University student reported to a Public Safety Officer that they were receiving harassing phone calls. A trap was placed on the line and investigation is continuing.

September 18, 1996

INFORMATION - A Public Safety Officer responded to Faculty Court for a suspicious noise. The area was searched and residents were questioned.

INFORMATION-MEDICAL ASSIST - A Public Safety Officer responded to Larison Cottage for a University student with a leg injury. The student was transported to Evangelical Community Hospital for treatment.

ACT 64 VIOLATION - A Public Safety Officer responded to Gateway Malesardi for a possible drug violation. The investigation was transferred to Lewisburg Police, who confiscated the evidence.

September 19, 1996

MEDICAL TRANSPORT/UNDERAGE CONSUMPTION/FALSE ID - A Public Safety Officer responded to Larison Cottage for an injured, intoxicated University student. The student was transported by ambulance to Evangelical Community Hospital. University citations were issued for underage consumption and possessing a false ID.

INFORMATION - Two unknown males entered the off-campus residence of University students. Public Safety and the Lewisburg Police were notified and a Public Safety alert was issued.

HARASSMENT BY COMMUNICATION - A University student reported to a Public Safety Officer having received harassing phone calls. The investigation is continuing.

MEDICAL ASSIST - A Public Safety Officer responded to the intramural fields in Bucknell West for an injured student. The student was transported to Evangelical Community Hospital for treatment.

September 20, 1996

INFORMATION/VEHICLE DAMAGE - A University student reported to a Public Safety Officer some damage done to a parked vehicle in Bucknell West. The investigation is continuing.

VEHICLE DAMAGE - A University employee reported to a Public Safety Officer damage done to the bumper of a vehicle parked on Vaughan Lit Road. The investigation is continuing.

HARASSMENT BY COMMUNICATION - A University student reported to a Public Safety Officer having received harassing phone calls. A trap was placed on the line and the investigation is continuing.

INFORMATION - A Public Safety Officer was alerted to a verbal confrontation between two University employees.

INFORMATION - ASSIST LOCAL/STATE POLICE - A Public Safety Officer was requested to assist the police in stopping a vehicle occupied by two University students in the Sigma Alpha Mu parking lot. The State police warned the students about reckless vehicle operation and they were released.

September 21, 1996

ALCOHOL VIOLATION/UNDERAGE CONSUMPTION - Four University students were cited for underage consumption at the intersection of Fraternity Road and Vaughan Lit Road.

LARCENY/THEFT - A University student reported to a Public Safety Officer that unknown person(s) took a bicycle from the front porch of Edwards House. The investigation is continuing.

VEHICLE COLLISION - An unattended vehicle rolled into a car parked on Walker Street.

September 22, 1996

TAMPERING WITH FIRE EQUIPMENT - A Public Safety Officer responded to a fire alarm activation in Roberts Hall. A fire extinguisher had been purposely discharged. The investigation is continuing.

INFORMATION/REPORTED MOTORCYCLE DAMAGE - While on patrol, a Public Safety Officer found a motorcycle lying on St. George Street. The owner was notified and later reported to the Public Safety Officer that three unknown females had placed the bike on the ground. The vehicle owner was advised to report the incident to Lewisburg Police.

September 23, 1996

MEDICAL ASSIST - A Public Safety Officer responded to Bertrand Library for an ill visitor. The visitor was transported by ambulance to Evangelical Community Hospital.

INFORMATION/LOST WALLET - A University student reported a lost wallet and keys to Public Safety. The investigation is continuing.

INFORMATION/SUSPICIOUS PERSON - A Public Safety Officer received the report of a suspicious person in the Langone Center. The area was searched but the individual was not found.

TRESPASS/SUSPICIOUS PERSONS IN RESIDENCE - A University student reported to a Public Safety Officer that on September 18 two unknown males entered the off campus residence. When discovered the males fled the house. The student was advised to contact Lewisburg Police.

BARBADOS

From Page 1

Two other study abroad programs are offered through the University. The Bucknell en France program has made some small but significant changes with the way the program is structured. Students are now strongly encouraged to stay in France for a full academic year. More specialized and advanced options are available.

Those opting to do so may take one or more courses at one of three French universities and they have the opportunity to do an internship in a business or public office. They may also enroll in approved institutes in Paris or study in another French-speaking area such as Cameroon, Martinique, or Quebec.

Another possibility is for students who do not meet the minimum requirements for participation in the Bucknell en France program. They may take a semester of intensive French in Tours where they take an equivalent of three or four Bucknell French courses. Upon completion, students are eligible to enroll in the regular program during the following spring semester.

Bucknell in London is in session now, and is offered only in the fall. For the past three years course offered in London have focused on economics and theater, next fall the program will offer courses in the areas of English and anthropology.

Courses taken in both France and London programs transfer as credit and Bucknell grades.

Bucknell News Brief

Steve Renock, '74, has recently been named to the Board of Trustees. Renock who resides in Costa Mesa, California, has been the president/chief executive officer with C.U. Mortgage Corporation since 1991.

Renock graduated from the University with a bachelor of science degree in business administration. He is the secretary of the Bucknell Alumni Association and has served as president of the Bucknell Alumni Club in both Pittsburgh and Dallas.

In 1994, Renock was presented with the Distinguished Service Award from the Bucknell Alumni Board of Directors in honor of his esteemed leadership, dedicated service and lasting influence on Bucknell alumni, in addition to his outstanding volunteer involvement.

During his undergraduate years at Bucknell, Renock was a member of the varsity football team, treasurer of Phi Gamma Delta fraternity, as well as a member of the Bucknell Student Government's athletics committee.

Community Judicial Board Post Results

A University student was charged with, and found guilty on all counts of, Disorderly Conduct, Category I; Disorderly Conduct, Category II; University Alcohol Policy, allowing minors to possess and/or consume alcohol.

The Community Judicial Board Panel found the sophomore male responsible for Disorderly Conduct (Category I) for confronting a resident assistant in a Bucknell West unit, July 28, by vote of 7-0.

The Panel, by a 7-0 vote, found the student responsible for Disorderly Conduct (Category II) for becoming angry with, and disrespectful toward, a Public Safety Officer while being questioned about an incident that occurred July 28 in a Bucknell West unit.

The student was also found responsible, by a vote of 7-0, for providing a tap that was used to tap a keg of beer that provided alcohol to minors.

Found guilty on all counts, the student has been suspended from the University for the 1996-1997 school year. The student must be evaluated by a psychologist or therapist for his inability to control his behavior. The results of the psychological evaluation must be shared with the Dean of Students.

While suspended from the University the student must be involved in productive activities. The Judicial Administrator and the Dean of Students will determine if the student will be eligible to return to the University.

If allowed to return, he will be on probation for the remainder of his enrollment. If he is found responsible for any other violation of the Student Code of Conduct he will be permanently expelled from the University.

HOTEL

From page 1

Karin Davidson—The Bucknellian

Earl Travers is the builder working on the project.

failure to pay outstanding back taxes on the property.

Several years ago, 15 investors formed the Committee to Restore the Lewisburg Hotel, which is no longer active, to bring this historic landmark of the community back to life.

The plan of the committee was to buy the Market Street hotel and then sell it to buyers who would restore it to the meeting place that it was during its prime years.

Norman and Nancy Buck of Watsontown purchased the hotel last fall.

The Lewisburg Hotel was originally opened in the 1840s as the "Lewisburger." For decades it continued as a popular meeting place for the townspeople and the visitors who came through it.

CAPSULE

from page 1

or essays published by professors, and pictures to show current dress and hairstyle trends."

Burnham added that videos about life on campus may be a part of the time capsule, but will not be included if the committee decides that they will be obsolete by 2046. She noted that the committee has "interesting concerns with today's technology versus tomorrow's technology."

Burnham said that the capsule will be buried in the Academic Quad "probably about one-third of the way back from the end of Freas Hall towards the library."

Burnham is organizing a "symbolic 'burial' with a neat and tidy celebration for public consumption," complete with "ceremonial shovels," so that students, alumni, faculty, and staff can partake in the time capsule burial.

Even though Burnham at first "had no guidance with the project, not knowing any time capsule experts," she was fortunate that George Waltham, professor of engineering, and some of his students were willing to construct the two by two by two feet time capsule box.

Each department and office on campus is invited to submit or suggest one item to be considered for placement in the capsule. Burnham said that the committee is also seeking student contributions and ideas. All comments and items should be given to Burnham by Sept. 30.

PRINCIPLES *of* SOUND RETIREMENT INVESTING

EVERYONE WILL GIVE YOU THEIR TWO CENTS WORTH, BUT WILL THAT BE ENOUGH TO RETIRE ON?

Today there seems to be an investment expert or financial advisor almost everywhere you turn. But just how qualified are all these experts?

Peace of mind about your future comes from solid planning. From investments and services designed and managed with your needs and retirement security specifically in mind. The kind of investments and services TIAA-CREF has been providing for more than 75 years.

WE'LL HELP YOU BUILD A REWARDING RETIREMENT.

Our counselors are trained retirement professionals who have only you and your future in mind. So you're treated as the unique person you are, with special needs and concerns about retirement. And that makes for an understanding, comfortable relationship.

With TIAA-CREF, you have plenty of choice and flexibility in building your retirement nest egg – from TIAA's guaranteed traditional annuity to the investment opportunities of CREF's seven variable annuity accounts. And we're nonprofit, so our expense charges are among the lowest in the insurance and mutual fund industries.* That means more of your money is where it should be – working for you.

TIAA-CREF is now the largest private pension system in the world, based on assets under management – managing more than $150 billion in assets for more than one and a half million people throughout the nation.

TIAA-CREF: THE CHOICE THAT MAKES SENSE.

It's tough to wade through all the "advice" to find a reliable pension plan provider. But as a member of the education and research community, your best choice is simple: TIAA-CREF. Because when it comes to helping you prepare for retirement, our annuities will add up to more than spare change.

For more information about how TIAA-CREF can help you prepare for the future, call our Enrollment Hotline at 1 800 842-2888.

TIAA CREF Ensuring the future for those who shape it.℠

KDR hazing suit ends with no contest plea

Kappa Delta Rho fraternity was ordered by the Union County Court in May to pay fines and costs after it plead no contest to the hazing charges brought against it last year.

"The entire issue is behind us, so we look forward to a successful year with 26 highly motivated pledges. The brotherhood is especially enthusiastic about returning to the social scene now that the school has rescinded our probation," said Bill Matthaei '97, president of KDR. "It has become obvious, that despite the accusation of hazing, that the house is more unified than ever."

The state charged KDR with violating Section 5353 of the Act of Health & Safety-Antihazing after the Sept. 22, 1995 incident which brought sanctions from University officials and the fraternity's national office.

House passes bill to crack down on immigration

WASHINGTON — Seventy-six Democrats were joined by all but five of the House's 235 Republicans in the 305-123 vote yesterday, passing a bill supporters characterize as the nation's first serious action against illegal immigration in years. The Senate was expected to vote on the bill later this week.

"Every three years enough illegal aliens enter the country permanently to populate a city the size of Boston or Dallas or San Francisco," said Rep. Lamar Smith, R-Texas, who sponsored the bill. "Classrooms bulge, welfare jumps, the crime rate soars."

Some Democratic opponents denounced the bill as too harsh on legal immigrants and too soft on businesses that knowingly hire illegals. They also accused Republicans of trying to score points with voters by whipping up anti-immigrant sentiment weeks before the presidential election and locking Democrats out of negotiations over what to include in the legislation.

"The problem with this bill is that it cons the American people into thinking major new steps are going to be done," said Rep. Howard Berman, D-California.

Navy analyst charged with spying for S. Korea

WASHINGTON — A civilian computer expert working for U.S. Naval intelligence was charged yesterday with passing at least 50 classified documents to his native South Korea.

Robert Chaegon Kim, 56, was arrested Tuesday night at Fort Myer, Virginia, while attending an Armed Forces Day reception sponsored by the South Korean Embassy, officials said.

According to an affidavit released in U.S. District Court, Kim supplied classified documents, many with "secret" or "top secret" designations, to Baek Dong-Il, a naval attaché for the South Korean government.

Kim also is accused of giving South Korea "above top-secret" documents containing political and military intelligence about North Korea and other Asian-Pacific nations.

He faces a 10-year prison sentence if convicted. Prosecutors are considering filing additional espionage charges, which carry life imprisonment penalties.

Study: College costs exceed inflation

WASHINGTON — The soaring cost of attending college has moderated in recent years, but tuition, room and board at both private and public universities keeps going up at rates exceeding inflation — and many students and their families keep feeling the pinch.

According to a study released Wednesday by the College Board, four-year public colleges and universities this year boosted tuition on average by six percent for undergraduates. That compares with double-digit annual increases between 1991 and 1993.

At four-year private schools, students are paying about five percent more in tuition and fees this year, compared with a year ago, the survey said. That's the smallest increase in a decade, but it's still higher than inflation, which is hovering at three percent.

Congress approves two-day maternity coverage

WASHINGTON — Legislation requiring health insurance plans to pay for two-day hospital stays for new mothers passed Congress Tuesday night as part of a broader bill financing veterans, housing, environmental and space programs.

A 388-25 vote by the House sent the measure to President Clinton for his expected signature. The Senate had approved it by voice vote earlier in the evening, without debate. In addition to the provision for new mothers, the bill also would remove some inequalities for mental health coverage. Despite these efforts, however, health plans still could set separate deductibles and co-payments for mental health services, or exclude mental health coverage altogether.

World News

Six confirmed dead in Dutch plane crash

DEN HELDER, Netherlands — Six people were confirmed dead and one person was badly injured after a DC-3 Dakota carrying 26 passengers and six crew members plunged into the sea near the Dutch naval town of Den Helder yesterday, the coastguard said.

"Six bodies have been recovered and one person has been transferred to hospital," coastguard spokesman Gerrit Miedema told Dutch radio. A navy spokesman said the 55-year-old vintage propeller-powered plane was operated by the Dutch Dakota association and had been on a sight-seeing flight over the Netherlands.

A spokesman for the association declined to comment on whether it was their Dakota which had crashed.

Yeltsin surgery delayed at least six weeks

MOSCOW — Russian President Boris Yeltsin will undergo triple or quadruple bypass surgery in six to 10 weeks and will remain hospitalized until then, his heart surgeons announced yesterday.

Dr. Renat Akchurin, head of Yeltsin's surgical team, said if the operation were carried out today, the chance of success would be just 80 percent. But in six weeks or longer, the success rate would increase to nearly 100 percent, he said.

"After reviewing all facts, I am pleased to say that the operation is needed, that it shall provide excellent results," said Dr. Michael DeBakey, 88, an American specialist aiding the team. He said Yeltsin's mental ability to work can go on as before with no real restrictions.

The Communist-led opposition has demanded that Yeltsin step down. Gennady Zyuganov, who ran against Yeltsin in the presidential election, was quoted as saying he would "gladly accept the challenge" of new presidential elections.

Rare Ming dynasty ceramics found in shipwrecks

ENDAU, Malaysia — Divers off the coast of Malaysia have discovered in the wrecks of four ships a precious cargo of ceramics believed to be from China's Ming dynasty period.

Little is known about the ships buried under the South China Sea, but three of them were thought to have been from Thailand and the fourth from China. Located in waters up to 213 feet deep, the wreckage appeared to have rested undisturbed for hundreds of years.

The booty was found after the Malaysian authorities gave Swedish engineer and maritime historian Sten Sjostrand permission to try to find the ships' remains. Volunteer divers first tackled the sunken ship called the Royal Nanhai and have retrieved some 30,000 pieces of ceramics thought to be Celadon, a form of green glazed pottery that predated blue and white porcelain.

First produced in China in the seventh century, Celadon was prized for its jade color and supposed supernatural powers. Initial probes of the other three wrecks, the Nanyang, Xuante and Longquan, indicate they had similar cargo, in addition to Chinese Celadon and blue and white porcelain.

Boxing orangutans attract tourists to Thailand

BANGKOK, Thailand — A wildlife park in Thailand has found a unique way to attract visitors — boxing orangutans.

After undergoing rigorous training in traditional Thai kick boxing for nearly a year, the primates have begun staging preview bouts before adoring audiences at Safari World on the outskirts of Bangkok. The bouts closely follow tradition, with the orangutans even performing the Thai prayer ceremony at ring corners before the start of the bout.

When a Reuters-TV crew visited the show, the day's top billing was between Dan in the red trunks and Mum in the blue trunks. Dan dominated the bout from the start, forcing Mum to take an eight-count in round three. An orangutan doctor who was rushed into the ring to examine Mum declared her unable to continue the fight.

Though the show is open to visitors already, it is still being fine tuned. Trainers say the event will be officially opened only in November.

National and World News compiled by Anna Foca from the CNN Interactive Web Site

PUBLIC SAFETY LOG

September 17, 1996

INFORMATION-FIRE - A Public Safety Officer responded to the front of Freas Hall where a light pole was on fire. Officers extinguished the fire and a technician repaired the light.

HARASSMENT BY COMMUNICATION - A University student reported to a Public Safety Officer that they were receiving harassing phone calls. A trap was placed on the line and investigation is continuing.

September 18, 1996

INFORMATION - A Public Safety Officer responded to Faculty Court for a suspicious noise. The area was searched and residents were questioned.

INFORMATION-MEDICAL ASSIST - A Public Safety Officer responded to Larison Cottage for a University student with a leg injury. The student was transported to Evangelical Community Hospital for treatment.

ACT 64 VIOLATION - A Public Safety Officer responded to Gateway Malesardi for a possible drug violation. The investigation was transferred to Lewisburg Police, who confiscated the evidence.

September 19, 1996

MEDICAL TRANSPORT/UNDERAGE CONSUMPTION/FALSE ID - A Public Safety Officer responded to Larison Cottage for an injured, intoxicated University student. The student was transported by ambulance to Evangelical Community Hospital. University citations were issued for underage consumption and possessing a false ID.

INFORMATION - Two unknown males entered the off-campus residence of University students. Public Safety and the Lewisburg Police were notified and a Public Safety alert was issued.

HARASSMENT BY COMMUNICATION - A University student reported to a Public Safety Officer having received harassing phone calls. The investigation is continuing.

MEDICAL ASSIST - A Public Safety Officer responded to the intramural fields in Bucknell West for an injured student. The student was transported to Evangelical Community Hospital for treatment.

September 20, 1996

INFORMATION/VEHICLE DAMAGE - A University student reported to a Public Safety Officer some damage done to a parked vehicle in Bucknell West. The investigation is continuing.

VEHICLE DAMAGE - A University employee reported to a Public Safety Officer damage done to the bumper of a vehicle parked on Vaughan Lit Road. The investigation is continuing.

HARASSMENT BY COMMUNICATION - A University student reported to a Public Safety Officer having received harassing phone calls. A trap was placed on the line and the investigation is continuing.

INFORMATION - A Public Safety Officer was alerted to a verbal confrontation between two University employees.

INFORMATION - ASSIST LOCAL/STATE POLICE - A Public Safety Officer was requested to assist the police in stopping a vehicle occupied by two University students in the Sigma Alpha Mu parking lot. The State police warned the students about reckless vehicle operation and they were released.

September 21, 1996

ALCOHOL VIOLATION/UNDERAGE CONSUMPTION - Four University students were cited for underage consumption at the intersection of Fraternity Road and Vaughan Lit Road.

LARCENY/THEFT - A University student reported to a Public Safety Officer that unknown person(s) took a bicycle from the front porch of Edwards House. The investigation is continuing.

VEHICLE COLLISION - An unattended vehicle rolled into a car parked on Walker Street.

September 22, 1996

TAMPERING WITH FIRE EQUIPMENT - A Public Safety Officer responded to a fire alarm activation in Roberts Hall. A fire extinguisher had been purposely discharged. The investigation is continuing.

INFORMATION/REPORTED MOTORCYCLE DAMAGE - While on patrol, a Public Safety Officer found a motorcycle lying on St. George Street. The owner was notified and later reported to the Public Safety Officer that three unknown females had placed the bike on the ground. The vehicle owner was advised to report the incident to Lewisburg Police.

September 23, 1996

MEDICAL ASSIST - A Public Safety Officer responded to Bertrand Library for an ill visitor. The visitor was transported by ambulance to Evangelical Community Hospital.

INFORMATION/LOST WALLET - A University student reported a lost wallet and keys to Public Safety. The investigation is continuing.

INFORMATION/SUSPICIOUS PERSON - A Public Safety Officer received the report of a suspicious person in the Langone Center. The area was searched but the individual was not found.

TRESPASS/SUSPICIOUS PERSONS IN RESIDENCE - A University student reported to a Public Safety Officer that on September 18 two unknown males entered the off campus residence. When discovered the males fled the house. The student was advised to contact Lewisburg Police.

Courtesy of the Department of Public Safety

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of the Bucknellian has no control over which events are included or omitted.

BARBADOS

From Page 1

Two other study abroad programs are offered through the University. The Bucknell en France program has made some small but significant changes with the way the program is structured. Students are now strongly encouraged to stay in France for a full academic year. More specialized and advanced options are available.

Those opting to do so may take one or more courses at one of three French universities and they have the opportunity to do an internship in a business or public office. They may also enroll in approved institutes in Paris or study in another French-speaking area such as Cameroon, Martinique, or Quebec.

Another possibility is for students who do not meet the minimum requirements for participation in the Bucknell en France program. They may take a semester of intensive French in Tours where they take an equivalent of three or four Bucknell French courses. Upon completion, students are eligible to enroll in the regular program during the following spring semester.

Bucknell in London is in session now, and is offered only in the fall. For the past three years course offered in London have focused on economics and theater, next fall the program will offer courses in the areas of English and anthropology.

Courses taken in both France and London programs transfer as credit and Bucknell grades.

Bucknell News Brief

Steve Renock, '74, has recently been named to the Board of Trustees. Renock who resides in Costa Mesa, California, has been the president/chief executive officer with C.U. Mortgage Corporation since 1991.

Renock graduated from the University with a bachelor of science degree in business administration. He is the secretary of the Bucknell Alumni Association and has served as president of the Bucknell Alumni Club in both Pittsburgh and Dallas.

In 1994, Renock was presented with the Distinguished Service Award from the Bucknell Alumni Board of Directors in honor of his esteemed leadership, dedicated service and lasting influence on Bucknell alumni, in addition to his outstanding volunteer involvement.

During his undergraduate years at Bucknell, Renock was a member of the varsity football team, treasurer of Phi Gamma Delta fraternity, as well as a member of the Bucknell Student Government's athletics committee.

Community Judicial Board Post Results

A University student was charged with, and found guilty on all counts of, Disorderly Conduct, Category I; Disorderly Conduct, Category II; University Alcohol Policy, allowing minors to possess and/or consume alcohol.

The Community Judicial Board Panel found the sophomore male responsible for Disorderly Conduct (Category I) for confronting a resident assistant in a Bucknell West unit, July 28, by vote of 7-0.

The Panel, by a 7-0 vote, found the student responsible for Disorderly Conduct (Category II) for becoming angry with, and disrespectful toward, a Public Safety Officer while being questioned about an incident that occurred July 28 in a Bucknell West unit.

The student was also found responsible, by a vote of 7-0, for providing a tap that was used to tap a keg of beer that provided alcohol to minors.

Found guilty on all counts, the student has been suspended from the University for the 1996-1997 school year. The student must be evaluated by a psychologist or therapist for his inability to control his behavior. The results of the psychological evaluation must be shared with the Dean of Students.

While suspended from the University the student must be involved in productive activities. The Judicial Administrator and the Dean of Students will determine if the student will be eligible to return to the University.

If allowed to return, he will be on probation for the remainder of his enrollment. If he is found responsible for any other violation of the Student Code of Conduct he will be permanently expelled from the University.

HOTEL

From page 1

Karin Davidson—The Bucknellian

Earl Travers is the builder working on the project.

failure to pay outstanding back taxes on the property.

Several years ago, 15 investors formed the Committee to Restore the Lewisburg Hotel, which is no longer active, to bring this historic landmark of the community back to life.

The plan of the committee was to buy the Market Street hotel and then sell it to buyers who would restore it to the meeting place that it was during its prime years.

Norman and Nancy Buck of Watsontown purchased the hotel last fall.

The Lewisburg Hotel was originally opened in the 1840s as the "Lewisburger." For decades it continued as a popular meeting place for the townspeople and the visitors who came through it.

CAPSULE

or essays published by professors, and pictures to show current dress and hairstyle trends."

Burnham added that videos about life on campus may be a part of the time capsule, but will not be included if the committee decides that they will be obsolete by 2046. She noted that the committee has "interesting concerns with today's technology versus tomorrow's technology."

Burnham said that the capsule will be buried in the Academic Quad "probably about one-third of the way back from the end of Freas Hall towards the library."

Burnham is organizing a "symbolic 'burial' with a neat and tidy celebration for public consumption," complete with "ceremonial shovels," so that students, alumni, faculty, and staff can partake in the time capsule burial.

Even though Burnham at first "had no guidance with the project, not knowing any time capsule experts," she was fortunate that George Waltham, professor of engineering, and some of his students were willing to construct the two by two by two feet time capsule box.

Each department and office on campus is invited to submit or suggest one item to be considered for placement in the capsule. Burnham said that the committee is also seeking student contributions and ideas. All comments and items should be given to Burnham by Sept. 30.

KDR hazing suit ends with no contest plea

Kappa Delta Rho fraternity was ordered by the Union County Court in May to pay fines and costs after it plead no contest to the hazing charges brought against it last year.

"The entire issue is behind us, so we look forward to a successful year with 26 highly motivated pledges. The brotherhood is especially enthusiastic about returning to the social scene now that the school has rescinded our probation," said Bill Matthaei '97, president of KDR. "It has become obvious, that despite the accusation of hazing, that the house is more unified than ever."

The state charged KDR with violating Section 5353 of the Act of Health & Safety-Antihazing after the Sept. 22, 1995 incident which brought sanctions from University officials and the fraternity's national office.

PRINCIPLES of SOUND RETIREMENT INVESTING

EVERYONE WILL GIVE YOU THEIR TWO CENTS WORTH, BUT WILL THAT BE ENOUGH TO RETIRE ON?

Today there seems to be an investment expert or financial advisor almost everywhere you turn. But just how qualified are all these experts?

Peace of mind about your future comes from solid planning. From investments and services designed and managed with your needs and retirement security specifically in mind. The kind of investments and services TIAA-CREF has been providing for more than 75 years.

WE'LL HELP YOU BUILD A REWARDING RETIREMENT.

Our counselors are trained retirement professionals who have only you and your future in mind. So you're treated as the unique person you are, with special needs and concerns about retirement. And that makes for an understanding, comfortable relationship.

With TIAA-CREF, you have plenty of choice and flexibility in building your retirement nest egg – from TIAA's guaranteed traditional annuity to the investment opportunities of CREF's seven variable annuity accounts. And we're nonprofit, so our expense charges are among the lowest in the insurance and mutual fund industries.* That means more of your money is where it should be – working for you.

TIAA-CREF is now the largest private pension system in the world, based on assets under management – managing more than $150 billion in assets for more than one and a half million people throughout the nation.

TIAA-CREF: THE CHOICE THAT MAKES SENSE.

It's tough to wade through all the "advice" to find a reliable pension plan provider. But as a member of the education and research community, your best choice is simple: TIAA-CREF. Because when it comes to helping you prepare for retirement, our annuities will add up to more than spare change.

For more information about how TIAA-CREF can help you prepare for the future, call our Enrollment Hotline at 1 800 842-2888.

TIAA CREF Ensuring the future for those who shape it.SM

EDITORIAL

Bucknell 1996 addresses letter to Bucknell 2046

As the Sesquicentennial Committee prepares to bury a time capsule that will be recovered during the Bicentennial celebration, all eyes are focused on the future. You are our future.

As you read this letter 50 years down the line, your thoughts will be occupied with the past. We are your past.

Like the old saying goes, you have to know where you're coming from to know where you're going. What better way to learn about the past than from those of us who are actually experiencing it first-hand.

To get to this moment in history, Bucknell's come a long way. Our excellent regional reputation is finally spreading to a national level.

If you flip back through old issues of *U.S. News and World Report* from a half a century ago, you'll find that Bucknell is ranking with the best of them. Our athlete graduation rate is also one of the highest in Division I, even as our teams captured the Patriot League President's Cup.

Our institution focuses on education, not research. The faculty in general is dedicated to helping and teaching students.

But don't be mistaken. While we know how to study hard, we play hard too.

As for a social profile of the 1996 student body, you might be surprised at what you see.

Clunky heels, hip huggers with wide bottoms, a-line skirts, corduroys and birkenstocks have resurfaced from our parent's generation, but nothing beats a pair of jeans and a sweatshirt.

Conformity may be the norm, but individuality also shines.

We're largely Greek.

We tend to be apathetic about most things, except when Jeans Day comes around. That event brings out the best and worst in all of us.

Good Luck John is a permanent fixture right outside Vaughan Literature Building, even braving bad weather to tend his post. If his tradition hasn't been carried forth, Bucknell has sadly lost a legacy.

The 7th Street Cafe is a hot spot on campus, popular for hanging out and studying.

We all have high goals for our personal futures. After all, that's why most of us are here.

As for Bucknell's future, may it be long but a little changed.

We hope that when you read this letter the campus isn't divided by Route 15 anymore. The art barn and the mods ("temporary" housing that's been around for over 30 years now) hopefully no longer exist.

More accessible and more modern buildings on the main part of campus should have replaced these outdated, isolated ones.

Parking tickets are now ridiculously high, sometimes reaching $50 for parking in a "forbidden" spot, even if it's just for ten minutes.

Computer Services tends to lag a little behind the times. The technology is expanding so quickly that it's hard for them to keep up. Pushing one button while doing email sometimes takes five minutes to produce results, although the system is running a lot more smoothly now.

Diversity within the student body is improving slowly, but not fast enough.

What you have in this letter is a piece of the past. It's not a complete picture or even a partial picture. It's more like an outline, a guide to who we are, a taste of what life is like now.

If you mix this outline with a little magic and a lot of color and transport it back 50 years, what you'll find is us—Bucknell in 1996.

OPINIONS

The Bell Curve's conclusions are flawed

Circumstantial evidence and hostile rhetoric overlook true causes of problems facing society

BY THOMAS NGUYEN

Bucknell Staff Writer

Part II of a two-part series

In the process of developing valid arguments to dispute specific conclusions presented in *The Bell Curve*, it became more apparent to me why a certain segment of our population would feel inclined to share Herrnstein and Murray's views on the role of IQ in determining society's future.

In this era of political debate in Washington, when issues of government-spending, welfare reform, and crime dominate the endless dialogue, people are seeking alternative answers to account for the present state of poverty and crime in this country.

The Bell Curve offers such an alternative answer by legitimizing the notion that the problems facing society are not indicative of an inherent flaw in a capitalist and class-based society, but are instead the results of an intrinsic mental deficiency in human beings themselves. According to Herrnstein and Murray, IQ plays a greater role in determining our individual futures than is readily acknowledged. Such things as a person's chances of making it through school, becoming poor, unemployed and welfare-dependent, and even committing crimes, is in some way connected to their IQ.

It was surprising to discover while reading *The Bell Curve* that key sections of the book dealing with these issues (poverty, schooling, crime, etc.) are focused entirely on whites and contains data collected on the white majority only. For instance, in regard to poverty, *The Bell Curve* asserts that low intelligence is a stronger precursor of being poor than socioeconomic background. A white individual has a 24 percent chance of becoming poor if his/her parents' socioeconomic status is low, but has a 30 percent chance of becoming poor if his/her cognitive abilities are dull.

However, it offers no data on intelligence vs. socioeconomic background in determining the likelihood of poverty among blacks, Latinos, Asians, etc. The reader is left to question whether or not this fact still holds true for other ethnic groups. Many social scientists will assert that it does not.

One sees this occurring in the discussion of other issues as well. For white youths, intelligence plays a greater role in determining whether or not they will excel in school then their parents' economic status. *The Bell Curve* emphasizes that "the common stereotype of the talented-but-disadvantaged-youth-denied-educational-opportunity does not seem to exist in significant numbers any longer." (With regard to whom?) And among whites, those with lower IQ scores are more likely to commit crimes than those with high IQs.

By bringing such findings to light, the authors of *The Bell Curve* hope to influence the way in which social scientists and government officials view society's problems by adding a human intelligence dimension to the discussion. But by presenting data that applies only to whites (excluding every other ethnic group of this country), one has to wonder what kind of impact (if any) Herrnstein and Murray feel they've made?

I often stopped to question during the reading of this book whether or not the authors chose to exclude minorities in their analyses on purpose. Could it be that their theories would no longer hold true if they did so?

A critical concept presented in *The Bell Curve* are the supposed ethnic differences in cognitive ability. East Asians, whether in America or Asia, generally score higher on IQ and achievement tests (such as the SATs) in the nonverbal section than white Americans.

The average white American, on the other hand, scores better on such tests than about 84 percent of all African-Americans. The authors also note briefly that this gap has narrowed in the past three decades.

According to Herrnstein and Murray, these differences suggest (although not conclusively) an inherent general factor to account for the cognitive differences among ethnic groups. But there are those who will maintain that there are other factors that may account for these discrepancies.

Could the occurrence of the former be due to the differences in cultural ideology; that mathematics and the sciences, in the Asian community, are generally considered primary to acquiring success and wealth in America whereas verbal studies are treated secondary and therefore not stressed.

Could it be that the discrepancies between the scores of blacks and whites are due to the fact that there still exists today a different standard of education for predominantly black inner-city public schools and predominantly white institutions?

Does the narrowing gap attest to the fact that in the past few decades, black parents have fought to raise the level of education in predominately black schools to that of the national standard? Herrnstein and Murray do not even consider the effects of living in a hostile environment to explain the discrepancy in the black and white test scores.

Another question that came to mind was, if such a general factor were to exist, how would acknowledging its presence benefit society? There are those that will maintain that doing so can only breed racial bigotry and animosity, at the same time, drawing attention away from the real issue, that there exists in our society a disparity in the distribution of wealth, education, and power among the classes. Poverty is not the result of an innate human genetic flaw but is the consequence of a class-based society.

Herrnstein and Murray then focus their attention on practice of affirmative action in higher education and the workplace. They are quick to point out that the standard of admission for blacks and Latinos is lower than that for whites, "Asians are a conspicuously unprotected minority." This edge, says *The Bell Curve*, may be justified if the competition for admission was between disadvantaged minorities and privileged whites, but according to the data they obtained, this is usually not the case. The authors also note that privileged blacks are still given an edge over disadvantaged whites.

According to *The Bell Curve*, blacks and Latinos constitute a small proportion of the student body on college campuses, but make up a high proportion of those students doing poorly and dropping out of school. "In society at large, a college degree does not have the same meaning for a minority graduate and white one, with consequences that reverberate in the workplace and continue throughout life." In this way, says Herrnstein and Murray, the practice of affirmative action is cost to society.

Affirmative action has, in our lifetime, provoked many heated arguments. One side believes that it is a form of "reverse discrimination." The other maintains that its practice is justified to give more minorities access to many of the opportunities normally monopolized by white man. Remember that white women also benefit from affirmative action.

I personally agree with Herrnstein and Murray when they say that affirmative action should be amended to help all economically disadvantaged individuals regardless of race.

What I do not support is their use of circumstantial evidence and hostile rhetoric to justify such a change.

LETTERS

DJ commentary found insensitive and offensive

TO THE EDITOR

This letter is a commentary on the Saturday broadcast by Ed Berlen and Tony Kail on WVBU. First, I'd like to thank you, Ed, for providing me with the correct title "Summer Wind" not "Summer Breeze" by Frank Sinatra. Imagine my delight during my Saturday afternoon study break of happening upon your broadcast playing some "classic" music. Once the music stopped and your monologue began, my delight turned into disdain because of the sexist nature of your show.

It is necessary for me to state that I respect (reluctantly) your right to free speech just as I respect it for Nazis, homophobes and white supremacists who espouse intolerance, hatred and violence. In doing so, I ensure my right to express myself in a public medium to denounce them as I am denouncing you. The difference between you and me is the responsibility and respect for others each of us has while exercising our civil rights.

Your total insensitivity to the implications which arise from the sexual innuendo you so jocularly shared publicly with your listeners contributed to the degradation, dehumanization, and objectification of women. Yes, yes, I know, you've heard all this before. Unfortunately for us, it has not made any real impression on you.

Therefore, if you choose not to positively participate in this discourse, at least have the nerve and personal integrity to admit to your sexist and patriarchal ideology. Don't insult MY intelligence with your lame, half-assed attempts to apologize on the air just to appease your critics.

The real irony and humor lies in your attempt to label the three female students who called to complain, of whom I am one, as "tight." Actually, Ed, it's you who are "tight" and narrow-minded.

One final thought for you, Ed: remember in George Orwell's *1984* how Big Brother was watching, well, it's 1996 and Big Sister is listening and writing.

EDITORIAL POLICY

The editorials of The Bucknellian *reflect the consensus of the Editorial Board as to the topics and general position. If a consensus could not be reached, the opinions expressed are those of the Editor in Chief.*

All other opinion material represents the views of the author and not necessarily those of The Bucknellian.

PUBLISHING POLICY

The Bucknellian *is written, edited, and published each Thursday during the academic year entirely by Bucknell University students.* The Bucknellian's *fiscal affairs are overseen by an Advisory Board comprised of faculty, staff, and administrators. All published material is chosen by the paper's Editorial Board without any prior review by its advisors, the University, or the Bucknell Student Government.*

The editorial content of The Bucknellian *does not necessarily reflect the opinions and attitudes of Bucknell University's administration, faculty, or trustees.*

The Bucknellian *is produced using Aldus PageMaker version 5.0a on Apple Macintosh computers. ITC Stone Sans and ITC Stone Serif are the paper's principal typefaces. Page mechanicals are printed on a Imager Plus 12, NewGen Systems Corporation laser printer at 1200 x 1200 dots per inch.* The Bucknellian *is reproduced at the Milton Standard, Milton, Pennsylvania.*

ADVERTISING POLICY

The Editorial Board of The Bucknellian *reserves the right to deny advertisements if offensive, illegal, or in bad taste. For advertising rates, please contact the advertising manager at (717) 524-1085.*

LETTERS POLICY

The Bucknellian *welcomes readers' comments on important campus, national, and international issues. Letters must be submitted by 5 p. m. Tuesday to appear in Thursday's issue. All letters must be typewritten in 12 point New York font and signed by the author.* ***Letters must contain less than 750 words.*** *We reserve the right to edit letters for length or libel. We attempt to publish all responsible material, but we reserve the right not to publish due to spacing, technical, legal, or other problems.*

Authors wishing to remain anonymous must make arrangements with the advisor to The Bucknellian, *Katherine Wheatcroft.*

Address letters to The Bucknellian, *Box C–3952, Bucknell University, Lewisburg, PA 17837, bring them to our offices in the basement of the central wing of Roberts Hall, or submit them electronically to bucknellian@bucknell.edu. On campus submissions by Macintosh users may also be placed in* The Bucknellian *"drop box," accessible by guest login to the computer "Schubert" in the "Acad" AppleTalk zone.*

SUBSCRIPTIONS POLICY

Subscriptions are available at $45 per year, $30 per semester. To subscribe, send payment and address to The Bucknellian *Subscriptions, Box C–3952, Lewisburg, PA 17837. Subscriptions are mailed first-class on the Friday following publication. Please send change-of-address information to the above location as well.*

QUESTIONS AND COMMENTS

To register questions or comments, please call our offices at (717) 524-1551 or (717) 524-1520, write to us at Box C-3952, or send a facsimile to us at (717) 524-1176. Internet-savvy writers can contact us via email at bucknellian@bucknell.edu.

Saddam Hussein provides stability in the Middle East

BY TODD ZERANSKI

Bucknellian Staff Writer

With the very recent U.S. cruise missile attack against Saddam Hussein in response to his belligerent attack against the Kurds in Northern Iraq, the inevitable question keeps coming up: "Why didn't we (the U.S.) get rid of him the first time around?"

Inevitable, certainly. The same query was heard back in 1993, when Saddam orchestrated an assassination attempt against George Bush.

And it is true that the Iraqi leader is a major pest—he continues to seek weapons of mass destruction, brutalizes his own people and runs such a dictatorial regime as to make Stalin proud.

Yet, there is some logic to leaving Saddam just where he is. While on the surface he appears to be a threat to stability in the Middle East, I contend that he is the principal reason that there exists at least some semblance of stability in the region.

Considering the wondrous variety of actors and interests in the region—a docile Israel, a backwards Syria, the ever-cautious Jordan-the actions of Saddam's Iraq at least constitute a common interest and concern.

With the widespread participation of many nations in the Persian Gulf Conflict, and the lukewarm support of the U.S. missile attack last week, Iraq unifies the security and national interest concerns of the Middle Eastern nations with those of the U.S. The result being, the United States has many allies in a region of great economic importance; Egypt, Saudi Arabia, and Kuwait (to name a few) are our friends in good part because we share a common interest in keeping Iraqi power in check.

Would Jordan, under different circumstances, allow American military exercises on its soil? Even in the wake of the recent military barracks bombings in Saudi Arabia, why is this nation still permitted a military presence?

As *Foreign Affairs* managing editor Fareed Zakaria contends, quite convincingly I think, the main destroyer of an alliance is the disappearance of a common enemy.

Any attempts on the part of Americans to depose of Saddam Hussein not only creates a logistical and military nightmare in new-founded responsibility for a divisive Iraq, but the basic existence of an advantageous U.S.-led Middle Eastern alliance would also be thrown into question.

Just as the Cold War was instigated partially due to the absence of a menacing Nazi threat that created a common goal between the U.S. and the U.S.S.R., so too would a Middle Eastern coalition (which can also be thought of as a league of friendly petroleum suppliers) crumble quickly due to the rise of Islamic fundamentalism and anti-Americanism sentiment in the region.

So while it is troubling indeed to seemingly condone the existence of a ruthless dictator intent on destroying the relative stability of a region that has involved this country since the 1950s, I believe that closer analysis of the situation dilutes the national guilt to some degree.

Just as one of the central tenets of international politics has been that a balance of power within a region ensures peace and stability, any attempt to usurp Saddam immediately jeopardizes both the considerable political presence and economic dependence this country has in the region.

While Saddam is no angel, any substantive meddling in Iraqi domestic affairs bears far greater costs than benefits.

MG 101 genuinely sparks student interest

BY BETH HAGGERTY

Wake up, drag yourself out of bed, and force yourself to walk across campus to your first class. While sitting in class, you silently curse yourself for not stopping for a cup of coffee, because this class is so boring, there is no way you are going to make it without falling face-first asleep onto your desk. No matter the student, every undergraduate at Bucknell can empathize with that scenario.

But wouldn't it be great if there was a solution to this age old problem? What if there were an incentive for getting up and sitting through these boring classes?

But wait, the solution is obvious! And we already have it at Bucknell, albeit in limited supply.

The best way to get students to be active, alert, and interested in their classes is to have interesting classes. And now, there will be an outcry from professors that their classes are interesting, but of course they are interesting only to those that have decided to make a career out of a subject. And any professor can make his class interesting by successfully conveying his enthusiasm for his topic.

But the award for the most interesting and thought provoking class at Bucknell must definitely be awarded to MG 101. Since beginning this class a mere five weeks ago, I feel as thought I have found something (finally) that interests me.

Don't misunderstand me, I have enjoyed classes at Bucknell in previous semesters, but never before to this extent. MG 101 is a class that exposes you to real life and real business. For those who have never had the opportunity to take this management class, MG 101 is a class where students are broken down into companies and develop products with which they compete against one another. The sales of these products finance service projects which benefit local charities and organizations.

This seems simple, but it is a complex class. Meeting three times a week for lecture and twice for collaborative labs, students break into coalitions to support their personal choices for products or charities. Throughout the process of deciding on businesses, students face conflict and uncertainty, both within their company, with other companies, and within their prospective markets. Students are encouraged to think on their own, present and support original ideas, while at the same time working with the group and learning the politics of business. MG 101 also emphasizes efficient administration and working to provide a supportive and happy community. Additionally, the course depicts how ethics and responsibility are important aspects of business that cannot afford to be ignored.

The reason this course is so beneficial to students just beginning to explore management is that it provides hands-on experience that is rare in most classes. Students get the feeling that they actually know what working in business is like after taking MG 101, which is not something every class provides.

Some people will argue that MG 101 is too idealistic and business doesn't actually perform in the neat and easy way it is presented in class. No, it is not the same, but if every businessperson in a position of power were forced to take MG 101 and learn about ethics, efficiency, effectiveness, and community, some of this country's major problems could be easily solved.

In wake of recent murders, gun control should be assessed

BY ELLEN MCWHORTER

Bucknellian Staff Writer

With the recent tragedy of a double murder/suicide freshly on our minds, many Bucknellians may find themselves questioning the effectiveness of United States government gun control laws. And if they haven't found themselves questioning, maybe they should take a few minutes now and reflect on this calamity.

Last Sunday, Ronald Goldner, a former Bucknell student, shot and killed his estranged wife, Robin Meredith-Goldner, and her partner, Dominic Giorgi, also former Bucknell students; in their vehicle. Goldner then fled the scene in that same vehicle, and his body was found Monday morning.

Keeping these seemingly unnecessary deaths in mind, I suggest that it is time to re-acquaint ourselves with the effectiveness of current gun control laws. Here is the bottom line: As long as someone is compliant with the waiting-period rule, and is then approved, he/she will be permitted to purchase and consequently possess a firearm. Assuming that person has had no previous offenses, he/she will most probably be approved.

Unfortunately, an assessment of sanity is not as easily performed as the act of locating someone's criminal record. Thus, without our consent, our safety is in the hands of the licenser, who ultimately cannot legally deny one's civil rights, even if he/she feels that the person requesting the permit is unstable. And the fact is, stability is easily faked anyway.

But why do so many people want to have possession of a gun? The most compelling answer might be safety. And if a person feels safer by placing a gun on their night stand, is it the government's place to prevent him/her from doing so? Isn't that a violation of civil rights?

It is unfortunate that such duality of "right" must exist. It is also unfortunate that the most stable people in the United States are probably the ones least likely to purchase firearms. The image of two innocent people lying dead in their car reminds me that not all seemingly sane people can be trusted, especially with a power that effects everyone so permanently.

"This dilemma is one which is unsolvable. This country will never tolerate the suspension of the right to bear arms which they seem to think has descended from on high. A law like this may seem to be in the nation's best interest, but this fact would be obscured by ultra-conservative, gun-toting members of the population. By the same turn, though, this country has been founded on a violent principle which contaminates our culture and which would serve as fodder for a thriving black market in which only criminals could obtain guns." A highly intelligent and very articulate friend of mine, who wishes to remain anonymous, said this, and its truth speaks for itself.

peak Out

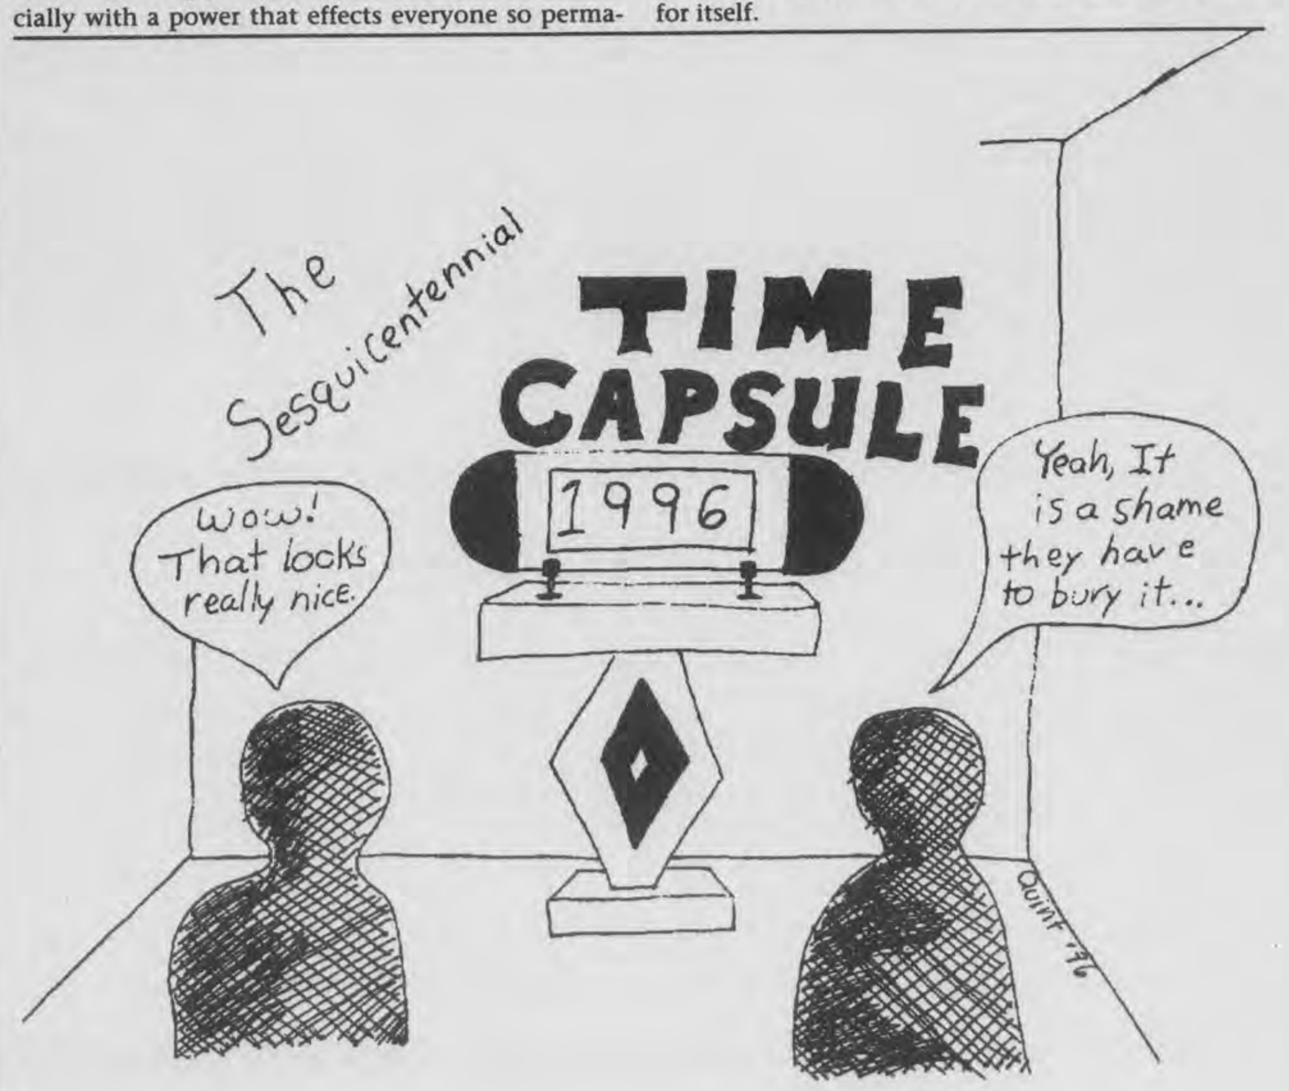
What would you put in the Bucknell Sesquicentennial time capsule that is going to be buried in late November?

Jeff Nuttall '99
"A roster of all the students at Bucknell and their majors so future generations can see what students were doing here in 1996."

Jaimi-Lin Vesel '99
"The yearbook...a computer to see how technology has developed...and the tuition price!"

Kim Weaver '97
"Some of the black stuff that comes out of physical plant because hopefully it'll be gone ."

Ted Burnes '00
"I'd put a styrofoam cup from the Bison because you never know what they're going to look like."



The Sesquicentennial
TIME CAPSULE
1996
wow! That looks really nice.
Yeah, It is a shame they have to bury it...

SCIENCE AND TECHNOLOGY

Computer labs in Dana receive a facelift

By Rebecca Klingler

Bucknellian Staff Writer

In the dimly-lit computer lab, Nicole Sprague '97 had to look down to check her email, but she wasn't standing up. She was using one of the two new electronic classrooms in Dana, where the monitors are placed down in the desks.

"It seems a lot better" than the old labs, Sprague said. She uses the labs frequently to check her email and do homework. "It's just a nicer environment."

The new computer facilities are actually updated versions of former labs.

The lab in Dana 227, which originally contained 20 IBM machines, now holds 23 new IBMs with Windows 95. While only three computers were added, the space was increased by 25 percent through the conversion of office space, said Brian Hoyt, manager of the construction of the two new labs and engineering computing instructional administrator.

This additional space enabled the lab to house a classroom atmosphere, where all the students face the same direction and the monitors are placed down in the desks.. It is also easier to move around in the room.

Formerly located in Dana 233, the updated Macintosh lab now occupies Dana 307, which before was a traditional classroom. Dana 233 was converted into three offices.

The number of machines in the Macintosh lab increased from 18 to 23. A classroom design was also integrated into the Mac lab, with students facing the same direction, built-in projection and the monitors down in the desk.

These changes were a much needed improvement, Hoyt said. The Dana 233 lab was originally designed to be an open-access lab, but teaching demands for computer facilities forced it to become a classroom. With the room in the shape of an "L," the computers had lined and faced the walls, a setup not conducive to learning.

Dissatisfied with the ability to conduct classes within the old labs, faculty requested the new electronic classrooms last year. The Committee on Academic Computing allocated $133,931 for the projects. Requests were also made to the capital budget for other renovations, such as those covered by the Physical Plant.

George Lincoln, systems integrator, estimated that the projects were completed $10,000 under the allocated amount, but the actual figures won't be available until the second week in October.

Another Rooke computer lab was also being considered for renovations, Lincoln said, but CAC decided the Dana changes were more beneficial for students. Since the Rooke computer lab is in the basement, it isn't as visible or used as much, and the old machines could not be recycled as widely as the Dana computers.

Sprague said one of the best improvements in the Dana 307 lab is the addition of Power Macs. These machines are more compatible than those found in the old lab because they can read IBM disks as well as Mac disks. There are also advantages to having the computers placed down in the desks.

Mitch Stewart—The Bucknellian

Ben Dewey '97 takes advantage of the newly installed computer lab in the Dana Engineering building.

"You've got plenty of room to spread out on the tables," she said.

The additional number of computers have also helped to eliminate problems scheduling larger classes, such as introductory engineering courses, to use the labs.

The old computers were moved to different locations on campus.

"We didn't throw away any machines at all," Hoyt said. "We just recycled them down the line."

Many of the IBMs became a part of a physics computer lab, and the Macs were situated in various computer labs, such as Smith, Larison and the 24-hour computer lab in the library.

The new electronic classrooms are "really hot spots," said Eugene Spencer, acting director of Computer and Communication Services. "Everything came together and they're both wonderful facilities."

"Everyone involved did a really nice job, from Physical Plant to the technicians," Lincoln said.

The first walls came down in early June, and the overall project was finished about two weeks before classes started.

Although both labs are located in Dana, they are open to everyone.

"They just happen to be in the engineering building... but they are made to be used by anyone," Spencer said.

Faculty from any department can schedule classes in the electronic classrooms.

"Faculty are very pleased with the outcome," Hoyt said, "and are responding by using the facilities in ways they've never used them before."

The two new labs are 24 hour-facilities, except between 2 a.m. and 7 a.m. Friday and Sunday mornings. According to Lincoln, the two labs are closed at these times because the chance of vandalism increases.

Windows 95 comes to campus

One year after its introduction, Windows 95 has started to show up on University computers. Over the summer, several University departments and two public IBM PC labs, Dana 227 and Taylor 203, have been upgraded. The upgrade from Windows 3.1 to Windows 95 promises to make these computers more user-friendly, more attractive and more functional to the faculty, staff, and students who use them.

How it Works

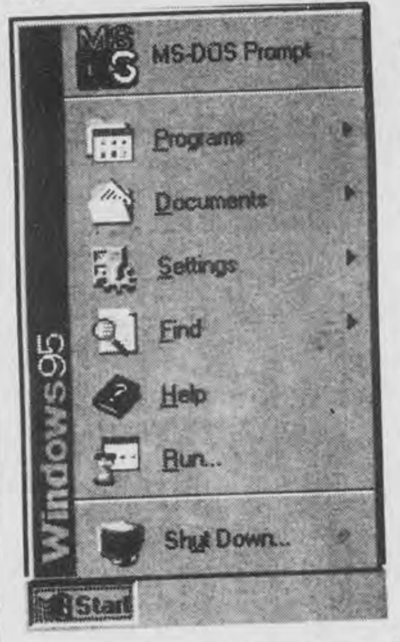
Chip Audette

Bucknellian Columnist

Windows 95 is the operating system which is being installed on most new computers sold in the United States. Windows 95, like every other operating system, is the software which actually runs the computer. It tells the computer what to do, when to do it, what to remember, how to save, how the keyboard works, what the mouse does, and what the screen displays. A computer must have an operating system in order to function. When one runs an application like Word, Excel, or Netscape, it sits on top of the operating system and interacts with it in order to get work done.

Windows 95 has been developed by Microsoft to replace the aging Windows 3.1 software running on most IBM compatible PCs in the world. While it has been a phenomenally successful product for Microsoft, Windows 3.1 is starting to show its age. Released in 1992, Windows 3.1 is having trouble keeping up with the advances of today's personal computers.

The real problem with Windows 3.1 is that it is not really an operating system. The operating system that is actually running a Windows 3.1 computer is called DOS and, in terms of PC time-scale, DOS is an ancient technology. It was developed in the early 1980s for the original IBM PC and, even though it has been updated over the years, it has several fundamental problems which prohibit it from fully taking advantage of modern computers. Windows 3.1 is merely a graphical interface which sits on top of DOS and makes the computer easier and more attractive to use. Since Windows 3.1 uses DOS as its foundation, it is still limited by the old technology accompanying it.



To overcome the limitations of the DOS/Windows combination, Microsoft created Windows 95. Windows 95 was designed to be a whole new operating system which would be compatible with all the old DOS/Windows software, but which would not be limited by the DOS operating system itself. It was also designed to integrate the graphical interface (which used to be the role of Windows 3.1) into the operating system itself. Windows 95, then, is a brand new package of software which runs the computer and provides an easy-to-use interface.

Most of the benefits of Windows 95 come from its ability to take advantage of technology which was not available when DOS and Windows 3.1 were written. Windows 95 utilizes the powerful microprocessors which are the core of every new personal computer. This new operating system is able to do more things at once than Windows 3.1. Whereas Windows 3.1 slows down and tends to crash when multiple applications are running at the same time, Windows 95 has been designed to be more efficient and stable. A more stable computer crashes less and loses less data, allowing more work to be accomplished in a shorter amount of time.

Windows 95 also provides better access to networked resources. This improvement can be directly seen by anyone using a public IBM lab which runs Windows 95. Using the network neighborhood icon, one can easily browse Bucknell's network so that they can access shared applications, drop files into a friend's drop-box, or find shared files for a group project. While this has been available to Macintosh users for several years, Windows 95 finally makes it easy for IBM users to have the same level of access.

In addition, Windows 95 has a greatly refined interface which drops Windows 3.1's dual personality of having a separate Program Manager and File Manager. Instead, Windows 95 gives users a Macintosh-like "desktop" upon which they can move and manipulate their files. Lastly, Windows 95 incorporates the much-publicized START button, used to find and launch applications. This is a more intuitive arrangement which will help people understand and use computers more efficiently.

Biology professor wins Lectureship Award

By Bridget Lewis

"Do not call me Dr. Fletcher, nor Professor Fletcher. Please, call me Dave."

This is the manner in which David J. C. Fletcher, professor of biology and animal behavior, begins his class.

For this talented and inspiring professor, being addressed as Dave is sufficient. There is enough respect given in just that. He believes that informality is the best way for student and teacher to learn together. His classroom is always informal with discussions that instill in students the desire to learn. He invests time and energy into his students and spurs them on

It is for these reasons that he was awarded the Class of 1956 Lectureship Award for Inspirational Teaching. As a result of this award, he will be giving a lecture on interdisciplinary studies entitled "Being and Becoming: A Biologist Tries to Fly".

The award is given to one University professor every year and it is the only award that requires a lecture. Of high prestige to faculty and staff, the award is an outward symbol of the contribution Fletcher has given to the University community.

Although he is a professor of biology and animal behavior, students across the curriculum have a chance to take classes with Fletcher, because he is a strong believer in interdisciplinary studies. He teaches two interdisciplinary capstones: Human Evolution, and Science and Literature. He co-teaches the latter with his wife, Pauline Fletcher, a professor in the English department. The course, as well as a foundation seminar that he taught for a number of years, has its focus steeped in Darwinism.

Fletcher is interested in interdisciplinary teaching as an important way to open doors to people. By crossing boundaries between disciplines, Fletcher believes that deeper discussion is encouraged and learning is fostered.

No one could possibly be an expert on all topics of discussion that take place in interdisciplinary classes. This gives all students the chance to contribute equally.

The classroom provides mutual discovery for both teacher and student as they learn from each other. Fletcher believes that this kind of environment encourages individual vitality by providing "on the edge" discussion. It is the enthusiasm for making new discoveries that Fletcher wishes to pass on to his students.

Fletcher is also a renowned scientist. His research focuses on the evolution of sociality, primarily in insects. He has been published many times for his research on honeybees and fire ants, research which he continues today.

Born in England and raised in South Africa, his initial interest in honeybees was fostered when he returned to England for undergraduate work. This interest was encouraged as he studied and performed his post-doctoral fellowship on honeybees under one of the leading researchers on European honeybees.

Fletcher broke ground and expanded his research to an area where few had ever experimented—the African honeybee. He is now one of the primary researchers of the African bee. During his research on the African bee, he discovered a communicatory dance that had never before been recorded. The dance is now termed as the dorsoventral abdominal vibration or vibratory dance.

In addition to his own research, Fletcher works with students in the biology department on his honeybee sociality project. His primary focus has now turned toward queen bee competition.

Many students find Fletcher an inspiration to further their interests in animal research. He continually insists that students go beyond the realm of his research and knowledge in order to discover for themselves what the world has to offer.

Cooking with Katie

KATIE JONES

GIANT MOCHA CHIP COOKIES

For a contemporary departure from the ordinary, try these cafe inspired giants. Bursting with flavor, their melting splendor will steal you away from classes and into the coffeehouse of your dreams.

The cookies derive their personality from the addition of chocolate pudding and coffee grounds, which replace the traditional amounts of sugars and salts.

Ingredients:

2 sticks butter, softened
1/2 cup packed light brown sugar
1/4 cup sugar
2 eggs
1 teaspoon vanilla
1 package JELLO chocolate pudding mix
2 tablespoons espresso (may be flavored) ground coffee
2 teaspoons baking soda
2 and 1/4 cup flour
1 12 oz. package semi-sweet chocolate chips

Variations:
white chocolate chips
toasted almonds
walnuts

1. Stir together flour, baking soda and pudding mix. Set aside.
2. With a wire whisk or electric beater, cream butter, sugars, eggs and vanilla.
3. Gradually stir in dry ingredients, incorporating them completely.
4. Add chocolate chips.
5. Scoop out about 1/8 to 1/4 cup batter onto cookie sheet: space by 3 inches.
6. Bake 9-10 minutes at 375 degrees or until very soft but solid.
7. Cool for a few minutes on sheet. Then remove with a spatula and place on wax paper and cover with paper towels.
8. Store in airtight container.

Katie Jones '98 is a civil engineering major and hopes to pursue her dream of opening a gourmet restaurant with a degree from the Culinary Institute of America. An overflow of flavor inspired curiosity... Other passions include horseback riding, painting and running.

Tune into the fall line-up

By Ted Burnes

So, have you heard? The guy upstairs has finally hooked up with the blond down the hall. You're friend's fiancee just died. And that pre-med resident finally became a doctor.

No, I'm not talking about any of the dorms on campus; I'm talking about the new fall TV season.

With over fourteen new shows and big events on all your old favorites, the networks are settling in and watching the ratings soar. But will they soar here at the University? Let's take a look:

NBC's Thursday Night Must-See TV was a big hit last year. You had to get to the lounge fifteen minutes early just to see the screen. How about this year?

"I can't wait to see what happens on *Friends* and *Seinfeld*," says Lara Coleman '00. "I hate George's mother [on *Seinfeld*]...she irks me so much!"

Friends promises to be good this season as Monica breaks up with her boyfriend Richard (played by Tom Selleck, who left to film his own sitcom, due out in February). Also, will poor Joey be able to put up with Chandler's new girlfriend?

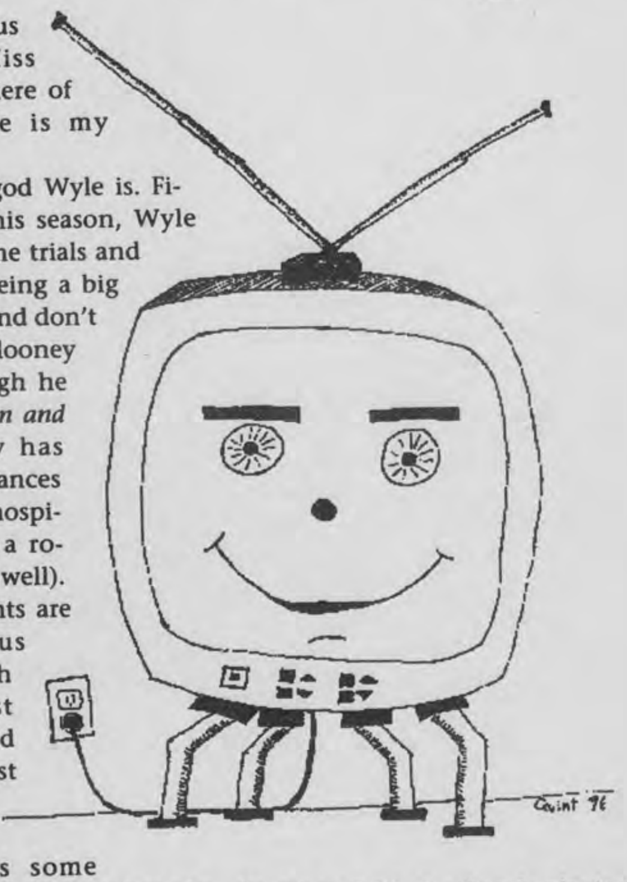
Seinfeld also promises to be good. It is rumored that this will be the wacky foursome's last season together. "The death of George's fiancee will unfold over the season, and expect a lot of dark humor and a great series finale," says Julia Louis-Dreyfuss in *Entertainment Weekly*'s Fall TV Preview.

Since *Caroline in the City* has moved to Tuesdays (this Lea Thompson lover predicts she and Richard will tie the knot before the season's over), taking its place is *Suddenly Susan*, giving Brooke Shields her first real comeback.

Insiders say that there have already been problems with the show. *Entertainment Weekly*'s Dana Kennedy says that "[NBC] wasn't sure if *Susan* was sharp enough for Thursday night Must-See TV, and a whole new pilot was ordered with Shields being the only cast member remaining...new writers, new supporting cast members."

The big wait for the season premiere of *ER* is almost over—it happens tonight. This single hour is one of the hottest topics on campus.

"All I have to say is that anyone who watches with me better only talk during the commercials" says Carla Christy '98.



An anonymous senior says, "Miss the season premiere of *ER*? Noah Wyle is my GOD!"

And what a god Wyle is. Finally a doctor this season, Wyle will experience the trials and tribulations of being a big bad medic. Oh, and don't worry, George Clooney fans—even though he is filming *Batman and Robin*, Clooney has plenty of appearances in TV's hottest hospital (and maybe a romance or two as well).

Monday nights are fast and furious this fall. With three new cast members and some great guest stars on the way, *Melrose Place* promises some cliffhangers. Richard's definitely alive, folks, and he's giving Jane and Sydney a little trouble.

Lisa Rinna joins the cast as Taylor, a mysterious young vixen from the East who has something to do with Peter Burns' unknown past...watch out, Ms. Locklear. And is that Rob Estes, Josie Bissett's (Jane) real life husband, playing Taylor's husband? Sounds like a love triangle to me.

Also introducing new cast members, *Murphy Brown* welcomes Lily Tomlin as Murphy's new boss (replacing Miles Silverberg).

Tuesdays and Wednesdays don't look bad this fall, either. *Roseanne* is still kicking, with Darlene pregnant and Sarah Chalke replacing Lacy Goransen as Becky (again? I'm getting a headache!). Tuesdays look pretty strong for NBC, with *Caroline in the City* joining the likes of *Frasier* and *NewsRadio*.

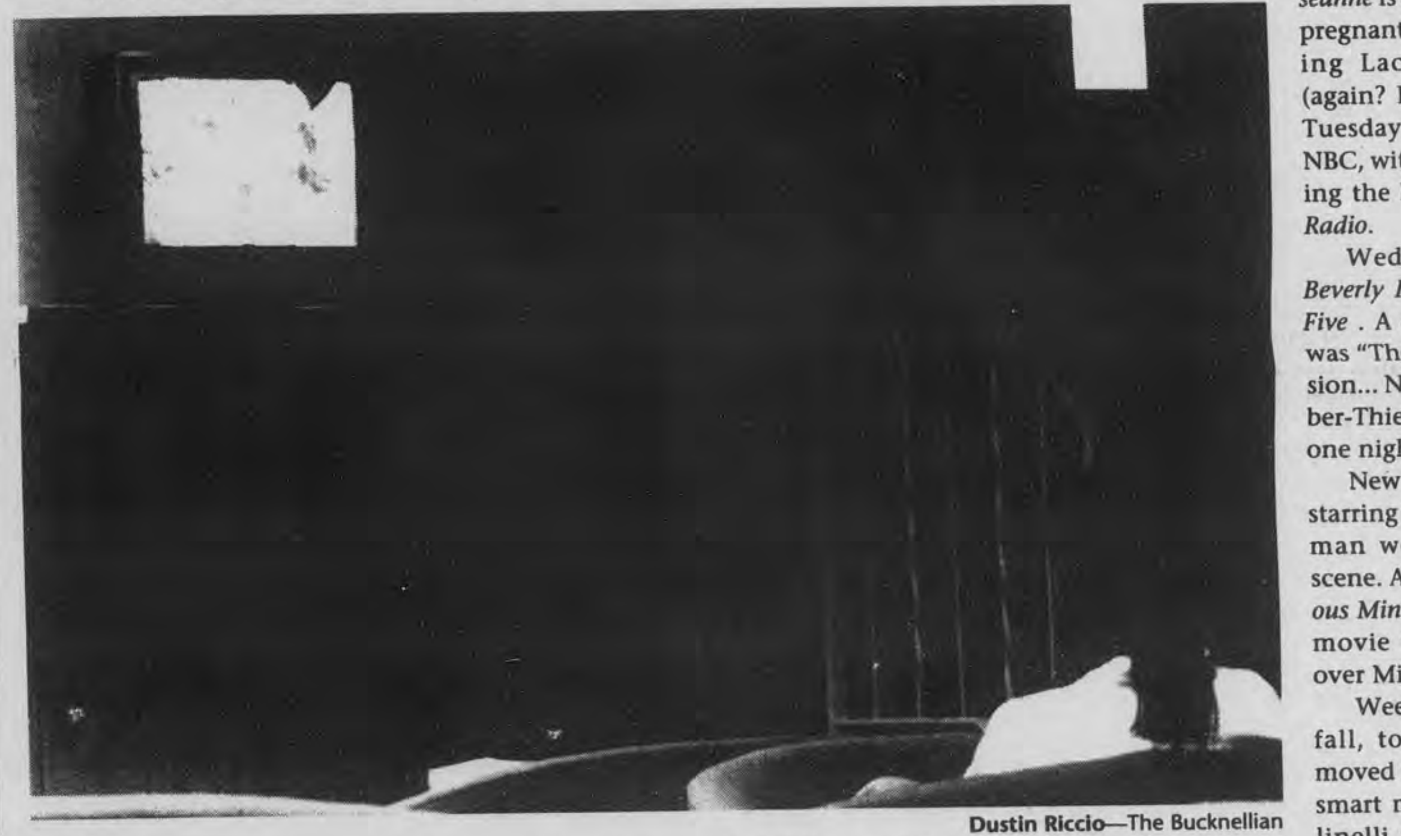
Wednesday is kicking with *Beverly Hills, 90210* and *Party of Five* . A quote heard at the Bison was "The best two hours of television... Neve Campbell, Tiffani Amber-Thiessen and Jennie Garth on one night!"

New shows include *Spin City*, starring Michael J. Fox as a young man working on the political scene. Also, ABC brings us *Dangerous Minds*, a sitcom version of the movie with Annie Potts taking over Michelle Pfeiffer's role.

Weekends look promising this fall, too. *The X-Files* has been moved from Fridays to Sundays, a smart move by Fox TV. Lisa Molinelli '00 just wonders "Who's gonna tape it for me while I'm at my weekly hall meeting—I can't miss a single episode!"

CBS is proud to be showing the new show *Cosby*, a sitcom reuniting the master of comedy Bill Cosby and his *Cosby Show* wife, Phylicia Rashad. This promises to be a good show...if you're willing to stay in on a Friday night!

So, now you have your TV schedule. It's gonna be a good one this fall. Just remember that in between shows, you might want to crack a book and study a little bit—that's why God made commercials.



Dustin Riccio—The Bucknellian

Some students can't tear themselves away from television's fall line-up. Most shows have just premiered within the past week. Traditional favorites include "Melrose Place" and "Friends."

Survey: What do students look for in a television show

We've given you the lowdown on this fall's lineup, now let's see what students look for when they tune into the tube. We asked several students: What's your favorite TV show and why?

"*ER*. I like drama. Out of all the shows on TV, *ER* has the most believable characters."
—*David Carpenter* '00

"*The X-Files*. It's different, and I think there's some truth to it...not all of the episodes, but especially the ones about extraterrestrials."
—*Natalie Kolcun* '98

"*Seinfeld*. It's very Jewish, New York humor. I can totally identify with the show because everything that goes on is totally how all my neighbors act with each other...all the stupid trivial stuff."
--*Ehab Ismail* '97

"*The Simpsons*. It's hysterical. It's the most educated humor."
—*Frank Procida* '97

"*Seinfeld*. Because it's about nothing, and it's just funny."
—*Jaime Saladino* '98

SCIENCE AND TECHNOLOGY

Computer labs in Dana receive a facelift

By Rebecca Klingler

Bucknellian Staff Writer

In the dimly-lit computer lab, Nicole Sprague '97 had to look down to check her email, but she wasn't standing up. She was using one of the two new electronic classrooms in Dana, where the monitors are placed down in the desks.

"It seems a lot better" than the old labs, Sprague said. She uses the labs frequently to check her email and do homework. "It's just a nicer environment."

The new computer facilities are actually updated versions of former labs.

The lab in Dana 227, which originally contained 20 IBM machines, now holds 23 new IBMs with Windows 95. While only three computers were added, the space was increased by 25 percent through the conversion of office space, said Brian Hoyt, manager of the construction of the two new labs and engineering computing instructional administrator.

This additional space enabled the lab to house a classroom atmosphere, where all the students face the same direction and the monitors are placed down in the desks.. It is also easier to move around in the room.

Formerly located in Dana 233, the updated Macintosh lab now occupies Dana 307, which before was a traditional classroom. Dana 233 was converted into three offices.

The number of machines in the Macintosh lab increased from 18 to 23. A classroom design was also integrated into the Mac lab, with students facing the same direction, built-in projection and the monitors down in the desk.

These changes were a much needed improvement, Hoyt said. The Dana 233 lab was originally designed to be an open-access lab, but teaching demands for computer facilities forced it to become a classroom. With the room in the shape of an "L," the computers had lined and faced the walls, a setup not conducive to learning.

Dissatisfied with the ability to conduct classes within the old labs, faculty requested the new electronic classrooms last year. The Committee on Academic Computing allocated $133,931 for the projects. Requests were also made to the capital budget for other renovations, such as those covered by the Physical Plant.

George Lincoln, systems integrator, estimated that the projects were completed $10,000 under the allocated amount, but the actual figures won't be available until the second week in October.

Another Rooke computer lab was also being considered for renovations, Lincoln said, but CAC decided the Dana changes were more beneficial for students. Since the Rooke computer lab is in the basement, it isn't as visible or used as much, and the old machines could not be recycled as widely as the Dana computers.

Sprague said one of the best improvements in the Dana 307 lab is the addition of Power Macs. These machines are more compatible than those found in the old lab because they can read IBM disks as well as Mac disks. There are also advantages to having the computers placed down in the desks.

Mitch Stewart—The Bucknellian

Ben Dewey '97 takes advantage of the newly installed computer lab in the Dana Engineering building.

"You've got plenty of room to spread out on the tables," she said.

The additional number of computers have also helped to eliminate problems scheduling larger classes, such as introductory engineering courses, to use the labs.

The old computers were moved to different locations on campus.

"We didn't throw away any machines at all," Hoyt said. "We just recycled them down the line."

Many of the IBMs became a part of a physics computer lab, and the Macs were situated in various computer labs, such as Smith, Larison and the 24-hour computer lab in the library.

The new electronic classrooms are "really hot spots," said Eugene Spencer, acting director of Computer and Communication Services. "Everything came together and they're both wonderful facilities."

"Everyone involved did a really nice job, from Physical Plant to the technicians," Lincoln said.

The first walls came down in early June, and the overall project was finished about two weeks before classes started.

Although both labs are located in Dana, they are open to everyone.

"They just happen to be in the engineering building... but they are made to be used by anyone," Spencer said.

Faculty from any department can schedule classes in the electronic classrooms.

"Faculty are very pleased with the outcome," Hoyt said, "and are responding by using the facilities in ways they've never used them before."

The two new labs are 24 hour-facilities, except between 2 a.m. and 7 a.m. Friday and Sunday mornings. According to Lincoln, the two labs are closed at these times because the chance of vandalism increases.

Windows 95 comes to campus

One year after its introduction, Windows 95 has started to show up on University computers. Over the summer, several University departments and two public IBM PC labs, Dana 227 and Taylor 203, have been upgraded. The upgrade from Windows 3.1 to Windows 95 promises to make these computers more user-friendly, more attractive and more functional to the faculty, staff, and students who use them.

How it Works

Chip Audette

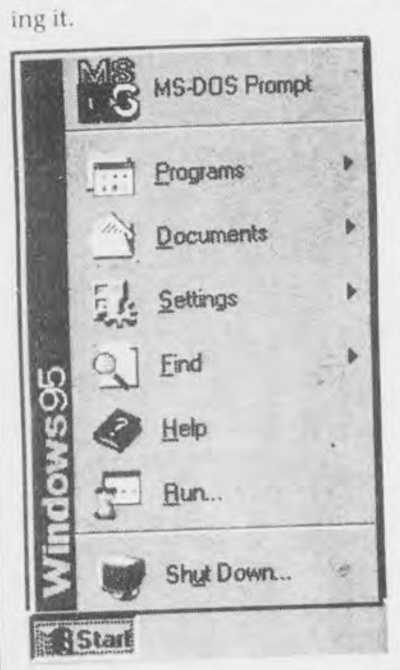
Chip Audette

Bucknellian Columnist

Windows 95 is the operating system which is being installed on most new computers sold in the United States. Windows 95, like every other operating system, is the software which actually runs the computer. It tells the computer what to do, when to do it, what to remember, how to save, how the keyboard works, what the mouse does, and what the screen displays. A computer must have an operating system in order to function. When one runs an application like Word, Excel, or Netscape, it sits on top of the operating system and interacts with it in order to get work done.

Windows 95 has been developed by Microsoft to replace the aging Windows 3.1 software running on most IBM compatible PCs in the world. While it has been a phenomenally successful product for Microsoft, Windows 3.1 is starting to show its age. Released in 1992, Windows 3.1 is having trouble keeping up with the advances of today's personal computers.

The real problem with Windows 3.1 is that it is not really an operating system. The operating system that is actually running a Windows 3.1 computer is called DOS and, in terms of PC time-scale, DOS is an ancient technology. It was developed in the early 1980s for the original IBM PC and, even though it has been updated over the years, it has several fundamental problems which prohibit it from fully taking advantage of modern computers. Windows 3.1 is merely a graphical interface which sits on top of DOS and makes the computer easier and more attractive to use. Since Windows 3.1 uses DOS as its foundation, it is still limited by the old technology accompanying it.



To overcome the limitations of the DOS/Windows combination, Microsoft created Windows 95. Windows 95 was designed to be a whole new operating system which would be compatible with all the old DOS/Windows software, but which would not be limited by the DOS operating system itself. It was also designed to integrate the graphical interface (which used to be the role of Windows 3.1) into the operating system itself. Windows 95, then, is a brand new package of software which runs the computer and provides an easy-to-use interface.

Most of the benefits of Windows 95 come from its ability to take advantage of technology which was not available when DOS and Windows 3.1 were written. Windows 95 utilizes the powerful microprocessors which are the core of every new personal computer. This new operating system is able to do more things at once than Windows 3.1. Whereas Windows 3.1 slows down and tends to crash when multiple applications are running at the same time, Windows 95 has been designed to be more efficient and stable. A more stable computer crashes less and loses less data, allowing more work to be accomplished in a shorter amount of time.

Windows 95 also provides better access to networked resources. This improvement can be directly seen by anyone using a public IBM lab which runs Windows 95. Using the network neighborhood icon, one can easily browse Bucknell's network so that they can access shared applications, drop files into a friend's drop-box, or find shared files for a group project. While this has been available to Macintosh users for several years, Windows 95 finally makes it easy for IBM users to have the same level of access.

In addition, Windows 95 has a greatly refined interface which drops Windows 3.1's dual personality of having a separate Program Manager and File Manager. Instead, Windows 95 gives users a Macintosh-like "desktop" upon which they can move and manipulate their files. Lastly, Windows 95 incorporates the much-publicized START button, used to find and launch applications. This is a more intuitive arrangement which will help people understand and use computers more efficiently.

Biology professor wins Lectureship Award

By Bridget Lewis

"Do not call me Dr. Fletcher, nor Professor Fletcher. Please, call me Dave."

This is the manner in which David J. C. Fletcher, professor of biology and animal behavior, begins his class.

For this talented and inspiring professor, being addressed as Dave is sufficient. There is enough respect given in just that. He believes that informality is the best way for student and teacher to learn together. His classroom is always informal with discussions that instill in students the desire to learn. He invests time and energy into his students and spurs them on

It is for these reasons that he was awarded the Class of 1956 Lectureship Award for Inspirational Teaching. As a result of this award, he will be giving a lecture on interdisciplinary studies entitled "Being and Becoming: A Biologist Tries to Fly".

The award is given to one University professor every year and it is the only award that requires a lecture. Of high prestige to faculty and staff, the award is an outward symbol of the contribution Fletcher has given to the University community.

Although he is a professor of biology and animal behavior, students across the curriculum have a chance to take classes with Fletcher, because he is a strong believer in interdisciplinary studies. He teaches two interdisciplinary capstones: Human Evolution, and Science and Literature. He co-teaches the latter with his wife, Pauline Fletcher, a professor in the English department. The course, as well as a foundation seminar that he taught for a number of years, has its focus steeped in Darwinism.

Fletcher is interested in interdisciplinary teaching as an important way to open doors to people. By crossing boundaries between disciplines, Fletcher believes that deeper discussion is encouraged and learning is fostered.

No one could possibly be an expert on all topics of discussion that take place in interdisciplinary classes. This gives all students the chance to contribute equally.

The classroom provides mutual discovery for both teacher and student as they learn from each other. Fletcher believes that this kind of environment encourages individual vitality by providing "on the edge" discussion. It is the enthusiasm for making new discoveries that Fletcher wishes to pass on to his students.

Fletcher is also a renowned scientist. His research focuses on the evolution of sociality, primarily in insects. He has been published many times for his research on honeybees and fire ants, research which he continues today.

Born in England and raised in South Africa, his initial interest in honeybees was fostered when he returned to England for undergraduate work. This interest was encouraged as he studied and performed his post-doctoral fellowship on honeybees under one of the leading researchers on European honeybees.

Fletcher broke ground and expanded his research to an area where few had ever experimented—the African honeybee. He is now one of the primary researchers of the African bee. During his research on the African bee, he discovered a communicatory dance that had never before been recorded. The dance is now termed as the dorsoventral abdominal vibration or vibratory dance.

In addition to his own research, Fletcher works with students in the biology department on his honeybee sociality project. His primary focus has now turned toward queen bee competition.

Many students find Fletcher an inspiration to further their interests in animal research. He continually insists that students go beyond the realm of his research and knowledge in order to discover for themselves what the world has to offer.

Cooking with Katie

KATIE JONES

GIANT MOCHA CHIP COOKIES

For a contemporary departure from the ordinary, try these cafe inspired giants. Bursting with flavor, their melting splendor will steal you away from classes and into the coffeehouse of your dreams.

The cookies derive their personality from the addition of chocolate pudding and coffee grounds, which replace the traditional amounts of sugars and salts.

Ingredients:

2 sticks butter, softened
1/2 cup packed light brown sugar
1/4 cup sugar
2 eggs
1 teaspoon vanilla
1 package JELLO chocolate pudding mix
2 tablespoons espresso (may be flavored) ground coffee
2 teaspoons baking soda
2 and 1/4 cup flour
1 12 oz. package semi-sweet chocolate chips

Variations:

white chocolate chips
toasted almonds
walnuts

1. Stir together flour, baking soda and pudding mix. Set aside.
2. With a wire whisk or electric beater, cream butter, sugars, eggs and vanilla.
3. Gradually stir in dry ingredients, incorporating them completely.
4. Add chocolate chips.
5. Scoop out about 1/8 to 1/4 cup batter onto cookie sheet: space by 3 inches.
6. Bake 9-10 minutes at 375 degrees or until very soft but solid.
7. Cool for a few minutes on sheet. Then remove with a spatula and place on wax paper and cover with paper towels.
8. Store in airtight container.

Katie Jones '98 is a civil engineering major and hopes to pursue her dream of opening a gourmet restaurant with a degree from the Culinary Institute of America. An overflow of flavor inspired curiosity... Other passions include horseback riding, painting and running.

Tune into the fall line-up

By Ted Burnes

So, have you heard? The guy upstairs has finally hooked up with the blond down the hall. You're friend's fiancee just died. And that pre-med resident finally became a doctor.

No, I'm not talking about any of the dorms on campus; I'm talking about the new fall TV season.

With over fourteen new shows and big events on all your old favorites, the networks are settling in and watching the ratings soar. But will they soar here at the University? Let's take a look:

NBC's Thursday Night Must-See TV was a big hit last year. You had to get to the lounge fifteen minutes early just to see the screen. How about this year?

"I can't wait to see what happens on *Friends* and *Seinfeld*," says Lara Coleman '00. "I hate George's mother [on *Seinfeld*]...she irks me so much!"

Friends promises to be good this season as Monica breaks up with her boyfriend Richard (played by Tom Selleck, who left to film his own sitcom, due out in February). Also, will poor Joey be able to put up with Chandler's new girlfriend?

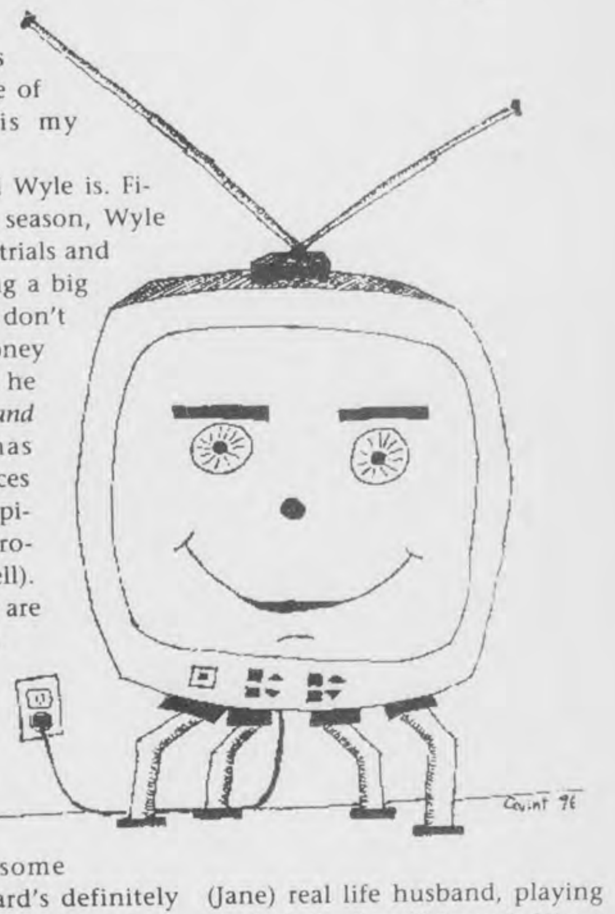
Seinfeld also promises to be good. It is rumored that this will be the wacky foursome's last season together. "The death of George's fiancee will unfold over the season, and expect a lot of dark humor and a great series finale," says Julia Louis-Dreyfuss in *Entertainment Weekly*'s Fall TV Preview.

Since *Caroline in the City* has moved to Tuesdays (this Lea Thompson lover predicts she and Richard will tie the knot before the season's over), taking its place is *Suddenly Susan*, giving Brooke Shields her first real comeback.

Insiders say that there have already been problems with the show. *Entertainment Weekly*'s Dana Kennedy says that "[NBC] wasn't sure if *Susan* was sharp enough for Thursday night Must-See TV, and a whole new pilot was ordered with Shields being the only cast member remaining...new writers, new supporting cast members."

The big wait for the season premiere of *ER* is almost over—it happens tonight. This single hour is one of the hottest topics on campus.

"All I have to say is that anyone who watches with me better only talk during the commercials" says Carla Christy '98.



An anonymous senior says, "Miss the season premiere of *ER*? Noah Wyle is my GOD!"

And what a god Wyle is. Finally a doctor this season, Wyle will experience the trials and tribulations of being a big bad medic. Oh, and don't worry, George Clooney fans—even though he is filming *Batman and Robin*, Clooney has plenty of appearances in TV's hottest hospital (and maybe a romance or two as well).

Monday nights are fast and furious this fall. With three new cast members and some great guest stars on the way, *Melrose Place* promises some cliffhangers. Richard's definitely alive, folks, and he's giving Jane and Sydney a little trouble.

Lisa Rinna joins the cast as Taylor, a mysterious young vixen from the East who has something to do with Peter Burns' unknown past...watch out, Ms. Locklear. And is that Rob Estes, Josie Bissett's (Jane) real life husband, playing Taylor's husband? Sounds like a love triangle to me.

Also introducing new cast members, *Murphy Brown* welcomes Lily Tomlin as Murphy's new boss (replacing Miles Silverberg).

Tuesdays and Wednesdays don't look bad this fall, either. *Roseanne* is still kicking, with Darlene pregnant and Sarah Chalke replacing Lacy Goransen as Becky (again? I'm getting a headache!). Tuesdays look pretty strong for NBC, with *Caroline in the City* joining the likes of *Frasier* and *NewsRadio*.

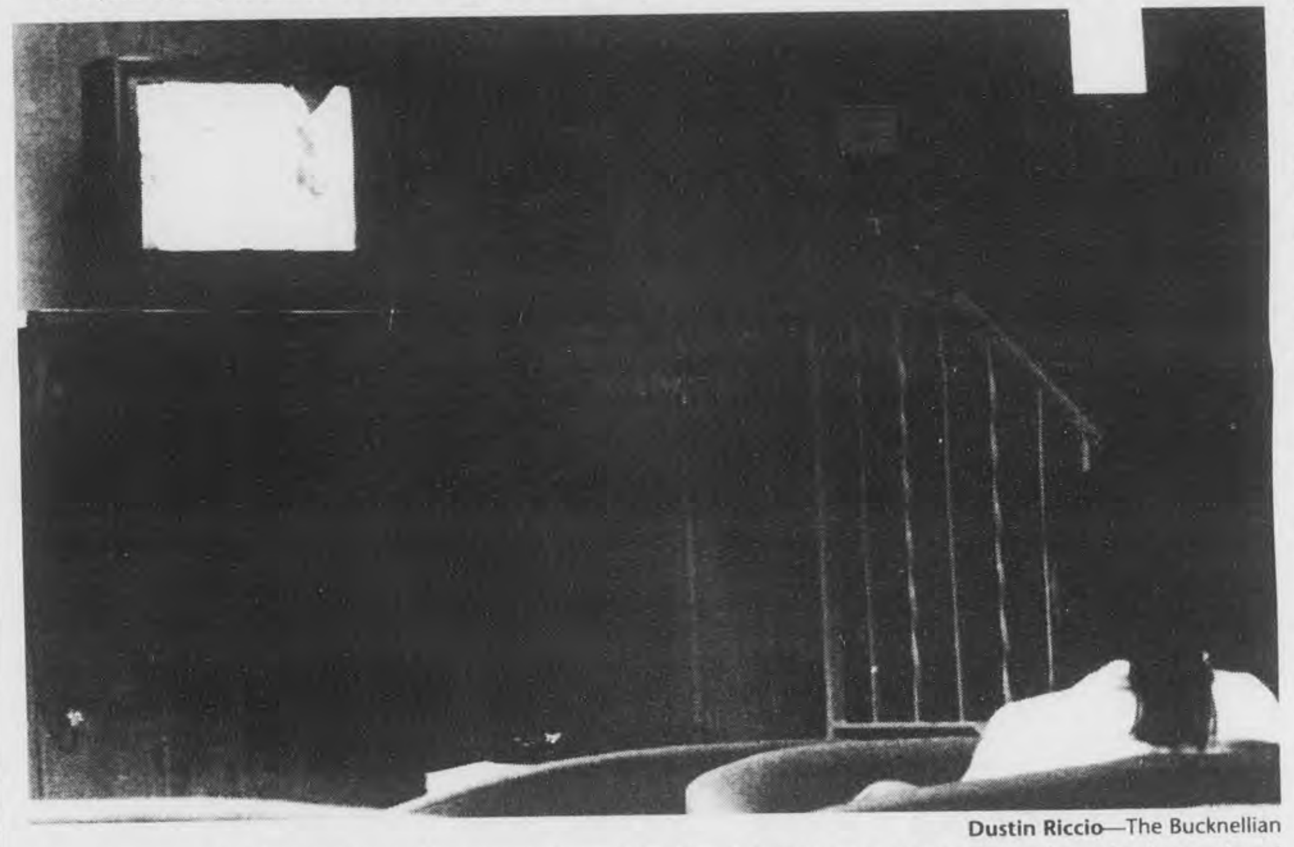
Wednesday is kicking with *Beverly Hills, 90210* and *Party of Five* . A quote heard at the Bison was "The best two hours of television... Neve Campbell, Tiffani Amber-Thiessen and Jennie Garth on one night!"

New shows include *Spin City*, starring Michael J. Fox as a young man working on the political scene. Also, ABC brings us *Dangerous Minds*, a sitcom version of the movie with Annie Potts taking over Michelle Pfeiffer's role.

Weekends look promising this fall, too. *The X-Files* has been moved from Fridays to Sundays, a smart move by Fox TV. Lisa Molinelli '00 just wonders "Who's gonna tape it for me while I'm at my weekly hall meeting—I can't miss a single episode!"

CBS is proud to be showing the new show *Cosby*, a sitcom reuniting the master of comedy Bill Cosby and his *Cosby Show* wife, Phylicia Rashad. This promises to be a good show...if you're willing to stay in on a Friday night!

So, now you have your TV schedule. It's gonna be a good one this fall. Just remember that in between shows, you might want to crack a book and study a little bit—that's why God made commercials.



Dustin Riccio—The Bucknellian

Some students can't tear themselves away from television's fall line-up. Most shows have just premiered within the past week. Traditional favorites include "Melrose Place" and "Friends."

Survey: What do students look for in a television show

We've given you the lowdown on this fall's lineup, now let's see what students look for when they tune into the tube. We asked several students:

What's your favorite TV show and why?

"*ER*. I like drama. Out of all the shows on TV, *ER* has the most believable characters."

—*David Carpenter* '00

"*The X-Files*. It's different, and I think there's some truth to it...not all of the episodes, but especially the ones about extraterrestrials."

—*Natalie Kolcun* '98

"*Seinfeld*. It's very Jewish, New York humor. I can totally identify with the show because everything that goes on is totally how all my neighbors act with each other...all the stupid trivial stuff."

—*Ehab Ismail* '97

"*The Simpsons*. It's hysterical. It's the most educated humor."

—*Frank Procida* '97

"*Seinfeld*. Because it's about nothing, and it's just funny."

—*Jaime Saladino* '98

ARTS & ENTERTAINMENT

Contra Dancing arrives in Lewisburg

From page 1

on their own techniques and style of music to the English variations. The immigrants from these countries brought their version of dancing with them and over the years. These dances have blended to become what is now known as Traditional New England Contra Dancing.

As more people become involved, Contra Dancing continues to change its form. The term Contra Dancing is, in fact, a broad category for traditional American folk dance that includes square dancing.

Dickson said Contra Dancing is simply "a type of traditional American Folk dancing and very similar to English Country Dance, but more lively and less stately."

Because Contra Dancing is considered a social function, it is customary to dance each dance with a different person, traditionally male and female, in order to meet as many people as possible. During the dance, one couple dances with another couple and the choreography moves you down the line. Although the steps are smooth and graceful, the pace of the dance is very fast, a great workout.

At the beginning of the dance, the caller, who calls out the steps of the dance, walks beginners through the steps. Then the dances formally begin, with each couple taking hands with another couple. As the music starts, the caller calls out the movements until they begin to repeat. At this point, the caller stops to let the beat of the music take over to set the pace of the four different movements which are unique to each dance.

Photo courtesy of Laurie Dickson

People of all ages enjoy a night of contra dancing. This form of dancing has arrived in Lewisburg.

The role of the caller is an integral part of Contra Dancing and requires a lot of training. People learn how to become callers by attending various music festivals and workshops. Those who run the workshops and festivals often become mentors to younger callers and help guide them through the learning process by passing down traditional steps and their own styles of Contra Dancing.

Some callers have even become quite famous for their methods. According to Slade, "the callers take on an important responsibility to teach other dancers who in turn pass on what they learned to other dancers." Although they are not paid much, most callers "do it for the love of doing it," said Dickson.

Who could have a dance without music? Another important aspect of Contra Dancing is live music, which further encourages a social environment. The most prominent and common instrument played at Contra Dances is the fiddle; other instruments include the hammered dulcimer and the guitar.

Many styles of music can be played at Contra Dances, including Celtic and Scottish songs, gigs, reels, and waltzes which often are played during the warm-up and cool-down sections of the dance.

When you watch Contra Dancing, it may look as if the man is leading. Although Contra Dancing is based upon traditional heterosexual dances where men lead, it is designed to be gender free, so both male and female have an equal role. They both add their own weight, creating a center of gravity between them.

In addition to being gender free, the atmosphere of Contra Dancing is alcohol and smoke free.

Dickson and Slade first learned how to Contra Dance at a festival in Pillow, Pennsylvania. They loved it so much that they started to travel to festivals all over the East Coast including one in Harrisburg and one in Washington D.C. which attracted 350 to 400 people.

Slade said, "It's exciting to introduce other people to it [Contra Dancing]-good satisfaction."

Dickson and Slade worked hard during February and March organizing a Contra Dance that was held in April. The work included finding a caller and a music group and reserving the Lewisburg Club which has a good maple floor to dance on.

About 70 people from Williamsport, Sunbury, Milton, Northumberland, and Lewisburg attended.

Contra Dancing took a break over the summer but started up again on September 6th with a crowd of about 40 people. The next dance will be on Friday, October 4 with Bob Livingston from Middletown, Connecticut as the caller and Total Hip Replacement providing the live music.

The dance starts at 7:30 p.m. with the caller teaching beginners until 8 p.m. Then the dance runs until 11 p.m. with a break for refreshments. Admission is $5 per person and $4 for students with ID.

The calendar continues with dances held on the first Friday of each month, same time and place as listed above. Different callers and bands will be appearing each time.

Musician, poet, artist to combine talents during Coffeehouse

With a background in folk music, Yona Leopold '00 will bring genre to Bison; she is inspired by musicians and poets

BY ANNE PUTNAM

At last Wednesday's Coffeehouse with Andrew Lasky's voice and guitar strings twanging, Yona Leopold '00 came to the Bison amidst coffee, crayons and cookies to experience this facet of the University's many talent venues.

Leopold will demonstrate many of her talents at her debut at the next Coffeehouse. One talent to be highlighted is her singing ability, in which folk music is her specialty.

Yona Leopold's artistic background was fostered by her family's involvement in music, under her mother's guidance. Harmonizing with her mother's folk band started her love for performing. Later on, vocalists such as Joan Biaz, Judy Collins, and Joni Mitchell provided further inspiration.

Leopold's next step in her musical career was to attend Hotchkiss School in Connecticut where she took four years of voice training. While she was at Hotchkiss, her performing experiences included opera and show tunes.

She also continued to sing at home, with her band in Wappingers, New York. They performed local gigs, continuing the folk venue as well as adding funk to their repertoire.

Yona diversified her artistic talents by occasionally writing poems as an expansion of her folk interests. Leopold said she had been writing since her middle school introduction to works by Anne Sexton. These works, in turn, led to the inspiration of some her lyrics with a combination of romance, nature, and personal experiences.

Leopold's other talents involve her visual art skills that she also tries to incorporate into her concerts. In continuation with her folk theme, she took many print making classes at Hotchkiss.

Leaves and other aspects of nature further inspired Leopold to continue developing her concentration in folk music. Nature is very important to Leopold and is echoed throughout all of her talents.

Leopold aspires to do many things in the future. Specifically, she intends to pursue her English education major and art minor while continuing to sing and perform concerts, Leopold-style, as everyone can discover Wednesday.

Josh Eisinger, a fellow classmate of Leopold's at Hotchkiss, describes her as having a powerful voice and decent range. He felt this allows her to perform well in both opera and Broadway songs, even though her true voice shines through in the folk realm.

Leopold can be heard on Wednesday at 9:30 p.m. in the Bison.

Rachel Doebber—The Bucknellian

Yona Leopold '00 will be performing at Coffeehouse on Wednesday.

Excerpt from

"Colorful Children"

by Yona Leopold

The wind glides delicate fingers over the falling form
which yields to the gravity of its destiny
colorful children, falling far
resting down at the foot of their mother.

Hanging from a tree, a thin body sways;
It's skin dried out its veins contracted so
They stand out against the cracked skin.
Slowly the union between the dying being
and living tree dissolves into the wind; a
disintegrating bond within a world
whose voice is that of the flowing brook,
and caress is a summer's breeze.
It stretches in agony, twisting and contorting,
pulling at the apron strings.

ARTS & ENTERTAINMENT

The Badlees bring their music and spirit to Bucknell

The Selinsgrove group returns to perform, drawing students together for an evening of a pep rally and picnic

BY SHETAL MITHANI

The Badlees, a local band gone national, is returning home to perform for the University tomorrow. Bucknell Student Government, the Bucknell Activities Council, the Panhellenic Council, the Interfraternity Council, and the Residence Hall Association came together to put on the first all campus picnic/pep-rally.

"We wanted to pull the entire campus together and increase school spirit. We wanted to put on the concert to entice people to come to the event," said Brooke Warehime, BSG president.

According to Warehime and Mark Amatrucola, BAC president, the Badlees were their first choice for entertainment.

"We have a couple of their CDs and we just think they're a great band," Warehime said.

According to Audrey Jaeger, assistant director of student activities, the Badlees are pretty excited about coming back home to perform because they are originally from Selinsgrove.

The picnic/pep-rally was planned especially for this coming weekend because there will be a home football game on Saturday, September 28, Amatrucola said.

Kirk Diehl, residence hall president, expects the event to have a pretty big turnout.

"We expect about 3,000 to 5,000 students, mainly because the Cafeteria will be closed and there will be no meal credit that day," Diehl said.

According to Amatrucola, this is the first time these five student organizations have planned an event of this size and magnitude.

"Our organizations decided to pull our resources together to plan this major event. We started planning this event at the end of March," Amatrucola said.

The five organizations feel confident about the event and believe it will be a success.

"We're very excited. We put a lot of time and effort into this event and we hope everyone enjoys it," Warehime concluded.

The Badlees will perform tomorrow, a result of planning by Bucknell Student Government, Bucknell Activities Council. Panhellenic Council, Interfraternity Council, and Residence Hall Association. The band, now known nationally, is originally from Selinsgrove.

Orchestra to serenade Weis Center stage

DAVID CARPENTER
Bucknellian Staff Writer

Once again student musicians will amaze us with their talents as they have done in the past, with the Bucknell Orchestra's annual fall concert.

This year's Orchestra Concerto Concert will give the top senior performers an opportunity to show off their musical skills and talents.

Christopher Para, conductor of the orchestra for the past eight years and graduate of the Eastman School of Music, is excited about the premiere of the musical group for this year.

"It is challenging for this show, because it is so early in the year," Para said, adding "I think we have a strong group this year."

According to Para, the orchestra as a whole only has four rehearsals to practice for, the Concerto Concert.

The spotlight of the evening will be on the three senior soloists who will each perform a piece.

"They started working on their pieces last semester." Professor Para said. "They have chosen work that reflects the unique attributes of their instruments."

Jennifer Ahrens, who is a music education major, will be performing a classical concerto on the clarinet, Concerto in B flat for Clarinet and Orchestra written by Stamitz. Professor Para added that although this piece "makes great technical demands on the performer, it displays the clarinets beautiful agility."

The violin solo entitled "Meditation from 'Thais' for Violin and Orchestra" and composed by Massenet will be performed by Kirsten McLaughlin who is double majoring in music and sociology. According to Para, this is a piece that, "shows the lyrical side of the violin."

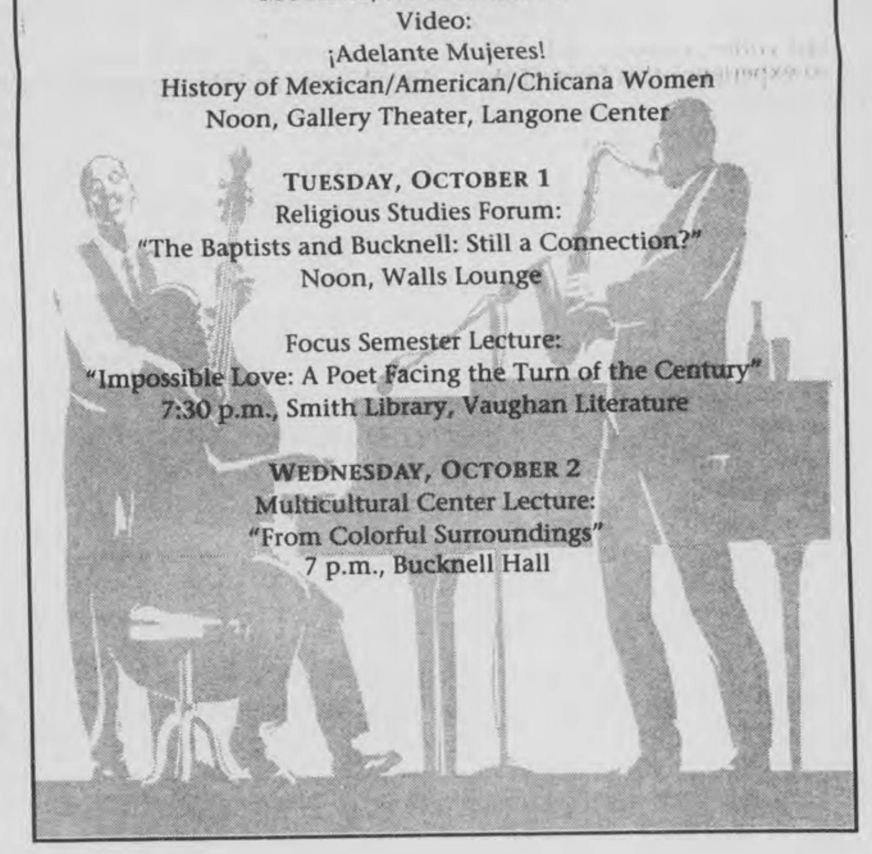
Chris Kemmlein, who is a civil engineering major and plays trumpet, will be performing a romantic but technically difficult piece composed by Hummel which is entitled "Concerto in E Flat Major for Trumpet and Orchestra." This piece will demonstrate the trumpet's ability to play arpeggios.

The concert will open with "Procession of the Nobles from 'Mlada'" by Nicolai Rimsky-Korsakov, which is performed by the whole orchestra. The three pieces performed by the senior soloists will then follow.

The concert will conclude with "Finlandia," written by Jean Sibelius which according to Para, "will be a crowd pleaser."

Although the all-campus picnic and pep rally is being held on the same night, the annual Orchestra Concert starts at 7 p.m. in the Weis Center so it will not interfere with the performance of the rock group, the Badlees, at 8 p.m.

A & E Calendar



FRIDAY, SEPTEMBER 27
Bucknell University Orchestra Concert
7 p.m., Weis Center

Movie Reviews

BY CHRIS NICHOLS
Bucknellian Staff Columnist

Independence Day ***1/2
Starring Bill Pulman, Jeff Goldblum, Will Smith and Randy Quaid

I know it's a little late to be doing a review for this but it's playing locally so it deserves to be mentioned. This film has gotten a lot of flack for being so simplistic and for some of its stereotypes, but I think those are really overemphasized. A lot of people out there didn't know a few things about the movie. The makers stated long before it was released that there was going to be nothing too revolutionary or exciting about it. They were retelling a classic story in modern ways using updated special effects and a witty new script. Let's face it, aliens taking over the earth has been done for as long as movies have been around. But it's really respectable the way they were able to tell the story in such an entertaining way, even though it's old hat. All of the actor's deserve credit for a job well done. Pulman plays a good president trying to prove himself in tough times and doing his best for the country. Goldblum plays a terrific geeky type that must face the real world instead of fighting for ideals in theory. And kudos to Will Smith for a terrific job as the leading man. I think it took a lot of initiative to cast such a young actor in a pivotal role when he really hasn't been tested in such a big production. He did a great job. All in all, everything about this makes it a great film. It's not exactly thought-provoking—it's more like brain candy, but it's a good watch.

Video

Fargo ****
Directed by The Brothers Kohn

Talk about a neat movie. This film hit the theaters last Spring and was still around in early summer for me to catch it. It comes out on video next week. From the two guys that brought you *Raising Arizona*, another great but weird movie results. This one follows the story of a small time murder in a little town named Fargo (Minnesota, I think...). The story surrounding the murder is revealed following a bunch of stories of people involved in it somehow. One such story follows the Trooper woman who investigates the murder (played by the same annoying woman who was Holly Hunter's sister in *Raising Arizona* and the ex-wife of the sheriff in *Lonestar*). The Kohn brothers are bears for details and you get hit with practically everything. We get details beyond details (not gory, don't worry) of the lives of these people that serve to make the thing seem so true to life. The only way to describe this is as cinematic realism. They do an amazing job of telling the story.

Ratings:

★★★★★:	Excellent: A must see.
★★★★:	Very Good: Very entertaining.
★★★:	Good: Worth the price.
★★:	Not so good: Limited scope and/or some significant flaws.
★:	Pretty bad: If you consciously see this movie you probably need help.

Women's tennis nets victory over UMBC

By Beth Coale
Bucknellian Staff Writer

Last Friday the women's tennis team defeated the University of Maryland Baltimore County, 4-3 in their first match of the season.

Number one seed Laura Leslie '00 met a disappointing three set loss to Karina Molsing 6-4, 2-6, 4-6. But Bucknell's number two player, Katie Roland '99 swept her match with a no contest victory over Amy Biggi, 6-0, 6-2.

Wendy Eason '98, the number three seed, fell to UMBC's Tracy Steppaw in a three set match 6-3, 1-6, 2-6. Laura Grossman '99, Blakely Lauria '00, and Kristen Jones '00, numbers four, five and six respectively, all won their matches against their UMBC opponents to put Bucknell over the top.

In doubles, Bucknell was victorious in the number two and number four positions. Leslie and Jones, the number two seeded doubles team, beat UMBC's Samson and Martiner, 8-3.

The number four doubles team consisting of Holly Shue '98 and Lauria also won their match with an impressive win over Hodges and Gancell 8-1.

On Sunday, the women had a rough match against the University of Delaware with an overall score of 8-1 in Delaware's favor. Only the number three doubles team of Eason and Kerry Callaghan '00 won their match against the Blue Hens with an 8-6 win over Lisa Fry and Tracy Gverin.

Bucknell surprised Delaware last year, playing a superb match to defeat the Blue Hens, but this year, the breaks did not fall in Bucknell's favor. Eason and Jones both stretched their singles matches to three sets but fell in the final stanzas.

The women's tennis team has an overall record of 1-1. Yesterday's match with Mount Saint Mary's began their four-game stretch on the road. The Bison start Patriot League play this Tuesday at Lehigh and return home to meet Army next Saturday.

Gilroy ignites Bison with winning goal

First-year player tallies two goals, one assist in first league victory of the season

By E.J. Crawford
Bucknellian Staff Writer

They say that home is where the heart is, but it took the Bucknell men's soccer team a trip to Holy Cross to right a sterling season that was soured by last week's loss to Lehigh.

With only 28 seconds remaining in the game, Scott Gilroy '00 scored to the upper right corner off a feed from junior Michael Thomas to lead the Bison to a 3-2 victory over favored Holy Cross, in what Coach Craig Reynolds deemed an "invaluable victory."

The Bison provided the only scoring in the first half, as Gilroy took a pass from junior Brian Ruddy and scored from 20 yards out.

The defense then set in for the rest of the first half, as both teams went scoreless over the final 30 minutes of the first half, and went to halftime with the Bison holding a one-goal edge.

Things took a very different turn, however, in the second half, as a fired up Crusader scored two goals in the span of a minute and a half. This was reminiscent of the Lehigh game, in which the Engineers scored twice in two minutes to win the game, and as Reynolds said, "in a case like that, games like Lehigh can linger in the back of player's minds."

But in "a real show of character," the Bison scored 10 minutes later on a goal by co-captain Wright Ramsey '98 to knot the score at 2-2, and pave the way for Gilroy's dramatic heroics.

Gilroy also assisted on Ramsey's goal, giving him five points for the game. He now leads the Bison with 11 points (five goals and an assist), despite only starting the last three games. Said Reynolds, "He's the type of player that can make things happen," and added that Gilroy "has shown a lot of composure with the ball, and knows what to do in the attacking third."

Michael Morris—The Bucknellian
Mike Thomas '98 and the Bison evened their Patriot League record at 1-1 with an exciting last-second win at Holy Cross.

The team was even more impressive considering that the Crusaders were the defending regular-season Patriot League champion, as well as the fact that they outshot the Bison 18-14, and had five more corner kicks. Senior goalkeeper Corey Harbold made seven saves in the victory.

Reynolds also gave considerable credit to the team's bench, particularly Carmine Guirland '99, for their contributions, as well as the "tough, solid play" of co-captain Doug Sweet '97, Brendon Whitworth '98, and Ryan Cummings '99 for their defensive work.

The men's squad takes on a hot Colgate team this weekend in another League match-up. Colgate has been "one of the most consistent teams" in the Patriot League since its inception, and are on a roll after upsetting pre-season favorite and last year's League Champion Navy two weeks ago. Colgate defeated the Bison 2-0 in last year's hard-fought contest. Also this weekend, the squad makes up their match against nationally-ranked Cornell.

William and Mary wallops Bison defense

By Brett Tomlinson
Bucknellian Staff Writer

Entering Saturday's game against football-powerhouse William and Mary, Bucknell had every reason to be optimistic.

The Bison defense was unyielding in their 44-7 opening win against Towson State, and with quarterback Jim Fox '97 and tailback Rich Lemon '97 both coming off solid performances, Bucknell appeared to have the offensive firepower to keep pace with the Tribe.

However, when William and Mary marched down the field for three touchdowns in the first quarter, it became clear that Bucknell was overmatched.

The Tribe scored on every possession in the first half, racking up 19 first downs en route to a 35-0 halftime lead. Meanwhile, the Bucknell offense was anemic.

In the first half, Fox was continually pressured by the quick and talented William and Mary defensive line. He converted on six of his 12 passes, but his longest completion went for a mere eight-yard gain. Fox was sacked three times for a total loss of 29 yards.

Lemon's day was a nightmare from the start, as the Tribe swarmed to plug the holes opened by the Bison line. The senior tailback had the worst performance of his career with six carries for (-6) yards rushing. The multi-talented Lemon tried to spark the offense as a receiver, catching a team-high six passes, but the offense never found first gear.

Jonah Half—The Bucknellian
Punter Rich Miller '97 was Player of the Game with a 44.1 yard average.

The Bison totaled a meager three yards rushing on the day, a figure which could have been even worse had it not been for junior George Howanitz's 33-yard run on a fake punt in the second quarter.

Howanitz, who was a State-championship option quarterback in high school, is a starter in the defensive backfield. He went back to his roots, though, taking the snap and breaking through the line for the longest rushing play of the game.

Howanitz's run, which was Bucknell's only first down in the first half, was one man away from being a touchdown, but All-American free safety Darren Sharper, who was returning the punt for William and Mary, stopped the Bison safety in his tracks.

Aside from the fake punt, Bison fans had little to cheer about. Punter Rich Miller '97 was the player of the game, averaging 44.1 yards on nine attempts with a long of 53 yards on a free kick following a first quarter safety. The Bison never got within Miller's field goal range, so the senior kicker/punter was relegated purely to his punting duties.

In fact, the Bison offense only crossed midfield twice and never got closer than 41 yards from the end zone with the ball.

The defense finally forced William and Mary to punt with 5:10 left in the third quarter, and Bucknell held the Tribe scoreless in the fourth quarter. But it was too little, too late for Bucknell, as William and Mary cruised to a comfortable 47-0 victory.

Bucknell will have a shot at redemption this week at home again against a considerably weaker opponent, Harvard.

The Crimson, led by rushing star Eion Hu, are coming off an opening loss to Columbia and a 2-8 season last year.

Bison look for redemption vs. Harvard

By Luke David and John Siris
Bucknellian Staff Writers

Last Saturday, in the first game of his third varsity season, Harvard senior tailback, Eion Hu, became his school's all-time leading rusher. Rich Lemon '97, the most prolific back in Bucknell history, accomplished this same feat last season, his third, on the second carry of the 1995 opener against Southern Connecticut. Although both backs will be in the spotlight when the Crimson (0-1) come to Lewisburg Saturday, it will be the supporting cast that makes or brakes this game for either team.

Harvard, 2-8 last season, opened 1996 with the same kind of performance that earned them a last place finish in the Ivy League last year, blowing a 13-point first half lead in an overtime loss to Columbia. Hu did his share of the work, carrying the ball 19 times for 119 yards and a touchdown, but the rest of the team faltered in a second half collapse marred by turnovers and missed opportunities.

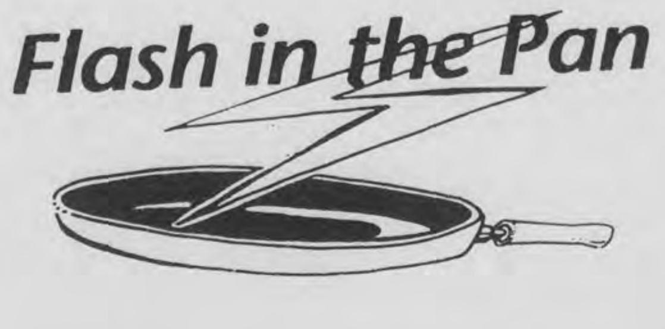
Jay Snowden, Harvard's mobile but inaccurate junior quarterback, threw three costly interceptions that led to the Crimson loss. Snowden, who tossed a mere 22 passes in 1995, will be trying to crack a Bison defense that has something to prove after allowing 47 points and 350 passing yards in last week's loss to William and Mary. Luckily for him, Harvard returns junior flanker Colby Skelton (35 catches in '95), a little guy with good speed and soft hands.

Bucknell's offense, which managed only three first downs last week, will be looking to return to form against a suspect Crimson defense. Unlike last week, Lemon and company should find ample running room against a defense which is struggling to fill the void left by the graduation of all four starting linebackers. The sole returning leader that will line up against the BU offense is junior Jeff Compas, an honorable mention All-Ivy cornerback who led Harvard with 75 tackles and four interceptions in 1995. Compas moved to free safety this season and will try to use his speed and quickness to disrupt the Bison offense.

Redemption is the theme of the week for the 1-1 Bison, who are searching for consistency and identity in the up-and-down 1996 season. Harvard is no William and Mary and should provide Bucknell with the perfect opportunity to rebound from last week's whipping. The once-vaunted Crimson football program has become the doormat of the Ivy League and the Bison could use a good place to clean their spikes.

This weeks picks:
John—BU: 35 Harvard: 14
Luke—BU: 21 Harvard: 3

Flash in the Pan



Baseball Comes to a Close: The baseball season is coming to an end, and the pennant races are on. In the American League, the Yankees have all but sown up the East, although the Baltimore Orioles are 1.5 games up on the Seattle Mariners with about a week and a half left in the season. As for the Mariners, a late second half surge has brought them within two games of the Texas Rangers, who have led for the majority of the season. The only team to clinch is the defending AL champion Cleveland Indians, who have breezed to a 14 game lead on the faltering White Sox.

In the NL, the Braves have clinched their second straight NL East title, while the struggling Expos remain in the wild card, although they trail the Padres by 2.5 games with time running out. As for the Padres, they are not yet thinking about the wildcard, as they trail the Dodgers by a mere half a game, and the two teams end the season with a four game series. The NL Central is less dramatic, as the Cardinals have pulled away from the Houston Astros, and appear assured of clinching the division soon.

The Mighty Fall: No. 1 Nebraska and No. 2 Tennessee both fell this weekend in NCAA collegiate football action. The Tennessee game was not a major surprise, as they fell 35-29 to a very experienced and fourth-ranked Florida squad that has dominated them in recent years. Peytin Manning threw for 472 yards in the defeat, but was also picked off four times. The Nebraska game was much more of a surprise, as the Cornhuskers lost to an Arizona State team 19-0, only a year after embarrassing the Sun Devils 77-28. Florida is the new No. 1 in the nation, and interstate rival Florida State moved up to No. 2.

George Suspended: In a surprise move following the Falcons 33-18 loss to the Eagles in which quarterback Jeff George and head Coach June Jones got into a sideline screaming match, the Falcons have announced that George is suspended indefinitely, and the team is pursuing a trade. Backup Bobby Hebert, who threw three interceptions on Sunday, has been promoted to the starting spot.

Surprise Teams Stay Undefeated: The Green Bay Packers, San Francisco 49ers, and Miami Dolphins all entered this weekend undefeated and with much fanfare, and they all left with losses to unexpected teams. After the first four games (three for Carolina), the Carolina Panthers (23-7 winners over the 49ers), Minnesota Vikings (30-21 over the Packers), and Indianapolis Colts (10-6 over the Dolphins) moved into first place in their divisions after their victories. Few prognosticators even gave these teams much of a chance to win 10 games, much less open the way they have.

College Football Top 10

1. **Florida 3-0**
2. **Florida State 2-0**
3. **Penn State 4-0**
4. **Ohio State 2-0**
5. **Notre Dame 3-0**
6. **Michigan 3-0**
7. **Tennessee 2-1**
8. **Nebraska 1-1**
9. **Miami 3-0**
10. **Arizona State 3-0**

Women's tennis nets victory over UMBC

By Beth Coale

Bucknellian Staff Writer

Last Friday the women's tennis team defeated the University of Maryland Baltimore County, 4-3 in their first match of the season.

Number one seed Laura Leslie '00 met a disappointing three set loss to Karina Molsing 6-4, 2-6, 4-6. But Bucknell's number two player, Katie Roland '99 swept her match with a no contest victory over Amy Biggi, 6-0, 6-2.

Wendy Eason '98, the number three seed, fell to UMBC's Tracy Steppaw in a three set match 6-3, 1-6, 2-6. Laura Grossman '99, Blakely Lauria '00, and Kristen Jones '00, numbers four, five and six respectively, all won their matches against their UMBC opponents to put Bucknell over the top.

In doubles, Bucknell was victorious in the number two and number four positions. Leslie and Jones, the number two seeded doubles team, beat UMBC's Samson and Martiner, 8-3.

The number four doubles team consisting of Holly Shue '98 and Lauria also won their match with an impressive win over Hodges and Gancell 8-1.

On Sunday, the women had a rough match against the University of Delaware with an overall score of 8-1 in Delaware's favor. Only the number three doubles team of Eason and Kerry Callaghan '00 won their match against the Blue Hens with an 8-6 win over Lisa Fry and Tracy Gverin.

Bucknell surprised Delaware last year, playing a superb match to defeat the Blue Hens, but this year, the breaks did not fall in Bucknell's favor. Eason and Jones both stretched their singles matches to three sets but fell in the final stanzas.

The women's tennis team has an overall record of 1-1. Yesterday's match with Mount Saint Mary's began their four-game stretch on the road. The Bison start Patriot League play this Tuesday at Lehigh and return home to meet Army next Saturday.

Gilroy earned Patriot League Player of the Week honors after his two goal, one assist performance against Holy Cross

Gilroy ignites Bison with winning goal

First-year player tallies two goals, one assist in first league victory of the season

By E.J. Crawford

Bucknellian Staff Writer

They say that home is where the heart is, but it took the Bucknell men's soccer team a trip to Holy Cross to right a sterling season that was soured by last week's loss to Lehigh.

With only 28 seconds remaining in the game, Scott Gilroy '00 scored to the upper right corner off a feed from junior Michael Thomas to lead the Bison to a 3-2 victory over favored Holy Cross, in what Coach Craig Reynolds deemed an "invaluable victory."

The Bison provided the only scoring in the first half, as Gilroy took a pass from junior Brian Ruddy and scored from 20 yards out.

The defense then set in for the rest of the first half, as both teams went scoreless over the final 30 minutes of the first half, and went to halftime with the Bison holding a one-goal edge.

Things took a very different turn, however, in the second half, as a fired up Crusader scored two goals in the span of a minute and a half. This was reminiscent of the Lehigh game, in which the Engineers scored twice in two minutes to win the game, and as Reynolds said, "in a case like that, games like Lehigh can linger in the back of player's minds."

But in "a real show of character," the Bison scored 10 minutes later on a goal by co-captain Wright Ramsey '98 to knot the score at 2-2, and pave the way for Gilroy's dramatic heroics.

Gilroy also assisted on Ramsey's goal, giving him five points for the game. He now leads the Bison with 11 points (five goals and an assist), despite only starting the last three games. Said Reynolds, "He's the type of player that can make things happen," and added that Gilroy "has shown a lot of composure with the ball, and knows what to do in the attacking third."

The team was even more impressive considering that the Crusaders were the defending regular-season Patriot League champion, as well as the fact that they outshot the Bison 18-14, and had five more corner kicks. Senior goalkeeper Corey Harbold made seven saves in the victory.

Reynolds also gave considerable credit to the team's bench, particularly Carmine Guirland '99, for their contributions, as well as the "tough, solid play" of co-captain Doug Sweet '97, Brendon Whitworth '98, and Ryan Cummings '99 for their defensive work.

The men's squad takes on a hot Colgate team this weekend in another League match-up. Colgate has been "one of the most consistent teams" in the Patriot League since its inception, and are on a roll after upsetting pre-season favorite and last year's League Champion Navy two weeks ago. Colgate defeated the Bison 2-0 in last year's hard-fought contest. Also this weekend, the squad makes up their match against nationally-ranked Cornell.

Michael Morris—The Bucknellian

Mike Thomas '98 and the Bison evened their Patriot League record at 1-1 with an exciting last-second win at Holy Cross.

William and Mary wallops Bison defense

By Brett Tomlinson

Bucknellian Staff Writer

Entering Saturday's game against football-powerhouse William and Mary, Bucknell had every reason to be optimistic.

The Bison defense was unyielding in their 44-7 opening win against Towson State, and with quarterback Jim Fox '97 and tailback Rich Lemon '97 both coming off solid performances, Bucknell appeared to have the offensive firepower to keep pace with the Tribe.

However, when William and Mary marched down the field for three touchdowns in the first quarter, it became clear that Bucknell was overmatched.

The Tribe scored on every possession in the first half, racking up 19 first downs en route to a 35-0 halftime lead. Meanwhile, the Bucknell offense was anemic.

In the first half, Fox was continually pressured by the quick and talented William and Mary defensive line. He converted on six of his 12 passes, but his longest completion went for a mere eight-yard gain. Fox was sacked three times for a total loss of 29 yards.

Lemon's day was a nightmare from the start, as the Tribe swarmed to plug the holes opened by the Bison line. The senior tailback had the worst performance of his career with six carries for (-6) yards rushing. The multi-talented Lemon tried to spark the offense as a receiver, catching a team-high six passes, but the offense never found first gear.

The Bison totaled a meager three yards rushing on the day, a figure which could have been even worse had it not been for junior George Howanitz's 33-yard run on a fake punt in the second quarter.

Howanitz, who was a State-championship option quarterback in high school, is a starter in the defensive backfield. He went back to his roots, though, taking the snap and breaking through the line for the longest rushing play of the game.

Howanitz's run, which was Bucknell's only first down in the first half, was one man away from being a touchdown, but All-American free safety Darren Sharper, who was returning the punt for William and Mary, stopped the Bison safety in his tracks.

Aside from the fake punt, Bison fans had little to cheer about. Punter Rich Miller '97 was the player of the game, averaging 44.1 yards on nine attempts with a long of 53 yards on a free kick following a first quarter safety. The Bison never got within Miller's field goal range, so the senior kicker/punter was relegated purely to his punting duties.

In fact, the Bison offense only crossed midfield twice and never got closer than 41 yards from the end zone with the ball.

The defense finally forced William and Mary to punt with 5:10 left in the third quarter, and Bucknell held the Tribe scoreless in the fourth quarter. But it was too little, too late for Bucknell, as William and Mary cruised to a comfortable 47-0 victory.

Bucknell will have a shot at redemption this week at home again against a considerably weaker opponent, Harvard.

The Crimson, led by rushing star Eion Hu, are coming off an opening loss to Columbia and a 2-8 season last year.

Jonah Half—The Bucknellian

Punter Rich Miller '97 was Player of the Game with a 44.1 yard average.

Bison look for redemption vs. Harvard

By Luke David and John Siris

Bucknellian Staff Writers

Last Saturday, in the first game of his third varsity season, Harvard senior tailback, Eion Hu, became his school's all-time leading rusher. Rich Lemon '97, the most prolific back in Bucknell history, accomplished this same feat last season, his third, on the second carry of the 1995 opener against Southern Connecticut. Although both backs will be in the spotlight when the Crimson (0-1) come to Lewisburg Saturday, it will be the supporting cast that makes or brakes this game for either team.

Harvard, 2-8 last season, opened 1996 with the same kind of performance that earned them a last place finish in the Ivy League last year, blowing a 13-point first half lead in an overtime loss to Columbia. Hu did his share of the work, carrying the ball 19 times for 119 yards and a touchdown, but the rest of the team faltered in a second half collapse marred by turnovers and missed opportunities.

Jay Snowden, Harvard's mobile but inaccurate junior quarterback, threw three costly interceptions that led to the Crimson loss. Snowden, who tossed a mere 22 passes in 1995, will be trying to crack a Bison defense that has something to prove after allowing 47 points and 350 passing yards in last week's loss to William and Mary. Luckily for him, Harvard returns junior flanker Colby Skelton (35 catches in '95), a little guy with good speed and soft hands.

Bucknell's offense, which managed only three first downs last week, will be looking to return to form against a suspect Crimson defense. Unlike last week, Lemon and company should find ample running room against a defense which is struggling to fill the void left by the graduation of all four starting linebackers. The sole returning leader that will line up against the BU offense is junior Jeff Compas, an honorable mention All-Ivy cornerback who led Harvard with 75 tackles and four interceptions in 1995. Compas moved to free safety this season and will try to use his speed and quickness to disrupt the Bison offense.

Redemption is the theme of the week for the 1-1 Bison, who are searching for consistency and identity in the up-and-down 1996 season. Harvard is no William and Mary and should provide Bucknell with the perfect opportunity to rebound from last week's whipping. The once-vaunted Crimson football program has become the doormat of the Ivy League and the Bison could use a good place to clean their spikes.

This weeks picks:
John—BU: 35 Harvard: 14
Luke—BU: 21 Harvard: 3

Flash in the Pan

Baseball Comes to a Close: The baseball season is coming to an end, and the pennant races are on. In the American League, the Yankees have all but sown up the East, although the Baltimore Orioles are 1.5 games up on the Seattle Mariners with about a week and a half left in the season. As for the Mariners, a late second half surge has brought them within two games of the Texas Rangers, who have led for the majority of the season. The only team to clinch is the defending AL champion Cleveland Indians, who have breezed to a 14 game lead on the faltering White Sox.

In the NL, the Braves have clinched their second straight NL East title, while the struggling Expos remain in the wild card, although they trail the Padres by 2.5 games with time running out. As for the Padres, they are not yet thinking about the wildcard, as they trail the Dodgers by a mere half a game, and the two teams end the season with a four game series. The NL Central is less dramatic, as the Cardinals have pulled away from the Houston Astros, and appear assured of clinching the division soon.

The Mighty Fall: No. 1 Nebraska and No. 2 Tennessee both fell this weekend in NCAA collegiate football action. The Tennessee game was not a major surprise, as they fell 35-29 to a very experienced and fourth-ranked Florida squad that has dominated them in recent years. Peytin Manning threw for 472 yards in the defeat, but was also picked off four times. The Nebraska game was much more of a surprise, as the Cornhuskers lost to an Arizona State team 19-0, only a year after embarrassing the Sun Devils 77-28. Florida is the new No. 1 in the nation, and interstate rival Florida State moved up to No. 2.

George Suspended: In a surprise move following the Falcons 33-18 loss to the Eagles in which quarterback Jeff George and head Coach June Jones got into a sideline screaming match, the Falcons have announced that George is suspended indefinitely, and the team is pursuing a trade. Backup Bobby Hebert, who threw three interceptions on Sunday, has been promoted to the starting spot.

Surprise Teams Stay Undefeated: The Green Bay Packers, San Francisco 49ers, and Miami Dolphins all entered this weekend undefeated and with much fanfare, and they all left with losses to unexpected teams. After the first four games (three for Carolina), the Carolina Panthers (23-7 winners over the 49ers), Minnesota Vikings (30-21 over the Packers), and Indianapolis Colts (10-6 over the Dolphins) moved into first place in their divisions after their victories. Few prognosticators even gave these teams much of a chance to win 10 games, much less open the way they have.

College Football Top 10

1. Florida 3-0
2. Florida State 2-0
3. Penn State 4-0
4. Ohio State 2-0
5. Notre Dame 3-0
6. Michigan 3-0
7. Tennessee 2-1
8. Nebraska 1-1
9. Miami 3-0
10. Arizona State 3-0

Volleyball learns from losses, spikes Drexel at home

By Jacob Lipman
Bucknellian Staff Writer

This past weekend, Bucknell's women's volleyball team competed in the Eagle Classic Tournament at Boston College. The team lost all three matches during the tournament. However, Bucknell bounced back with a win over Drexel last night, halting their three match slide.

The Bison now stand with a record of 9-5.

The Bison opened up against a very tough Cincinnati team on Friday. Despite losing the first two games by a large margin, Bucknell did not give up easily. The Bison gave the Bearcats a fight in the third game but Cincinnati prevailed, handing Bucknell a 6-15, 4-15, 13-15 defeat.

Melissa Wharton '98 led Bucknell with 13 kills and three blocks, while Emily Pomeroy '99 had five blocks in the match.

First up for Bucknell on Saturday, was Minnesota from the powerful Big Ten conference. The Bison stayed right with the Golden Gophers early on but eventually the big hitters for Minnesota wore Bucknell down. The Bison lost in three games 11-15, 4-15, 7-15.

Heather Rendle '97 had the most success versus Minnesota, with eight kills in only 11 attempts. Defensively, Susie Teitsworth '97 led the team with 14 digs.

In the final match for Bucknell, they faced Providence College. After falling behind a game, the Bison rallied to win game two in an impressive fashion. Providence was able to win the pivotal third game and then cruised to victory. The final score was 8-15, 15-6, 9-15, 1-15 in favor of the Friars.

Wharton had a fantastic game with 15 kills and three blocks. Also hitting well was Pomeroy with 10 kills. Teitsworth finished with 13 digs.

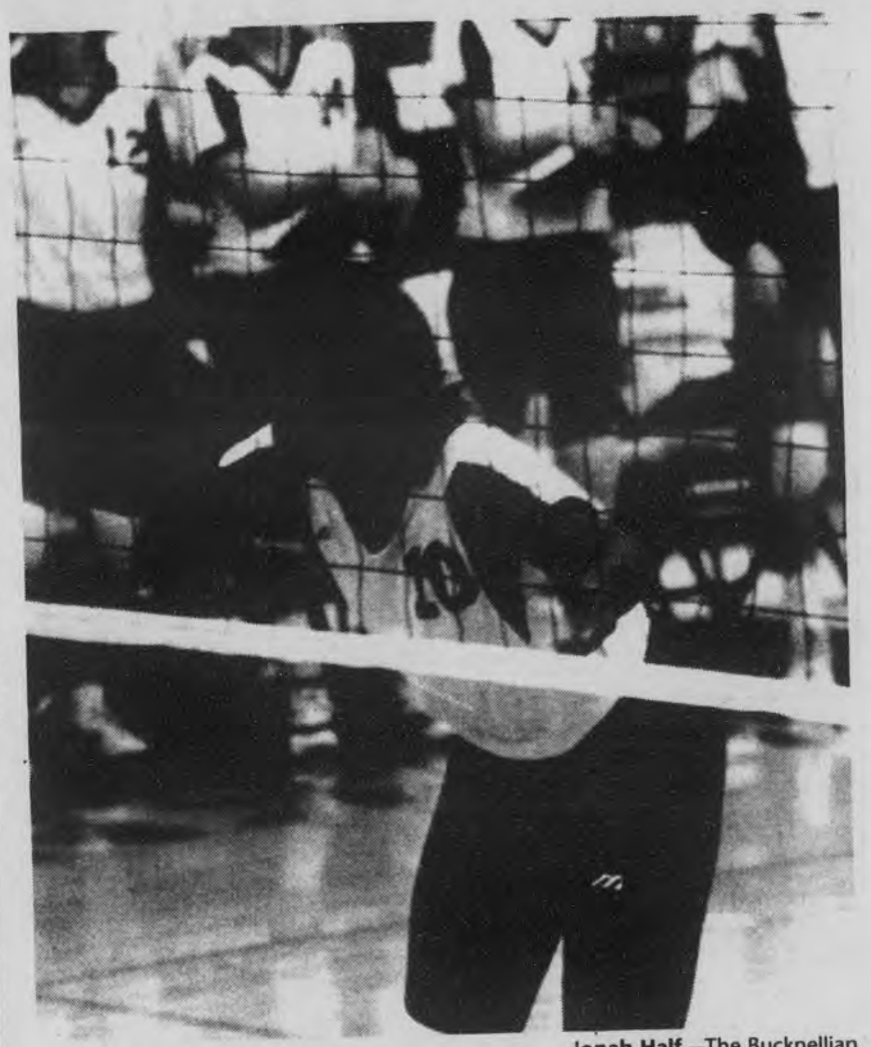
Wharton earned All-Tournament honors once again, after recording 35 kills and 10 blocks during the two day tournament.

On the team's play at the tournament, Coach Cindy Opalski remarked, "Sometimes you give lessons and sometimes you get lessons. Hopefully the lessons we learned will carry over to our Patriot League opener."

Last night, Bucknell put an end to that losing streak with a four game, 15-10, 15-10, 13-15, 15-9, defeat of Drexel.

The Bison got off to a 3-1 lead in the first game but Drexel rallied with nine of the next 12 points. Down 6-10, Pomeroy slammed a spike between the net and a would-be-Drexel blocker. This play and an ace by Teitsworth on the next play triggered a 9-0 run for Bucknell that gave them game one.

Game two started out much the same as the first one, as the Bison opened up with a 3-1 lead once again. The Dragons kept it close though and claimed the lead a few times. Behind 8-9, Wharton spiked for the kill twice in a row, starting a six point scoring run by the Bison. Drexel managed to score a point but that was all as Bucknell took a two-game lead.



Jonah Half—The Bucknellian

Melissa Wharton '98 earned All-Tournament honors last weekend.

Bucknell played well at the start of game three but from there on it got rough. After being up 5-1, Drexel scored five points in a row. Good team blocking and hitting enabled the Bison to regain the lead by a 10-7 score. Unfortunately poor serving hurt the team's chances to win the third game. The Dragons scored eight of the last 11 points to force a fourth game.

In the fourth and final game, Bucknell started on a roll to make it 3-0 but Drexel wasn't about to give up. The Dragons went on an 8-2 run to take an 8-5 lead. Rendle blasted a spike from the outside to draw the Bison a little closer.

However, the turning point came when Teitsworth served another ace, with the team down 7-9. Wharton had two monstrous spikes on the next two plays that gave Bucknell some much needed momentum. Amy Turnshek '98 had a huge solo block to make it 13-9. After yet another Teitsworth ace, Allison Morris '97 spiked a rocket just past the outstretched arms of the Drexel defenders and right on the back line to seal the victory.

Bucknell will face Navy, at home, in their Patriot League opener Saturday, at 11 a.m. The Bison will also play Coppin St. later in the afternoon at 3 p.m.

Water Polo coming home after tough losses at Navy

Bison to host only home matches Saturday

By Erica Friedlander and Jay O'Neil
Bucknellian Staff Writers

The Bucknell men's water polo team continued its season two weekends ago with its second tournament at Slippery Rock University, winning the first game against Johns Hopkins before losing a heartbreaker to Princeton.

The squad then traveled to Maryland's naval base for three more games, where it easily defeated a Canadian team before again falling to Princeton, and then dropping a tough game to Harvard.

On Sept. 14, Bucknell came out weak in the first quarter against Johns Hopkins but slowly gained speed throughout the remainder of the game. Despite the poor start, the men's team proved to be powerful competition and defeated Johns Hopkins 15-11.

The second game of the weekend versus Princeton was more trying for the Bison men. Through the third quarter, Bucknell led the game against the Tigers, but at the start of the fourth quarter the Bison faltered, losing their lead and eventually losing the game to the Tigers 13-12, thus ending their short weekend at Slippery Rock with a record of 1-1.

Last weekend, the Bucknell men traveled once again to Maryland's naval base. Their first game of the tournament was against Princeton, the team that had defeated them the previous weekend.

The Bison knew that they would be facing an uphill battle since Princeton was used to playing in a larger pool. Bucknell hung tight but because of lapses in defense fell to the Tigers once again by the score of 14-12.

The next game of the tournament for Bucknell was against McMaster, a Canadian water polo team. The Bison handled them rather easily, putting the Canadians away in the first quarter. There was no looking back after that. Bucknell had the remainder of the afternoon off and was able to rest and prepare for the following morning's game against Harvard.

Although Harvard did not possess a threatening roster, they were led by a very strong hole set. Bucknell came out sluggish and flat and despite efforts by Josh Watts '00, the Bison ended up losing the game by four goals to the Harvard team.

"We should be 7-0 instead of 2-5. We have had lapses on the defensive end of things as well as on the offensive end. This team had more talent than any other team in recent Bucknell history but, because of lack in execution, still retain a record of 2-5." Coach Mike Wooster said after the trying tournament.

Co-captain Alex Lunding '98 also commented on the struggling water polo team. "We have to concentrate on the little things we do in practice every day in order for them to work in a game."

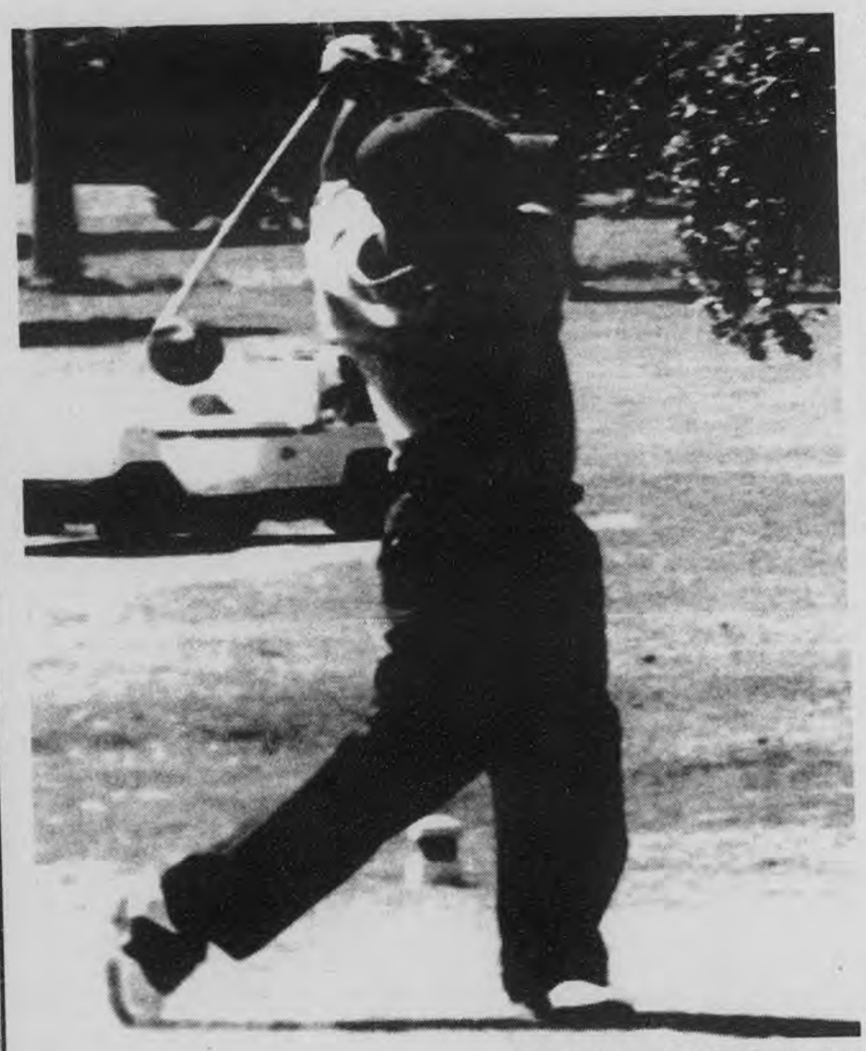
Jeremy Kish '98 chimed in to say, "We have to perfect the basics and then everything else will fall into place."

The Bucknell men's water polo team will be playing its first and only home tournament of the season this weekend. The team's first game is scheduled for a 9:30 a.m. start against Navy followed by a 1:30 p.m. game versus Villanova. The prime-time nightcap will be against Slippery Rock, starting at 7:30 p.m.

Bison golfers rally to reach middle of the pack

By Matthew Ansley
Bucknellian Staff Writer

Despite trailing the leader, Indiana University of Pennsylvania, by 24 strokes after the first round of play, the Bucknell men's golf team had a strong second day and finished eighth in its own tournament last weekend.



Mike O'Donnell—The Bucknellian

Bucknell was eighth out of 15 teams at the Invitational.

"We ended up right in the middle, eighth out of 15," said Coach Tommy Thompson '60, now in his 16th season as head golf coach at his alma mater. "It was really close though; there were a bunch of teams within a shot or two of us at 631."

This weekend's tournament was a little bit less encouraging than the Bucknell team's earlier season results such as its third place finish at the Colgate/Cornell Invitational one week earlier and second place honors at the Saint Bonaventure tournament before that.

"I know the guys are disappointed in themselves after the last two tournaments we've had, second place at Saint Bonaventure and third at Colgate/Cornell," said Thompson. "The first round kind of put us in a hole, but the second round, with a 309 total, was one of the lower rounds on Sunday. That makes me feel a little bit better, but the guys just have to put two good rounds together."

Bryan Sun '99 shot a 75, Eric Shortz '98 a 76, Todd Schneider '99 a 78, and Tony Calandra '99 an 80 to round out the second day score of 309 and make up for the first day's 322. Brian Borman '00 set a pace his teammates could not match, tying the tournament leaders by shooting a 74 in the first round of play Friday.

"I sent a bunch of freshmen out this weekend, and Brad Borman had one of the lower scores, so I'm pretty happy about that," said Thompson. "This was Bryan Sun's first tournament of the season and he did well, as did Josh Hartman. Tony Calandra, who is normally one of our lowest scorers, did not have a good tournament, but he'll be back."

The University of Pennsylvania's Adam Bradshaw took first place individually, as well as propelling his team to the tournament victory, with a 74 on the first day and a 73 on the second. The Quakers narrowly shut the door on IUP with a one stroke team victory. While the Bison golfers had a collectively poor tournament showing and did not provide much challenge in the individual contest, they are confident that the season will follow a different trend.

"I have a great deal of confidence about this team," said Thompson. "We have a great line-up, with five guys averaging in the 70s."

The Bison golfers will be in action again this weekend at the Navy Fall Classic.

Bison golfers rally to reach middle of the pack

By Matthew Ansley
Bucknellian Staff Writer

Despite trailing the leader, Indiana University of Pennsylvania, by 24 strokes after the first round of play, the Bucknell men's golf team had a strong second day and finished eighth in its own tournament last weekend.

Mike O'Donnell—The Bucknellian

Bucknell was eighth out of 15 teams at the Invitational.

"We ended up right in the middle, eighth out of 15," said Coach Tommy Thompson '60, now in his 16th season as head golf coach at his alma mater. "It was really close though; there were a bunch of teams within a shot or two of us at 631."

This weekend's tournament was a little bit less encouraging than the Bucknell team's earlier season results such as its third place finish at the Colgate/Cornell Invitational one week earlier and second place honors at the Saint Bonaventure tournament before that.

"I know the guys are disappointed in themselves after the last two tournaments we've had, second place at Saint Bonaventure and third at Colgate/Cornell," said Thompson. "The first round kind of put us in a hole, but the second round, with a 309 total, was one of the lower rounds on Sunday. That makes me feel a little bit better, but the guys just have to put two good rounds together."

Bryan Sun '99 shot a 75, Eric Shortz '98 a 76, Todd Schneider '99 a 78, and Tony Calandra '99 an 80 to round out the second day score of 309 and make up for the first day's 322. Brian Borman '00 set a pace his teammates could not match, tying the tournament leaders by shooting a 74 in the first round of play Friday.

"I sent a bunch of freshmen out this weekend, and Brad Borman had one of the lower scores, so I'm pretty happy about that," said Thompson. "This was Bryan Sun's first tournament of the season and he did well, as did Josh Hartman. Tony Calandra, who is normally one of our lowest scorers, did not have a good tournament, but he'll be back."

The University of Pennsylvania's Adam Bradshaw took first place individually, as well as propelling his team to the tournament victory, with a 74 on the first day and a 73 on the second. The Quakers narrowly shut the door on IUP with a one stroke team victory. While the Bison golfers had a collectively poor tournament showing and did not provide much challenge in the individual contest, they are confident that the season will follow a different trend.

"I have a great deal of confidence about this team," said Thompson. "We have a great line-up, with five guys averaging in the 70s."

The Bison golfers will be in action again this weekend at the Navy Fall Classic.

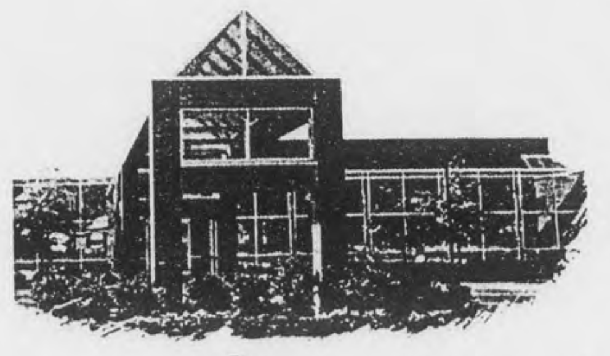
Northwestern College of Chiropractic

At Northwestern College of Chiropractic, we feel strongly about the quality of education we provide to our 600 students and their preparedness for satisfying careers.

As our 3,000 alumni know, we can provide you with an educational experience featuring:

- 55 years of expertise developing a well-rounded, rigorous educational program integrating the basic and clinical sciences, diagnosis, X-ray, chiropractic therapeutics, wellness care and practice management;
- Emphasis on clinical, hands-on education and experience;
- 11:1 student-to-faculty ratio, individual faculty attention, easy access to educational resources;
- Clinical internships in 80+ Minnesota community clinics and five College public clinics;
- Extensive interdisciplinary clinical learning opportunities;
- A research center known internationally and dedicated to advancing chiropractic science and the profession;
- Final term, full-time private practice internships globally;
- A beautiful 25-acre campus featuring leading-edge classrooms, science and methods labs, and clinic facilities;
- Career Services Office to assist graduates in job placement;
- New state-of-the-art library to support education and research.



A representative will be attending the Graduate School Day 96 on Wednesday, October 2nd from 3 pm to 6 pm in the Terrace Room of the Langone Center. Please stop by to pick up information and have your questions answered.

Free one-year Apple warranty.

Offer expires October 11, 1996. No payment of interest or principal will be required for 90 days. Interest accruing during this 90-day period will be added to the principal and will bear interest, which will be included in the repayment schedule. For example, the month of May 1996 had an interest rate of 12.15% with an Annual Percentage Rate (APR) of 13.93%. A monthly payment of $40.19 for the Power Mac 5400 system is an estimate based on a total loan amount of $2,340.43, which includes a sample purchase price of $2,185 and a 6% loan origination fee. Interest is variable based on the Prime Rate as reported on the 5th business day of the month in The Wall Street Journal, plus a spread of 3.9%. Monthly payment and APR shown assumes deferment of principal and does not include state or local sales tax. The Apple Computer Loan has an 8-year loan term with no prepayment penalty and is subject to credit approval. Monthly payments may vary depending on actual computer system prices, total loan amounts, state and local sales taxes and a change in the monthly variable interest rate. ©1996 Apple Computer, Inc. SPORTS

Professionals in the Olympics are a con for the games

Commentary

Brett Tomlinson

Brett Tomlinson
Co-Sports Editor

Somewhere in the northeastern Pennsylvania town that bears his name, Jim Thorpe is turning over in his grave.

Eighty-six years after the great sportsman played the short stint of minor league baseball which later cost him an Olympic gold medal in the decathlon, the International Baseball Association made a formal decision to allow professional baseball players to compete in the Olympics, starting in the 2000 Games at Sydney.

Baseball will join other high-profile sports like hockey, tennis, and basketball in allowing professionals to compete, further destroying the image of the Olympics as a showcase for amateur athletics. While the U.S. baseball team will probably not be quite as dominant as the basketball Dream Team, the admission of pros will no doubt make the U.S. the gold medal favorite. But more importantly, this latest intrusion of professionalism proves that prime-time amateur athletics are rapidly moving towards extinction. Amateur athletics simply do not sell. The coverage of Olympic baseball was weak in the Atlanta Games, and baseball promoters are hoping that the Sydney games in 2000 will attract enough pro baseball stars and fans to bring the event back into the spotlight. Logistically, the Sydney Games could be a problem since the Games will take place in the last two weeks of September, during the most important part of the pennant race. However, the U.S. should be able to put together a solid team of stars from non-contending teams.

Finding players should not be a problem, because apparently it means a lot to be an Olympian, even if you are a millionaire. Basketball stars have said how proud they are to be able to represent the good old USA, and last year, Emmitt Smith even suggested that the Olympics should include American football so that he can represent the country. But one has to wonder how eager these patriots would be if there was any real competition to worry about. After all, how much training and motivation does it take for the Dream Team to blow out Angola by 60 points? And what other countries could actually field a football team worthy of competing with U.S. high school all-stars, let alone professionals?

It is important for the Olympics to include great athletes, but Olympic events should also be competitive, if possible. The international governing bodies that have allowed professionals to compete are neglecting the need for a level playing field. The marketability and revenue potential of big American names overshadow the Olympic spirit.

The admission of pro baseball players in the Olympics is far from the first blow to amateur athletics. In fact, amateurism is steadily decaying in sports, especially in America. Olympic medals seem less like the capstone of a noble journey and more like a springboard to exploitation and commercialism. The champions of the 1996 Atlanta Games are prime examples of what it now means to win a medal. The U.S. women's gymnastic team is capitalizing on their gold with a tour of American arenas. Inspiring gymnast Kerri Strug broke free from her teammates to make her millions in a rival tour run by the Ice Capades. Mary Lou Retton, who struck gold and all that comes with it in 1984, is still making money as a motivational speaker.

The Olympics are merely one example of the decline of amateurism. NCAA schools have been suspended and reprimanded continuously for illegally paying players with gifts or cash, and basketball's player of the year, Marcus Camby, was even involved in a scandal for accepting gifts. Golfing sensation Tiger Woods drew criticism from the amateur golf world when he arrived at Pumpkin Ridge for the U.S. Amateur with an entourage that included, among others, his own personal golf instructor and his personal psychologist.

Indeed, the days of the true amateur are gone, even in the golf world, where the great Bobby Jones once won seven majors without ever joining the professional tour. Jones preferred the satisfaction of running his insurance business to the grind of the tour, so he remained an amateur. However, he still found time to keep his tremendous skills sharp for special events.

The simple fact is that there is just too much money to go around in American sports, which is not necessarily bad. At least our great Olympians will have some extra reward for their efforts. The irony of the situation is that not so long ago, athletes like Thorpe, who needed to play professional sports just to get by, were shunned by the Olympics. It is time for the International Olympic Committee to take a look at what the Olympics really mean and come to grips with what the Games have become. Just like the rest of the sporting world, the Olympics have become a business, and to advertise it otherwise is misleading. I think Mr. Thorpe would agree.

Sports Trivia Quiz

1. When was the last time the St. Louis Cardinals won their division in baseball?
2. With Jim Leyland stepping down, who will soon be the manager with the longest tenure with his current team?
3. Who holds golf's record for earnings in a year?
4. Name the last non-Brave to win the Cy Young award in the NL.
5. When was the last time Nebraska lost a regular season football game prior to this week's loss to Arizona State.

Answers:

1. 1987, 2. Tom Kelly, 3. Greg Norman, 1995, 4. Greg Maddux, Chicago Cubs, 5. Nov. 1992

Women rebound, shutout Holy Cross

By Eric Keber
Bucknellian Staff Writer

The Bucknell women's soccer team (4-2) improved its Patriot League record to 2-1 with a 2-0 victory over Holy Cross at home. It was the season's first shutout for the Bison. Unfortunately, the victory followed a tough 1-0 loss to Army last Wednesday, which only made the players more eager for their victory.

"The Army game was a game between teams of equal ability," remarked head Coach Toby Lovecchio. "We played a decent first half but in the second half they (Army) came out focused. Physically we were ready, mentally we weren't there."

In the Holy Cross game Leigh Raymont '98 scored Bucknell's first goal with 25:54 left in the first half. She was assisted on the goal by Liz Woodrow '98.

About five minutes later Sarah Stopper '00 scored her first goal of her Bucknell career to complete the Bison's scoring.

"It looked like it was going to go over," said Stopper, who is playing for the injured Karen Spall '98, "but it kind of dropped into the corner."

Stopper has started all of the Bison's six games and has proved to be a worthy replacement. "Sarah has a phenomenal work rate," notes Lovecchio, "she never stops."

Becky Snover '97 was in goal for the entire game and made seven saves. She has 29 saves this year and only needs 39 more to break the all-time Bucknell record.

Lovecchio hoped that his team would play Holy Cross with more fervor than they did against Army.

"We concentrated on intensity and being focused," Lovecchio said. "We were there mentally and we didn't have many shots but we had a lot of corners which created a lot of scoring opportunities. They played with a lot of heart and enthusiasm."

The Bison travelled to UPenn on yesterday and will go to Colgate Saturday and Cornell Tuesday.

"Both teams are evenly matched," stated Lovecchio in his analysis of the next game. "It's going to be another game that depends on who gets the breaks. I know we'll be there mentally."

The Bison have outscored their opponents this year 13-7 and outshot them 84-59.

Betna Kim—The Bucknellian

Captain Amy Green '97 (left) and Katie McElligot '00 stop a Holy Cross attacker in her tracks in the Bison's 2-0 victory on Saturday. The team improved its Patriot League record 2-1.

Club Sport Report

Women ruggers stifle Swarthmore

Bison dominate 24-0

By Karen Dziuma
Bucknellian Team Correspondent

Last Saturday, the Bucknell Women's Rugby Club crushed Swarthmore by a score of 24-0. The team played well in the first league game of the season, as everyone worked together for a victory.

The A side started off the game strong as Bucknell dominated from the opening whistle. Their level of play really picked up when Cara DeVito '99 scored the first try of the game. Bucknell continued to control the game for the rest of the first half which included a try by Anne Mayer '98 and a field goal kicked by freshman Lindsay Vietor. The second half began with another try by Mayer.

The Ruggers proved their desire to beat the number five ranked team in the league when forward Beth Boetzer '98 charged through Swarthmore's line to score her first try of the season. Vietor then displayed her kicking skills as she knocked in her second field goal of the day to make the score 24 -0.

The ruggers who scored could not have accomplished their tries without the strong performance by the rest of the team. The forwards did an outstanding job of consistently being the first to get to the ball, beating Swarthmore every time. Co-captain Jessie Liddell '99, Andrea Maas '98, Heather Leaf '97 and Deb Yates '98 played an incredible game and kept the rest of the pack going especially when the heat became almost unbearable. The backs did a great job of keeping the ball moving forward throughout the entire game. Co-captain Megan McCarthy '99, Megan Kull '98, and Alyssa Gady '98 were the powerhouses behind the back line. Overall, Bucknell played a strong game against a talented team and Coaches Bob Langton '77 and Jim Mathias are looking forward to an exciting season for Bucknell's team.

The B side game was packed with excitement as there was no score until the end of the second half. Forward Cheri Kantola '99 managed to push the ball into the try zone from a scrum down to put Bucknell on the board. Some Bucknell players volunteered to play for Swarthmore since they did not have enough players and ironically, it was a Bucknell player, Kelly Creech '99, who tied the game at 5-5 minutes after the score by Bucknell. Most of the B side were first time players who showed a better understanding of the game in a remarkably short time.

Outing Club reaches new heights on first trip of the year

Photo courtesy of Phil Boothby

By Phil Boothby
Bucknellian Team Correspondent

On Saturday, a group of Bucknell Outing Club members found themselves putting on shoes three sizes too small, tying knots in ropes, and clinging onto dime-thin cracks. This was the first rock climbing trip of the semester for the club and it was a great success. About 15 students ranging from first-timers to the so called "rock-jocks" were taken to a nearby quarry to scale the 80 foot walls of limestone.

Climbing is getting more popular on campus as the students who take these trips get addicted to the sport. "You get such a great feeling of accomplishment when you reach the top of the climb!" says junior Aislinn Moore.

The trips are led by a competent group including staff, students, and local experts. When the students first arrive they are given a quick lesson in knot tying and they are ready to climb. The Outing Club has three more trips planned for the semester. When the weather turns bad they plan to take the climbers to a new indoor climbing gym in Selinsgrove called Get a Grip.

The Outing Club members find that climbing and other outdoor activities are a great way to get off campus, meet people, and take a break from books.

Look who is bringing in the millenium

BY ERIC BLOEM
Bucknellian Staff Writer

With an increase in applications for admission and a decrease in class size, the Class of 2000 has been one of the University's most competitive classes to date.

Mark Davies, director of admissions, said, "the biggest difference [in the class of 2000] is that there were 11.6% more applicants." Davies said that he was pleased with so much interest in the University and that with this interest the University can be more selective. Of the 7,364 applicants this past year, the University granted admission to 49 percent. Davies stated that this "was a good mark for Bucknell to reach."

This Aug., 894 students arrived on campus to begin their college careers. Of those students, 53 percent were in the top 10 percent of their high school class. Seventy-nine percent of the first-year students were in the top 20 percent of their high school class. The average median Scholastic Aptitude Test (SAT) scores were 580-650 in the verbal section and 600-660 in the math section.

Mark Davies, the director of admissions, is looking to the future.

Demographically, the Class of 2000 is fairly diverse. As with many of the University's past classes, the Class of 2000 has a strong representation of students from Pennsylvania (280), New York (138), and New Jersey (125). International students total 14.

"Internationally we've made some progress, but we would like to have more interest in the west coast," said Davies.

To facilitate more interest from students in the western United States, the University has recently established a branch office to make the University better known. "We would like to get above 10 percent of the freshman class from the west coast," Davies said.

Davies hopes to accomplish this goal in three years. Currently in this year's class, 34 students are from the western states.

One area that the admissions office hopes to improve is that of ethnicity. Davies said, "One area

Capital Campaign to kick off in November

BY TARA DRISCOLL
Bucknellian Staff Writer

A transformation and rebuilding campaign has been proposed to relieve the deteriorating Carnegie building and the 19th century Music and Art building.

A five-year Capital Campaign, what administrators hope will be a successful way to attain funds through endowments, donations, and grants, is to begin in November

If all goes as planned, said Barry Maxwell, vice president for administration, the raised money will be divided between both financial aid and the renovations of academic and athletic buildings.

"There is a general recognition of facility needs," Maxwell said. "There are facility needs in both the academic areas and the athletic areas. The campaign is supposed to be for five years, but there are factors to consider, such as donor interest and the level to which they follow through with their interest."

A committee was formed a year and a half ago to consider strategic plans for renovation and to develop a plan to do so.

Recently an executive summary of feasibility studies was released detailing possible plans for campus expansion. A visual draft was needed in order to help raise money

Admissions reaches out to west coast

BY KATHRYN ARDINGER
Bucknellian Staff Writer

In the hopes of attracting more students from the west coast to the University, the office of admissions has stationed a staff member in Colorado.

There are 40 to 60 students on average from the west coast in an incoming first year class. Mark Davies, director of admissions, said "we've made some progress and we seem to have anywhere between 40 and 60 students a year from the west coast." Davies includes Colorado, Texas, Arizona, New Mexico, California, Oregon, and Washington as western states.

Davies added, "We seem to have plateaued. We can't seem to get above that 60, so the idea was to put a staff member on a full-time basis on the west coast to work to establish a greater presence for Bucknell."

"Our goal, our hope, is to get to a point where there is close to ten percent of the first-year class" from western states, Davies said. In numbers, that amounts to about 80 to 90 students.

"And whether that is feasible or not I

Spring brings new registration system

BY TRACY THIFFAULT
Bucknellian Staff Writer

This spring, students will be registering for fall classes using a new computeerized system to choose their schedules.

With the BANNER system, students will have access to more information about classes, and the registrar will know maximum class numbers before registration. Students will have to make less adjustments to their schedules and be more apt to get the courses requested.

The three year BANNER system project will affect all areas of the campus including admissions, the registrar's office, and financial aid. It will provide a more organized, systematic approach to these processes and make the University comparable to schools such as Colgate University, Wellesley College, and the University of Richmond. These schools currently use the BANNER system and are very pleased with it's success.

Most of the changes will be seen only within the administration. However, students will see a change when scheduling for classes next spring. Each course will be renumbered.

Plans set to consolidate CCS and Bertrand Library

BY BETH MARTIN
Bucknellian Staff Writer

In an effort to facilitate the Bertrand Library's increasing reliance on technology, the University recently created a new associate vice president position. The appointee, who has not yet been chosen, will head Computer and Communication Services and the Ellen Clark Bertrand Library.

The associate vice president will replace Ann DeClerk, director of the library, who will retire in June, and Gene Spencer, acting director of CCS.

Some faculty and students are concerned that the new associate vice president will favor either a traditional library, leaving the University technologically behind, or a digital library, delivering information impersonally and mechanically.

DeClerk discussed the variety of current attitudes towards technological advances in the library.

"Some people don't think we're moving fast enough. Others are not used to it [digital aids] and don't think they'll have access to the new world," DeClerk said.

Dan Little, vice president of academic affairs and head of the search team responsible for hiring the associate vice president, said that his committee is seeking someone who is "equally sensitive to and sympathetic towards" both sides and will be "fully committed to continuing the very high level of service that the library and CCS both provide."

Little said that he and his committee have not prepared "a precise definition" of the associate vice president's responsibilities to leave him or her some freedom to define the role. He added that the search team is looking for someone who will "work productively and not tilt too heavily" towards providing traditionally accessible material or digitally accessible material to faculty and students.

DeClerk is excited about the integration of CCS and the library under the new associate vice president.

"Libraries are no longer only books in a building, but also access to information in whatever form and whatever location the information exists in," she said.

Nevertheless, DeClerk said, "While using technological aids, we heavily weigh on providing information through print and microfilm." Furthermore she added, "It would be impossible to convert the library's wealth of information into electronic form.

DeClerk is optimistic about

BUCKNELL UNIVERSITY — LEWISBURG, PENNSYLVANIA 17837

THE BUCKNELLIAN

Look who is bringing in the millenium

BY ERIC BLOEM
Bucknellian Staff Writer

With an increase in applications for admission and a decrease in class size, the Class of 2000 has been one of the University's most competitive classes to date.

Mark Davies, director of admissions, said, "the biggest difference [in the class of 2000] is that there were 11.6% more applicants." Davies said that he was pleased with so much interest in the University and that with this interest the University can be more selective. Of the 7,364 applicants this past year, the University granted admission to 49 percent. Davies stated that this "was a good mark for Bucknell to reach."

This Aug., 894 students arrived on campus to begin their college careers. Of those students, 53 percent were in the top 10 percent of their high school class. Seventy-nine percent of the first-year students were in the top 20 percent of their high school class. The average median Scholastic Aptitude Test (SAT) scores were 580-650 in the verbal section and 600-660 in the math section.

Demographically, the Class of 2000 is fairly diverse. As with many of the University's past classes, the Class of 2000 has a strong representation of students from Pennsylvania (280), New York (138), and New Jersey (125). International students total 14.

"Internationally we've made some progress, but we would like to have more interest in the west coast," said Davies.

Alum selected as Kennedy Center intern

The John F. Kennedy Center for the Performing Arts has selected Mythili Soundararajan, a 1996 University graduate, as an intern for the fall 1996 season.

She will be working in the National Symphony Orchestra (NSO) Press Office, where she will be assisting press representatives with media coverage for NSO and institutional events.

Candidates to preach at Rooke Chapel

The search committee for a University chaplain has selected three candidates from a pool of 100 to visit campus and preach in Rooke Chapel.

Jill Crainshaw, a doctoral candidate in Preaching and Worship at the Union Theological Seminary in Richmond Va., will preach on Oct. 6.

Kathleen Chesson, the pastor of Henson Valley Christian Church in Ft. Washington, Md., will preach on Oct. 20.

Ian Oliver, Interim Chaplain for the University, delivered a sermon on Sept. 29.

The candidates will participate in the regular Sunday worship service from 11 a.m. to noon at Rooke Chapel. From 2 p.m. to 3:15 p.m. the candidates will be available to respond to questions and concerns.

Clingham honored as National Endowment for the Humanities Chair in the Humanities

Greg Clingham, associate professor of English, is the newest recipient of the National Endowment for the Humanities Chair in the Humanities.

Clingham has taught at the University for three years. Previously, Clingham taught at Fordham University in New York for seven years and at Cambridge University for six years.

Clingham is also a member of the Editorial Board of the Bucknell University Press.

COLORADO

from page 1.

think depends on a lot of things. We can't move ourselves closer to those places, to those states," Davies said. "What we need to do is to make sure that the students are well aware of the opportunities at Bucknell."

Shena Molyneaux, who has worked in the University's admissions office for the past six years, moved to Colorado in August. What began as a joint effort between Davies and Molyneaux has developed into a three-year pilot project, which will be evaluated every year.

Last fall, Davies and Molyneaux drafted a proposal and presented it to the president's staff and the Board of Trustees. The idea sprang out of the effort to increase the geographic distribution of students on this campus.

Molyneaux continues to do much of the same kinds of work that she did while at the University. "She'll probably visit over 100 schools in the state of California this fall. She'll visit... about 15 in Texas and 69 in Colorado," Davies said.

"She is also making herself available to interview students in major cities on the west coast," Davies said.

"We're hoping to... have greater contact with the counselors and then most importantly with the students," Davies said.

"I think it's an exciting opportunity for Bucknell. We're not sure how it is going to work out for us. I don't think we're going to lose ground. Everyday I think we're going to gain visibility," Davies said.

One of Molyneaux's major objectives while in Colorado is to work with the alumni on the west coast who participate in the alumni interviewing program. She will try to update them with the University.

Molyneaux works out of an office in her home and is frequently in touch with the campus' admissions office. "We've connected her with email, she has a computer, voice mail and... a post office box for mail. I communicate with her everyday," Davies said.

One of the reasons that Colorado is such an appealing location is that "the accessibility to any west coast city from Colorado is very, very good," Davies said.

"To work on the diversity issue, I think is really important for us," Davies said. "There are all types of diversity and we feel that there is a tremendous diversity in students on the west coast who should be thinking about Bucknell," Davies added.

Davies highlighted a few features that may attract students from the west to the University.

"I don't think there are many schools like Bucknell on the west coast. First of all, there are a lot of very good schools out there, but most of them are large state institutions. Bucknell is not large, but I don't think that we are small either. We are a comprehensive university with a student population of 3400," he said.

"We can promote the interaction between student and faculty very well," Davies added.

Davies does not foresee any other pilot projects right now. He said that the admissions staff does a lot of traveling as it is. "Our staff right now, this fall alone, will be going to the Southeast, Florida... the Midwest and New England," he said.

Also, Julie Jamieson, assistant director of admissions, is currently traveling in Europe.

BANNER

From page 1.

With the new system, courses will be numbered according to level of study. First-year seminars will be listed under 100, while graduate courses will be listed in the 600 range. Instead of two letters before the number, there will be four. Biology classes will have BIOL instead of BI. This will enable graduate schools and employment offices to read transcripts with ease.

Currently, some prerequisite courses are listed with higher catalog numbers than advanced major courses. Some first year seminars are listed in the three or four hundred level. This numbering system occurred because, over the years, the University has simply run out of numbers for courses.

The scheduling process for students will remain virtually the same. All students will receive a booklet on the course conversions to make selecting courses easier. The cards used to request courses will be smaller.

Registration for fall classes is scheduled to begin in April. The registrar's office will be running a mock registration before February to ensure the success of the program. They will use sample registrations to weed out any problems.

The University bought the BANNER software from a company outside of Philadelphia. The company makes regular visits to Bucknell for training and checkup purposes. Under direction from the project coordinator, Dennis Swank, each department is independently working on instituting the program.

> *"It will serve the institution well. This is just an opportunity for a new computer system allowing us to start totally over again."*
> *—Robert Dunkerly, associate registrar*

The BANNER system is a stepping stone for many other technological opportunities in the future. The University hopes to someday be networked and do all registrations on line. It would eliminate almost all paperwork and provide much easier access for students and professors.

Robert Dunkerly, the associate registrar, is very excited about the advancement. He says "it will serve the institution well. This was just an opportunity for a new computer system allowing us to start totally over again."

Currently, the registrar's office is devising a plan to integrate first-year student pre-registration into the BANNER system.

PUBLIC SAFETY LOG

September 25, 1996

INSTITUTIONAL VANDALISM– A University employee reported that a sign was removed from the exterior of the Weis Center and the restroom was vandalized. The investigation is continuing.

September 26, 1996

INFORMATION/DISTURBANCE/LIQUOR LAW VIOLATION(S) – A Public Safety Officer responded to Theta Chi Fraternity for a possible fight in progress; however, the report was unfounded. Later, a Public Safety Officer again responded to the fraternity for a disturbance. A University student was questioned, cited for underage consumption, and returned to his room.

LARCENY – A University employee reported that an unknown person had stolen a granola bar from the Langone Center Convenience Store. The investigation is continuing.

September 27, 1996

INFORMATION/EAST BUFFALO TOWNSHIP POLICE DEPARTMENT– East Buffalo Township Police Department reported to a Public Safety Officer that a University student observed two males fleeing the parking area of Theta Chi Fraternity. A crowbar was found in the vicinity of one of the parked vehicles, which sustained no damage. The investigation is continuing.

ALCOHOL VIOLATION/UNDERAGE POSSESSION – A University student was cited for underage possession at Swartz Field.

September 28, 1996

CRIMINAL MISCHIEF – A Resident Assistant reported to a Public Safety Officer that unknown person(s) broke two window panes at Swartz Hall. The investigation is continuing.

September 29, 1996

MEDICAL EMERGENCY/INJURED FOOTBALL PLAYER (NON-BU) – A Public Safety Officer responded to the practice field for an injured football player. The non-Bucknell student was transported by ambulance to Evangelical Hospital Emergency Room, where he was treated and released.

INSTITUTIONAL VANDALISM – A Resident Assistant reported to a Public Safety Officer that unknown person(s) broke four window panes in Swartz Hall over the weekend. The investigation is continuing.

September 30, 1996

INFORMATION/POSSIBLE HARASSING EMAIL MESSAGES – A University student reported to a Public Safety Officer having received several e-mail messages over the past two weeks that the student found to be disturbing. The investigation is continuing.

October 1, 1996

HARASSMENT BY COMMUNICATION – A University student reported to a Public Safety Officer having received a call on Sept. 26 in reference to an unknown person who ordered pizza for that room. No delivery was made and the investigation is continuing.

INSTITUTIONAL VANDALISM – A University student admitted to accidentally breaking a window at Swartz Hall, while playing on Sept. 29. The student agreed to pay for the damage.

Lewisburg meningitis case calls for awareness

By Karin Davidson
Bucknellian Staff Writer

Concerns have been voiced as a Lewisburg High School student was diagnosed this week with meningococcal meningitis.

However, as Donald Stechschulte, medical director of the Student Health Center, pointed out, the case seems to be an isolated event as no new cases have surfaced.

"There's always room for appropriate concern, but no reason to panic. If you have symptoms you're concerned about, we're here to help," Stechschulte said.

Meningitis is an inflammation of the linings of the brain and spinal cord caused by either viruses or bacteria.

Early symptoms include a fever, severe sudden headaches accompanied by mental changes such as lethargy, and neck stiffness. A rash is also a warning of the disease.

Approximately 10 percent of the general population carry meningococcal bacteria in the nose and throat in a harmless state.

During meningococcal disease outbreaks, the percentage of people carrying the bacterium may approach 95 percent, yet the percentage of people who develop meningococcal disease is less than 1 percent.

Meningococcal bacteria cannot usually live for more than a few minutes outside the body. As a result, they are not easily transmitted in water supplies, swimming pools, or by routine contact with an infected person in casual interaction such as in a classroom or dining room.

People who have haad intimate contact with the oral secretions of a person diagnosed with meningococcal disease are at risk for contracting the disease and should receive prophylactic medication immediately. Examples of intimate interaction include kissing and sharing utensils.

To minimize the risk of contracting meningitis, one can maximize his or her body's immune system by incorporating a lifestyle that includes a balanced diet, adequate sleep, appropriate exercise and avoidance of stress.

Information supplied by the Student Health Center

> *"There's always room for appropriate concern, but no reason to panic. if you have symptoms you are concerned about, we're here to help."*
> *—Donald Stechshulte, medical director of the Student Health Center*

Meningitis Quick Facts

•Meningitis is an infection of brain membranes, called meninges:
There are two types:
Viral
•more common
•usually occurs in late spring and summer
•symptoms include stiff neck, headache, nausea, vomiting, rash
•most cases run short, uneventful course
•caused by a virus, Antibiotics are not effective
Bacterial
•occurs rarely and sporadically throughout the year, though outbreaks tend to occur in late winter and early spring
•can cause grave illness
•requires early diagnosis and treatment
•persons who have had intimate contact with infected person require treatment
•untreated cases can be fatal

—Each year in the U.S. there is about 1 case of meningitis per 100,000 people.

Information supplied by the Student Health Center

2000

From page 1

of disappointment was with ethnicity." He maintained that one of the admissions offices greatest goals is to increase the diversity on campus. The Class of 2000 has 25 African Americans, three Native Americans, 26 Hispanic Americans, and 32 Asians.

The majority of the Class of 2000 is undecided on their majors. The most popular majors are engineering, sciences, and social sciences.

Mark Kerr, director of the Career Development Center sees a bright future for this particular class.

"Certainly the economy is more favorable now than in the past. There is a much brighter job market now and through the next few years," Kerr said

Kerr said that careers, particularly in technology and wellness will grow in the future. He suggested such jobs as computer programming, system analysis, as well as, working with the elderly and within the healthcare system.

Kerr said that it is most important for students to chose a career in which one has the most interest. "Companies don't hire majors, they hire individuals."

> *"So far I've enjoyed Bucknell; over the next four years I hope to gain as much expirence as I can."*
> *—Carinne Davis '00*

Kerr stressed that it is most important for the Class of 2000 to seek internships. More than ever companies are seeking well-rounded students with practicle experience.

Carinne Davis '00 has already gotten a head start on her career plans. She plans on majoring in psychology and minoring in child development. "Over this past summer I worked in a day care center observing children."

"So far I've enjoyed Bucknell; over the next four years I hope to gain as much experience as I can," she said.

Kate Dobbs '00, from Connecticut, said, "Since I went to boarding school, it hasn't been tremendously different. I've met a lot of people through classes and extracurricular activities."

> *"Since I went to boarding school, it hasn't been that different. I've met a lot of people through classes and extra-curricular activities."*
> *—Kate Dobbs '00*

Dobbs is contemplating a mathematics major and wishes to pursue a medical degree.

While much of the focus around campus is on the Class of 2000, the Admissions Office is already looking ahead. "[This] class is history," said Davies. " The focus now is on the Class of 2001."

Alum selected as Kennedy Center intern

The John F. Kennedy Center for the Performing Arts has selected Mythili Soundararajan, a 1996 University graduate, as an intern for the fall 1996 season.

She will be working in the National Symphony Orchestra (NSO) Press Office, where she will be assisting press representatives with media coverage for NSO and institutional events.

Candidates to preach at Rooke Chapel

The search committee for a University chaplain has selected three candidates from a pool of 100 to visit campus and preach in Rooke Chapel.

Jill Crainshaw, a doctoral candidate in Preaching and Worship at the Union Theological Seminary in Richmond Va., will preach on Oct. 6.

Kathleen Chesson, the pastor of Henson Valley Christian Church in Ft. Washington, Md., will preach on Oct. 20.

Ian Oliver, Interim Chaplain for the University, delivered a sermon on Sept. 29.

The candidates will participate in the regular Sunday worship service from 11 a.m. to noon at Rooke Chapel. From 2 p.m. to 3:15 p.m. the candidates will be available to respond to questions and concerns.

Clingham honored as National Endowment for the Humanities Chair in the Humanities

Greg Clingham, associate professor of English, is the newest recipient of the National Endowment for the Humanities Chair in the Humanities.

Clingham has taught at the University for three years. Previously, Clingham taught at Fordham University in New York for seven years and at Cambridge University for six years.

Clingham is also a member of the Editorial Board of the Bucknell University Press.

COLORADO

from page 1.

think depends on a lot of things. We can't move ourselves closer to those places, to those states," Davies said. "What we need to do is to make sure that the students are well aware of the opportunities at Bucknell."

Shena Molyneaux, who has worked in the University's admissions office for the past six years, moved to Colorado in August. What began as a joint effort between Davies and Molyneaux has developed into a three-year pilot project, which will be evaluated every year.

Last fall, Davies and Molyneaux drafted a proposal and presented it to the president's staff and the Board of Trustees. The idea sprang out of the effort to increase the geographic distribution of students on this campus.

Molyneaux continues to do much of the same kinds of work that she did while at the University. "She'll probably visit over 100 schools in the state of California this fall. She'll visit... about 15 in Texas and 69 in Colorado," Davies said.

"She is also making herself available to interview students in major cities on the west coast," Davies said.

"We're hoping to... have greater contact with the counselors and then most importantly with the students," Davies said.

"I think it's an exciting opportunity for Bucknell. We're not sure how it is going to work out for us. I don't think we're going to lose ground. Everyday I think we're going to gain visibility," Davies said.

One of Molyneaux's major objectives while in Colorado is to work with the alumni on the west coast who participate in the alumni interviewing program. She will try to update them with the University.

Molyneaux works out of an office in her home and is frequently in touch with the campus' admissions office. "We've connected her with email, she has a computer, voice mail and... a post office box for mail. I communicate with her everyday," Davies said.

One of the reasons that Colorado is such an appealing location is that "the accessibility to any west coast city from Colorado is very, very good," Davies said.

"To work on the diversity issue, I think is really important for us," Davies said. "There are all types of diversity and we feel that there is a tremendous diversity in students on the west coast who should be thinking about Bucknell," Davies added.

Davies highlighted a few features that may attract students from the west to the University.

"I don't think there are many schools like Bucknell on the west coast. First of all, there are a lot of very good schools out there, but most of them are large state institutions. Bucknell is not large, but I don't think that we are small either. We are a comprehensive university with a student population of 3400," he said.

"We can promote the interaction between student and faculty very well," Davies added.

Davies does not foresee any other pilot projects right now. He said that the admissions staff does a lot of traveling as it is. "Our staff right now, this fall alone, will be going to the Southeast, Florida... the Midwest and New England," he said.

Also, Julie Jamieson, assistant director of admissions, is currently traveling in Europe.

BANNER

From page 1.

With the new system, courses will be numbered according to level of study. First-year seminars will be listed under 100, while graduate courses will be listed in the 600 range. Instead of two letters before the number, there will be four. Biology classes will have BIOL instead of BI. This will enable graduate schools and employment offices to read transcripts with ease.

Currently, some prerequisite courses are listed with higher catalog numbers than advanced major courses. Some first year seminars are listed in the three or four hundred level. This numbering system occurred because, over the years, the University has simply run out of numbers for courses.

The scheduling process for students will remain virtually the same. All students will receive a booklet on the course conversions to make selecting courses easier. The cards used to request courses will be smaller.

Registration for fall classes is scheduled to begin in April. The registrar's office will be running a mock registration before February to ensure the success of the program. They will use sample registrations to weed out any problems.

The University bought the BANNER software from a company outside of Philadelphia. The company makes regular visits to Bucknell for training and checkup purposes. Under direction from the project coordinator, Dennis Swank, each department is independently working on instituting the program.

The BANNER system is a stepping stone for many other technological opportunities in the future. The University hopes to someday be networked and do all registrations on line. It would eliminate almost all paperwork and provide much easier access for students and professors.

Robert Dunkerly, the associate registrar, is very excited about the advancement. He says "it will serve the institution well. This was just an opportunity for a new computer system allowing us to start totally over again."

Currently, the registrar's office is devising a plan to integrate first-year student pre-registration into the BANNER system.

> *"It will serve the institution well. This is just an opportunity for a new computer system allowing us to start totally over again."*
> *—Robert Dunkerly, associate registrar*

PUBLIC SAFETY LOG

September 25, 1996

INSTITUTIONAL VANDALISM– A University employee reported that a sign was removed from the exterior of the Weis Center and the restroom was vandalized. The investigation is continuing.

September 26, 1996

INFORMATION/DISTURBANCE/LIQUOR LAW VIOLATION(S) – A Public Safety Officer responded to Theta Chi Fraternity for a possible fight in progress; however, the report was unfounded. Later, a Public Safety Officer again responded to the fraternity for a disturbance. A University student was questioned, cited for underage consumption, and returned to his room.

LARCENY – A University employee reported that an unknown person had stolen a granola bar from the Langone Center Convenience Store. The investigation is continuing.

September 27, 1996

INFORMATION/EAST BUFFALO TOWNSHIP POLICE DEPARTMENT– East Buffalo Township Police Department reported to a Public Safety Officer that a University student observed two males fleeing the parking area of Theta Chi Fraternity. A crowbar was found in the vicinity of one of the parked vehicles, which sustained no damage. The investigation is continuing.

ALCOHOL VIOLATION/UNDERAGE POSSESSION – A University student was cited for underage possession at Swartz Field.

September 28, 1996

CRIMINAL MISCHIEF – A Resident Assistant reported to a Public Safety Officer that unknown person(s) broke two window panes at Swartz Hall. The investigation is continuing.

September 29, 1996

MEDICAL EMERGENCY/INJURED FOOTBALL PLAYER (NON-BU) – A Public Safety Officer responded to the practice field for an injured football player. The non-Bucknell student was transported by ambulance to Evangelical Hospital Emergency Room, where he was treated and released.

INSTITUTIONAL VANDALISM – A Resident Assistant reported to a Public Safety Officer that unknown person(s) broke four window panes in Swartz Hall over the weekend. The investigation is continuing.

September 30, 1996

INFORMATION/POSSIBLE HARASSING EMAIL MESSAGES – A University student reported to a Public Safety Officer having received several e-mail messages over the past two weeks that the student found to be disturbing. The investigation is continuing.

October 1, 1996

HARASSMENT BY COMMUNICATION – A University student reported to a Public Safety Officer having received a call on Sept. 26 in reference to an unknown person who ordered pizza for that room. No delivery was made and the investigation is continuing.

INSTITUTIONAL VANDALISM – A University student admitted to accidentally breaking a window at Swartz Hall, while playing on Sept. 29. The student agreed to pay for the damage.

Lewisburg meningitis case calls for awareness

BY KARIN DAVIDSON
Bucknellian Staff Writer

Concerns have been voiced as a Lewisburg High School student was diagnosed this week with meningococcal meningitis.

However, as Donald Stechschulte, medical director of the Student Health Center, pointed out, the case seems to be an isolated event as no new cases have surfaced.

"There's always room for appropriate concern, but no reason to panic. If you have symptoms you're concerned about, we're here to help," Stechschulte said.

Meningitis is an inflammation of the linings of the brain and spinal cord caused by either viruses or bacteria.

Early symptoms include a fever, severe sudden headaches accompanied by mental changes such as lethargy, and neck stiffness. A rash is also a warning of the disease.

Approximately 10 percent of the general population carry meningococcal bacteria in the nose and throat in a harmless state.

During meningococcal disease outbreaks, the percentage of people carrying the bacterium may approach 95 percent, yet the percentage of people who develop meningococcal disease is less than 1 percent.

Meningococcal bacteria cannot usually live for more than a few minutes outside the body. As a result, they are not easily transmitted in water supplies, swimming pools, or by routine contact with an infected person in casual interaction such as in a classroom or dining room.

People who have haad intimate contact with the oral secretions of a person diagnosed with meningococcal disease are at risk for contracting the disease and should receive prophylactic medication immediately. Examples of intimate interaction include kissing and sharing utensils.

To minimize the risk of contracting meningitis, one can maximize his or her body's immune system by incorporating a lifestyle that includes a balanced diet, adequate sleep, appropriate exercise and avoidance of stress.

Information supplied by the Student Health Center

> *"There's always room for appropriate concern, but no reason to panic. if you have symptoms you are concerned about, we're here to help."*
> *—Donald Stechshulte, medical director of the Student Health Center*

Meningitis Quick Facts

•Meningitis is an infection of brain membranes, called meninges:

There are two types:

Viral
- **more common**
- **usually occurs in late spring and summer**
- **symptoms include stiff neck, headache, nausea, vomiting, rash**
- **most cases run short, uneventful course**
- **caused by a virus, Antibiotics are not effective**

Bacterial
- **occurs rarely and sporadically throughout the year, though outbreaks tend to occur in late winter and early spring**
- **can cause grave illness**
- **requires early diagnosis and treatment**
- **persons who have had intimate contact with infected person require treatment**
- **untreated cases can be fatal**

—Each year in the U.S. there is about 1 case of meningitis per 100,000 people.

Information supplied by the Student Health Center

2000

From page 1

of disappointment was with ethnicity." He maintained that one of the admissions offices greatest goals is to increase the diversity on campus. The Class of 2000 has 25 African Americans, three Native Americans, 26 Hispanic Americans, and 32 Asians.

> *"So far I've enjoyed Bucknell; over the next four years I hope to gain as much expirence as I can."*
> *—Carinne Davis '00*

The majority of the Class of 2000 is undecided on their majors. The most popular majors are engineering, sciences, and social sciences.

Mark Kerr, director of the Career Development Center sees a bright future for this particular class.

"Certainly the economy is more favorable now than in the past. There is a much brighter job market now and through the next few years," Kerr said

Kerr said that careers, particularly in technology and wellness will grow in the future. He suggested such jobs as computer programming, system analysis, as well as, working with the elderly and within the healthcare system.

Kerr said that it is most important for students to chose a career in which one has the most interest. "Companies don't hire majors, they hire individuals."

Kerr stressed that it is most important for the Class of 2000 to seek internships. More than ever companies are seeking well-rounded students with practicle experience.

Carinne Davis '00 has already gotten a head start on her career plans. She plans on majoring in psychology and minoring in child development. "Over this past summer I worked in a day care center observing children."

"So far I've enjoyed Bucknell; over the next four years I hope to gain as much experience as I can," she said.

Kate Dobbs '00, from Connecticut, said, "Since I went to boarding school, it hasn't been tremendously different. I've met a lot of people through classes and extracurricular activities."

> *"Since I went to boarding school, it hasn't been that different. I've met a lot of people through classes and extra-curricular activities."*
> *—Kate Dobbs '00*

Dobbs is contemplating a mathematics major and wishes to pursue a medical degree.

While much of the focus around campus is on the Class of 2000, the Admissions Office is already looking ahead. "[This] class is history," said Davies. " The focus now is on the Class of 2001."

RENOVATIONS

From Page 1

within the Campaign. The drafts were drawn to help give administration and donors an idea of how much the University will need to spend on the project.

The buildings detailed in the executive summary may not necessarily become the final plans. University President, William Adams, stressed that these proposals are highly conceptual, not concrete plans.

"It is premature to identify specifics now," Maxwell said. "At this point in time we recognize that changes must be made."

An art facility is a possibility, which should include most of the art work from the Art Barn, a building located across Route 15.

A renovated gymnasium, swimming pool and fieldhouse facility are part of the conceptual renovations. Also included in the proposal are a music building and psychology/geology building.

Projects outside of the campaign are the renovation of residence halls Harris, Hunt, and possibly Vedder. Residence halls are not included in the Campaign Adams said, becasue they generate their own revenue

Maxwell noted that the improvements to the dormitories will continue through the summers to come—a continual process, but nothing immediate. Larison Hall has already undergone some changes, as have Carey House and Bucknell Cottage.

The Mods, 25-year-old temporary housing units, "are old and will need to be replaced eventually. Six of the Mods have undergone some sort of renovation over the summer," Maxwell said.

The upgrading program to repair the Mods is ongoing. Adams said that by the end of the year, the administration will know what they want to do regarding the Mods, and then they will move forward from there.

Adams will take on a lead role in initiating the five-year campaign. With a new strategic financial plan, he looks to allocate the funds of the University successfully so that renovation can take place in those areas which need it most.

His plan began in late spring of '95 and will continue as the academic and athletic renewals and transformations take place.

The consensus on campus is that changes must be made, and that the Carnegie building is an important place to start.

Edward Cotter, professor of geology, would like to see a new building that looks as nice as the chemistry building.

"When a building has outlived its life, it's time for a change. Fifteen years ago Carnegie was judged to be the worst facility on campus," Cotter said. "The plumbing is terrible, the heating, the basement has leaks in the ceiling."

While administrators hope that the new buildings will become a reality, they are not sure what will happen to the old ones. Adams did not rule out the possibility of tearing the buildings down.

There is "no comparison between these buildings and Taylor," said Adams, referring to the Music and Art and Carnegie buildings. Taylor Hall was renovated a year and one half ago because it was a historical building.

The Carnegie building is historically significant, being the University's first library. The inside, for the most part, has lost its antiqueness, because it was gutted out years ago.

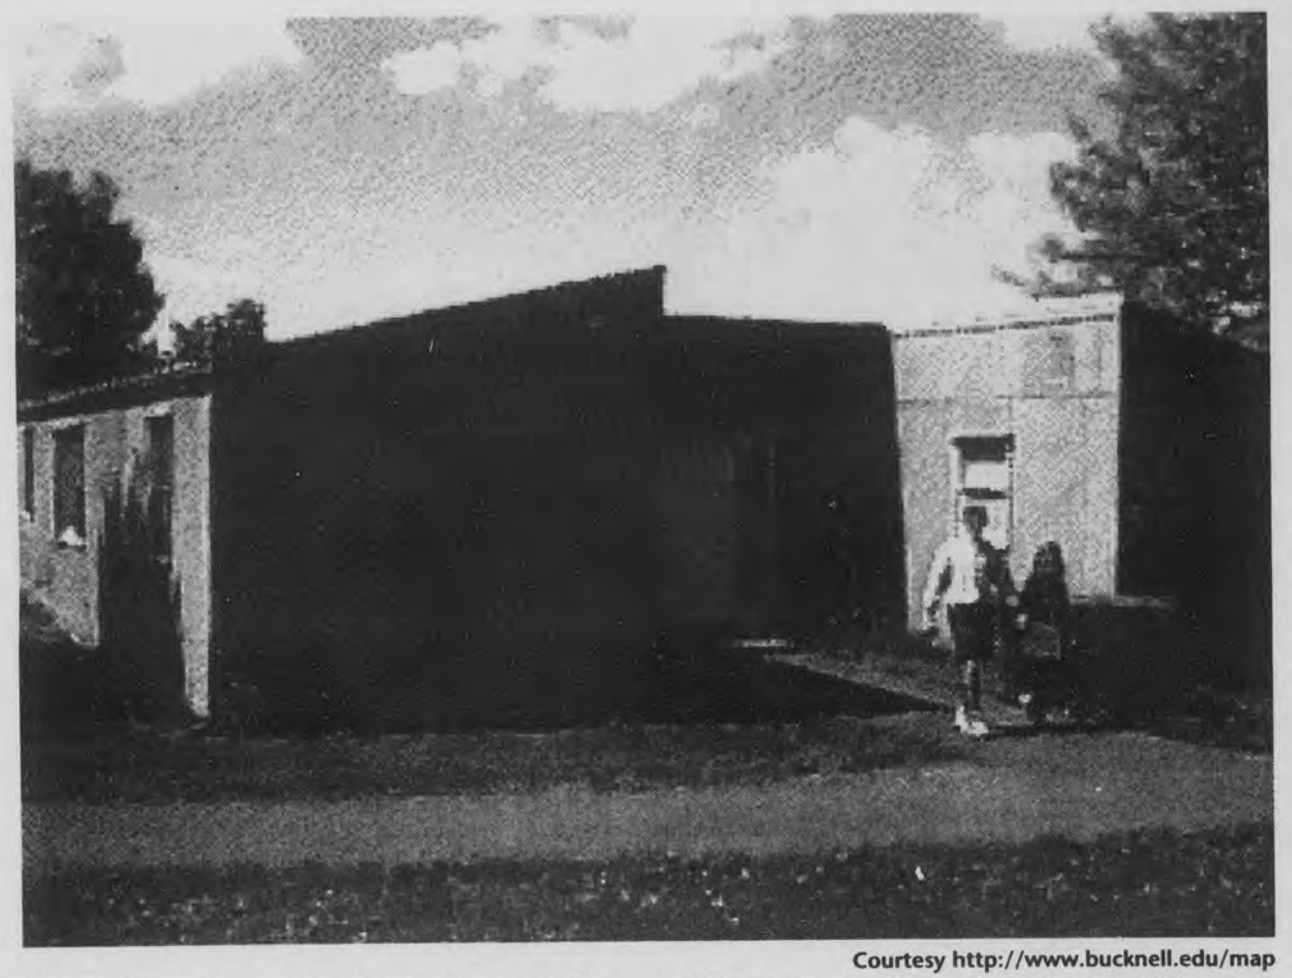
But what is left, as Michael Moohr, associate professor of economics, argues, is the beauty of the outside architecture, not seen anywhere else on campus.

"The Carnegie building is very handsome, visually appealing. The color of the brick, the structure, it's very characteristic of the late 19th century. The mortar joints between the bricks are genuine," Moohr said.

Adams said that if the money was raised through the campaign, it was "not inconceivable" that the campus could see these new buildings within five to eight years.

Courstesy of http://www.bucknell.edu/map

Davis Gymnasium may be slated for renovation in the future, with funds raised through the Campaign.



Courtesy http://www.bucknell.edu/map

The decision on reonvating the Mods, twenty-five year-old housing, may be made at the end of the year.

Courstesy http://www.bucknell.edu/map

The Music and Art Building may be replaced with two new facilities for each of the departments by money raised from the Capital Campaign.

Freas-Rooke Pool may be replaced as part of the Capital Campaign that begins in November.

an undergraduate study abroad program in Classical, Byzantine and Modern Greek studies

BEAVER COLLEGE STUDY IN GREECE

The Beaver College Study in Greece program is designed to provide North American students with a comprehensive academic and cultural experience including opportunities to undertake accredited upper division college courses in Classical, Byzantine and Modern Greek studies. Our program features:

- leadership and teaching by recognized scholars
- intensive use of local resources for field study
- required study of modern Greek
- student apartments in a local neighborhood
- field-study trips
- program-arranged cultural and social activities

Our program emphasizes experiential learning and uses the country and its people as an extension of the classroom. Students enjoy individualized attention and can enroll in a semester or a full-year program with courses on offer in areas as various as Classical Languages and Literature, Modern Greek Politics, the Byzantine Tradition and Mediterranean Ecology.

Speak to your study abroad advisor about Beaver College programs or call for a free catalog today.

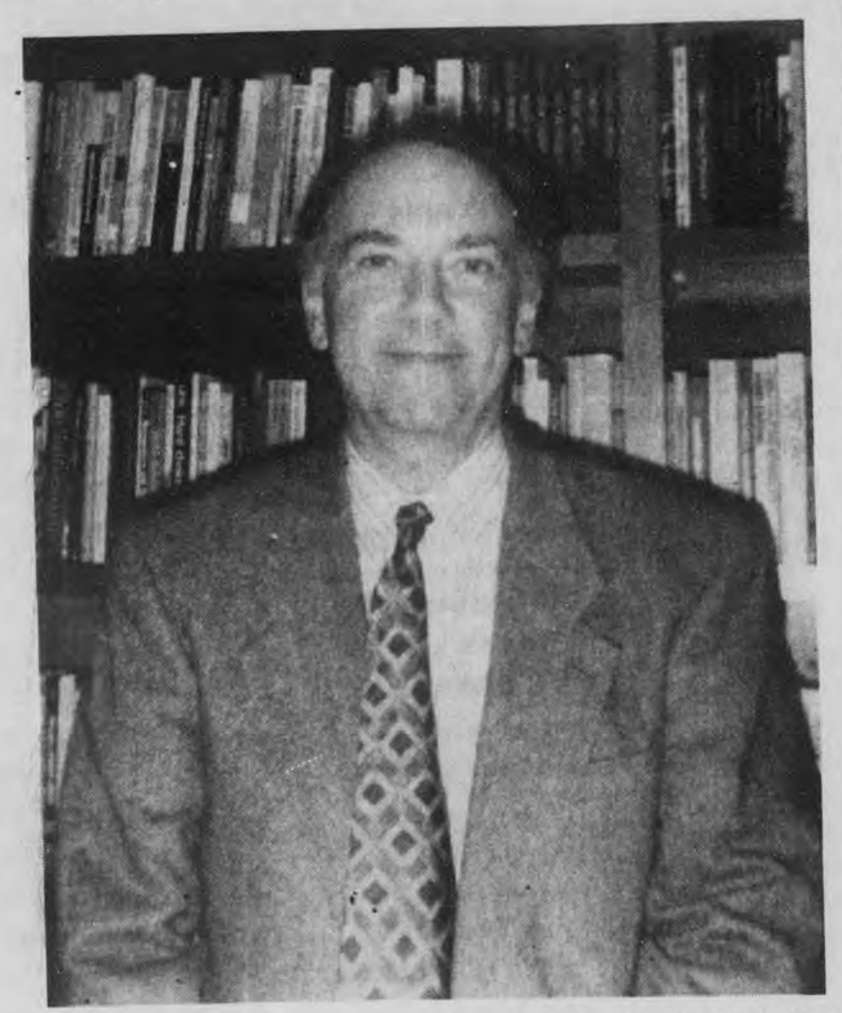
CCS/LIBRARY

from page 1



Maggie McCormick—The Bucknellian

Dan Little, vice president for academic affairs, is heading the search commitee for a director of a newly joined library and CCS.

the person who will be chosen to fill the new position. "The leader, regardless of education and background, will have the needs of the University at heart," DeClerk said.

Little, DeClerk, and Spencer all pointed out that the merging of directors into the new associate vice president position is not a cost-cutting measure.

However, Spencer did discuss the financial advantage of integrating more technology into the library structure. Books and journals are rising astronomically in cost, and the Bertrand Library's budget increases more than inflation each year. Providing digital information would save a significant amount of money, as well as allow an unlimited number of people to access the same information at one time.

Little said he and his search committee are aiming for a June 1, 1997 appointment of the new associate vice president.

Courtesy of http://www.bucknell.edu/map

Gene Spencer's position as the director of CCS will be assumed by the appoinment of a new associate vice president.

News Briefs

National News

Defense seeks separate trials for suspects in Oklahoma City bombing

DENVER — Defense experts in the Oklahoma City bombing case testified yesterday that juries are more likely to impose the death penalty when suspects are put on trial together than when they are tried separately.

Attorney Bryan Stevenson, testifying on the first day of three days of pre-trial hearings, said that juries in joint trials tend to "feel like if one did it, both did it, and they should be sentenced the same."

Prosecutors want a single trial. They say much of the evidence and witnesses against the two men, friends since they were in the Army together, will be the same. McVeigh, they allege in court papers, committed the actual bombing, and Nichols was involved in virtually every step of the conspiracy.

Nichols and McVeigh have been charged with conspiracy, murder and use of a weapon of mass destruction in the bombing of the Alfred P. Murrah Federal Building that killed 168 people and injured over 500. If convicted, the two could face the death penalty.

Pentagon: Gulf troop exposure to chemical weapons may have been large

WASHINGTON — The Pentagon admitted Tuesday that it believes troops may have been exposed to chemicals during two explosions at an Iraqi weapons dump in southern Iraq in March 1991. So far, 5,000 troops involved in the first explosion, at a bunker, were being notified of possible exposure. The CIA is doing studies to help determine the scope of the exposure to both explosions.

The new, higher estimate is based on the belief that there were more chemical weapons stored in an open pit destroyed by U.S. troops on March 10, 1991, than in the bunker destroyed a week earlier, Pentagon spokesman Ken Bacon said.

"I just don't think we know at this stage, but we have to think in terms of big numbers — bigger than 15,000 certainly," Bacon said.

Experts believe sarin nerve gas was in the bunker and open pit at the weapons depot known as Kamisiyah.

Asked if the number of troops affected could include seven U.S. Army divisions, a number that could exceed 100,000 troops, Bacon replied, "I don't know, but I think we have to be prepared for the possibility of big numbers. The question will be, 'What was the level of exposure, if any?'"

School defends 'Midol' drug suspension

DAYTON, Ohio — School officials defended their suspension of a 13-year-old honor student who borrowed a packet of Midol from a friend, saying the girl violated the school's drug policy.

Erica Taylor took the over-the-counter pills from a classmate at Baker Junior High School in Fairborn, Ohio, because she felt ill - but then decided not to take them.

When she was found out, the school suspended her for 10 days and ordering her to undergo a drug evaluation or possibly face expulsion.

"The more and more I thought about it, the more ridiculous it became," Erica's father, Dan Taylor, said Tuesday.

"We're real comfortable with our policy, and it's pretty much in line with what most districts do," a school spokeswoman said. "I believe the general public wants safe, drug-free schools."

Taylor who had perfect attendance last year and made the honor roll each of the past three years, can reduce her suspension by attending drug screenings for $100 with later visits costing $90.

Suspension lifted on 2nd-grader accused of sexual harassment

NEW YORK — A second-grader who kissed a classmate and ripped a button off her skirt will return to school today after school officials revoked an earlier decision to suspend the boy for sexual harassment.

De'Andre Dearinge, 7, received a five-day suspension Friday from Public School 104 in Queens for his actions.

School officials met with the boy's parents yesterday and decided to drop the suspension and harassment charges. They also apologized for the way they had handled the situation, including informing the boy's mother of the suspension in a letter, mother Erica White said.

The boy said he kissed a classmate, "because I like her," the New York Daily News reported. He explained ripping off the button as an idea he got from his favorite book "Corduroy," about a teddy bear with a missing button. The boy couldn't say what sex means, the *News* said.

World News

Arafat, Netanyahu agree to continuous talks

WASHINGTON — Israel and the Palestinians agreed to resume intensive and continuous peace talks, with Hebron as their first priority, President Clinton said Wednesday at the conclusion of a two-day emergency Middle East summit.

The first meeting will be held Sunday at Erez on the Israeli-Gaza border. No timetable for the negotiations was made, but talks would focus on the pullout of Israeli soldiers from the West Bank town of Hebron.

Even though no progress was made on key issues, Clinton declared the summit a success. Earlier, Christopher presided over a meeting of Israeli and Palestinian negotiators. State Department spokesman Nicholas Burns said the talks were "quite specific" and both sides "got down into the weeds" about the serious issues between them.

The emergency summit was prompted by an outbreak of fighting in the West Bank and Gaza that left more than 70 dead. The clashes were sparked by the opening of an archaeological tunnel near Muslim holy sites in Jerusalem.

Taliban fighters try to conquer rest of Afghanistan

AFGHANISTAN — A standoff between Taliban soldiers and troops of a powerful northern faction leader threatened to explode into renewed bloodshed Tuesday. Both sides were massing troops along the main road to Central Asia. In Moscow, Russian President Boris Yeltsin proposed a summit of leaders from former Soviet republics to discuss Afghanistan.

The northern provinces controlled by General Rashid Dostum are virtually all that remain outside the Taliban's reach after a two-year campaign to capture the country and to impose its strict version of Islamic law in every corner of Afghanistan.

Dostum has refused to hand over his northern enclave, and although he has not ruled out negotiating with the Taliban fighters, his forces appear ready to fight. Dostum was once an ally of President Najibullah, a brutal dictator condemned as godless by his devout Muslim people. Dostum joined forces with the Islamic rebels who ousted Najibullah in 1992.

Until last week, Najibullah had lived in a U.N. compound in Kabul. When they seized the capital, the Taliban dragged him from his refuge and executed him, along with his brother and two aides.

North Korea threatens as murder mystery unfolds

SEOUL, South Korea — North Korea warned of "serious consequences" on Wednesday over a submarine incident two weeks ago, while the bludgeoning of a South Korean diplomat in Russia led to media speculation that it was making good on previous threats.

Separately, South Korea's defense minister said Seoul should prepare for all-out war from North Korea. His comments were not new, but they added to a sense of alarm.

South Korean troops have either killed or found the bodies of 22 North Korean soldiers who landed by submarine on a South Korean beach.

North Korean officers "indicated that serious consequences, which would be announced, would occur as a result of the deaths of their soldiers," a U.N. Command statement said.

Peruvian airliner with 70 aboard crashes into Pacific

LIMA, Peru — A Peruvian jetliner carrying 61 passengers and nine crew members crashed into the Pacific Ocean early Wednesday.

Navy officials said late Wednesday morning that the body of one male passenger had been recovered, and that their crews had spotted life jackets amid an oil slick where the plane went down.

Peruvian Navy patrols said they spotted the plane's fuselage about 30 miles off the coast. The fuselage was broken in half, said Admiral Jaime Monge, head of Navy Rescue Operations.

The Aeroperu Boeing 757's pilot reported mechanical difficulties shortly after taking off from Lima en route to Santiago, Chile, early yesterday morning, officials said. Officials in the tower at Lima's airport said the pilot asked whether he was over land or sea and requested a rescue plane before the jet fell from the sky.

RENOVATIONS

From Page 1

within the Campaign. The drafts were drawn to help give administration and donors an idea of how much the University will need to spend on the project.

The buildings detailed in the executive summary may not necessarily become the final plans. University President, William Adams, stressed that these proposals are highly conceptual, not concrete plans.

"It is premature to identify specifics now," Maxwell said. "At this point in time we recognize that changes must be made."

An art facility is a possibility, which should include most of the art work from the Art Barn, a building located across Route 15.

A renovated gymnasium, swimming pool and fieldhouse facility are part of the conceptual renovations. Also included in the proposal are a music building and psychology/geology building.

Projects outside of the campaign are the renovation of residence halls Harris, Hunt, and possibly Vedder. Residence halls are not included in the Campaign Adams said, becasue they generate their own revenue

Maxwell noted that the improvements to the dormitories will continue through the summers to come—a continual process, but nothing immediate. Larison Hall has already undergone some changes, as have Carey House and Bucknell Cottage.

The Mods, 25-year-old temporary housing units, "are old and will need to be replaced eventually. Six of the Mods have undergone some sort of renovation over the summer," Maxwell said.

The upgrading program to repair the Mods is ongoing. Adams said that by the end of the year, the administration will know what they want to do regarding the Mods, and then they will move forward from there.

Adams will take on a lead role in initiating the five-year campaign. With a new strategic financial plan, he looks to allocate the funds of the University successfully so that renovation can take place in those areas which need it most.

His plan began in late spring of '95 and will continue as the academic and athletic renewals and transformations take place.

The consensus on campus is that changes must be made, and that the Carnegie building is an important place to start.

Edward Cotter, professor of geology, would like to see a new building that looks as nice as the chemistry building.

"When a building has outlived its life, it's time for a change. Fifteen years ago Carnegie was judged to be the worst facility on campus," Cotter said. "The plumbing is terrible, the heating, the basement has leaks in the ceiling."

While administrators hope that the new buildings will become a reality, they are not sure what will happen to the old ones. Adams did not rule out the possibility of tearing the buildings down.

There is "no comparison between these buildings and Taylor," said Adams, referring to the Music and Art and Carnegie buildings. Taylor Hall was renovated a year and one half ago because it was a historical building.

The Carnegie building is historically significant, being the University's first library. The inside, for the most part, has lost its antiqueness, because it was gutted out years ago.

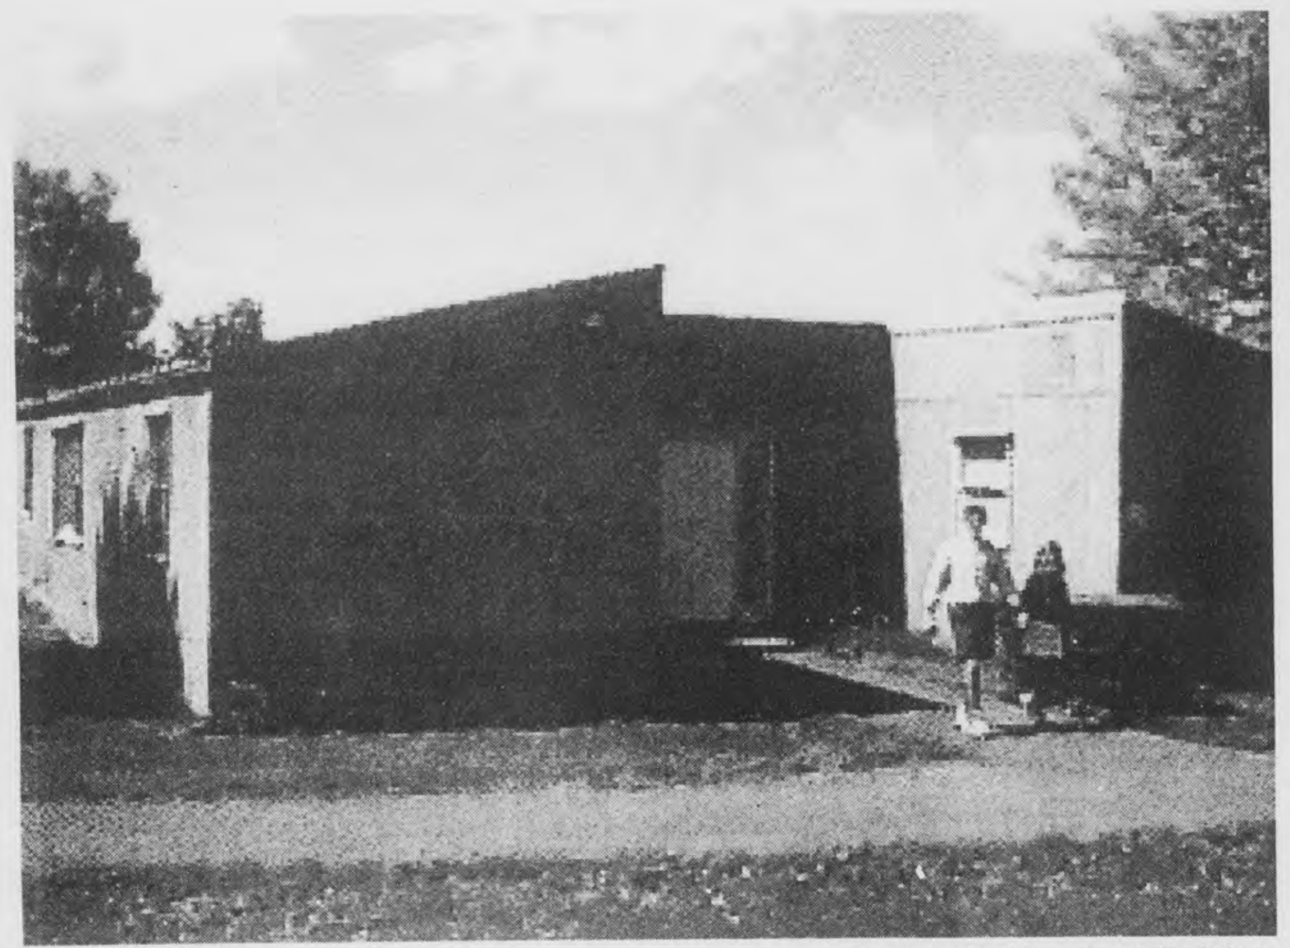
But what is left, as Michael Moohr, associate professor of economics, argues, is the beauty of the outside architecture, not seen anywhere else on campus.

"The Carnegie building is very handsome, visually appealing. The color of the brick, the structure, it's very characteristic of the late 19th century. The mortar joints between the bricks are genuine," Moohr said.

Adams said that if the money was raised through the campaign, it was "not inconceivable" that the campus could see these new buildings within five to eight years.

Courstesy of http://www.bucknell.edu/map

Davis Gymnasium may be slated for renovation in the future, with funds raised through the Campaign.



Courtesy http://www.bucknell.edu/map

The decision on reonvating the Mods, twenty-five year-old housing, may be made at the end of the year.

Courstesy http://www.bucknell.edu/map

The Music and Art Building may be replaced with two new facilities for each of the departments by money raised from the Capital Campaign.

Freas-Rooke Pool may be replaced as part of the Capital Campaign that begins in November.

an undergraduate study abroad program in Classical, Byzantine and Modern Greek studies

BEAVER COLLEGE STUDY IN GREECE

The Beaver College Study in Greece program is designed to provide North American students with a comprehensive academic and cultural experience including opportunities to undertake accredited upper division college courses in Classical, Byzantine and Modern Greek studies. Our program features:

- leadership and teaching by recognized scholars
- intensive use of local resources for field study
- required study of modern Greek
- student apartments in a local neighborhood
- field-study trips
- program-arranged cultural and social activities

Our program emphasizes experiential learning and uses the country and its people as an extension of the classroom. Students enjoy individualized attention and can enroll in a semester or a full-year program with courses on offer in areas as various as Classical Languages and Literature, Modern Greek Politics, the Byzantine Tradition and Mediterranean Ecology.

Speak to your study abroad advisor about Beaver College programs or call for a free catalog today.

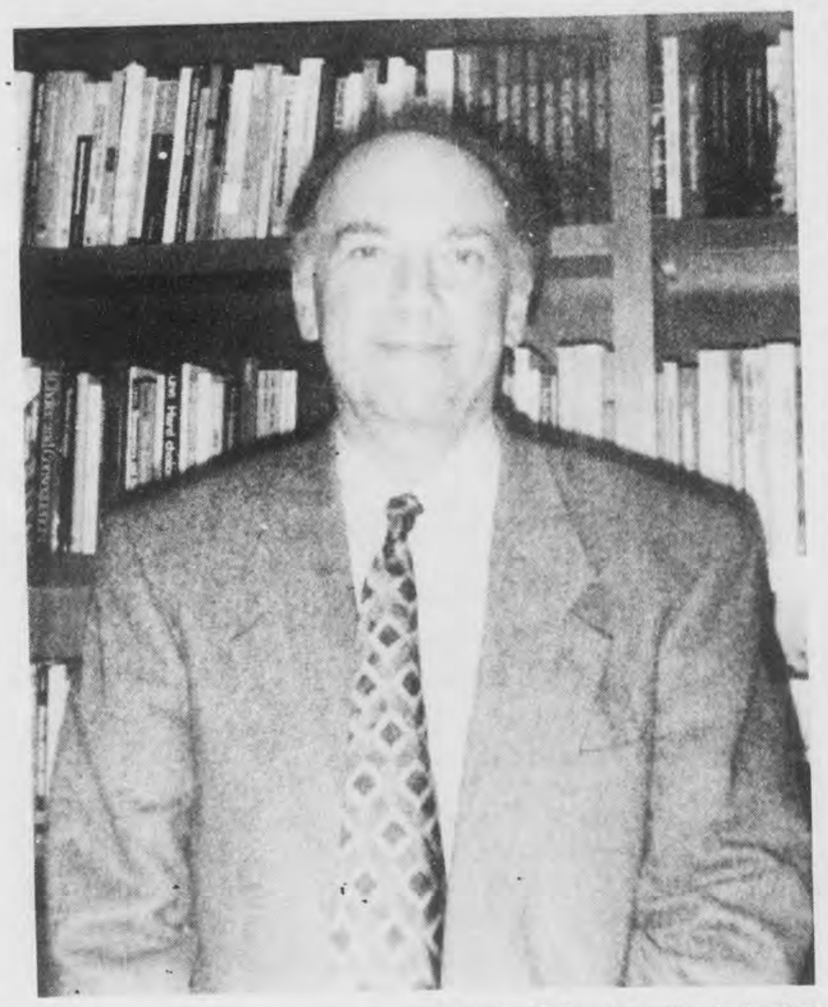
CCS/LIBRARY

from page 1



Maggie McCormick—The Bucknellian

Dan Little, vice president for academic affairs, is heading the search commitee for a director of a newly joined library and CCS.

the person who will be chosen to fill the new position. "The leader, regardless of education and background, will have the needs of the University at heart," DeClerk said.

Little, DeClerk, and Spencer all pointed out that the merging of directors into the new associate vice president position is not a cost-cutting measure.

However, Spencer did discuss the financial advantage of integrating more technology into the library structure. Books and journals are rising astronomically in cost, and the Bertrand Library's budget increases more than inflation each year. Providing digital information would save a significant amount of money, as well as allow an unlimited number of people to access the same information at one time.

Little said he and his search committee are aiming for a June 1, 1997 appointment of the new associate vice president.

Courtesy of http://www.bucknell.edu/map

Gene Spencer's position as the director of CCS will be assumed by the appoinment of a new associate vice president.

National News

Defense seeks separate trials for suspects in Oklahoma City bombing

DENVER — Defense experts in the Oklahoma City bombing case testified yesterday that juries are more likely to impose the death penalty when suspects are put on trial together than when they are tried separately.

Attorney Bryan Stevenson, testifying on the first day of three days of pre-trial hearings, said that juries in joint trials tend to "feel like if one did it, both did it, and they should be sentenced the same."

Prosecutors want a single trial. They say much of the evidence and witnesses against the two men, friends since they were in the Army together, will be the same. McVeigh, they allege in court papers, committed the actual bombing, and Nichols was involved in virtually every step of the conspiracy.

Nichols and McVeigh have been charged with conspiracy, murder and use of a weapon of mass destruction in the bombing of the Alfred P. Murrah Federal Building that killed 168 people and injured over 500. If convicted, the two could face the death penalty.

Pentagon: Gulf troop exposure to chemical weapons may have been large

WASHINGTON — The Pentagon admitted Tuesday that it believes troops may have been exposed to chemicals during two explosions at an Iraqi weapons dump in southern Iraq in March 1991. So far, 5,000 troops involved in the first explosion, at a bunker, were being notified of possible exposure. The CIA is doing studies to help determine the scope of the exposure to both explosions.

The new, higher estimate is based on the belief that there were more chemical weapons stored in an open pit destroyed by U.S. troops on March 10, 1991, than in the bunker destroyed a week earlier, Pentagon spokesman Ken Bacon said.

"I just don't think we know at this stage, but we have to think in terms of big numbers — bigger than 15,000 certainly," Bacon said.

Experts believe sarin nerve gas was in the bunker and open pit at the weapons depot known as Kamisiyah.

Asked if the number of troops affected could include seven U.S. Army divisions, a number that could exceed 100,000 troops, Bacon replied, "I don't know, but I think we have to be prepared for the possibility of big numbers. The question will be, 'What was the level of exposure, if any?'"

School defends 'Midol' drug suspension

DAYTON, Ohio — School officials defended their suspension of a 13-year-old honor student who borrowed a packet of Midol from a friend, saying the girl violated the school's drug policy.

Erica Taylor took the over-the-counter pills from a classmate at Baker Junior High School in Fairborn, Ohio, because she felt ill - but then decided not to take them.

When she was found out, the school suspended her for 10 days and ordering her to undergo a drug evaluation or possibly face expulsion.

"The more and more I thought about it, the more ridiculous it became," Erica's father, Dan Taylor, said Tuesday.

"We're real comfortable with our policy, and it's pretty much in line with what most districts do," a school spokeswoman said. "I believe the general public wants safe, drug-free schools."

Taylor who had perfect attendance last year and made the honor roll each of the past three years, can reduce her suspension by attending drug screenings for $100 with later visits costing $90.

Suspension lifted on 2nd-grader accused of sexual harassment

NEW YORK — A second-grader who kissed a classmate and ripped a button off her skirt will return to school today after school officials revoked an earlier decision to suspend the boy for sexual harassment.

De'Andre Dearinge, 7, received a five-day suspension Friday from Public School 104 in Queens for his actions.

School officials met with the boy's parents yesterday and decided to drop the suspension and harassment charges. They also apologized for the way they had handled the situation, including informing the boy's mother of the suspension in a letter, mother Erica White said.

The boy said he kissed a classmate, "because I like her," the New York Daily News reported. He explained ripping off the button as an idea he got from his favorite book "Corduroy," about a teddy bear with a missing button. The boy couldn't say what sex means, the *News* said.

World News

Arafat, Netanyahu agree to continuous talks

WASHINGTON — Israel and the Palestinians agreed to resume intensive and continuous peace talks, with Hebron as their first priority, President Clinton said Wednesday at the conclusion of a two-day emergency Middle East summit.

The first meeting will be held Sunday at Erez on the Israeli-Gaza border. No timetable for the negotiations was made, but talks would focus on the pullout of Israeli soldiers from the West Bank town of Hebron.

Even though no progress was made on key issues, Clinton declared the summit a success. Earlier, Christopher presided over a meeting of Israeli and Palestinian negotiators. State Department spokesman Nicholas Burns said the talks were "quite specific" and both sides "got down into the weeds" about the serious issues between them.

The emergency summit was prompted by an outbreak of fighting in the West Bank and Gaza that left more than 70 dead. The clashes were sparked by the opening of an archaeological tunnel near Muslim holy sites in Jerusalem.

Taliban fighters try to conquer rest of Afghanistan

AFGHANISTAN — A standoff between Taliban soldiers and troops of a powerful northern faction leader threatened to explode into renewed bloodshed Tuesday. Both sides were massing troops along the main road to Central Asia. In Moscow, Russian President Boris Yeltsin proposed a summit of leaders from former Soviet republics to discuss Afghanistan.

The northern provinces controlled by General Rashid Dostum are virtually all that remain outside the Taliban's reach after a two-year campaign to capture the country and to impose its strict version of Islamic law in every corner of Afghanistan.

Dostum has refused to hand over his northern enclave, and although he has not ruled out negotiating with the Taliban fighters, his forces appear ready to fight. Dostum was once an ally of President Najibullah, a brutal dictator condemned as godless by his devout Muslim people. Dostum joined forces with the Islamic rebels who ousted Najibullah in 1992.

Until last week, Najibullah had lived in a U.N. compound in Kabul. When they seized the capital, the Taliban dragged him from his refuge and executed him, along with his brother and two aides.

North Korea threatens as murder mystery unfolds

SEOUL, South Korea — North Korea warned of "serious consequences" on Wednesday over a submarine incident two weeks ago, while the bludgeoning of a South Korean diplomat in Russia led to media speculation that it was making good on previous threats.

Separately, South Korea's defense minister said Seoul should prepare for all-out war from North Korea. His comments were not new, but they added to a sense of alarm.

South Korean troops have either killed or found the bodies of 22 North Korean soldiers who landed by submarine on a South Korean beach.

North Korean officers "indicated that serious consequences, which would be announced, would occur as a result of the deaths of their soldiers," a U.N. Command statement said.

Peruvian airliner with 70 aboard crashes into Pacific

LIMA, Peru — A Peruvian jetliner carrying 61 passengers and nine crew members crashed into the Pacific Ocean early Wednesday.

Navy officials said late Wednesday morning that the body of one male passenger had been recovered, and that their crews had spotted life jackets amid an oil slick where the plane went down.

Peruvian Navy patrols said they spotted the plane's fuselage about 30 miles off the coast. The fuselage was broken in half, said Admiral Jaime Monge, head of Navy Rescue Operations.

The Aeroperu Boeing 757's pilot reported mechanical difficulties shortly after taking off from Lima en route to Santiago, Chile, early yesterday morning, officials said. Officials in the tower at Lima's airport said the pilot asked whether he was over land or sea and requested a rescue plane before the jet fell from the sky.

Warning: use caution in department combination

As the University is looking to fill the recently created head of Computer and Communications Services and Library position, it may also be looking for trouble.

In an effort to facilitate the library's increasing reliance on technology, the search is on for a new associate vice president of these combined departments.

CCS and the library presently work together under the common goal of making information available to students, faculty and staff.

In theory, the idea of a new head holds. But in practice, there may be a problem because of the lack of checks and balances. Furthermore, this change could dictate an increasingly bureaucratic structure.

Concern has been expressed regarding the tendencies and preferences of the person to be appointed. On the non-technical side of the spectrum, people are afraid that someone with sights set only on technological advances will ignore the tangible side of the library.

A similar fear holds true from the opposite perspective. How unfortunate (and extremely detrimental) it would be not to take advantage of the continually improving world of electronics and computers.

As separate entities that both work to make information accessible, CCS and the library have each other to use as sounding boards, as well as to keep each other in line. The creation of a new head will eliminate this beneficial practice.

The concerns just mentioned regarding a new head who is partial to one of departments, however, is most likely not valid. In all probability, the search committee will be able to select a motivated candidate with his or her eyes and ears open to the differing perspectives. The problem now is not one of partiality for a school of thought, but one of increased hierarchical organizational structure.

In the present system, CCS employees about 45 full-time personnel and the library 50. The number of employees under each director is considerable, but small enough to allow the directors to interact with their employees personally. This relatively flat organizational structure is more conducive to a closer community within the work place.

Coupling the two organizations results in a drastic increase of employees under one person. In effect, doubling the number of employees is going to do two things.

First, it will be necessary to have certain employee representatives promoted to be the spokesperson for their co-workers, creating intermediary positions.

Secondly, it will make the director less accessible to the employees, who may in turn feel less of a connection to their positions.

The creation of this position will not necessarily be detrimental to the University, but be warned: proceed with caution.

OPINIONS

Election year offers perfect opportunity for privatization of the public school system

BY CHRIS ELLIS
Bucknellian Staff Writer

It's that time again.

All across America, public schools are beginning their fall semesters. The time is always marked by apprehension for all: new grades, new teachers, new friends. For some students, though, that fear is magnified by an outside specter, a widespread belief and, in some cases, reality, that they are destined to fail. That destiny is no more apparent that in the inner cities of America, where schools are overcrowded, under-funded and appallingly under-maintained. Some New York City schools are filled to over 150% capacity, forcing students of all grades to hold classes in gymnasiums, bathrooms and closets.

The underlying problem in this atrocity, although more manifest in inner-city blacks, spreads across all racial, ethnic, and economic lines; it is, quite simply, a public school system that is failing. Failing because of mismanaged funds. Failing because of lack of funds. Failing because of indifference and ignorance, because of administrators and officials that are hopelessly out of touch with the children they are supposed to be educating.

Because education is one of the few institutions that is more or less "centralized," there is virtually nothing our society can do about it. The government, be it local, state, or (God forbid) federal, has absolute control over the educational system, and even concerned parents and students are little more than pawns in the grand scheme of it all.

For years, centralized government-controlled systems have been the ones most targeted for inefficiency and corruption in American society: the Postal Service, the IRS, Amtrak. Now it is the public schools' turn to bear the brunt of the nation's anger, and rightly so.

The United States, while churning out Nobel Prize winner after Nobel Prize winner, has, on the average, less proficiency in basic skills than nearly any other industrialized nation. This can only mean one thing: that education is geared towards the few, rather than the masses.

Sure, the naturally intelligent can slide through the cracks and become successful and the naturally rich can escape the mess though private schooling, but for the most part, American children are trapped in a downward spiral of failing education, education that is failing because the government permits it to.

This failure is no more evident than in New York City, where fewer than half of the eligible students graduate from high school and only a minute portion advance to any degree program of consequence. While numerous factors obviously contribute to this, these problems are no more apparent than in the school system.

Because inner-city schools are allowed to proceed with no outside competition, the schools are permitted to flounder with little more repercussion than a yearly grumbling about "not meeting mandated educational standards" and a wishy-washy president whining about how badly "something needs to be done."

But there is a way out.

The New York City citizens, realizing that the school system will not improve on its own recognizance and that enlarging the federal government to control the problem will only make the problem worse, have paved the way for a school voucher system to enable disadvantaged children to get an education elsewhere, even if they cannot afford it.

The residents realize that this idea is not a means to an end, but that is exactly the point. With the government controlling nearly all aspects of American education, there is virtually no way to improve the existing system. In a capitalist economy, though, there is an answer: school choice.

Allowing students to use monetary vouchers to attend the schools that they wish will create something that has been sorely missing from the educational system in America; a reason to improve. In much the same way corrupt and ineffective businesses die out, poor schools will do the same—they will either be forced to improve their standards or lose their "business" to places better equipped to serve their students.

In turn, these "better" schools will, in turn, be given more funding, allowing them to serve students even more effectively. This plan also has a means of escape; if schools do not do the job that they should be capable of, students can simply take their business elsewhere, therefore making it economically advantageous for schools to do succeed.

There is no better time to push the privatization of the school plan that in an election year. Bill Clinton, a man of questionable presidential savvy but a superior political mind, seems poised to do anything to earn four more years in office. His timings of the welfare-bill signing and attacks on Iraq were positioned (not entirely coincidentally, I'm sure) to coincide with when he needed a boost in the polls most.

This is his chance to succeed in his ultimate goal again—while helping the country at the same time. New York City residents, as well as most residents of large cities, appear to be in favor of the school-choice plan, citing it as a long-overdue way for education to rectify itself. A full-page ad in the New York Times was underscored by members of more than 20 educational groups in NYC, groups that ranged from the Chinese American Parents Association to the National Parenting Association.

If there is ever a time to press this issue into action, it is now. It benefits everyone; it gives the rich something better—more choices; it gives the poor something better—*a* choice; it is even politically popular.

If politics don't woo Mr. Clinton, long a detractor of this plan maybe first hand experience will.

Go to Harlem, Mr. Clinton, and sit in on a 40-person math class being held against a row of urinals.

Listen to an underpaid, apathetic teacher try to grasp the material while he tries to teach it to his students.

Realize what American education has come to. And then, look into your heart and see if you can allow the travesty known as public education to persist any longer.

Mr. President?

Speak Out

OPINIONS

Gun control alone will not solve the problem of violence

BY CHARLES EHRENFRIED

Shots ring through small town America and people blame the guns. Does anyone else see the logical error here? Never before has the saying "don't kill the messenger" been more relevant.

Too often, when people see gun-perpetrated violence, their reaction is to talk about gun-control and condemn "ultraconservative, gun-toting members of society."

A cry goes out to get rid of the evil weapons in order to solve the problem. This type of reaction, which has led to such things as the Brady Bill, is essentially useless. Guns are not the problem. People are the problem.

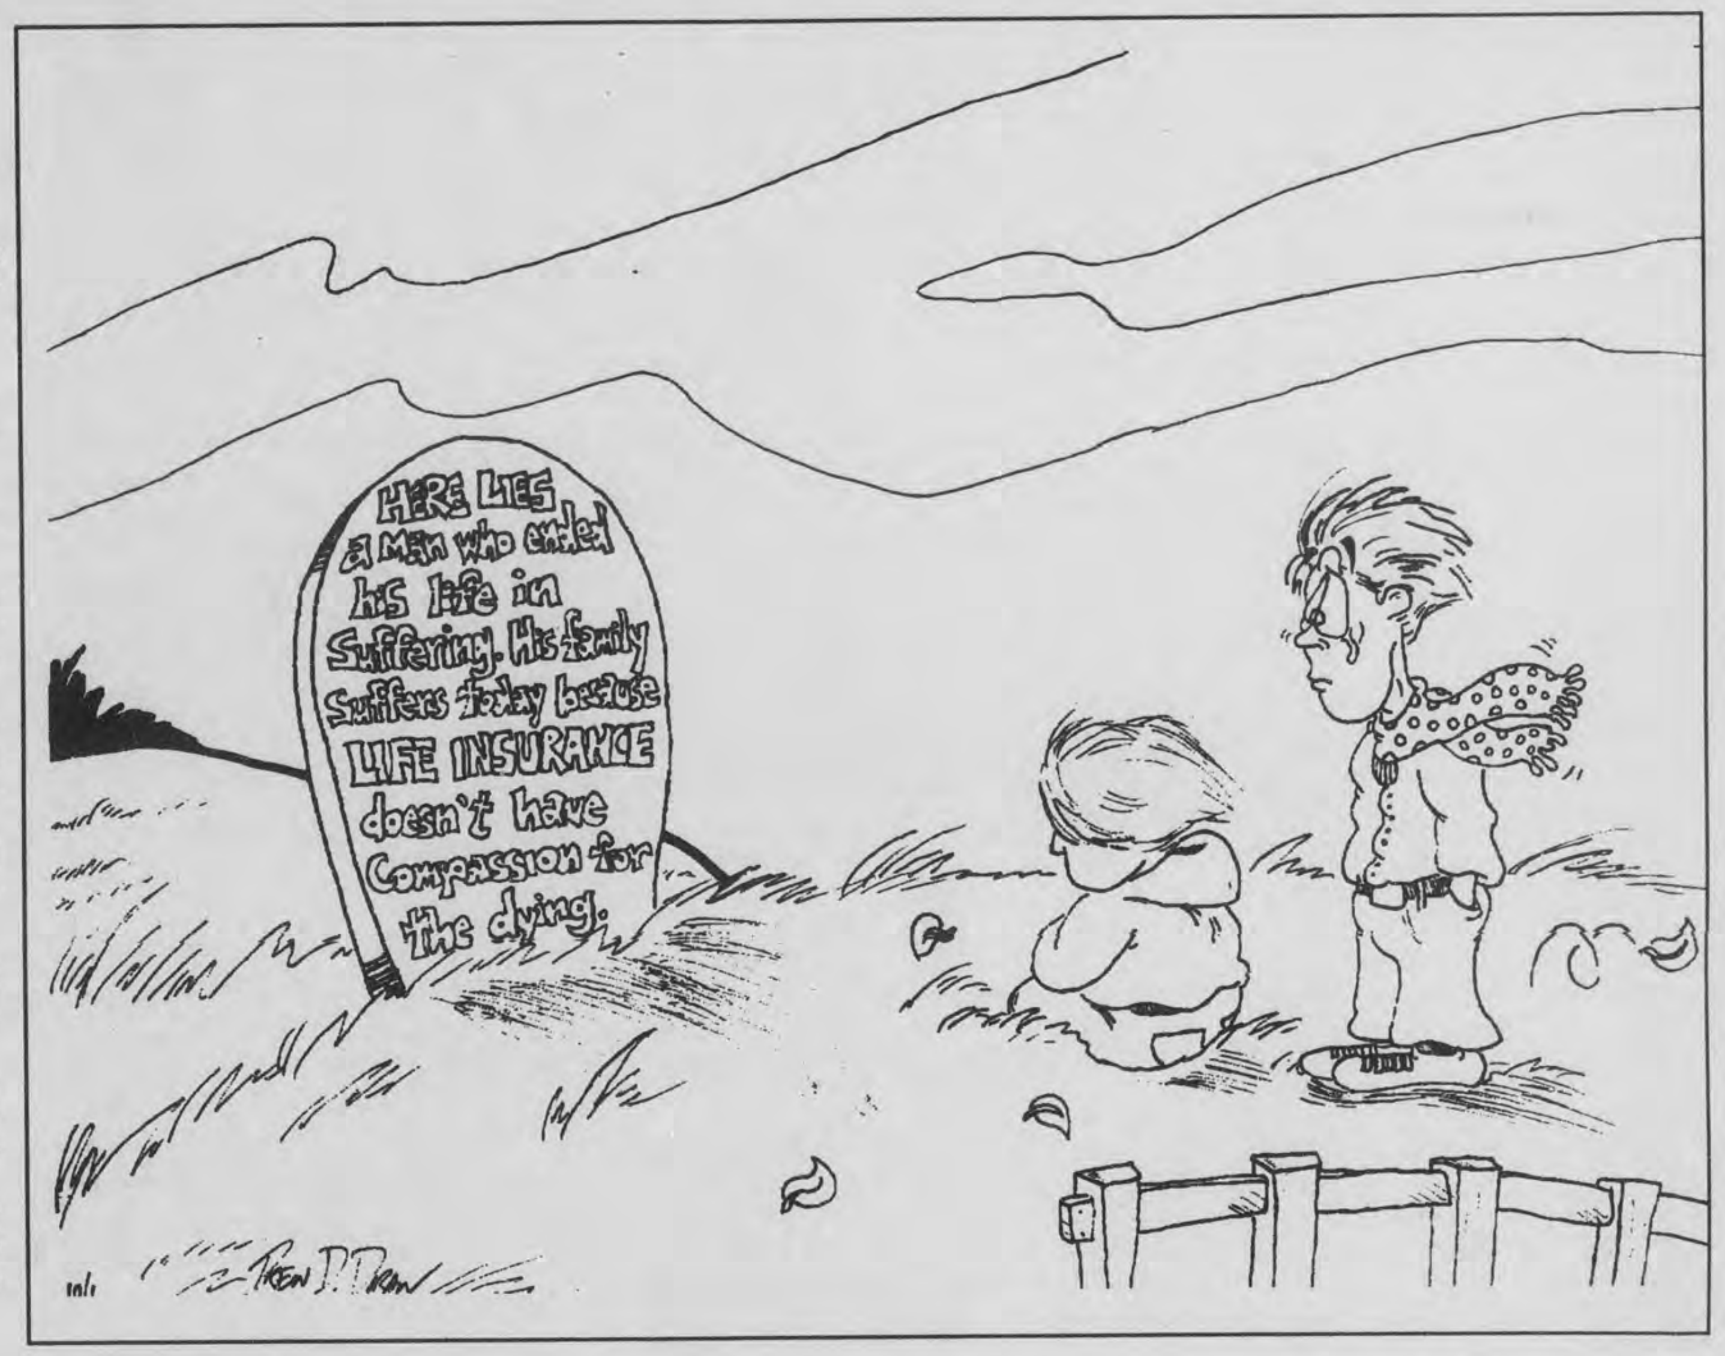
That is not to say that I am espousing the National Rifle Association's old saying "Guns don't kill people, people kill people." This, while true, is even more simplistic and ridiculous than the gun-control advocates' idea.

Blaming guns or people is too simple. It is purely topical. It does not get to the heart of the problem. It is like putting a Band-Aid on a gangrenous wound. The problem lies deeper.

When a man kills his estranged wife and her partner, when a nine-year-old boy accidentally kills his kid sister, when a thirteen-year-old gang bangs on the streets of L.A., this is not the fault of guns. Guns may often times facilitate the violence, but they are not the cause.

And when these things occur on the basis that they seem to be in America today, it is not the errant conduct of a few persons. There is obviously something very, very diseased about today's society. The problem lies in the whole, not in the singular.

This is something that needs to be explored. People can no longer sit around and point fingers at each other or at inanimate objects. The problem exists within all of us. Until we confront it, nothing will be solved.



Capital punishment offers revenge, not a solution

BY ALLISON PRICE
Bucknellian Staff Writer

Part of me wanted to watch what transpired at the sentencing of Richard Allen Davis, the man convicted of abducting 13-year-old Polly Klaas from her bedroom and then brutally raping and murdering her later that night. It was compelling national news, as well as one of the most disturbing stories I had ever read about. So, I put CNN on mute.

Davis was sentenced to death, and managed in the process to enrage Polly's father to such an extent through his arrogance and unrepentence that Marc Klaas had to be escorted from the courtroom. All that in silence, with Polly's last school photograph on the screen when it was all over.

Oh please do not write about Davis, someone asked me last week, he is evil incarnate. Yes, he truly is. One of the difficulties you face in opposing the death penalty is the assumption that you in your objection lack feelings and sympathy for the victims and the victim's families. This is simply not the case.

In the field of education, you get to stand in front of classrooms full of young women not much unlike Polly Klaas, and the thought that any harm could come to them at the hands of another person is beyond description and comprehension. Marc Klaas lost his daughter, and there is no sense in that, with the TV mute or full blast.

These evil people, or those who come into contact with them, do not exist only on television. A woman who once worked with the mother of Jillian Robbins spoke at the vigil against domestic violence a short time ago in town. Robbins is the accused perpetrator of the shooting massacre early last month at Penn State which claimed the life of a student. Currently, it appears that prosecutors will seek the death penalty in Robbin's case, which is Robbin's mother's case as well. As it was once described on a TV legal drama, in the end the death penalty is too much and not enough.

There are many logical arguments against the death penalty. It is obviously not a deterrent, and the U.S. is one of, I believe, two civilized countries which still have it. The American justice system is run by humans and therefore inherently flawed.

The case of Mumia Abu-Jamal in Philadelphia exemplifies this in full horror. Humans inevitably have interests and motives, as well as margins of error. If you can afford better lawyers, you will get a better sentence. Capitalism and capital punishment do not compliment each other.

Statistics show that the punishment falls disproportionately hard on minorities and the poor. Statistics also show that life sentences cost less than the lengthy appeals process in capital murder cases, and I will dignify the idea of limited guaranteed appeals by discussing it. However, it is unfortunate that this is the argument that seems to have the most profound influence on the majority of Americans as the questions the issue raises are so very complex.

I do not believe either cost efficiency or even deterrence are the real reasons so many Americans support the death penalty. How do you attempt to apply some order to the senselessness? How can you possibly quantify the violent loss of a loved one? How do you get the killer to pay?

These are real questions and reactions. However in the end we get no satisfaction. As the old proverb goes, when plotting revenge, dig two graves, especially in the case of capital punishment wherein the violence is carried on.

Another myth of death penalty opposition is that you are somehow soft on crime. Following the criteria that some people are too dangerous to function in society and have committed heinous crimes, life sentences are sometimes a necessity.

However, the real solutions to crime in the United States are far less satisfying and superficially reassuring than the death penalty—a better mental health care system, education and economic opportunity and security.

Sadly, the random senselessness will always exist no matter how many solutions we offer or how many deterrents we establish.

The summer of the Susan Smith trial I was working at a day care center and did not need to be reminded for a second how beautiful her two sons were in life and death. In the end, after taking all the horror of the Smith case into account, the community decided it was not in their best interest to apply the death penalty and it was not the way to overcome the loss, the senselessness.

No matter how hard or what we try, it is an impossible feat. If you doubt that, look at Polly Klaas' smile in her last school photograph.

Welfare reform will only succeed once its causes are understood

Clinton's newly passed welfare reform bill: A formula for drastic social and economic difficulties in America's future

BY NICOLE MAESTRI
Bucknellian Staff Writer

The vast majority of middle-class Americans have a preconceived notion of welfare. It is seen as a handout of their hard-earned dollars to lazy adults who choose not to work. It is viewed as a system that supports single, young mothers and encourages them to have more babies to increase their monthly welfare check. Welfare is not working, and any respectable, hard-working American would see the necessity of ending this type of program.

That is an easy perception to have of welfare if it is seen from afar. Since most of us probably do not know anyone who has been on welfare, we have a contrived idea of just who it is that receives welfare and the type of person he/she must be.

Our anger at the system seems justified; we feel cheated because we are the ones who follow the rules and work hard to remain self-sufficient while others take advantage of the system. We want to be acknowledged for our good behavior.

> ***Welfare is a human problem and it needs to be dealt with in human terms. If we look at welfare as purely a financial matter, we will never be able to grasp its complexities or find a solution that will work in the real world.***

Various states and cities have made their own attempts to reform welfare. The Wisconsin Learnfare program "encourages" students to stay in school by deducting money from their family's welfare check for each unexcused absence. While the idea behind this may sound nice, an entire family is penalized for the truancy of one child, whether or not the family has made efforts to persuade the child to go to school daily. Truancy is not limited to children who live in households receiving welfare.

The California welfare-to-work program is a crash course in getting welfare recipients off welfare and into a new job, any job. It offers mock interview sessions and to find employment, participants open the phone book and call employers to search for any available job openings. It is a mandatory program, penalizing welfare recipients if they choose not to attend. While the program does place many workers, only one-third of them are still employed two years later and it has been shown to only reduce the welfare rolls by 10 percent. This program may place people in a job, but how are they going to retain any long-term position if they have no skills? They simply return to welfare after a few short months or weeks.

Other states have implemented Child Exclusion Laws. Traditionally, a woman on welfare received a set amount of money each month and for every additional child she had, she was given an increase. With these new laws, a woman with one child receives the same check as a woman with five. This program would be effective if money was the reason that women decided to become pregnant, but it does not even come close. Being pregnant with no job or steady boyfriend is seldom caused by a 15-year-old wishing she could receive a welfare check.

Bill Clinton has forged ahead with welfare reform and this summer, he responded to middle-America's concerns by passing a welfare reform bill. Sticking to his campaign promise to "end welfare as we know it," he has crafted a bill whose consequences may be far more damaging than the current system we condemn.

The new welfare reform bill eliminates $54 billion in aid over the next six years, requires that everyone work within two years of going on welfare, and sets a five-year lifetime limit for an individual to receive welfare.

The bill is filled with cuts not only in funding to welfare programs, but to programs that fund child nutrition in day care centers, that offer assistance to families with disabled children, and that support health services to legal immigrants over the age of 65. Aid to Families with Dependent Children has been ended, and states will not receive fixed grants of money to apply to their welfare program. This fixed sum of money will not be adjusted when the economy takes a downturn.

The impact of these cuts has not yet been felt, but non-profit agencies who help current welfare recipients and those people struggling to keep themselves off welfare are bracing themselves.

They question how an economy that cannot absorb skilled workers will be able to employ even a fraction of a new wave of unskilled, uneducated workers who will flood the market when they can no longer receive welfare.

They wonder how children will be able to grow up nourished and clothed in a family who has seen their last welfare check. They see union and blue-collar workers becoming threatened and hostile as the idea of a new supply of cheap labor infringes on their jobs and their security.

They cannot even begin to imagine where $54 billion could even be found in the private sector to replace that aid being lost in the public sector.

Yes, there are those who took advantage of welfare under the old system, but they did it because in the old system, it made sense—recipients were penalized for finding minimum-wage jobs by losing their food stamps and health benefits. What rational person would choose to work when they could make more money staying home and receiving a check in the mail?

Unfortunately, welfare is a human problem and it needs to be dealt with in human terms. If we look at welfare as a purely financial matter, we will never be able to grasp its complexities or find a solution that will work in the real world.

Teenage pregnancy is not caused or promoted by welfare—it is a cry for unconditional love. Receiving financial assistance because of emotional or physical handicaps or economic hard times is not greed or laziness—it is a necessity for survival. Maybe welfare as we knew it did not work. But the sounds of Clinton's new, reformed welfare and the system we will come to know will be far uglier in social and economic costs than the system we currently criticize.

Woodrow combines southern charm with knack for scoring

BY JEFF CAMPAGNA
Bucknellian Staff Writer

You may not recognize Liz Woodrow if you see her in the Bison, but this junior forward from Alabama is the leading goal scorer for the women's soccer team.

Photo courtesy of Sports Information
Liz Woodrow '98, who has scored 22 career goals and 60 career points, hails from Birmingham, Alabama.

With 4 goals in 9 games so far, Woodrow has picked up where she left off last year, a season in which she led the Bison in both goals and points.

Faced with high expectations, the team has started off slowly though, with a 4-4-1 record. After going undefeated (6-0) in the Patriot League last year, the Bison sit at 2-2 against league opponents.

Woodrow remains hopeful of the team's chances to straighten themselves out, commenting, "We have to play together with a lot of heart, and we'll be successful."

The team concept is emphasized by head Coach Toby Lovecchio, and players are expected to put the team first. Woodrow's good ball skills and foot skills allow her to create opportunities for both herself and her teammates. This ability to blend with other players helps to make her even more valuable to the team. Though she is a quiet person, Woodrow lets her skills speak for themselves on the field, leading by example.

Beetna Kim—The Bucknellian
Liz Woodrow '98, finds her teammates the best part of being on a team.

Woodrow has shown a knack for scoring, and the Bison have made good use of this strength, as evidenced by Woodrow's 24 career goals. Commented Lovecchio, "If we get her the ball in the right situation, she's going to put it in the net because she knows how to."

For her superb 1995 season, in which she scored 11 goals and 4 assists (26 points), Woodrow was named to the All-Patriot League team. She has continued to produce this season, pacing the Bison with 4 goals and 10 points (2 assists). Woodrow also received Patriot League Offensive-Player-of-the-Week honors the second week in September. With career totals of 24 goals and 60 points, Woodrow currently ranks third in Bucknell history in those categories.

Between soccer and studying, there is not much room to spare for this psychology major; however, Woodrow manages to squeeze in the occasional episode of "The Simpsons" into her busy schedule. She also faces the challenge of being far from her home of Alabama, and since being here at Bucknell, she has gained greater appreciation of the South. As a member of a team, Woodrow relies on her teammates both on the field and off, and she enjoys the time she spends with them, commenting, "The best thing about playing on the team is the fun I have with my teammates."

Crusaders kill Bison win streak

BY HALEY FUTTERKNECHT
Bucknellian Staff Writer

Bison field hockey had its winning streak broken Sept. 21, against Holy Cross. The game proved to be a tough one, with the Bison eventually falling 3-2 to the Crusaders.

The Bison led off the game with junior Sarah Catlin scoring the first goal on a penalty stroke. Catlin's stroke is powerful, and she kept the goaltender off balance with her excellent placement.

Catlin also contributed a defensive save.

The second goal for the Bison was scored by senior Kate McIlvain off of a rebound on a penalty corner.

The goal was tended by sophomore Maureen Breslin who made eight saves.

Against Towson on Sept. 25, the Bison field hockey team rallied to turn up a big win, upsetting Towson 4-3.

The first goal for the Bison was scored by McIlvain off of a rebound on a penalty corner.

The second was scored by senior co–captain Dani Johnston on a penalty corner with an assist by Jen Zimmerman '00.

The third goal was put in by junior Tina Jones on a penalty corner with assists by McIlvain and Jamie Paldin '98.

The final goal was contributed by Catlin with another of her flawless penalty strokes.

Goal was tended by both Breslin and Kanda Kratzer '00 both making four saves each.

Bucknell fell again on Sept. 28, in another Patriot League challenge to defending league champion, Lafayette. Johnston contributed the only goal for the Bison with the final score being 1-3. Johnston's goal was put in on a penalty corner deflection with an assist from Zimmerman.

Goal was tended by Breslin who made 16 saves for the Bison.

The Bison bounced back once again to keep themselves alive in the Patriot League. Bucknell field hockey won their first Patriot League game Oct. 1, against Ursinus.

The game proved to be close, but the Bison upset Ursinus 4-3 in the end. "We wanted to put the losses behind us and start anew knowing that Ursinus is a league game. We knew we had to play a hard game to beat them and we did," Paldin said.

Jones scored the first two goals for Bucknell on penalty corners with assists from Paldin and McIlvain.

Junior Kristin Soto also put one in the cage for Bucknell off of a rebound from Zimmerman's shot.

Johnston also contributed a goal for the Bison. "We never gave up against Ursinus, which was integral to our success," Jones said.

Bucknell field hockey has its fourth Patriot League face-off this Saturday against Lehigh at 1 p.m. on the field across Route 15. This game proves to be an important one for Bucknell, since Lehigh is undefeated in the Patriot League thus far. "If we perform and execute like we did against Ursinus, we will beat Lehigh," said Susan Lefevre '98. The Bison also have a home game on Tuesday against LaSalle.

Erin Leidl—The Bucknellian
Jamie Paldin '98 wins possession for the Bison. Paldin assisted on a goal in Bucknell's recent win over Ursinus.

Volleyball wins thriller over Navy

BY JACOB LIPMAN
Bucknellian Staff Writer

Bucknell's women's volleyball team played Navy in its Patriot League opener this past Saturday. The Bison were victorious against the Midshipmen and then defeated Coppin State later that afternoon.

They now stand with an overall record of 11-5 (1-0 in Patriot League).

Navy came into the match with a 1-1 record in Patriot League play. They were hoping to steal a win from Bucknell, but this was not meant to be. Though the Midshipmen did not go down without a fight, the Bison won by a score of 15-10, 11-15, 15-9, 15-11.

The Bison came out strongly in the first game. With the score 2-1 in favor of Navy, Bucknell scored six straight points. Melissa Wharton '98 started the rally with a block for a sideout and then had two more blocks during the string of points.

Navy scored a couple of points to make it 7-4. However, Emily Pomeroy '99 took control for the next few plays. Pomeroy had three overpowering kills as the Bison scored six of the next seven points, giving them a commanding 13-5 lead.

The Midshipmen countered with five straight points of their own to cut the Bucknell lead to 13-10. The comeback by Navy was halted there, and game one went to the Bison.

To say that the second game did not start out the way Bucknell planned would be a mild understatement. Navy raced to a 7-0 lead, helped by a few errors by the Bison.

This game was far from over, though. The Bison slowly worked their way back by scoring six of the next seven points.

Navy then started to pull away, scoring three consecutive points to give them an 11-6 lead. Once again, the Bison were able to narrow the deficit. They matched Navy's three points with three of their own and then scored a fourth straight point.

However, with Bucknell in striking distance of taking the lead, being down only 11-10, luck smiled on the Midshipmen. What

Football Preview: Bison seek revenge against Penn

BY LUKE DAVID AND JOHN SIRIS
Bucknellian Staff Writers

Last year, Bucknell came one point away from snapping the University of Pennsylvania's Division I-AA record 24-game winning streak in a heartbreaking loss at Franklin Field. If the Bison don't find a way to move the ball on offense, and take some of the pressure off their defensive unit, they will face their own streak: three straight losses.

Although the Quakers (1-1) came up short in their season-opening loss to Ivy League foe Dartmouth, they have shown dominance over Patriot League opponents in the past and are coming off a 38-7 thrashing of Colgate.

Offensively, Penn (7-3 last year) is a very well-balanced squad. Unlike Bucknell (1-2), the Quaker running game, led by Jasen Scott (235 yards, 3 Tds) and Rick Granata (106 yards, 2 Tds), has been keeping the chains moving and finding a home away from home in the end zone.

Senior quarterback Steve Teodecki has been effective in his first two games at the helm, throwing for 258 yards and two touchdowns. Since the Quakers have been getting things done on the ground, their top two receivers, seniors Eric Thompson and Mark Fabish, have combined for only 12 receptions so far this season.

Penn's offensive line, led by senior Sears Wright (6-6, 350), averages over 280 pounds and should provide Teodecki and the rest of the offense with plenty of protection.

On the other side of the coin, Bucknell continues its woeful search to find something that resembles an offense. The Bison have compiled a meager 101 rushing yards in three games and are 0 for 24 on third down conversions in their last two games. Last week they committed six turnovers, gained -4 yards on the ground, and allowed 5 quarterback sacks. With numbers like these, its no wonder that punter Rich Miller has had so many opportunities to showcase his skills.

Although coach Tom Gadd's defensive unit has allowed an average of 38.5 points in the past two games, their play has been commendable considering the fact that the offense has given them little opportunities to rest. Senior linebacker Brandon Little, who leads the team with 34 tackles, two interceptions, and two sacks, is hopeful that the Bison can rebound. "We've got to work hard day in and day out, play good fundamental football, and the wins and losses will take care of themselves," Little said.

Senior safety Jack Boyle, who also has two interceptions, thinks that "the game plan is OK, we just need to execute better."

Fundamentals and better execution may not be enough to beat a Quaker team that leads the overall series 21-3 and is picked to finish third in the same Ivy League that Harvard was picked to finish last in. Fortunately for the Bison, all bad things come to an end and last year's one point loss could be the catalyst for an explosive showdown on Parents' Weekend.

This Week's Picks:
John: Penn 34 BU 10
Luke: Penn 28 BU 10

Another rainy day for Bucknell football

BY BRETT TOMLINSON
Bucknellian Staff Writer

Bucknell averted their second consecutive shutout with a late fourth quarter touchdown, but the story of this week's game was remarkably similar to last week's disaster against William and Mary.

Bucknell struggled offensively, with only two first downs in the first half, while the Bison defense tried to fight the driving Crimson on the muddy turf at Christy Mathewson Memorial Stadium. Harvard prevailed with a convincing 30-7 victory in their first-ever trip to Lewisburg.

The loss left many Bison fans wondering what happened to Jim Fox '97 and Rich Lemon '97, the backfield tandem that led Bucknell to a 7-4 record last season. Fox, who started every game at quarterback last year and passed for over 2,000 yards, has had the two worst passing yardage totals of his career in the past two games, while Lemon, who broke the 4,000 yard career rushing barrier in the first game of the season, inched backwards towards the milestone with his second negative-rushing game in a row.

Although the production of the senior leaders has declined, coach Tom Gadd does not blame his talented offensive backfield for the Bison's collapse. The problems for Bucknell have been on the line, according to Gadd.

"You can't play this game without winning the physical battles." Gadd said. "We're not physically winning any of those battles right now." The offensive line, which has only one returning starter and no seniors, has struggled to establish pass protection for Fox and has left Lemon little room to work with on running plays.

Fox, who was sacked five times on Saturday, was noticeably shaken up on several plays and threw two interceptions under the constant pressure of the Crimson defense.

"Jimmy's struggling right now with his confidence, and I think the big part is he's not real sure he's going to be protected," Gadd said.

"No quarterback goes untouched during the course of the season, but at the same time,

See FOOTBALL, Page 11

Beetna Kim —The Bucknellian
The weather was gloomy, but a 30-7 loss to Harvard was even worse for the umbrella toting Bison fans.

Flash in the Pan

Pennant Races: The baseball season ended Sunday as the San Diego Padres completed a four game sweep of the Dodgers to claim the western division and set up a first round matchup against the central division winner St. Louis Cardinals.

The other matchup in the National League pits the two best pitching staffs in baseball against each other, as the wild card L.A. Dodgers face the World Series defending champion Atlanta Braves.

In the American League there was little drama as the season wound down, except for the wild card race, which was won by the Baltimore Orioles. The O's will now face last year's AL champs, the Cleveland Indians.

Managerial Changes: Two more managers were fired this past week after the season ended on Monday. Phillies manager Jim Fregosi and Red Sox manager Kevin Kennedy were fired after disappointing seasons. The Phillies had bottomed out the past two seasons as many of their stars, including Lenny Dykstra, Gregg Jeffries, and Darren Daulton all went down with injuries. The firing of Kennedy was more of a surprise, as the Red Sox posted the best winning percentage in the league after the All-Star break, although they still fell short of the wild card by three games.

The Mighty Fall: In a rash of upsets this week, the previously undefeated Minnesota Vikings and Carolina Panthers both fell to mediocre teams in the Giants (15-10 over Minnesota) and the Jaguars (expansion bowl winners over Carolina 24-14). Also falling from the ranks of the unbeaten were the Kansas City Chiefs, who fell to the San Diego Chargers 22-19.

Tyson Back in Court: Mike Tyson went back to the courtroom last week to fight a $49 million law suit filed by his former trainer, Kevin Rooney. Tyson's bad luck in courtrooms continued as the federal jury ruled in favor of Rooney, awarding him $4.4 million.

The heavyweight champion plans to fight the decision.

Rooney claims he had a contract to manage Tyson for the rest of his career, but Iron Mike fired the trainer. Activist Al Sharpton, a friend of Tyson and his promoter Don King, led a protest outside the courthouse, claiming that the all-white jury's decision was biased.

Orioles Jump Ahead 2-0: In what could be the biggest upset of this year's MLB playoffs, the Baltimore Orioles have taken a two-games-to-none lead over the defending American League Champion Cleveland Indians. Brady Anderson has hit a home run in each game for the O's, who just locked up their wild card spot last Saturday with one game left in the season.

Woodrow combines southern charm with knack for scoring

By Jeff Campagna
Bucknellian Staff Writer

You may not recognize Liz Woodrow if you see her in the Bison, but this junior forward from Alabama is the leading goal scorer for the women's soccer team.

With 4 goals in 9 games so far, Woodrow has picked up where she left off last year, a season in which she led the Bison in both goals and points.

Faced with high expectations, the team has started off slowly though, with a 4-4-1 record. After going undefeated (6-0) in the Patriot League last year, the Bison sit at 2-2 against league opponents.

Woodrow remains hopeful of the team's chances to straighten themselves out, commenting, "We have to play together with a lot of heart, and we'll be successful."

The team concept is emphasized by head Coach Toby Lovecchio, and players are expected to put the team first. Woodrow's good ball skills and foot skills allow her to create opportunities for both herself and her teammates. This ability to blend with other players helps to make her even more valuable to the team. Though she is a quiet person, Woodrow lets her skills speak for themselves on the field, leading by example.

Woodrow has shown a knack for scoring, and the Bison have made good use of this strength, as evidenced by Woodrow's 24 career goals. Commented Lovecchio, "If we get her the ball in the right situation, she's going to put it in the net because she knows how to."

For her superb 1995 season, in which she scored 11 goals and 4 assists (26 points), Woodrow was named to the All-Patriot League team. She has continued to produce this season, pacing the Bison with 4 goals and 10 points (2 assists). Woodrow also received Patriot League Offensive-Player-of-the-Week honors the second week in September. With career totals of 24 goals and 60 points, Woodrow currently ranks third in Bucknell history in those categories.

Between soccer and studying, there is not much room to spare for this psychology major; however, Woodrow manages to squeeze in the occasional episode of "The Simpsons" into her busy schedule. She also faces the challenge of being far from her home of Alabama, and since being here at Bucknell, she has gained greater appreciation of the South. As a member of a team, Woodrow relies on her teammates both on the field and off, and she enjoys the time she spends with them, commenting, "The best thing about playing on the team is the fun I have with my teammates."

Crusaders kill Bison win streak

By Haley Futterknecht
Bucknellian Staff Writer

Bison field hockey had its winning streak broken Sept. 21, against Holy Cross. The game proved to be a tough one, with the Bison eventually falling 3-2 to the Crusaders.

The Bison led off the game with junior Sarah Catlin scoring the first goal on a penalty stroke. Catlin's stroke is powerful, and she kept the goaltender off balance with her excellent placement.

Catlin also contributed a defensive save.

The second goal for the Bison was scored by senior Kate McIlvain off of a rebound on a penalty corner.

The goal was tended by sophomore Maureen Breslin who made eight saves.

Against Towson on Sept. 25, the Bison field hockey team rallied to turn up a big win, upsetting Towson 4-3.

The first goal for the Bison was scored by McIlvain off of a rebound on a penalty corner.

The second was scored by senior co-captain Dani Johnston on a penalty corner with an assist by Jen Zimmerman '00.

The third goal was put in by junior Tina Jones on a penalty corner with assists by McIlvain and Jamie Paldin '98.

The final goal was contributed by Catlin with another of her flawless penalty strokes.

Goal was tended by both Breslin and Kanda Kratzer '00 both making four saves each.

Bucknell fell again on Sept. 28, in another Patriot League challenge to defending league champion, Lafayette. Johnston contributed the only goal for the Bison with the final score being 1-3. Johnston's goal was put in on a penalty corner deflection with an assist from Zimmerman.

Goal was tended by Breslin who made 16 saves for the Bison.

The Bison bounced back once again to keep themselves alive in the Patriot League. Bucknell field hockey won their first Patriot League game Oct. 1, against Ursinus.

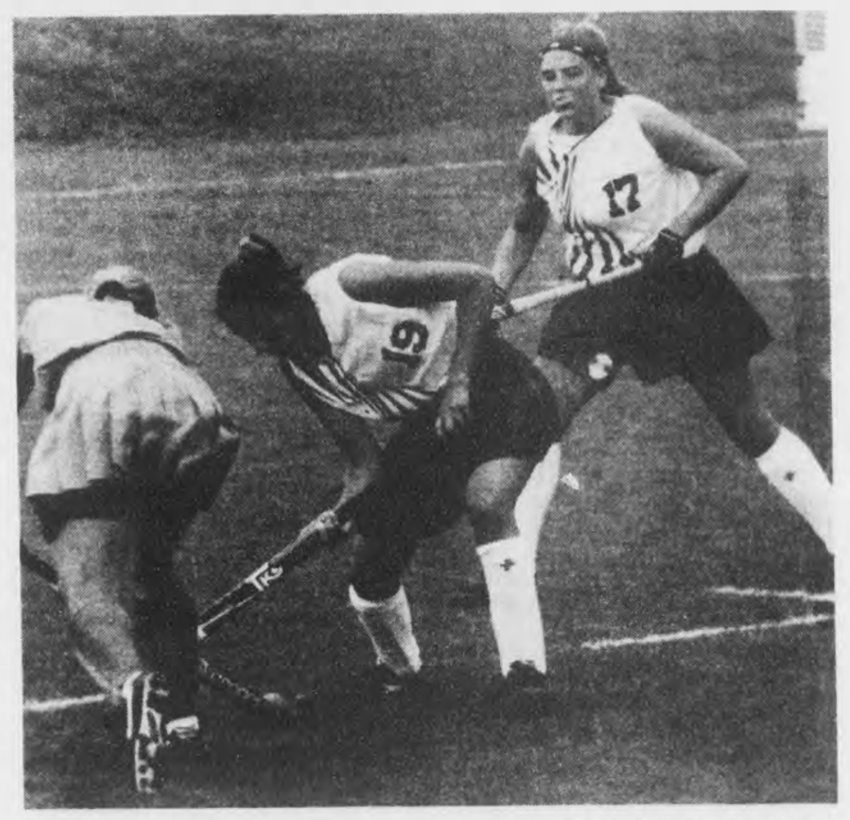
The game proved to be close, but the Bison upset Ursinus 4-3 in the end. "We wanted to put the losses behind us and start anew knowing that Ursinus is a league game. We knew we had to play a hard game to beat them and we did," Paldin said.

Jones scored the first two goals for Bucknell on penalty corners with assists from Paldin and McIlvain.

Junior Kristin Soto also put one in the cage for Bucknell off of a rebound from Zimmerman's shot.

Johnston also contributed a goal for the Bison. "We never gave up against Ursinus, which was integral to our success," Jones said.

Bucknell field hockey has its fourth Patriot League face-off this Saturday against Lehigh at 1 p.m. on the field across Route 15. This game proves to be an important one for Bucknell, since Lehigh is undefeated in the Patriot League thus far. "If we perform and execute like we did against Ursinus, we will beat Lehigh," said Susan Lefevre '98. The Bison also have a home game on Tuesday against LaSalle.



Erin Leidl—The Bucknellian
Jamie Paldin '98 wins possession for the Bison. Paldin assisted on a goal in Bucknell's recent win over Ursinus.

Volleyball wins thriller over Navy

By Jacob Lipman
Bucknellian Staff Writer

Bucknell's women's volleyball team played Navy in its Patriot League opener this past Saturday. The Bison were victorious against the Midshipmen and then defeated Coppin State later that afternoon.

They now stand with an overall record of 11-5 (1-0 in Patriot League).

Navy came into the match with a 1-1 record in Patriot League play. They were hoping to steal a win from Bucknell, but this was not meant to be. Though the Midshipmen did not go down without a fight, the Bison won by a score of 15-10, 11-15, 15-9, 15-11.

The Bison came out strongly in the first game. With the score 2-1 in favor of Navy, Bucknell scored six straight points. Melissa Wharton '98 started the rally with a block for a sideout and then had two more blocks during the string of points.

Navy scored a couple of points to make it 7-4. However, Emily Pomeroy '99 took control for the next few plays. Pomeroy had three overpowering kills as the Bison scored six of the next seven points, giving them a commanding 13-5 lead.

The Midshipmen countered with five straight points of their own to cut the Bucknell lead to 13-10. The comeback by Navy was halted there, and game one went to the Bison.

To say that the second game did not start out the way Bucknell planned would be a mild understatement. Navy raced to a 7-0 lead, helped by a few errors by the Bison.

This game was far from over, though. The Bison slowly worked their way back by scoring six of the next seven points.

Navy then started to pull away, scoring three consecutive points to give them an 11-6 lead. Once again, the Bison were able to narrow the deficit. They matched Navy's three points with three of their own and then scored a fourth straight point.

However, with Bucknell in striking distance of taking the lead, being down only 11-10, luck smiled on the Midshipmen. What

Football Preview: Bison seek revenge against Penn

By Luke David
and John Siris
Bucknellian Staff Writers

Last year, Bucknell came one point away from snapping the University of Pennsylvania's Division I-AA record 24-game winning streak in a heartbreaking loss at Franklin Field. If the Bison don't find a way to move the ball on offense, and take some of the pressure off their defensive unit, they will face their own streak: three straight losses.

Although the Quakers (1-1) came up short in their season-opening loss to Ivy League foe Dartmouth, they have shown dominance over Patriot League opponents in the past and are coming off a 38-7 thrashing of Colgate.

Offensively, Penn (7-3 last year) is a very well-balanced squad. Unlike Bucknell (1-2), the Quaker running game, led by Jasen Scott (235 yards, 3 Tds) and Rick Granata (106 yards, 2 Tds), has been keeping the chains moving and finding a home away from home in the end zone.

Senior quarterback Steve Teodecki has been effective in his first two games at the helm, throwing for 258 yards and two touchdowns. Since the Quakers have been getting things done on the ground, their top two receivers, seniors Eric Thompson and Mark Fabish, have combined for only 12 receptions so far this season.

Penn's offensive line, led by senior Sears Wright (6-6, 350), averages over 280 pounds and should provide Teodecki and the rest of the offense with plenty of protection.

On the other side of the coin, Bucknell continues its woeful search to find something that resembles an offense. The Bison have compiled a meager 101 rushing yards in three games and are 0 for 24 on third down conversions in their last two games. Last week they committed six turnovers, gained -4 yards on the ground, and allowed 5 quarterback sacks. With numbers like these, its no wonder that punter Rich Miller has had so many opportunities to showcase his skills.

Although coach Tom Gadd's defensive unit has allowed an average of 38.5 points in the past two games, their play has been commendable considering the fact that the offense has given them little opportunities to rest. Senior linebacker Brandon Little, who leads the team with 34 tackles, two interceptions, and two sacks, is hopeful that the Bison can rebound. "We've got to work hard day in and day out, play good fundamental football, and the wins and losses will take care of themselves," Little said.

Senior safety Jack Boyle, who also has two interceptions, thinks that "the game plan is OK, we just need to execute better."

Fundamentals and better execution may not be enough to beat a Quaker team that leads the overall series 21-3 and is picked to finish third in the same Ivy League that Harvard was picked to finish last in. Fortunately for the Bison, all bad things come to an end and last year's one point loss could be the catalyst for an explosive showdown on Parents' Weekend.

This Week's Picks:
John: Penn 34 BU 10
Luke: Penn 28 BU 10

Another rainy day for Bucknell football

By Brett Tomlinson
Bucknellian Staff Writer

Bucknell averted their second consecutive shutout with a late fourth quarter touchdown, but the story of this week's game was remarkably similar to last week's disaster against William and Mary.

Bucknell struggled offensively, with only two first downs in the first half, while the Bison defense tried to fight the driving Crimson on the muddy turf at Christy Mathewson Memorial Stadium. Harvard prevailed with a convincing 30-7 victory in their first-ever trip to Lewisburg.

The loss left many Bison fans wondering what happened to Jim Fox '97 and Rich Lemon '97, the backfield tandem that led Bucknell to a 7-4 record last season. Fox, who started every game at quarterback last year and passed for over 2,000 yards, has had the two worst passing yardage totals of his career in the past two games, while Lemon, who broke the 4,000 yard career rushing barrier in the first game of the season, inched backwards towards the milestone with his second negative-rushing game in a row.

Although the production of the senior leaders has declined, coach Tom Gadd does not blame his talented offensive backfield for the Bison's collapse. The problems for Bucknell have been on the line, according to Gadd.

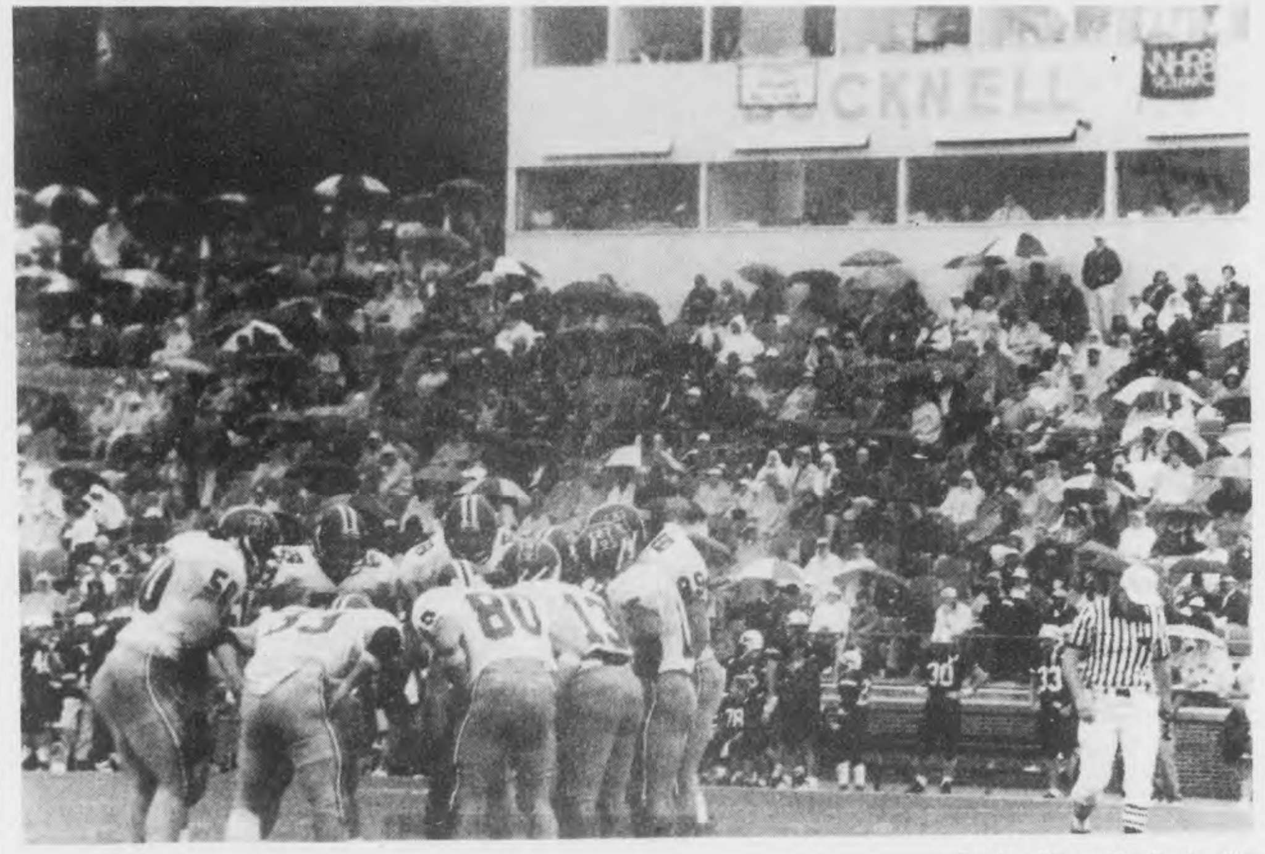
"You can't play this game without winning the physical battles." Gadd said. "We're not physically winning any of those battles right now." The offensive line, which has only one returning starter and no seniors, has struggled to establish pass protection for Fox and has left Lemon little room to work with on running plays.

Fox, who was sacked five times on Saturday, was noticeably shaken up on several plays and threw two interceptions under the constant pressure of the Crimson defense.

"Jimmy's struggling right now with his confidence, and I think the big part is he's not real sure he's going to be protected," Gadd said.

"No quarterback goes untouched during the course of the season, but at the same time,

See FOOTBALL, Page 11



Beetna Kim —The Bucknellian
The weather was gloomy, but a 30-7 loss to Harvard was even worse for the umbrella toting Bison fans.

Flash in the Pan

Pennant Races: The baseball season ended Sunday as the San Diego Padres completed a four game sweep of the Dodgers to claim the western division and set up a first round matchup against the central division winner St. Louis Cardinals.

The other matchup in the National League pits the two best pitching staffs in baseball against each other, as the wild card L.A. Dodgers face the World Series defending champion Atlanta Braves.

In the American League there was little drama as the season wound down, except for the wild card race, which was won by the Baltimore Orioles. The O's will now face last year's AL champs, the Cleveland Indians.

Managerial Changes: Two more managers were fired this past week after the season ended on Monday. Phillies manager Jim Fregosi and Red Sox manager Kevin Kennedy were fired after disappointing seasons. The Phillies had bottomed out the past two seasons as many of their stars, including Lenny Dykstra, Gregg Jeffries, and Darren Daulton all went down with injuries. The firing of Kennedy was more of a surprise, as the Red Sox posted the best winning percentage in the league after the All-Star break, although they still fell short of the wild card by three games.

The Mighty Fall: In a rash of upsets this week, the previously undefeated Minnesota Vikings and Carolina Panthers both fell to mediocre teams in the Giants (15-10 over Minnesota) and the Jaguars (expansion bowl winners over Carolina 24-14). Also falling from the ranks of the unbeaten were the Kansas City Chiefs, who fell to the San Diego Chargers 22-19.

Tyson Back in Court: Mike Tyson went back to the courtroom last week to fight a $49 million law suit filed by his former trainer, Kevin Rooney. Tyson's bad luck in courtrooms continued as the federal jury ruled in favor of Rooney, awarding him $4.4 million.

The heavyweight champion plans to fight the decision

Rooney claims he had a contract to manage Tyson for the rest of his career, but Iron Mike fired the trainer. Activist Al Sharpton, a friend of Tyson and his promoter Don King, led a protest outside the courthouse, claiming that the all-white jury's decision was biased.

Orioles Jump Ahead 2-0: In what could be the biggest upset of this year's MLB playoffs, the Baltimore Orioles have taken a two-games-to-none lead over the defending American League Champion Cleveland Indians. Brady Anderson has hit a home run in each game for the O's, who just locked up their wild card spot last Saturday with one game left in the season

SPORTS

WEDGE

From Page 12

the greatest accomplishments of the tournament was the number of Bucknell women, which far surpassed past years.

The highlight of the tournament came in the last game in which Team Wedge played the Bucknell alumni, who also had an impressive turnout for this tournament.

The veterans on Team Wedge had been anticipating this game all day. They finally got their chance to face off against the players that they idolized as first-year students, and for this year's younger players it was a chance to match faces with the legends of old.

Captain and organizer of this event Dan Heckman '99 remarked, "We love having the alumni come back, they are the epitome of good spirit and it gives us something to work towards."

The tension began to mount in anticipation of the game when ironically, the heavens opened up and it began to pour a cold, hard rain. Both teams trudged through the mud pit that was once a field, smiling at the added antidote to this already growing fairy tale. As the game progressed the score gave way to the shared sense of spirit and unity being enjoyed by both teams.

Even though the Alumni won 13-7, the game began to fade in the minds of the players and somewhere, between the rain and the mud, the true spirit of the game was brilliantly displayed.

The essence of ultimate frisbee is submerged within the spirit of the game. This is the one thing that unites teams from all colleges. It is a mutual respect for the sport and for other players, and a pure love of the game itself. This is what makes these tournaments special events. The spirit accompanied by the competition creates an atmosphere conducive to everyone involved. For both new and old players, a great lesson was learned, it is the spirit that puts the ultimate in frisbee.

ROGUE

From Page 12

Sharks allowed Lafayette to score the first four scores of the half. The Mudshark skid did not last long, however, as both Jim Bush '98 and Kevin Mulroy '99 scored on passes from Rousch to take an 11-10 lead. But in the end, the Lafayette squad prevailed 13-11 in a game dominated by good spirit and hard play.

Unfortunately, Team Rogue's game against Haverford picked up where Lafayette left off, as Haverford played a tough zone and made smart, quick throws to combat the wind. Haverford's smart and skilled play pushed them out to an eventual 9-0 lead. Then Team Rogue made some adjustments. Under the advisory of Jacob, the team switched to a zone defense, and the Mudsharks also moved their more experienced players such as Alex Gregory '99 and E.J. Crawford '99 to the offensive middle position. This helped to combat Haverford's quick throws, and Bucknell, boosted by great team defense made a strong comeback before falling 13-8.

Team Rogue's final game against East Stroudsburg was slowed by major wind gusts and monsoon conditions, but in the true spirit of the game, Team Rogue's John Belding '98 engineered Bucknell to victory with a stirring win in rock, paper, scissors, that left the team 1-3 on the day.

Despite the rain and cold, the semi-annual tournament was incredibly successful, as all teams displayed the great sportsmanship and love of the game that truly represents the game of ultimate.

Hartman, Calandra lead golf effort

By Matt Ansley
Bucknellian Staff Writer

Unfortunately for the Bucknell golf team, pretty good isn't always enough. The Bison finished in a tie for 13th place out of 18 teams entered in the Navy Fall Classic last weekend.

With a two day total of 632 and an even split of 316 each day, the Bison were playing solid and consistent golf.

It just so happened that other schools, such as tournament host Navy and Rollins College of Florida, were playing up to the peak of their ability.

"We didn't play badly," said coach Tommy Thompson. "It was just that a lot of teams played so well. Rollins College from Florida was particularly impressive."

Rollins and Navy finished in a tie for first, each with a two day total of 590. Princeton trailed slightly with 596, and the field dropped off more dramatically thereafter. Bucknell's tie was with Duquesne, but both schools were well within range of passing Saint Francis College or Saint Joseph's College, with 630 and 621 respectively.

"We just missed being in the top half," said Thompson. "If we had taken just a few strokes less it would have made all the difference, since it was so close in the middle."

Despite the result of the tournament, the Bison were pleased with their play and satisfied with the experience it provided. Rather than letting the 13th place finish discourage them, the Bison are remaining pleased with individual results.

"It was a good tournament," said Thompson. "We played against some good competition and gained valuable experience. Josh Hartman '98 and Tony Calandra '99 particularly had a good tournament. And Brad Borman is just a freshman; he had a rough first day, but came back to shoot a 77."

The Bison are looking ahead to tough post season competition, hoping that illness will not slow them down.

"We have the ECAC qualifier and the Patriot League Championships coming up," said Thompson. "Josh Hartman has been sick, and it always hurts to lose a good player out of the lineup, but hopefully he will be back with us in time."

The golfers are off to the Eastern College Athletic Conference qualifier today, and this weekend they will head to the Patriot League Championships at Lehigh University.

VOLLEYBALL

From Page 9

should have been an easy call for the linesman wasn't so easy. A ball hit by one of the Bison players clearly landed in bounds but the linesman called it out. With that play, the momentum shifted and Navy was able to stave off the Bison comeback to win the second game.

The third game was a very close match from the beginning. Neither team managed more than a three point lead in the early going.

With the score 6-5 in favor of Navy, the blocking duo of Heather Rendle '97 and Wharton made some key blocks to give the Bison an 8-6 lead. During one particular play, the two blocked three straight hits by Navy players.

After a point by Navy, Rendle aced a serve, giving the Bison a 10-7 lead. Though Navy scored the next two points, cutting Bucknell's lead to one, the Bison ran off five straight points to take a 2-1 lead in the match.

The fourth game started much like the previous one. Navy took a 5-2 lead but was not able to stretch it. Tristen Voget '99 ended a long rally with a huge kill and then added another kill on the next play, tying the game at 5-5.

During the next segment of the game, the two teams battled each other relentlessly. Navy scored a point but Bucknell tied it up almost immediately. Many plays later, the score was still knotted up at 8-8. Navy finally broke the tie, scoring three points in a row.

From there on out, the Bison dug their feet into the ground and made their stand. Refusing to let up, Rendle gave Bucknell some momentum by bashing two kills for a sideout and a point.

After another point for the Bison, Heather Montaperto '97 served an ace tying the game at 11-11. The next play, Montaperto gave Bucknell its first lead of the game with a great cross-court kill. Rendle followed this up with a blast down the middle, which none of the Navy players could react to in time.

Bucknell capitalized on Navy errors to score the final two points, capping a 7-0 run to end the game.

"We played very well in pressure situations," said Coach Cindy Opalski. "We hit good serves when we needed them and we made blocks when we needed them," she added.

Wharton led the offense with 19 kills but she had help from her teammates. Pomeroy had 14 kills and Rendle added 11 kills. Wharton also had nine blocks while Rendle had six blocks and 10 digs. Setter Amy Turnshek '98 had a good game, assisting her teammates 54 times. Susie Teitsworth '97 was outstanding defensively, recording 19 digs.

In the second match, the Bison slaughtered the hapless Coppin State team by a count of, 15-1, 15-2, 15-3.

"Playing against Coppin State gave us an opportunity to see some of our younger talent," Opalski said.

The first point for the Bison was a very good indication as to how the match would go. Annalise Meidman '97 served an ace to give the Bison a 1-0 lead in the first game. It was smooth sailing from there on out as Bucknell grabbed a 4-0 lead. Coppin State managed to get a single point but that was all.

Cameron Adams '99 had three kills in the span of a few plays and Montaperto served nine straight points to make it 13-1. In total, the Bison had five aces in the game.

Coppin State actually started the third game with a 2-0 lead but Bucknell dominated the rest of the way. The Bison scored 15 of the final 16 points to complete the sweep. Bucknell matched its game one total of five aces in this game as well.

Michelle Lesh '00 paced the Bison with 11 kills. Also playing exceptionally in the match were Pomeroy and Adams, who had seven and nine kills respectively. Pomeroy was the top server for the match as well, serving four aces.

Bucknell will travel to West Point this weekend, to face the always competitive Army team. The Bison then meet Lafayette next Tuesday in another League match.

Kodak runners trample field

Bucknell men sweep top five finishes

By Chris Ellis
Bucknellian Staff Writer

Spurred by healthy measures of confidence and desire, the Bucknell men's cross-country team finished up its dual meet tune-up schedule with a trio of impressive wins at home last Saturday.

Running in calm, favorable conditions that allowed Bucknell's runners to post some spectacular times, the Bison pounded Delaware (15-46), Hofstra (15-50), and Duquesne (15-46) at the meet, which provided Bucknell's final test before invitational play begins next weekend.

Bucknell again dominated all competitors in the meet, as its runners earned the top five places, and six of the top 10.

Lightly-regarded Matt Kodak '99 rallied again to post his second victory in as many meets, running Saturday's course in 25:46, cutting 18 seconds off of his winning time two weeks ago.

Finishing eight seconds behind Kodak was Steve Roeser '97, who earned the second-place finish for the second consecutive meet. Wally Dietrich '99, Bob Chandler '97 and Jason Trollope '99 rounded out the top five. Chris Kearney '99 finished ninth with a time of 26:42, a nine-second drop from his time in the first meet.

The win improves Bucknell's record to 5-0 and gives the Bison a huge amount of confidence heading into Saturday's Lafayette Invitational, a meet head coach Art Gulden believes will be a good indicator of the team's progress.

"After the Lafayette invitational, we'll have a pretty good idea of where we are and where we need to be," Gulden said. "That meet is run on the same course as the conference Championships, so it will also be a big test for us."

Gulden believes that the team's schedule follows somewhat of a "stepping-stone" format; that is, it begins with fairly easy matchups and advances to higher levels of competition as the season progresses.

After this Saturday, two more invitationals precede the Patriot League Championships at Lafayette on Nov. 2.

The women's cross-country team ended its dual meet season 1-1 after dropping a narrow decision to Delaware last Saturday. Delaware's fifth runner edged Bucknell's fifth by eight seconds and gave the Blue Hens the 27-28 victory.

Julie Sweitzer '99 was Bucknell's top runner, placing third overall with a time of 18:51. Swietzer's time was ten seconds faster than her winning time against Manhattan in her previous meet. Annie Hamlin '99 and Julie Shafter '97 both crossed the line in a time of 19:09 to finish fourth and fifth, and Mandy McTavish returned from an injury to finish sixth.

The women's team will also participate in the Lafayette Invitational this weekend before running in the Murray Keating Invitational on Oct. 12.

FOOTBALL

From Page 9

we've got to do a better job, give him some time, and let him get in his rhythm so he can start doing the things he's capable of doing."

Lemon's early slump has also had something to do with the inexperienced line. "We haven't gotten him downfield, and we haven't gotten him to the point where you can make the breaks," coach Tom Gadd said. "It starts with the offensive line, and it starts with the physical battles up front."

Defensively, Bucknell played well on Saturday, despite the good field position of the Crimson. After the dismal offensive performance in the first half, the Bison only trailed 10-0, and the defense held strong early in the third quarter, forcing the Crimson to kick an early field goal after stuffing three plays from the one-yard line.

Outside linebacker Brandon Little '97 led the Bison defensive effort with an interception, a sack, and eight tackles. The 6-1, 200-pound senior has two interceptions on the year and leads the squad in tackles.

It was another physically rough day for Little and his defensive mates, due to the lack of offensive production. "We can't keep putting our defensive kids on the field for 85 or 90 snaps a game and expect those kids to hold up for the rest of the year," Gadd said.

Although the Bison have been outscored 77-7 in the past two games, they were able to start moving the ball late in the game to avoid a second consecutive shutout.

Roshahn Whitner '98 got things rolling on the 89-yard scoring drive, rushing seven times for 39 yards. Quarterback Jim John '99 rebounded from a shaky start in his third consecutive relief appearance, completing three straight passes and hitting freshman Greg Geishauser for the touchdown.

Geishauser replaced the injured Ken Scholtz '98, who caught a touchdown pass from John on a similar route in the Towson State game. Scholtz broke a finger in the third quarter and is expected to miss three to four games.

"I'm really proud of those kids that went in there offensively and hung in there and got that score on the board," coach Tom Gadd said. Gadd hopes that the Bison will be able to halt their skid and get things going offensively this week against Pennsylvania, the second of four straight Ivy League opponents for Bucknell.

The Bison lost a heartbreaker to the Quakers last year on a last second field goal and will seek revenge on their home turf in front of the Parents' Weekend crowd. Kickoff is at 1 p.m.

New York schools invade, conquer Bucknell soccer

By E.J. Crawford
Bucknellian Staff Writer

The Bucknell men's soccer team was hoping to use this past weekend as a springboard into the top of the Patriot League, but after tough losses to Colgate and Cornell this weekend the men's squad is now left to try to regroup and salvage a once promising season.

On Saturday, the Bison took on a very strong Colgate team in an important Patriot League match-up. The Bison had high hopes after last week's upset of defending League champion Holy Cross, but those hopes were quickly trampled as the Red Raiders scored the first two goals of the game within ten minutes of each other to take a 2-0 lead.

The first goal was a result of what sophomore Ryan Cummings called a "defensive breakdown" that resulted in a one-on-one for senior goalie Corey Harbold, who made six saves for the game, while second was scored on a cross to a Colgate forward.

Despite the early deficit, the Bison fought hard and were able to register their first goal with six minutes remaining in the half. The goal was scored by Brendon Whitworth '97 off a corner kick by Brian Ruddy '97.

However, this is as close as the Bison would get, as Colgate held Bucknell scoreless in the second half to take a 3-1 victory and dropped Bucknell to 1-2 in the conference.

"It was a very emotional loss," said Cummings, because a win "would've put us in good position to make the [Patriot League] tournament." With the loss to Colgate, the Bison will need to win two of their three conference games to get into contention for the playoffs.

But there was no rest for the weary Bison, as they had to come back Sunday and play Cornell, the 15th ranked team in the country.

As Cummings said, "Everyone's mind was on the day before [the loss to Colgate]," and as a result the team came out flat as the Big Red jumped out to a 2-0 first-half lead and then cruised in the second half to a 5-0 victory.

Bucknell was able to register only four shots for the game against a Cornell squad that has allowed only one goal all year, whereas Cornell launched 23 shots at Harbold, who in turn made 11 saves.

The Bison get a much needed week off before taking on Army in another important League contest. Although Army went only 2-4 last year, they return a "young team that has proven to be very competitive," and have already registered an early win in the League this year.

Bucknell also gets a much needed break on Tuesday, as they take on Division III Millersville, a team that the Bison defeated easily last year, 5-1.

Ryan Savell '00 wins a header against Cornell. Bucknell had a rough weekend, dropping two games against Colgate and Cornell.

Women's soccer drops two, falls to 2-2 in Patriot League

By Eric Keber
Bucknellian Staff Writer

The Bucknell women's soccer team's winless three game road trip came to an unhappy end on Tuesday with a 3-1 loss to Cornell.

Katie McElligott '00 scored her third goal of the season for the Bison with Liz Woodrow '98 assisting, but that would be the extent of Bucknell's scoring as their record dropped to 4-4-1.

Last Wednesday the Bison played Penn (1-4-1) and came away with a 2-2 overtime tie for the second year in a row against the Quakers. The Bison scored on their first shot when Sarah Stopper '00 drilled a shot from about 35 yards out into the upper right corner, her second goal in the last two games. She was followed by teammate Amy Riviere '98 who also notched her second goal of the season.

Jackie Flood answered for Penn, bringing the Quakers to within one by half-time.

"We played pretty well the first half," said Head Coach Toby Lovecchio, "but they came back and pressured us in the second half."

In the second period Penn forced the game into overtime with another goal. Neither team was able to break the tie in the overtime period.

Lovecchio believes that Penn, along with Colgate, was one of the best teams that his team had faced all season.

The Bison were out shot 29-8 and goalkeeper Becky Snover '97 was forced to make 15 saves to maintain the tie.

"Becky made some great saves and kept us in the game," commented Lovecchio. Snover has recorded 51 saves this season and, barring injury, is set to become Bucknell's all-time leader in saves.

At Colgate three days later, the Bison, playing under very windy conditions, were shutout by the Red Raiders, one of two undefeated teams in Patriot League competition. The Bison were scored on twice in the first half, and then Colgate added another goal in the second half to complete the scoring, dropping Bucknell to 2-2 in Patriot League play.

The Bison were still in the game even though they were down 2-0, but the added pressure that Colgate displayed allowed them to hold on.

"The first ten minutes we played pretty well," Lovecchio said. "Then they pressured us the rest of the half."

McElligott played a solid game defending against Colgate's best player, keeping her from scoring.

Lovecchio attributes the team's lack of success to not converting on their scoring opportunities.

"Right now we are not playing that well," Lovecchio said. "We're having a difficult time maintaining possession of the ball and we're not capitalizing on our scoring chances."

Bucknell will play their next two games at home, facing Lafayette on Saturday at noon and then Scranton on Wednesday.

Women's and Men's Tennis Update

Tennis teams travel with mixed results

By Jared Silliker
Bucknellian Staff Writer

Bringing in a season record of 2-1 to this past weekend, the Bucknell Women's Tennis team took its show on the road for matches against undefeated Patriot League rival Lafayette on Saturday and then at Villanova Sunday.

The Bison fell one win short on Saturday, as Lafayette improved to 7-0, but Bucknell (3-2) did return to earn a split over Villanova, 5-2.

Wendy Eason '98 led the Bucknell attack at third singles collecting two wins over the weekend. Eason edged out Lafayette's Randy Coin in three sets, 6-2, 6-7 (4-7), 6-3, and then cruised to a 6-3, 6-0 victory against Villanova.

Blakely Lauria '99 scored the only other singles win against Lafayette, downing Janeese Amero, 6-2, 7-6 (7-1).

Bucknell's Katie Roland '99, Kristin Jones '00 and Kerry Callaghan '00 all added singles victories over Villanova.

In doubles play, number one singles player Laura Leslie '00 teamed up with Jones to earn wins on both days, 8-3 over Lafayette and 8-6 over Villanova.

Bucknell played at Lehigh on Tuesday and hosts Army on Saturday and Holy Cross on Sunday.

Men's Tennis Finishes Third

In men's off-season action, Bucknell finished third out of 24 teams at the East Coast Athletic Conference tournament. Bucknell brought five players (3 singles, 1 doubles team) to the individual tournament where points are awarded for each win. Farleigh Dickinson placed first with 17 points, followed by yearly powerhouse Concordia (15) and Bucknell (13.5).

The Bucknell doubles tandem of Josh Plumb '97 and Sean Galligan '98 led the way, making it to the finals before losing 6-0, 6-7, 6-2 to the doubles team from Villanova.

In singles action, freshman Justin Quandt played his way into the semifinals before losing to the eventual tournament champion from Concordia.

Steve Bomberger '99 defeated the No. 1 seed from Monmouth in the second before bowing out in the quarterfinals, while number one singles player T.K. Kelly '00 lost to the eventual finalist from Concordia, but did notch a win in the consolation round.

SPORTS

WEDGE

From Page 12

the greatest accomplishments of the tournament was the number of Bucknell women, which far surpassed past years.

The highlight of the tournament came in the last game in which Team Wedge played the Bucknell alumni, who also had an impressive turnout for this tournament.

The veterans on Team Wedge had been anticipating this game all day. They finally got their chance to face off against the players that they idolized as first-year students, and for this year's younger players it was a chance to match faces with the legends of old.

Captain and organizer of this event Dan Heckman '99 remarked, "We love having the alumni come back, they are the epitome of good spirit and it gives us something to work towards."

The tension began to mount in anticipation of the game when ironically, the heavens opened up and it began to pour a cold, hard rain. Both teams trudged through the mud pit that was once a field, smiling at the added antidote to this already growing fairy tale. As the game progressed the score gave way to the shared sense of spirit and unity being enjoyed by both teams.

Even though the Alumni won 13-7, the game began to fade in the minds of the players and somewhere, between the rain and the mud, the true spirit of the game was brilliantly displayed.

The essence of ultimate frisbee is submerged within the spirit of the game. This is the one thing that unites teams from all colleges. It is a mutual respect for the sport and for other players, and a pure love of the game itself. This is what makes these tournaments special events. The spirit accompanied by the competition creates an atmosphere conducive to everyone involved. For both new and old players, a great lesson was learned, it is the spirit that puts the ultimate in frisbee.

ROGUE

From Page 12

Sharks allowed Lafayette to score the first four scores of the half. The Mudshark skid did not last long, however, as both Jim Bush '98 and Kevin Mulroy '99 scored on passes from Rousch to take an 11-10 lead. But in the end, the Lafayette squad prevailed 13-11 in a game dominated by good spirit and hard play.

Unfortunately, Team Rogue's game against Haverford picked up where Lafayette left off, as Haverford played a tough zone and made smart, quick throws to combat the wind. Haverford's smart and skilled play pushed them out to an eventual 9-0 lead. Then Team Rogue made some adjustments. Under the advisory of Jacob, the team switched to a zone defense, and the Mudsharks also moved their more experienced players such as Alex Gregory '99 and E.J. Crawford '99 to the offensive middle position. This helped to combat Haverford's quick throws, and Bucknell, boosted by great team defense made a strong comeback before falling 13-8.

Team Rogue's final game against East Stroudsburg was slowed by major wind gusts and monsoon conditions, but in the true spirit of the game, Team Rogue's John Belding '98 engineered Bucknell to victory with a stirring win in rock, paper, scissors, that left the team 1-3 on the day.

Despite the rain and cold, the semi-annual tournament was incredibly successful, as all teams displayed the great sportsmanship and love of the game that truly represents the game of ultimate.

Hartman, Calandra lead golf effort

By Matt Ansley

Bucknellian Staff Writer

Unfortunately for the Bucknell golf team, pretty good isn't always enough. The Bison finished in a tie for 13th place out of 18 teams entered in the Navy Fall Classic last weekend.

With a two day total of 632 and an even split of 316 each day, the Bison were playing solid and consistent golf.

It just so happened that other schools, such as tournament host Navy and Rollins College of Florida, were playing up to the peak of their ability.

"We didn't play badly," said coach Tommy Thompson. "It was just that a lot of teams played so well. Rollins College from Florida was particularly impressive."

Rollins and Navy finished in a tie for first, each with a two day total of 590. Princeton trailed slightly with 596, and the field dropped off more dramatically thereafter. Bucknell's tie was with Duquesne, but both schools were well within range of passing Saint Francis College or Saint Joseph's College, with 630 and 621 respectively.

"We just missed being in the top half," said Thompson. "If we had taken just a few strokes less it would have made all the difference, since it was so close in the middle."

Despite the result of the tournament, the Bison were pleased with their play and satisfied with the experience it provided. Rather than letting the 13th place finish discourage them, the Bison are remaining pleased with individual results.

"It was a good tournament," said Thompson. "We played against some good competition and gained valuable experience. Josh Hartman '98 and Tony Calandra '99 particularly had a good tournament. And Brad Borman is just a freshman; he had a rough first day, but came back to shoot a 77."

The Bison are looking ahead to tough post season competition, hoping that illness will not slow them down.

"We have the ECAC qualifier and the Patriot League Championships coming up," said Thompson. "Josh Hartman has been sick, and it always hurts to lose a good player out of the lineup, but hopefully he will be back with us in time."

The golfers are off to the Eastern College Athletic Conference qualifier today, and this weekend they will head to the Patriot League Championships at Lehigh University.

VOLLEYBALL

From Page 9

should have been an easy call for the linesman wasn't so easy. A ball hit by one of the Bison players clearly landed in bounds but the linesman called it out. With that play, the momentum shifted and Navy was able to stave off the Bison comeback to win the second game.

The third game was a very close match from the beginning. Neither team managed more than a three point lead in the early going.

With the score 6-5 in favor of Navy, the blocking duo of Heather Rendle '97 and Wharton made some key blocks to give the Bison an 8-6 lead. During one particular play, the two blocked three straight hits by Navy players.

After a point by Navy, Rendle aced a serve, giving the Bison a 10-7 lead. Though Navy scored the next two points, cutting Bucknell's lead to one, the Bison ran off five straight points to take a 2-1 lead in the match.

The fourth game started much like the previous one. Navy took a 5-2 lead but was not able to stretch it. Tristen Voget '99 ended a long rally with a huge kill and then added another kill on the next play, tying the game at 5-5.

During the next segment of the game, the two teams battled each other relentlessly. Navy scored a point but Bucknell tied it up almost immediately. Many plays later, the score was still knotted up at 8-8. Navy finally broke the tie, scoring three points in a row.

From there on out, the Bison dug their feet into the ground and made their stand. Refusing to let up, Rendle gave Bucknell some momentum by bashing two kills for a sideout and a point.

After another point for the Bison, Heather Montaperto '97 served an ace tying the game at 11-11. The next play, Montaperto gave Bucknell its first lead of the game with a great cross-court kill. Rendle followed this up with a blast down the middle, which none of the Navy players could react to in time.

Bucknell capitalized on Navy errors to score the final two points, capping a 7-0 run to end the game.

"We played very well in pressure situations," said Coach Cindy Opalski. "We hit good serves when we needed them and we made blocks when we needed them," she added.

Wharton led the offense with 19 kills but she had help from her teammates. Pomeroy had 14 kills and Rendle added 11 kills. Wharton also had nine blocks while Rendle had six blocks and 10 digs. Setter Amy Turnshek '98 had a good game, assisting her teammates 54 times. Susie Teitsworth '97 was outstanding defensively, recording 19 digs.

In the second match, the Bison slaughtered the hapless Coppin State team by a count of, 15-1, 15-2, 15-3.

"Playing against Coppin State gave us an opportunity to see some of our younger talent," Opalski said.

The first point for the Bison was a very good indication as to how the match would go. Annalise Meidman '97 served an ace to give the Bison a 1-0 lead in the first game. It was smooth sailing from there on out as Bucknell grabbed a 4-0 lead. Coppin State managed to get a single point but that was all.

Cameron Adams '99 had three kills in the span of a few plays and Montaperto served nine straight points to make it 13-1. In total, the Bison had five aces in the game.

Coppin State actually started the third game with a 2-0 lead but Bucknell dominated the rest of the way. The Bison scored 15 of the final 16 points to complete the sweep. Bucknell matched its game one total of five aces in this game as well.

Michelle Lesh '00 paced the Bison with 11 kills. Also playing exceptionally in the match were Pomeroy and Adams, who had seven and nine kills respectively. Pomeroy was the top server for the match as well, serving four aces.

Bucknell will travel to West Point this weekend, to face the always competitive Army team. The Bison then meet Lafayette next Tuesday in another League match.

Kodak runners trample field

Bucknell men sweep top five finishes

By Chris Ellis

Bucknellian Staff Writer

Spurred by healthy measures of confidence and desire, the Bucknell men's cross-country team finished up its dual meet tune-up schedule with a trio of impressive wins at home last Saturday.

Running in calm, favorable conditions that allowed Bucknell's runners to post some spectacular times, the Bison pounded Delaware (15-46), Hofstra (15-50), and Duquesne (15-46) at the meet, which provided Bucknell's final test before invitational play begins next weekend.

Bucknell again dominated all competitors in the meet, as its runners earned the top five places, and six of the top 10.

Lightly-regarded Matt Kodak '99 rallied again to post his second victory in as many meets, running Saturday's course in 25:46, cutting 18 seconds off of his winning time two weeks ago.

Finishing eight seconds behind Kodak was Steve Roeser '97, who earned the second-place finish for the second consecutive meet. Wally Dietrich '99, Bob Chandler '97 and Jason Trollope '99 rounded out the top five. Chris Kearney '99 finished ninth with a time of 26:42, a nine-second drop from his time in the first meet.

The win improves Bucknell's record to 5-0 and gives the Bison a huge amount of confidence heading into Saturday's Lafayette Invitational, a meet head coach Art Gulden believes will be a good indicator of the team's progress.

"After the Lafayette invitational, we'll have a pretty good idea of where we are and where we need to be," Gulden said. "That meet is run on the same course as the conference Championships, so it will also be a big test for us."

Gulden believes that the team's schedule follows somewhat of a "stepping-stone" format; that is, it begins with fairly easy matchups and advances to higher levels of competition as the season progresses.

After this Saturday, two more invitationals precede the Patriot League Championships at Lafayette on Nov. 2.

The women's cross-country team ended its dual meet season 1-1 after dropping a narrow decision to Delaware last Saturday. Delaware's fifth runner edged Bucknell's fifth by eight seconds and gave the Blue Hens the 27-28 victory.

Julie Sweitzer '99 was Bucknell's top runner, placing third overall with a time of 18:51. Swietzer's time was ten seconds faster than her winning time against Manhattan in her previous meet. Annie Hamlin '99 and Julie Shafter '97 both crossed the line in a time of 19:09 to finish fourth and fifth, and Mandy McTavish returned from an injury to finish sixth.

The women's team will also participate in the Lafayette Invitational this weekend before running in the Murray Keating Invitational on Oct. 12.

FOOTBALL

From Page 9

we've got to do a better job, give him some time, and let him get in his rhythm so he can start doing the things he's capable of doing."

Lemon's early slump has also had something to do with the inexperienced line. "We haven't gotten him downfield, and we haven't gotten him to the point where you can make the breaks," coach Tom Gadd said. "It starts with the offensive line, and it starts with the physical battles up front."

Defensively, Bucknell played well on Saturday, despite the good field position of the Crimson. After the dismal offensive performance in the first half, the Bison only trailed 10-0, and the defense held strong early in the third quarter, forcing the Crimson to kick an early field goal after stuffing three plays from the one-yard line.

Outside linebacker Brandon Little '97 led the Bison defensive effort with an interception, a sack, and eight tackles. The 6-1, 200-pound senior has two interceptions on the year and leads the squad in tackles.

It was another physically rough day for Little and his defensive mates, due to the lack of offensive production. "We can't keep putting our defensive kids on the field for 85 or 90 snaps a game and expect those kids to hold up for the rest of the year," Gadd said.

Although the Bison have been outscored 77-7 in the past two games, they were able to start moving the ball late in the game to avoid a second consecutive shutout.

Roshahn Whitner '98 got things rolling on the 89-yard scoring drive, rushing seven times for 39 yards. Quarterback Jim John '99 rebounded from a shaky start in his third consecutive relief appearance, completing three straight passes and hitting freshman Greg Geishauser for the touchdown.

Geishauser replaced the injured Ken Scholtz '98, who caught a touchdown pass from John on a similar route in the Towson State game. Scholtz broke a finger in the third quarter and is expected to miss three to four games.

"I'm really proud of those kids that went in there offensively and hung in there and got that score on the board," coach Tom Gadd said. Gadd hopes that the Bison will be able to halt their skid and get things going offensively this week against Pennsylvania, the second of four straight Ivy League opponents for Bucknell.

The Bison lost a heartbreaker to the Quakers last year on a last second field goal and will seek revenge on their home turf in front of the Parents' Weekend crowd. Kickoff is at 1 p.m.

New York schools invade, conquer Bucknell soccer

By E.J. Crawford

Bucknellian Staff Writer

The Bucknell men's soccer team was hoping to use this past weekend as a springboard into the top of the Patriot League, but after tough losses to Colgate and Cornell this weekend the men's squad is now left to try to regroup and salvage a once promising season.

On Saturday, the Bison took on a very strong Colgate team in an important Patriot League match-up. The Bison had high hopes after last week's upset of defending League champion Holy Cross, but those hopes were quickly trampled as the Red Raiders scored the first two goals of the game within ten minutes of each other to take a 2-0 lead.

The first goal was a result of what sophomore Ryan Cummings called a "defensive breakdown" that resulted in a one-on-one for senior goalie Corey Harbold, who made six saves for the game, while second was scored on a cross to a Colgate forward.

Despite the early deficit, the Bison fought hard and were able to register their first goal with six minutes remaining in the half. The goal was scored by Brendon Whitworth '97 off a corner kick by Brian Ruddy '97.

However, this is as close as the Bison would get, as Colgate held Bucknell scoreless in the second half to take a 3-1 victory and dropped Bucknell to 1-2 in the conference.

"It was a very emotional loss," said Cummings, because a win "would've put us in good position to make the [Patriot League] tournament." With the loss to Colgate, the Bison will need to win two of their three conference games to get into contention for the playoffs.

But there was no rest for the weary Bison, as they had to come back Sunday and play Cornell, the 15th ranked team in the country.

As Cummings said, "Everyone's mind was on the day before [the loss to Colgate]," and as a result the team came out flat as the Big Red jumped out to a 2-0 first-half lead and then cruised in the second half to a 5-0 victory.

Bucknell was able to register only four shots for the game against a Cornell squad that has allowed only one goal all year, whereas Cornell launched 23 shots at Harbold, who in turn made 11 saves.

The Bison get a much needed week off before taking on Army in another important League contest. Although Army went only 2-4 last year, they return a "young team that has proven to be very competitive," and have already registered an early win in the League this year.

Bucknell also gets a much needed break on Tuesday, as they take on Division III Millersville, a team that the Bison defeated easily last year, 5-1.

Michael Morris — The Bucknellian

Ryan Savell '00 wins a header against Cornell. Bucknell had a rough weekend, dropping two games against Colgate and Cornell.

Women's soccer drops two, falls to 2-2 in Patriot League

By Eric Keber

Bucknellian Staff Writer

The Bucknell women's soccer team's winless three game road trip came to an unhappy end on Tuesday with a 3-1 loss to Cornell.

Katie McElligott '00 scored her third goal of the season for the Bison with Liz Woodrow '98 assisting, but that would be the extent of Bucknell's scoring as their record dropped to 4-4-1.

Last Wednesday the Bison played Penn (1-4-1) and came away with a 2-2 overtime tie for the second year in a row against the Quakers. The Bison scored on their first shot when Sarah Stopper '00 drilled a shot from about 35 yards out into the upper right corner, her second goal in the last two games. She was followed by teammate Amy Riviere '98 who also notched her second goal of the season.

Jackie Flood answered for Penn, bringing the Quakers to within one by half-time.

"We played pretty well the first half," said Head Coach Toby Lovecchio, "but they came back and pressured us in the second half."

In the second period Penn forced the game into overtime with another goal. Neither team was able to break the tie in the overtime period.

Lovecchio believes that Penn, along with Colgate, was one of the best teams that his team had faced all season.

The Bison were out shot 29-8 and goalkeeper Becky Snover '97 was forced to make 15 saves to maintain the tie.

"Becky made some great saves and kept us in the game," commented Lovecchio. Snover has recorded 51 saves this season and, barring injury, is set to become Bucknell's all-time leader in saves.

At Colgate three days later, the Bison, playing under very windy conditions, were shutout by the Red Raiders, one of two undefeated teams in Patriot League competition. The Bison were scored on twice in the first half, and then Colgate added another goal in the second half to complete the scoring, dropping Bucknell to 2-2 in Patriot League play.

The Bison were still in the game even though they were down 2-0, but the added pressure that Colgate displayed allowed them to hold on.

"The first ten minutes we played pretty well," Lovecchio said. "Then they pressured us the rest of the half."

McElligott played a solid game defending against Colgate's best player, keeping her from scoring.

Lovecchio attributes the team's lack of success to not converting on their scoring opportunities.

"Right now we are not playing that well," Lovecchio said. "We're having a difficult time maintaining possession of the ball and we're not capitalizing on our scoring chances."

Bucknell will play their next two games at home, facing Lafayette on Saturday at noon and then Scranton on Wednesday.

Women's and Men's Tennis Update

Tennis teams travel with mixed results

By Jared Silliker

Bucknellian Staff Writer

Bringing in a season record of 2-1 to this past weekend, the Bucknell Women's Tennis team took its show on the road for matches against undefeated Patriot League rival Lafayette on Saturday and then at Villanova Sunday.

The Bison fell one win short on Saturday, as Lafayette improved to 7-0, but Bucknell (3-2) did return to earn a split over Villanova, 5-2.

Wendy Eason '98 led the Bucknell attack at third singles collecting two wins over the weekend. Eason edged out Lafayette's Randy Coin in three sets, 6-2, 6-7 (4-7), 6-3, and then cruised to a 6-3, 6-0 victory against Villanova.

Blakely Lauria '99 scored the only other singles win against Lafayette, downing Janeese Amero, 6-2, 7-6 (7-1).

Bucknell's Katie Roland '99, Kristin Jones '00 and Kerry Callaghan '00 all added singles victories over Villanova.

In doubles play, number one singles player Laura Leslie '00 teamed up with Jones to earn wins on both days, 8-3 over Lafayette and 8-6 over Villanova.

Bucknell played at Lehigh on Tuesday and hosts Army on Saturday and Holy Cross on Sunday.

OSU's Orlando is on Pace for the Heisman

Commentary

E.J. Crawford
Co-Sports Editor

Well, we're far enough into the college football year that all the pollsters and newspapers are beginning talk of the Heisman Trophy, the most ballyhooed and overrated prize in the history of athletics. And to all those who disagree, I have only one argument: Gino Torreta. And things don't look to improve this year, as all the nation is carefully scrutinizing Troy Davis, Danny Wuerffel, and Peyton Manning, as well as a host of other "skill" players from across the nation. Does anybody else see what is missing here? Can anybody name me the last time an offensive lineman, defensive back, or even a tight end won the Heisman? Well, for this year's Heisman I have a big suggestion. In fact, very big—about 6'3" and 340 pounds worth of big named Orlando Pace. But before I get to the Ohio State offensive tackle, let me first go off on my rant against the Heisman.

The Heisman trophy is supposed to be awarded to the best player in college football, not the best offensive player who touches the ball a lot. Does anybody remember the year Warren Sapp had two years ago? Even in Miami's loss in the Orange Bowl, Sapp was clearly the most dominant player in college football, and most likely would have been the number one overall pick in the draft if he didn't get fat, lazy, and stoned (as in marijuana, not as in stoned like Jet fans are going to throw stones at Rich Kotite if they keep losing). On that same drift, does anyone remember Brian Bosworth. Now given, Bosworth was completely dominating in a year when there was a color-blind quarterback with an average arm from Miami (please stand Vinny Testeverde, that is if you can get up from the mountain of defensive lineman that are lying on top of you each Sunday). But seriously, and on a bit of a different note, does anyone remember the season Deon Figures had in 1993? Probably not, because Charlie Ward (you can call him the back-up point guard for the Knicks) was eating up all the press, but Figures, then of Colorado, had six interceptions, no pass interferences calls, and allowed only one pass caught against him all year. One pass, even Dave Brown completes more than one pass a game. And I have no doubt that Figures would now be enjoying a successful pro career if much of his speed hadn't been diminished after he was shot in the leg last year by some deranged maniac. Anyway, all this brings me to this year's best player in college football—Ohio State junior Orlando Pace.

Let me start my plug of Orlando Pace by asking how many people actually reading this column have heard of Pepe Pearson? Did you know that he's averaging 132 yards a game? Probably not. Now, how many of you know of Eddie George, probably a lot more. And most know that he put up incredible numbers last year, but was not taken until the 14th pick in the draft. Many people ask why a guy with such great numbers would be picked so late. Well, here's why: Orlando Pace. Without Pace, Pearson would be another of a hundred well-qualified Division I running backs, and Eddie George wouldn't have a Heisman to come home to every night. So now it's time to give Pace a little bronzed man of his own, but don't have Pace's holding a football, have it pancaking a defensive lineman, pulling through the hole and taking out half of the opposing defense. Over the last two years Pace has been so dominant that Don Shula called him one of the best 10 lineman in football. Not college football, football. Last year Pace became the first sophomore ever to win the Lombardi Trophy, which is awarded to the best lineman in football, either offensive or defensive. That means that he beat out guys like Cedric Jones and Jonathen Ogden, both top five picks, as well as a host of others in a truly remarkable feat. I realize that people love to look at stats, so here are some pretty remarkable ones: in the last two years Pace has given up one sack, one holding penalty, had his running backs run for near 3,000 yards, and has gone 13-2 as a team. That is incredible, and truly deserving of the Heisman.

So please, Heisman voters, this year try to look beyond the fact that the man on the Heisman is holding a football, and give a look to someone who has dominated football at his position unlike anyone in recent history, and cast some votes towards the big man in the buckeye state, Orlando Pace.

Home stand proves unlucky for Bison

BY ERICA FRIEDLANDER
Bucknellian Staff Writer

This past weekend, the Bucknell men's water polo team hosted it's first tournament of the season. Maryland's Navy, Villanova and Slippery Rock came to play a series of games on Saturday.

Bucknell began its morning with a grueling game against the Navy team. The Bison knew it would be a tough game and they received what they were expecting.

After the first quarter, Bucknell was down by a score of 3-1. Navy remained strong throughout the remainder of the game and never relinquished their lead. Coach Mike Wooster rallied the team in the locker room in preparation for their next game of the day against Villanova.

Again the Bison were going to have their hands full, facing a hole set that was 6'6" and weighed in at 280 lbs. Bucknell crumbled defensively in the first quarter giving up nine goals.

However, the Bison came back and stepped up their defensive efforts for the next three quarters, but despite sophomore Bryan Baker's five goals, Bucknell was unable to take the lead.

The final game of the evening against Slippery Rock brought in massive crowds to cheer on the home team. The Bison had been down on themselves due to the two morning losses, but seemed to be rising in spirits due to the crowd's enthusiasm.

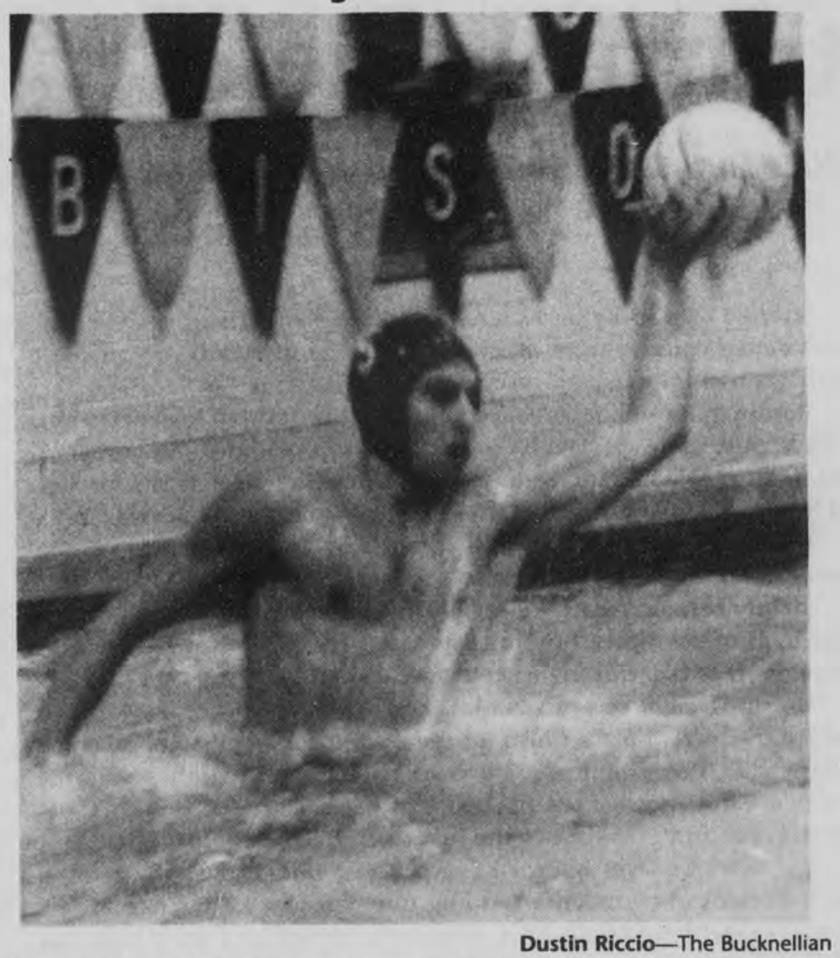
Captains Jeremy Kish '98 and Alex Lunding '98 called a team meeting prior to the game. They stressed the importance of the win to all of the players and got the men's team fired up.

Despite the efforts, Bucknell came out sluggish, ending the first quarter with a score of 6-1 in favor of Slippery Rock. However, the Bison were able to harness the energy of the home crowd and began their comeback at the start of the third quarter with three unanswered goals.

Unfortunately, Bucknell's surge was not enough to stop Slippery Rock's game and the Bison ended the weekend giving up their final game.

Wooster commented on the weekend's play. "We scored enough goals against Villanova for us to beat them easily. Due to defensive problems, we ended up giving up nine goals. We're going to focus on defensive skills during this week's practices."

This weekend, the team will travel to Brown to play the New York Athletic Club, Queens, and UMASS as well as the home team.



Dustin Riccio—The Bucknellian

Brian Baker '99 had five goals against Villanova, but the Bison fell short of a win. Bucknell dropped all three games at home.

Bucknell Ultimate hosts semi-annual "Shroomfest Tournament"

The Bucknell Mudsharks and Peace Frogs held their semi-annual tournament this past weekend, as 10 men's teams and three women's teams participated in a rainy day of hard play that epitomized the true sportsmanship of Ultimate, known as "the spirit of the game." Due to the large size of the Bucknell squad, the men were split into two teams, Team Rogue and Team Wedge. The women's team, the Peace Frogs, held a smaller women's tournament with teams from Penn State and Drew University. The following is a report of last Saturday from representatives of all three teams:

photo courtesy of Phil Huggins

The Mudsharks, shown here displaying their spirit in a drill called "the minnow", next travel to sectional at Lehigh this coming weekend

Team Wedge

BY MIKE O'BRIEN
Bucknellian Team Correspondent

On a rainy Saturday with most of the campus sleeping, Bucknell's Ultimate Frisbee team hosted a successful 10-team tournament.

The participants included Haverford, Penn State, Lafayette, Lehigh, ESU, Navy, two teams from Swathmore, the Bucknell women's team, two Bucknell men's teams, and a Bucknell Alumni team. Due to the impressive number of new Ultimate players, Bucknell split into two teams, Team Wedge and Team Rogue. Each Bucknell men's team had four games and the women's team played two. One of

See WEDGE, Page 10

Team Rogue

BY E.J. CRAWFORD
Bucknellian Team Correspondent

In weather befitting the Mudshark nickname, the other half of the Bucknell men's ultimate team, Team Rogue, took the field this past Saturday.

With a light rain beginning, Team Rogue took the field against a strong Lehigh squad. It was a tough game for the Mudsharks, as they got off to a typically slow start, as well as having to continually stop play due to a cross-country meet (only one of the strange occurrences of the day). They fell to Lehigh in what the team leaders, Rob Jacob '97 and Gavin Rousch '97 deemed "a learning experience" for all the team's newcomers.

Team Rouge's second game against Lafayette turned out to be a much more stirring endeavor, as the team, led by the strong throws and handling play of sophomores Greg Lithgow and Scott Diperna and the defense of Beau Botteicher '98, the squad jumped out to a 7-4 lead as the rains and winds picked up, making it very difficult to score against the wind. However, the team's inexperience showed in the second half, as the

See ROGUE, Page 10

Peace Frogs Take on Drew, Penn St.

By Alison Kenny
Bucknellian Team Correspondent

Frisbees flew this weekend, as well as rain and a few bodies, as the Peace Frogs—the women's ultimate team— took part in their first tournament of the season.

Led by captains, Karen Horiszny '97 and Stacey Siravo '98, as well as five other veterans, seven rookies, and even a few alumni, the Peace Frogs took to the field ready for the mud and fun.

The first game was against Penn State, and although it ended with the Peace Frogs falling a bit short, spirit was at an all time high and the team was ready for its next game.

With the wind and rain picking up, the Peace Frogs took to the field again, this time against Drew University. It was a good game, skills were evenly matched, and the score was continuously bouncing back and forth.

As the game neared an hour and a half and the rain felt more like hail, the game was capped. Four points stood between the Peace Frogs and their first win, yet Drew only needed two for a win.

As the crowd was dissipating and the field began to resemble a swamp, the Peace Frogs and Drew anxiously awaited the outcome of the game. After a lot of slipping and two long points, the Peace Frogs hopped off the field, excited about their first tournament but without the thrill of victory.

Rise in reported sexual assaults causes many to worry on campus

BY KATHRYN ARDINGER

Bucknellian Staff Writer

Seven women have reported acquaintance sexual assaults on campus to the Department of Public Safety since the beginning of this academic semester.

Sexual assault is defined under the University's policy as "threats of, or deliberate physical contact of a sexual nature which is against another person's will or without consent."

All seven female victims knew the persons responsible, said Vincent DeCerchio, director of Public Safety. Most cases involved alcohol and being at a party where the victim was in an unfamiliar place, DeCerchio added.

"In all seven cases, initially the victims did not want anything done," DeCerchio said. They didn't want to press charges, allow Public Safety to further investigate or talk to [illegible] perpetrator, he said.

"We were unable to investigate or to determine all of the facts in these incidents," DeCerchio said. "We are still actively pursuing the investigations."

Recently, one of the victims pressed charges against her alleged assaulter through the University judicial system. In this case, the Hearing Board for Sexual Assault concluded that there was insufficient evidence to find the accused responsible for violating the University's Code of Conduct.

"I've been told maybe more victims will be pursuing internal charges through the judicial system," DeCerchio said. There are currently two other cases pending review by the Hearing Board for Sexual Assault.

"At this point we are on hold, pending our ability to investigate further and pending whether or not the victims choose to file charges," he added.

The University community is alarmed by the volume of reports of alleged sexual assault. An open letter to all University students from Richard Chapman, dean of students, and President William D. Adams was sent via campus mail and email on Monday. The letter addressed the incidents that have allegedly occurred on campus this fall.

"Members of Public Safety, the dean's office and Student Health Services have been meeting to devise a series of strategies to address this issue on campus," DeCerchio said.

Some of the issues that have been discussed at these meetings include more campus wide education and more workshops in the halls, he added.

There are four victims who have not chosen to file criminal or University charges.

For more information, see sexual assault sidebar on page 3.

Questions about the future of the Patriot League rise as Holy Cross threatens to withdraw because of scholarship debate.

Fifty involved in brawl at TKE

East Buffalo Township and Lewisburg Police on the scene; several students harmed

BY BETH MARTIN

Bucknellian Staff Writer

Approximately 50 people were involved in a brawl outside Tau Kappa Epsilon Fraternity at about 1 a.m. Sunday morning.

The William Cameron Engine Company ambulance squad transported Dan Pedriani, a University student and TKE brother who is on medical leave this semester, to Evangelical Hospital where he was treated for a head laceration. Several other University students suffered minor injuries.

Four Public Safety officers arrived at the scene and witnessed a table thrown into the air and windows being broken.

Public Safety called for reinforcements, and one East Buffalo Township and two Lewisburg police officers arrived soon afterwards. The Pennsylvania State police were not notified.

Dick Miller, the EBT police officer who was on scene, indicated that charges may be brought up against one or more of the people involved in the fight, but said, "it would be foolish for me to say more."

At this point, no arrests have been made.

The fight may have begun when Rich Miller '97 was asked to leave TKE fraternity when they asked him to hand over his beer. Miller was waiting for friends in the foyer area of TKE, where alcohol is forbidden.

Miller said that he refused to leave because "I'm 21, it was my own beer, and I was wearing a wristband." Also the friends that he had come with were still downstairs.

Miller said he left when "a couple of TKE brothers pushed me outside, and one hit me in the jaw."

Miller then went to Sigma Chi fraternity. After hearing Miller's story Mike Haggerty '97, a Sigma Chi brother and good friend of Miller's, went over to TKE because he was curious about what happened.

"I knew a couple of brothers there and wanted to see what was going on," Haggerty said. "I never had any intention of fighting anyone at TKE. I mean it's my last year here, and I've already missed two football games and will be out for at least two more, because I have post- concussion syndrome from a football injury. The last thing I want to do is get in trouble my senior year and have to miss more games," he added.

Haggerty said he casually greeted several TKE brothers who were at their front door. According to Haggerty, someone grabbed him from behind, at which point he grabbed Pedriani around the collarbone area. He said he was then pushed towards the lawn area as he simultaneously pushed Pedriani into a porch column.

Although a large crowd, including Rich Miller, gathered around TKE to watch the action, Haggerty said that only he, two other Sigma Chi brothers, and a pledge were aggressive towards TKE. He would not reveal the names of the brothers or pledge.

Haggerty does not believe that Sigma Chi will be put on probation for the incident. The University qualifies an incident as organizational if five or more members are involved. Since, according to Haggerty, only four members of Sigma Chi were directly involved, the whole organization should not be held responsible.

Responding to rumors that Pedriani will press charges against him, Haggerty said, "I had no intention of filing criminal charges, but, if he does, I will too. I was assaulted when I got pushed. It is ridiculous. Rich could press charges, too."

Gerald Manning '97, TKE president, said that his fraternity "was not in fault" and that the fraternity had "no problems with Sig beforehand."

Jason Pfannenbecker '97, Sigma Chi president, had no comment.

Pedriani was unavailable for comment.

Both Haggerty and Manning said that while some of the people involved in the fight may have previously consumed alcohol, the incident was not drug related.

Richard Chapman, dean of students, and Myra Legg, acting director of greek affairs, have no comments at present concerning the incident.

Patriot League falling down

BY BRETT TOMLINSON

Bucknellian Staff Writer

The future of the Patriot League remains in jeopardy despite repeated attempts by the Council of Presidents to resolve the issue of scholarships for men and women's basketball.

University president William D. Adams, who is the chairman of the Council of Presidents, brought the issue to the attention of the faculty on Monday.

The faculty responded by supporting the University's current stand against offering athletic scholarships.

"I feel very strongly that it would be a mistake for this institution in this time of its life to institute such a policy," said Adams at Monday night's faculty meeting.

The issue of basketball scholarships in the Patriot League was raised by the College of the Holy Cross earlier this year, and it has been discussed several times by the Council, most recently at a meeting last week.

Holy Cross officials have not budged in their crusade for scholarships, and the college is threatening to leave the League if they are not allowed to award merit-based financial aid for basketball.

Bucknell switches to direct deposit only

BY TRACY THIFFAULT

Bucknellian Staff Writer

All University employees are now being paid by direct deposit as a result of a decision made by the President's Council last spring. Faculty and staff now have instant access to their pay through their bank account.

Several issues have developed into a protest of this system. Karl Patten, professor of English, has refused to sign the authorization form and has since then not been paid.

Patten sent an open letter to the faculty stating his opinion of the direct deposit system. In his letter he states that mandatory direct deposit is "an unhealthy intrusion by the administration into one's privacy and one's right to choose." He said, "I don't like being forced to do things against my will."

"They [the administration] cannot treat any employee with preferential treatment," Barry Maxwell, vice-president of administration, stated.

Student employees and staff have mixed feelings about the policy. Bill Batdorf, a member of the support staff in Smith Hall said, "It should be left up to the individuals." Leanne Leer '00 said, "it's really putting pressure on the people that work for the University; they have the right to decide for themselves." Erika

Larison to be wired and on line by spring semester

BY NATHANIEL A.F. CLARK

Bucknellian Staff Writer

Busy signals may soon be a thing of the past for University computer users.

Implementation of the now two-and-a-half year old proposal to bring high-speed network connections to every residence hall is within sight. These high speed connections, identical to the ones which connect the computers found in labs and offices to the rest of the campus, will tremendously add to the ability of students to rapidly access and exchange information from their rooms.

At present, students who wish to access on-line resources from their rooms are limited to "dial up" access using modems. Where these connections allow a maximum of 28,800 bits of information to be transferred per second, the new high speed connections (which use a networking standard known as 'ethernet') would allow approximately 15,000,000.

Another important limitation on dialup access is the number of simultaneous connections which are possible. Only 54 high speed modems are available for student use, causing long delays while students wait for a connection to become available.

The Network and Telecommunications Planning Group, working to bring this $1.6 million proposal about, is co-chaired by Gerald Commerford, associate dean of students, and Gene Spencer, director of computer and communication services (CCS).

The University committee has been charged with: "Developing a comprehensive plan and timetable that will guide, coordinate, and oversee all aspects of the Residence Hall Networking Project and the Telecommunications Upgrade Project, as well as make recommendations concerning potential new service offerings such as voice mail and cable TV that are closely related."

The committee members range from faculty to CCS employees, but has no student representation.

As noted in their charge, the committee will be dealing not only with the implementation of residence hall networking, but also with a $1.2 million subproject: the upgrading of the campus telephone 'switch'.

The University telephone system operates off a Private Branch Exchange (PBX). The heart of this system is the "switch," a specialized computer which actually carries out the process of connecting the various telephones across campus to one another. The present phone switch, located in the basement of Kress Hall, is approximately nine years old, and the University's demands have outgrown its capabilities. Evidence of this is the inability of CCS to meet the demand for second phone lines in student rooms.

As noted in their charge, the committee will be dealing not only with the implementation of residence hall networking, but also with a $1.2 million subproject: the upgrading of the campus telephone 'switch'.

The University telephone system operates off a Private Branch Exchange (PBX). The heart of this system is the "switch," a specialized computer which actually carries out the process of connecting the various telephones across campus to one another. The present phone switch, located in the basement of Kress Hall, is approximately nine years old, and the University's demands have outgrown its capabilities. Evidence of this is the inability of CCS to meet the demand for second phone lines in student rooms.

Steam line repairs explain construction around campus

BY KARIN DAVIDSON
Bucknellian Staff Writer

Cara Mickelsen—The Bucknellian

Three repairs of the steam system result in roped off holes around the campus. The work should be done within a couple of weeks.

Due to corrosion of utility lines underground, three sites on campus have been party to repairs involving digging.

The Physical Plant is in the midst of a project to repair sections of the steam and condensate lines that are networked under campus.

"The powerhouse makes steam and it's distributed throughout campus in pipes," said Michael Noll, assistant director for technical services and utilities.

Corrosion and leaks that occur over time need to be fixed.

By the biology building there is a problem with the return condensate system.

The digging of holes at the three sites (adjacent to Trax, the computer center, and biology building) are all associated with the same steam leak.

The steam, which is distributed throughout campus, heats and cools the buildings, operates the chillers throughout campus (nine create the cooling effect) and, during the winter months switches to heat.

The project is "coming to some conclusion." Without giving a specific date, Noll said that within a couple weeks the sites should be restored to their original condition.

The white material with a snow-like appearance on the mounds of dirt at the project sites "is a material which is used for insulating the steam lines—a limestone by-product, so it is environmentally acceptable," Noll said.

The playground area next to Tustin Gymnasium is also undergoing construction. The playground equipment that the children at Sunflower nursery used has been removed and relocated to Sunflower's new location on Smoketown Road. The area has been bulldozed and paved to create a parking lot.

The lot was created in an attempt to help meet the quota of parking spaces to residents living in the Gateways.

DEAN

have improved the College of Engineering. Although advancements in educational devices such as the enhancement of labs, use of multimedia instruction, and new computing facilities continue to allow students to learn in new and better ways, Rich's goal has been "to develop people and program rather than facility."

By "adding flexibility to the curriculum," non-engineering students can experience and learn outside of their discipline and engineering students have leeway in changing their major or taking courses outside their major. Associate Dean Trudy Cunningham credits Rich as the "Father of EG100," the common first semester course every engineer takes.

Rich admits that "Engineering can be too narrow," and he has tried to integrate the college into the University community better. His own personal experiences abroad, teaching in England, have led him to help open the way for engineering students to study outside of the country.

The engineering program has grown a great deal in the past ten years. Five tenure-track positions as well as 18 other faculty positions have been filled under Rich. Since 1987, the student enrollment in the College of Engineering has increased 17 percent and the number of women engineers is double the national average, at 30 percent.

U.S. News and World Report recently rated the University fifth in the nation for engineering schools without graduate programs. Rich proudly credits the school's strong, teaching oriented faculty.

Rich is looking forward to teaching again. He has some ideas for research and would also like to use a history of engineering as a vehicle for instruction. His study will mainly focus on engineering in Pennsylvania (James Moore III, one of the founders of Bucknell, was an engineer) and use examples in history to help explain modern principles of engineering.

Cunningham describes Rich as very collaborative; he will make time to be sure every member of a team is involved in making decisions and can input his or her opinion. Outside of work, he likes being outside and hiking as well as playing with his Studebaker.

Cunningham also says that Rich applies one of the main subjects of EG100, the systems approach, to everything he does. Things are done correctly and well the first time.

Originally from Pittsburgh, Rich did his undergraduate studies at Carnegie Mellon University and his graduate studies at Lehigh in mechanical engineering.

PUBLIC SAFETY LOG

October 3, 1996

JUVENILE CONTACT — While on routine patrol, a Public Safety Officer observed three juveniles entering the stadium by climbing the wall. The Public Safety Officer spoke with the juveniles and their parents regarding their behavior.

INSTITUTIONAL VANDALISM — A University student reported to a Public Safety Officer that unknown person(s) had broken one of the panes in his kitchen window in Bucknell West. Investigation is continuing.

October 4, 1996

RECOVERED PROPERTY — A Public Safety Officer received an anonymous call reporting that the University campus map, missing since Sept. 12, 1996 was located to the rear of Davis Gym Annex. The map was retrieved and Physical Plant notified to replace it.

MEDICAL TRANSPORT — A Student Health Service driver transported a University student to Evangelical Hospital emergency room for treatment of an ankle injury.

INFORMATION/MEDICAL ASSIST — A Public Safety Officer responded to Vedder Hall for the report of an ill student. The student refused treatment and the Resident Assistant was requested to check on the student's condition.

INFORMATION/DISTRESSED STUDENT — A Public Safety Officer searched various campus locations for a student who left their residence in an emotional state. The student was located and the situation resolved.

INFORMATION/VEHICLE DAMAGE — A Dining Service employee reported to a Public Safety Officer that her vehicle was damaged while parked on campus.

INFORMATION/ROOM FIRE — A Public Safety Officer responded to a room fire in Hunt Hall. The fire, apparently ignited by a burning candle, was extinguished and the smoke ventilated.

INFORMATION/POSSIBLE ACT 64 VIOLATION — A Public Safety Officer responded to a party in Swartz Hall and the presence of marijuana. The report was determined to be unfounded.

October 5, 1996

HARASSMENT BY COMMUNICATIONS — A University student reported to a Public Safety Officer that between 2:30-4:30 a.m. he received six prank phone calls. At 3:30 a.m., an unidentified person entered his unlocked room and poured an unknown liquid on him while he slept. The investigation is continuing.

RETAIL THEFT — A Public Safety Officer responded to the University Bookstore for the theft of two compact disks. The University student was cited by East Buffalo Township Police Department for retail theft.

INFORMATION/ALLEGED TICKET SCALPING — A Public Safety Officer responded to the main gate of the stadium for a report of a visitor selling tickets beneath admission price. The report was determined to be unfounded.

UNREGISTERED PARTY/ALCOHOL VIOLATION(S) — A Public Safety Officer responded to Mod 35 for an alarm activation, and upon arrival found a party in progress, where alcohol was being served. The alcohol was confiscated and the investigation is continuing.

ALCOHOL VIOLATION/UNDERAGE CONSUMPTION — Four University students were cited for underage consumption at a Bucknell West Mod.

VIOLATION OF UNIVERSITY ALCOHOL POLICY — Four underage University students were cited for being present at a party where alcohol was served.

October 6, 1996

SUSPICIOUS PERSON - A Public Safety Officer responded to Kress Hall for the report of a suspicious person. The male was located and escorted from the building.

FIGHT/TAU KAPPA EPSILON - A Public Safety Officer responded to Tau Kappa Epsilon Fraternity for a fight in progress. Lewisburg and East Buffalo Township Police were called for backup. The investigation is continuing.

October 7, 1996

INFORMATION/5K RACE — While on routine patrol, a Public Safety Officer observed several individuals participating in the Lambda Chi Alpha foot race which was suspended for insurance purposes. It was determined that the fraternity did not sanction the race and the activity was terminated.

October 8, 1996

LARCENY — A University employee reported to a Public Safety Officer that unknown person(s) had stolen one of her paintings from the Art Barn. Investigation is continuing.

HARASSMENT BY COMMUNICATION — A University student reported to a Public Safety Officer that he had received a harassing phone call in his room. A phone trap was requested and the investigation is continuing.

INFORMATION/LOST KEYS — An employee reported the loss of keys to a Public Safety Officer. The investigation is continuing.

INFORMATION/ACT 64 VIOLATION — A Public Safety Officer responded to Swartz Hall for a fire alarm activation. The smell of marijuana was detected and a plain view search met with negative results. The investigation is continuing.

Fire burns in Hunt

BY KATHRYN WRIGHTSON
Bucknellian Staff Writer

On Saturday night the William Cameron Engine Company, the volunteer fire department of Lewisburg, responded to a fire on the third floor of Hunt Hall bringing with them, one ambulance, one ladder truck, and two fire engines. The fire, which destroyed a desk, is believed to have been caused by a burning candle.

Female residents on the third floor hall of Hunt noticed smoke coming out of a room and notified the Resident Assistant (RA) on-duty. The resident of the room, Dana Rapneth '98, and the RA on-duty, Anne Mayer '98, were unable to be reached for comment.

A Public Safety Officer extinguished the fire with a hall extinguisher and the fire company ventilated the room. The fire alarm was activated by the smoke from the fire; however, the sprinkler system in Hunt was not activated. No injuries were reported due to the incident.

Public Safety is continuing to investigate the cause of the fire.

"The quick response to the fire is due to the awareness by the residents. They smelled smoke and they felt something was wrong. They notified Public Safety and gave us the opportunity to get there before the sprinkler system was activated," said James McCormick, safety manager for the University.

Consequences of burning a candle include a $100 fine, loss of lottery number privileges for the next academic year, loss off-campus living privileges, required to complete community service hours.

Jeanne Futuyma—The Bucknellian

The fire in Hunt hall last Saturday night burnt this desk. The fire is believed to have been caused by a candle.

Bucknell Briefs

"Firing Line" panelists announced

The remaining participants in the "Firing Line" debate were been announced Monday.

Former Democratic presidential candidate, George McGovern, Representative Robert Andrews, D-N.J., Democrat political consultant Bob Shrum, and historian Arthur M. Schlesinger, who served in the Kennedy administration will complete the Democratic panel.

House Speaker Newt Gingrich, R-Ga., Senator Kay Bailey Hutchison, R-Tx., former Secretary of State, Henry Kissinger, and William F. Buckley Jr, founder of "Firing Line" and National Review, will represent the Republican side.

The debate will debate the topic: "Resolved: The Repubilican party is better able to run the country for the next four years than the Democratic party."

Michael Kinsley, editor of the Internet magazine, Slate, will moderate the event, which is scheduled for Oct. 19.

Nominees sought for academic team

Nominees are being sought for an "All USA Academic Team". Twenty students will be selected for the first team and will receive %2500 in cash prizes. Forty additional students will also be selected as team members. All 60 students will be featured in an edition of USA TODAY.

The University has been invited by USA TODAY and several other national educational groups to nominate as many students as there are faculty members willing to sponsor them.

This program is designed to recognize students who excel in scholarship and leadership roles , both on and off campus.

Alum's story in *Reader's Digest*

Susan LaMaire, who graduated from Bucknell in 1993, submitted a story to the Campus Comedy section of *Reader's Digest*. Her story appeared in the October issue

The facts about sexual assault

Sexual Assault, under the University's policy, is defined as threats of, or deliberate physical contact of a sexual nature which is against another person's will or without consent.

Examples of such behavior include, but are not limited to, the following:

- Physical contact of a lewd type, including brushing, touching, grabbing, pinching, patting, hugging, and kissing.
- Deliberate or reckless threats, actual or implied, of physical contact of a sexual nature that result in reasonable apprehension of a sexual assault or physical harm.
- Coerced sexual activity, which in its most severe occurrence, is manifested by any form of sexual penetration when it was not reasonable for the perpetrator to believe the victim had freely given affirmative consent to the act.

Research and criminal reports have shown:

- A rape occurs every six minutes in the United States.
- The average age of a rape victim is 18.5 years old.
- Women aged 16-24 have four times higher risk of rape than other age groups.

According to one study:

- One in four college women had experienced a rape or attempted rape since age 14.
- Of the women who were raped, 84 percent knew their assailants.
- Fifty-seven percent of the rapes occurred on a date.
- One out of 12 male students surveyed has committed acts legally defined as rape.
- Of those students involved in a date rape, 75 percent of the males and 55 percent of the females had been drinking or using drugs.

Szendrey '00 said, "I don't think there's anything wrong with it; it's a convenience for us."

James Heath, associate professor of classics, requested that the issue be discussed at the faculty meeting last Monday. He personally is happy with direct deposit and said, "It's the wave of the future, but needs an alternative."

Previously the payroll staff spent hours tracking down lost checks and issuing new ones because employees were sick or not available to pick up their checks. It was decided that direct deposit was the best option to alleviate these problems.

A 'direct deposit team', consisting of members of the finance and personnel office, was formed last spring. The group met regularly and proposed the plan of direct deposit to the President's Council. Ruth Burnham, associate dean of students, represented students employed by the University.

All of last year's employees of the University were notified of the payroll changes through mail over the past summer. It was announced that September would be the last month the University would issue paychecks.

Counseling sessions were held over the summer by members of the team to help faculty and staff select banks with little or no fees. A number of options were presented to fit anyone's banking needs.

For Karl Patten's open letter to faculty and staff, see Opinions page 6.

Clinton signs airport security measures into law

WASHINGTON — Yesterday President Clinton signed into law the Federal Aviation Administration Reauthorization Act of 1996, which includes some of the wide-ranging security measures recommended by Vice President Al Gore's aviation security commission.

"(The bill) will improve the security of air travel," the President said at a signing ceremony in the Old Executive Office Building. "It will carry forward our fight against terrorism."

The measure, combined with a budget bill signed last week, authorizes the installation of new bomb-detection scanners to examine both carry-on and checked baggage at major airports, pays for new FBI agents to be assigned to airport security, increases inspection of mail on board flights, and increases the use of bomb-sniffing dogs.

Suspect charged in kidnapping of high school cheerleaders

DRYDEN, New York — New York State Police Tuesday announced they had arrested a suspect in connection with the disappearance of two high school cheerleaders, now believed to be dead.

Officials in upstate New York say that although they have not yet recovered the bodies, they are certain two missing 16-year-old girls, Sarah Hajney and Jennifer Bolduc, were murdered.

Police said the suspect arrested Monday night, John Ben Andrews, 31, is an ex-convict who lived next door to Hajney. He is being held in the Tompkins County Jail for kidnapping in the first degree, they said; he could face life in prison if convicted on that charge.

Maj. Arthur Hawker of the New York State Police said that investigators had found human remains in various locations in northern Chenango county. "Our efforts are continuing to locate all the remains that we can," he said.

Report: U.S. Gulf troops may have been exposed to mustard gas

WASHINGTON — The Pentagon is looking into the possibility of a third incident in which U.S. troops serving in the Persian Gulf in March 1991 may have been exposed to chemical weapons, officials said Tuesday.

The Pentagon has acknowledged that U.S. troops may have been exposed to the nerve agent sarin when they destroyed Iraqi chemical weapons stockpiles on March 4 and March 10, 1991.

This third incident refers to intelligence reports suggesting that Iraq used mustard gas against its own citizens in southern Iraq after the war, when U.S. troops were still in the area.

According to Pentagon spokesman Capt. Michael Doubleday, the question of mustard gas exposure was based on intelligence information that he said was "not finally evaluated."

"At this point, I don't have any way to confirm that the event actually occurred or to deny that it occurred," he said. "We just have to look into it."

Car leases, home improvement scams top consumer complaints

WASHINGTON — Everything old is new again in the latest survey of consumer scams.

Car complaints, as usual, top the list — with new headaches from confusing leases.

"What we were finding is that consumers didn't realize there were a lot of hidden charges, and most importantly, once you sign a lease agreement it is final. You cannot rescind it," said Mary Ponder of the Consumer Federation of America.

Ponder's group and the National Association of Consumer Agency Administrators asked consumer agencies to list the top five subjects that generated the most complaints in 1995.

Nearly all of the 46 respondents cited used car sales as the most frequent complaint; auto repair and home improvement complaints were close behind. Telemarketing and new car sales were also top complaints.

Studies: Floods good for Grand Canyon's ecosystem

PHOENIX — A man-made flood through the Grand Canyon this spring helped restore its ecosystem, bolstering claims by environmentalists that the government should mimic Mother Nature in managing the nation's dams.

New scientific studies have concluded that the week long flood in March helped revive natural habitats along the Colorado River. The studies, done by more than 100 scientists, were released yesterday by Interior Secretary Bruce Babbitt at a news conference.

A copy of the Interior Department report details how beaches, rapids, fish, vegetation and various endangered species were replenished by the flood.

The report is the culmination of six years of research on the effects of the Glen Canyon dam on the Colorado. It will be used as a model by the government as consideration is given to how dams around the nation can be managed to coexist more harmoniously with the environment.

World News

Chemistry, physics Nobel winners announced

STOCKHOLM, Sweden — Two U.S. scientists and a Briton, discoverers of a new form of the element carbon, will receive the Nobel Prize for chemistry, the Royal Swedish Academy of Sciences announced yesterday.

University of Sussex professor Harold W. Kroto and Rice University professors Robert F. Curl Jr. and Richard E. Smalley will take the chemistry honor for their 1985 discovery of "fullerenes."

The Nobel Prize for physics, announced earlier in the day, will be awarded to three U.S. scientists for their work in low-temperature physics.

Physics prize winners David M. Lee, Douglas D. Osheroff and Robert C. Richardson were cited "for their discovery of superfluidity in helium-3," the academy said.

Recently, this research has been applied to a theory about "cosmic strings" — large objects that may have been instrumental in the creation of the universe.

Police call IRA bombing 'deliberate attempt at mass murder'

BELFAST, Northern Ireland — Police yesterday called this week's car bombing at a British Army base a "deliberate attempt at mass murder" and released a computer-generated portrait of a suspected Irish Republican Army bomber seen driving out of the base shortly after the blast.

Irish Prime Minister John Bruton accused the IRA of a "cynical betrayal" of Northern Irish peace hopes. In a statement issued on Tuesday, the IRA admitted responsibility for Monday's bombing at Thiepval Barracks in Lisburn.

The IRA broke a cease-fire in February, setting off a bomb in London, but Monday's attack was the first by the IRA in Northern Ireland in more than two years. IRA moderates who had embraced the truce "no longer have a voice," says Paul Beaver of the publication *Jane's Defense Weekly*.

Mideast talks hit deadlock over Hebron

JERUSALEM — Peace talks between Israelis and Palestinians continued yesterday amid reports that the two sides were still far apart over the redeployment of Israeli troops in Hebron.

In a deal signed in September 1995, Israel agreed to withdraw troops from the West Bank town by March 1996, but after a series of suicide bombings, the troops were kept in place.

"I am not sure that we will be able to accomplish anything in the...talks unless the Israeli government changes its position and honors the agreements it has already signed," said Yasser Arafat in Egypt's Al Mussawar magazine. "No one expects that."

Israeli Prime Minister Benjamin Netanyahu is not likely to agree to such an idea. He maintains that Jewish settlers have a right to live in the city, which is home to the oldest Jewish community in the world and the burial place of the biblical Abraham.

The speaker of the Palestinian legislative council, Ahmed Queria, hinted that some compromise was possible, but said the Palestinians would turn to the U.N. Security Council or another international forum if an agreement isn't reached.

Pope doing well after surgery, doctors say

ROME (CNN) — One day after his inflamed appendix was removed, Pope John Paul II took a few steps, and post-operative tests confirmed he does not have a tumor, his doctors said in a statement Wednesday.

The condition of the 76-year-old Roman Catholic Church leader was described as normal, according to the statement released Wednesday at the Rome hospital where the operation was performed.

Tuesday's operation at the Gemelli hospital was accompanied by intense media speculation that the pope may have another tumor. A benign colon tumor the size of an orange was removed in 1992.

Yesterday's statement said final tests of tissue removed during surgery had confirmed the findings of initial post-operative analysis that no new tumor was present. However, there was nothing in the statement related to recent tremors in the pope's left hand and his shuffling walk, which have led to speculation that he is afflicted with Parkinson's Disease, a progressive neurological disorder.

Spaniard stops by empty church to pray, inherits one million

HAMBURG, Germany — A Spanish businessman and devout Roman Catholic who stopped to pray at a church during a trip to Stockholm ended up a millionaire, the Bild newspaper said yesterday.

The church was empty except for a coffin containing the remains of a man, so Eduardo Sierra knelt down and prayed for the deceased for 20 minutes, the Hamburg-based daily said.

Sierra, 35, signed a condolence book after he saw a note saying those who prayed for the dead man should enter their name and address. He noticed he was the first to sign. He would be the only.

Several weeks later he got a call from the Swedish capital informing him he was a millionaire, Bild said.

Jens Svenson, the man he had prayed for, was a 73-year-old real estate dealer with no close relatives. He had specified in his will that "whoever prays for my soul gets all my belongings," Bild said.

EDITORIAL

Greed threatens to ruin the Patriot League

The Patriot League is up against a greedy competitor and the stakes are high.

Holy Cross is threatening to pull out of the League if a permissive measure for offering basketball scholarships is not adopted. If they leave, the United States Military Academy might also, and the Patriot League will no longer exist.

The Ivy and Patriot Leagues are the only conferences in Division I whose schools do not offer athletic scholarships. It is a shame for one school to endanger this academic emphasis because of selfish motivations.

Appeasing Holy Cross might drastically change the Patriot League as we know it, but it may be the only decision that can possibly save it. And if the Patriot League collapses, Bucknell will suffer some very serious consequences.

If both Holy Cross and The Military Academy drop out of the League, Bucknell will be forced to play independently among other Division I schools. Given our geographic location and low athletic profile, Bucknell sports would have to rely on schools voluntarily traveling out of their way to central Pennsylvania (which seems highly unlikely) or would have to face powerhouses equal to Penn State (possibly bearing results that could resound negatively in enrollment and endowment).

Even if Holy Cross is the only school that leaves, several Bucknell sports teams, such as lacrosse and crew, will be unable to compete in the League, since not every remaining school participates in every sport.

Bucknell's hands are tied. The decision to give Holy Cross the ability to give basketball scholarships seems unavoidable. But that doesn't mean Bucknell should or can follow suit.

Handing out athletic scholarships would undermine the academic credibility of the University. At a time when we are trying to gain national exposure for scholarship, we must maintain high academic standards. If Bucknell is forced to give athletic scholarships in order to remain competitive, the University may become susceptible to forfeiting academic qualifications in athletes.

If Holy Cross is permitted to give basketball scholarships, other schools in the Patriot League may feel pressure to follow suit, not only for basketball, but other sports as well. Qualified student athletes could be wooed away from Bucknell by other schools with more financial assistance. Our competitiveness may decrease, which could also lead to a decrease in our enrollment and endowment.

While not giving scholarships may jeopardize our endowment in the future, giving athletic scholarships seems almost impossible with our present endowment.

How much money would we be able to raise strictly for athletic scholarships, given that the University has strongly opposed it for such a long period of time? And diverting money now used for need-based scholarships to attract athletes should not even be an option.

Hopefully, Holy Cross will be the only school in the Patriot League to consider giving scholarships, so a chain reaction will not be triggered. Bucknell's policy of just giving need-based scholarships is not only commendable, it's imperative for maintaining academic standards. We can only hope the rest of the schools in the Patriot League feel the same way.

OPINIONS

An open letter to faculty and staff

Editor's note: This is a copy of a letter Karl Patten, professor of English, distributed to faculty and staff regarding the new system of direct deposit being required of everyone receiving a paycheck from the University.

September 14, 1996

Re: Direct Deposit Payroll
From: Karl Patten, Department of English

I wonder how many Bucknell employees, other than me, object to the enforced direct deposit payroll system, recently introduced. Admittedly, it may resolve a few glitches in the current system of sending checks to whomever so desires, but at what cost? Do other employees feel that this is an unhealthy intrusion by the administration into one's privacy and one's right to choose? Does anyone else resent being told that one cannot receive contracted remuneration for one's work until one has agreed to put on, by filling out a form, a bureaucratic strait-jacket? What kind of "authorization" is it that is completely non-voluntary? What if a person simply did not have a bank account?

In my own case, I have not received my most recent paycheck because I have refused to sign a Direct Deposit Authorization Form. Perched in this financial limbo, I suppose that eventually I will be paid for the work I have done, but I have no notion of how or when this will happen. And I note that the letter of Sept. 11th from Ellis Harley states: "Checks will not be issued in future payrolls." Just how will I be reimbursed in the future? I have suggested to Mr. Halama of the Financial Office that I would gladly receive my salary in cash, but he seemed to think this primitive form of barter an impossible option.

I believe that there are larger issues involved than my particular paycheck. One of them is the power of authority to dictate terms to individuals without their compliance. Another is the ever-encroaching commitment to technology by the University, a blind submission to machines and numbers; the latest bit of gadgetry takes priority over the person. This only reflects what I believe to be ominous tendencies in our larger society. One's social security number has virtually become an identity card. Again and again, I find that I am not known by my name but rather by various sets of numbers that have become attached to it. Try dealing with the IRS, for example. In the Federal prison system a prisoner can be located by his number and his birthdate. How far are we from that?

Much more could be said of all of this, but I intend to keep this letter as brief as possible, hoping that it will be thought about and that anyone who is sympathetic to my resentment at this new act of incivility (in a University ostensibly devoted to liberal values, one of which is the freedom of the individual) will write or speak to me. On a much graver issue (his life), Joe Hill said to his friends: "Don't mourn for me—organize."

The cost of printing this letter is entirely paid for by Karl Patten, who is not yet devoid of funds.

SpeakOut

In light of the recent violent incidents on campus has your perception of Bucknell changed?

Lauren Schmierer '99
"Yeah. I'm a little more precautious about locking my door. I'm a little uncomfortable knowing that there are people in Lewisburg who could be responsible for some of these acts."

Emily Kleinholz '99
"Not really...I've always been cautious so I'm not doing anything differently now because I never had a false sense of security."

Timothy Gernitis '98
"No. I don't view it as an extremely serious problem."

Heidi Hammes '99
"No. I don't know too much about the incidents so it's new news to me, but I feel I've learned preventive measures in the past so I don't feel threatened by these new incidents."

LETTERS

Letter's assault on free speech frightening

To the Editor:

This is a response to Mary Wyeth's rather frightening assault on free speech. I understand that she did mention that Ed Berlen has a "right" to free speech. However, she ended her letter with a phrase reminiscent of many dictatorships. Congratulations, Mary, on joining the authoritarian movement. By recalling the "Big Brother is watching" phrase and perversely twisting it to "Big Sister is watching," you have done more damage to causes you seem to hold dear than to Ed's remarks. If you claim to speak on behalf of your gender, then what your little twist of phrase does is to degrade women in general by making them out to be undemocratic and authoritarian opponents of free speech.

We have a first amendment for a reason. It is to allow people, no matter whether they speak for themselves or a group, to speak their minds. It is unfortunate that your mentality has infected American society from its inception, a legacy of our Puritan past. I am not surprised, though given the current "trendiness" of various forms of censorship, that you have chosen to join the assault on free speech. By trying to intimidate Mr. Berlen with your "Big Sister is watching," you have inadvertently frightened many people, who would otherwise have agreed with you that Mr. Berlen's humor isn't in the popular taste. Most people will distance themselves from somebody who will simultaneously affirm somebody's right to free speech, and out of the other side of their mouth, try to intimidate that same person into not speaking their mind too much.

What exactly does "Big Sister is watching" mean? Are you going to take some action against Mr. Berlen if he chooses to exercise his right to free speech? If so, what sort of action would it be? Violence? Slander? I suggest that next time YOU choose to speak so freely, you should weigh your words for the meaning that they carry. Your letter can be construed in a lot of ways, some of which aren't pleasant. I would like to think that you have the best of intentions and merely made a slip of the pen with your ominous words, but in this day and age one can never be sure.

Partial-birth abortion deserves opinionless inquiry

By Ellen WcWhorter
Bucknellian Staff Writer

In the Oct. 7, 1996 issue of *Newsweek*, Jonathan Alter wrote what I would deem to be the paradigm opinion piece concerning partial-birth abortions. Although a self-labeled "pro-choice type," Alter managed to pull something off which would turn the stomach of any true extremist.

He used common sense, stemming from observation and a balanced opinion, throughout his article, and in the process he shed both the conservatism of the pro-life camp and the liberalism of the pro-choicers, leaving him with a starkly accurate portrayal of this much debated issue.

Partial-birth abortion, a name coined by anti-abortionists, is the medical procedure in which a fetus is brought down into the birth canal, its skull is crushed, and it is pulled out of the uterus. This procedure is performed within the second or third trimester of a pregnancy.

These are the undisputed facts, but Alter notes that the extremists, both pro-lifers and pro-choicers, cease agreement on virtually everything else.

Recognizing that both extremes circulate only those facts which will strengthen his/her collective arguments, Alter actively sought out the facts for himself.

He found that the number of partial-birth abortions performed each year to be more than the 500 or 600 that the pro-choice camp would like to believe, but less than to exist as a "common" occurrence, which pro-life supporters confirm. Alter finally estimated that the procedure is used "perhaps several thousand times a year."

He went on to say that although the pro-choice groups insist that partial-birth abortions are "reversed for heart-wrenching cases involving women whose tests show severely deformed fetuses or whose health [is] at risk," C. Everett Coop, former surgeon general, says that partial-birth abortion is never medically necessary.

In the same turn, however, Alter said that receiving a partial-birth abortion is not as easy as the pro-life group maintains. "Supporters of the ban [on partial-birth abortions] made it seem as if a healthy woman could find herself not fitting into her prom dress, walk into an abortion clinic 40 weeks pregnant and get an abortion." This would be illegal in 41 states.

By paraphrasing Alter's article, I realize that the magic of his words and observations is lost. But through this paraphrasing, I hope that one might at least find the necessary validity of his method of inquiry.

Alter believes that the surge of political loyalties brought on by the upcoming election has intensified the exaggerations of both the pro-life and pro-choice assemblies.

I have no idea if this is the cause of so much of the intentional misleading, but I am inclined to argue that it is never honest, nor is it accurate, to form an opinion by inspecting only one side of an issue.

And that is why I find Alter's article so compelling—he sheds his pro-choice opinions in exchange for actual facts and observations; this is something that should not seem foreign to those of us who use common sense.

Whether or not Alter's opinion remained that of the pro-choice camp is irrelevant.

His method of opinionless inquiry provided the foundation on which only an appropriate opinion could be built.

Euthanasia to have its day in The Supreme Court

Court should take a firm stance and impose limitations

By Amy Younggren
Bucknellian Staff Writer

The Supreme Court is back in session and has announced that it will rule on the two physician-assisted suicide cases from Washington and New York. The Court will stimulate a transformation that will place it in the forefront of much visible and social change.

Physician-assisted suicide or euthanasia is defined as the deliberate, painless killing of persons who suffer from a painful and incurable disease or condition. This issue has been prevalent and controversial for years, and now with this new term the Court will face it head on.

In two of the nine appeals courts in the United States that were heard last spring, the Constitution was interpreted as giving terminally ill people the right to choose a doctor's assistance in deciding the moment of death. By making this decision, the court has disturbed its conservative stand on the individual's choice and social norms in choosing the moment of death.

The Court had no choice but to listen to these cases because they provide us with the its official response and answer to these constitutional questions that have been raised. However, the potential for major social change at the hands of the court could cause a liberal decision to mean much more than the permission to allow one human to choose the moment of death.

The justices of the Supreme Court are not committed to using the Constitution as an engine of social change, and why not? Last year these justices were reluctant to sway from the institutions that contained the precedent and let their decisions establish new laws if there was a need.

This is a conservative court that takes very little steps and makes few decisions that would disarm the social and legal norms present at the time.

It seems however, that there is hardly a "small" step to take when speaking of assisted suicide. With this issue there is no half way.

The problem lies at the core of the Court, where it somehow has become unethical to initiate a large step towards social reform.

In my opinion, if the Supreme Court does not have the guts to go against precedent and make a decision for the good of the parties involved and the good for the nation, then who does? It is respectable that they realize the amount of pull they have in defining social and legal norms, but to become so afraid of rocking the boat that each decision simply rests on precedent seems very lackadaisical.

Another issue surrounding the Court in relation to these cases is the actual definition of this problem. It has become necessary to break down the mere definition of euthanasia into two separate situations.

First, the removing of life-sustaining equipment in order to "let" the patient die naturally. Second, the administering of fatal medications to initiate the death process in the patient.

The two appeals courts in the Washington and New York cases found the two situations to be constitutionally equivalent ways of choosing to die.

They actually stated that to treat the two categories differently would violate the constitutional guarantee of equal protection.

I think it is one thing to refuse life-support equipment, especially when the patient's life would be similar to that of a vegetable, but it is quite another issue to administer fatal drugs to a patient.

This is both playing God and speeding up a process in which the outcome is still unknown. No matter how many doctors' opinions one has, no one can fully know the direction of someone's disease or the fate of their life.

Give humans the right to end life when it has lost its quality

By Nicole Maestri
Bucknellian Staff Writer

Right now, I am in total control of my life and I love my independence. I choose how I wish to live my life—where I go, what I do, how I act. So, if I can choose all of these things, can I choose the right to die?

The Supreme Court is going to have the chance to rule on two euthanasia cases this session. And it is going to have the chance to tell me whether or not I can make that decision. It will tell me whether or not I can choose the right to die.

My own death seems something of an enigma at this point in my life. I can comprehend the death of my grandmother or an elderly family friend. They have lived a full life and now death, while painful for those left behind, can be accepted.

But I cannot comprehend my own death. It is a frightening thought and the only way I have found to deal with it is to choose not to think of it. I don't choose for death to be a part of my life—I guess I feel I have the power to tell death I am not ready.

But what will happen when the time comes when I will I loose my independence? Today, I am fully capable of performing all functions necessary for me to survive, and when I do have to ask for help to do something that I feel I should be able to do, I am ashamed. But there will come a time that I will have to rely on others to help me make it through the day, and I dread that day.

If it ever comes to the point that where I have no physical control of my body, I want to have to right to end my own life. When a person is no longer able to care for themselves, is forced to deal with chronic pain and no longer has a will to live, why can they not choose the right to die? What has their life, if it can still be called that, become?

Euthanasia is a quality of life question. Technology has enabled us to make amazing advances in the world of medicine. Millions of premature babies now survive when in the past, they would not have lived beyond a few hours. Organ transplants are now successfully completed for almost any type of organ and reconstructive surgery erases any trace of a problem. Medicine that has been discovered is the reason we live healthier and longer lives.

Unfortunately, medicine and technology are the reasons we are alive when we should be dead. Technology can keep our bodies "alive" longer than ever before, but what does "alive" mean? Our hearts may be beating, but are our minds functioning? We may be able to wake up in the morning, but what will the day be filled with? Pain? Constant medications? Blood samples and I.V.s? Technology and medicine have allowed us to make it through another day, but have we "lived" through the day?

While medicine can do amazing things, it has its failings. If a cancer patient decides to refuse treatment because it will be too painful, too long and too drawn-out, they are allowed to make that decision with dignity and respect.

But if a cancer patient decides to accept treatment, thinking they are strong enough to endure the pain and then realizes, once their bodies have not responded to powerful drugs and medications, that they wish to end their suffering, they are not allowed. They are allowed to embrace drugs that offer them the possibility of another day, but they are not allowed to request drugs that end their lives when they know they can not mentally face another day.

If I was a judge on the Supreme Court, I would be overwhelmed with the task that lies ahead of me. Is if morally acceptable to condone physician-assisted suicide? I am not sure.

But is it morally acceptable to deny a person the right to die with a least a little bit of dignity, with a glimmer of the independence and autonomy they used to enjoy? When a person is living solely because medication is keeping their heart beating and their brain functioning, but there is no joy in their days or a future to live for, what gives us the right to deny them the decision to end a life that has already been lived?

I do not think twice about my health—I know that I take it for granted. And I do not think twice about my independence—I see it as a fact of life. I feel that as a human being, I deserve a certain amount of respect and a degree of choice, no matter what the state of my health may be.

I believe that we all know ourselves and our lives, our tolerance for pain, and our conception of the quality of life. I hope we will all be given the chance to decide, when our lives no longer resemble what they used to and our physical body can no longer function, that we are ready to die.

The Supreme Court, by allowing physician-assisted suicide is not condoning suicide or diminishing the importance of life. It is acknowledging that medicine has its limitations and cannot save everyone. It is believing that human beings are intelligent enough to know when they have stopped living and started dying.

Did anything in this paper offend you? Perplex you? Annoy you? Take some time out of your day and write a Letter to the Editor. Let everyone know.

Husband-wife duo to fill Bucknell Hall with music

By Marni Harriman

"I set a goal for myself and say I'm going to play." And play she will.

Mary Hannigan will perform five pieces of different styles and moods on the flute at 8 p.m. Thursday in Bucknell Hall.

The campus is invited to Bucknell Hall to experience the melodic sounds of Mary Hannigan's flute and the piano accompaniment of her husband, Barry Hannigan, professor of music.

According to Hannigan, it was her original idea to give the first performance in 1978. This musical performance has now become an annual flute recital, with her husband accompanying her on piano. Hannigan sees this annual performance as a way to keep active and as another challenge for both herself and her husband to accomplish.

With the input of her husband, Hannigan has chosen all the pieces to be performed. First, she decides what pieces she enjoys playing and what would be a challenge. She then tries to assemble the program with a contrast of styles and moods.

In this performance there will be five pieces on the program, with a brief intermission after the third.

The first piece is a tribute to Johann Sebastian Bach, but the composer is unknown.

The duo will then be performing "Fantasy," by Gaubert, also a flautist, which is a Paris conservatory contest piece. It contains two contrasting sections—one is slow and methodical while the other demonstrates challenging technique. "The flute tends to sour, like everything he has written," Hannigan added.

Hannigan is especially excited for the third piece, which is a world premiere for the composer, Larry Nielson, professor of theory and composition at Westchester University in Philadelphia. The Hannigans have known the composer for over 10 years, and he actually wrote the piece especially for their musical talents.

The Hannigans and Nielson have worked closely, as they are still making changes for the performance.

The couple received rough copies of the piece over a year ago, and since then endless phone conversations between the two parties have resulted in some rewrites of the work.

"This piece is a part of all of us," Hannigan expressed.

The second half of the performance will begin with "Ballade," by Carl Reineche, who was of the late Romantic era. This piece will be performed in its original form, designated for the flute and orchestra.

"Sonata," by Robert Muczynski, is the final piece. It can be described as an angular, rhythmic piece that retains a Neoclassical component, along with elements of jazz. The composer is largely influenced by modern studio musicians.

Barry Hannigan, professor of music, will accompany the recital.

Hannigan has been playing the flute for more than 30 years. She has spent her life pursuing the instrument seriously. "It comes from within," she explained. "You discover you can't live without it."

Hannigan is a very self-motivated musician, who has been inspired by many flautists. In particular, Geoffrey Gilbert, a British flautist, greatly influenced her and her work.

"He really changed me as a player, as well as affecting me personally. He was incredible," Hannigan said.

The Hannigans performance will take place on Thursday, October 17 at 8 p.m. in Bucknell Hall.

Students, alumni join in one-act plays

By Erin Windle
and Emily Thorne

The Tustin Studio Theater will be transformed into a cafe setting mimicking the 1960s decade which Gary Grant, Chair of Theater Department, described as having an "intimate and informal atmosphere" for the presentation of "Tonight at Le Cafe Tustin: An Evening of One Acts." These plays are part of the continuing celebration of Bucknell's Sesquicentennial. The plays, "Comings and Goings," "Icarus' Mother" and "Speaking the Language," directed by Grant, were all written by University alumni who are now playwrights, and star University alumni and current students.

"Comings and Goings," written by Megan Terry, who is an artist-in-residence at the University this season, illustrates the unique interactions in relationships such as mother/son, guru/student, comedian/heckler and boyfriend/girlfriend. There are only two set roles in the play: he and she. The student actors performing "Comings and Goings" do not know who exactly will portray the "he" and who will portray the "she" until a spinner is spun only seconds before the actor must play the role on stage. The spinner is spun throughout each scene, giving the play a dramatically chaotic and attention-grasping quality.

The roles of he and she will be played by Liz Asti '00, Alexandra Franklin '00, Kelly George '00, Donald Jones '98, Liz Maccie '97, Lindsay Rosenberg '99, Todd Ross '98, Tom Markley '96 and Jon Uffelman '90. The musical score will be created by Peppy Kokinas and her band, Antigony Rising, and University alumni.

> *"It is a test for actors to switch in and out of different roles and energies. It is fun not being confined to one role."*
> *—Tom Markley '96*

Markley enjoys performing in this play because, "It is a test for actors to switch in and out of different roles and energies. It is fun not being confined to one role."

Franklin, an energetic first year student, was chosen to perform "Comings and Goings" because of her successful improvisational sketches at auditions. "Gary Grant challenges me to look in different directions and to find inspiration within myself," Franklin said emphatically.

"Icarus' Mother," written by Pulitzer-prize winning playwright, Sam Shepard, will also be performed. Shepard, who is married to Jessica Lange, starred in the movie *The Right Stuff*. The plot of "Icarus' Mother" revolves around the relationship of five friends. Cast members include Shannon Kearns '97, Chris Scholl '99, Maccie, Ross and Uffelman.

Uffelman currently lives in New York City and has had the opportunity to work with Beth Henry, a Pulitzer Prize winner. "It was an incredible opportunity," he explained, "She is generous with her insights and allows an actor freedom to perform at his own will."

"Speaking the Language," the third-one act play to be performed, was written by Bernardo Solano, an artist-in-residence this season at the University. The play is a sequel to "Speak Spanish for Me," which was written by Dave Ames '94. Ames' play follows the lives of four freshmen at Yale. "Speaking the Language" shows how their lives change after graduation. Two members of the cast are Kearns and Ross while the remaining roles will be portrayed by alumni.

Ross enjoys working with Solano in his play. "It was very stimulating to work with Bernardo Solano on this project. I hope to work with him again in the future."

While not acting, other theater alumni are volunteering with the background preparation of the one act plays. Mark Mansavage, University graduate, is in charge of costumes and Rich Dionne GR designed the poster used for advertising "Le Cafe Tustin: A Night of One Acts," which includes a picture of Harvey Powers, the man who designed the Tustin Theatre.

The show will take place at 8 p.m. on October 18, 19 and 20 in the Tustin Studio Theater.

Coffeehouse performer to jazz up the Bison

By Shetal Mithani
Bucknellian Staff Writer

Brett Brown '00 knows how to judge a good performance.

When he first walks onto the stage, he feels anxiety form a knot in his stomach. The spotlight shines down as he sits in the center of the stage and picks up his guitar.

As beautiful, jazzy notes start pouring into the ears of the audience, people start clapping and bouncing to the notes. The knot in his stomach releases its grip, and nothing but the music takes hold.

"I like an audience that pays attention and I like people who get up and start dancing," Brown said.

From 9 p.m. until 11 p.m. on Wednesday, October 16th, Brown will perform at Coffeehouse in the Bison.

Brown said he is definitely playing the guitar and he may play the mandolin and harmonica.

Brown's music consists of blues, jazz, blue-grass and rock and roll. He writes his own songs, but he still doesn't know which ones he'll play at the Bison.

"I really enjoy writing [my own songs]. Bob Dylan has really inspired my song writing," Brown said.

According to Brown, performing is not a rarity for him. He has performed on stage since fifth grade and he has played the guitar since fourth grade.

"I've grown up with music. I guess my parents really got me into playing musical instruments," Brown said.

Brown, however, is still not sure how serious he'll take his music in the future as a career. He's pretty sure he'll major in either business or history.

"I know I'll still play the guitar for the rest of my life. I can't just sit around without playing," he said.

A & E Calendar

Thursday, October 17
flute recital
Mary Hannigan, flute, and Barry Hannigan, piano
8 p.m., Bucknell Hall

Friday, October 18 - Sunday, October 20

Alumna, Rochester Orchestra to help Weis Center celebrate Sesquicentennial year

D'Anna Fortunato '67 to join musical talents with renowned orchestra, prodigy cellist for Weis Center event

By Rachel Doebber
Bucknellian Staff Writer

What do a child cello prodigy, a former University music student and a famous American orchestra all have in common? Give up?

Combining all their talents, these performers will be presenting a concert as a Weis Center Sesquicentennial event.

The Rochester Philharmonic Orchestra, renowned cellist, Alisa Weilerstein and alumna mezzo-soprano D'Anna Fortunato '67 will be performing together on October 25 at 8 p.m.

"We got such a great response from the Louisville Orchestra concert that we decided to try to find an American orchestra to perform for the Weis Center's Sesquicentennial event. The Rochester Philharmonic is one of the top notch orchestras in the United States. They were also very willing to cooperate in programming the event with us where we could bring in other soloists," said Bill Boswell, director of cultural events for Bucknell University, when asked why the Rochester Philharmonic was chosen.

According to Boswell, it also works out well because Rochester is not too far away. Therefore they could travel here on the 25th, perform and leave that same night.

Led by Robert Bernhardt, principal conductor and artistic director, the Rochester Philharmonic, which was founded in 1923, will feature many pieces, all written by American composers including Aaron Copland, Leonard Bernstein, David Ott and William Grant Still.

Since this concert is to commemorate the University's Sesquicentennial, one selection will feature a song written by a famous hymnist who was also a music professor at the University during the late 1800s

"We wanted the content of the performance to be special and also to make a lot of connections with Bucknell," Boswell said, referring to the presentation of Aaron Copland's *Old American Songs* which includes his arrangement of Robert Lowry's hymn, "Shall We Gather at the River" that will be sung by Fortunato.

D'Anna Fortunato '67, a mezzo-soprano, will perform with the Philharmonic Orchestra at 8 p.m. October 25 in the Weis Center.

Born in Pittsburgh to parents of Italian and German descent, Fortunato studied at the University for a few years and later graduated from the New England Conservatory of Music where she currently is a professor of voice.

She has made many appearances as a concert soloist with performance groups including the National Symphony, San Francisco Symphony, New Jersey Symphony, the Chamber Music Society of Lincoln Center and St. Luke's Ensemble.

Fortunato has also sung the lead role in opera companies such as the New York City Opera, Rochester Opera Theater and Kentucky Opera.

In addition to her many stage engagements, Fortunato has recorded CDs for various recording companies including six Baroque CDs for Newport Classics and her portrayal of Dido in Purcell's *Dido and Aeneas* for Harmonia Mundi.

"We love D'Anna and so we try to bring her back as often as possible. She was received very well the two previous times she performed here," Boswell added.

At 14 years of age, Weilerstein is a member of the Young Artist Program at the Cleveland Institute of Music and is the youngest cellist to have ever been accepted into the Cleveland Orchestra Youth Orchestra. This past summer, she was invited to be a guest artist at the Aspen Music Festival and will soon perform as a soloist with the Santa Rosa Symphony.

Weilerstein, who began playing the cello at age 4 1/2, also performs with her parents in their Weilerstein Trio all over the country in places such as Cleveland, Chicago and Eastman School of Music in Rochester, NY.

Weilerstein was recommended to Boswell as a soloist through her agency.

"There's an intrinsic excitement in hearing a child prodigy perform before they really become famous," Boswell explained and then added, "This should also be a different solo performance compared to past ones because she [Weilerstein] is a cellist whereas most soloists are violinists or pianists."

Tickets for this event can be purchased by mail, phone or in person at the Weis Center Box Office, Tuesday through Friday from 11:30 a.m. to 5:30 p.m. Tickets for students, faculty and staff with Bucknell ID are $10 while general admission is $20.

Movie Reviews

By Chris Nichols
Bucknellian Staff Columnist

Tin Cup *** 1/2
Starring Kevin Costner, Rene Russo, Cheech Marin and Don Johnson

From the first glance this film looks a lot like a no-brainer. Kevin Costner is doing his usual suave routine to win himself a lady. And really that's basically what it is.

But there is definitely more than that to this film. Costner's character is much more disturbed than it looks from the outside. Of course, with his usual charm he manages to blow off his troubles and tries to slide through life on his golf.

Enter Russo, a local shrink who's coming for golf lessons. All of the sudden things get really complicated. Roy MaCavoy (Costner) is a guy that's never finished anything in his life. Suddenly, he sees a reason to try a little harder (that reason being Russo's character). Things get worse when Johnson's character comes to town. The two of them used to be best friends and golf partners; now Johnson is on the pro Golf tour and MaCavoy is the "pro" at a driving range in the middle of Texas. Things get complex and it turns into a contest for the woman (and the golf game).

One of the most entertaining aspects of the film is the supporting character Romeo played by Marin. Cheech's classic humor seemed to shine through in a way that it hasn't for many years. The relationship between Romeo and MaCavoy is a really unique one and definitely not as superficial as it initially seems. One of the most powerful scenes in the movie is when the two face off against each other.

I think most viewers will like this film regardless of their interest in golf. Granted it's no *Happy Gilmore*, but it's a good, funny and thoughtful film.

Video Review

Miller's Crossing (1990) **** 1/2
Directed by Joel Coen
Starring Gabriel Byrne and Albert Finney

This excellent film is produced by the same brother team that made last week's Video Pick *Fargo* , along with other greats like *Barton Fink* and *Raising Arizona*. I'm on a Coen brothers hype right now so bear with me.

This Prohibition-set film follows a group of underworld bad guys through the double crossing and double-double crossing they experience in a short couple of days.

The focus of the story is Tom (played by Byrne), who is one of the brains behind the operations of Leo (played by Finney), an Irish boss who has both the Mayor and the Chief of Police in his pocket. A change of power is coming to this city and Tom isn't sure whether his loyalties belong where they've been, or with the new boss who is about to take control. Of course there's a woman involved (played by Marcia Gay Harden); the only real question about her though is the mystery surrounding who she's not sleeping with.

Anyway, the story is a clever weave of complexities among complexities. Byrne does a great job portraying the only man in the town that doesn't seem trigger happy; yet he is still a very powerful figure.

The screenplay, directing and cinematography here are all first rate. It's violent (rated R), but not excessively so. If you missed this one on the big screen definitely make a point of renting it.

Ratings:

★★★★★:	Excellent: A must see.
★★★★:	Very Good: Very entertaining.
★★★:	Good: Worth the price.
★★:	Not so good: Limited scope and/or some significant flaws.
★:	Pretty bad: If you consciously see this movie you probably need help.

Show and CD review

Rent electrifies Broadway

By Robin Reitzes

Some of you may have heard about the hype this new rock-opera *Rent* has been getting. The rave reviews *Rent* has received are not unfounded. Directed by Michael Greif and starring Adam Pascal, Anthony Rapp and Daphne Rubin-Vega, *Rent* has already won the Pulitzer Prize along with four Tony Awards, including Best New Musical.

Unfortunately, Jonathan Larson, the man responsible for the heartfelt score and lyrics, died of an aortic aneurysm before the show opened on Broadway. Nevertheless, *Rent* is experiencing the sweet smell of success.

Larson's 20th century rock-opera adaptation of the 19th century "Boheme" by Puccini is set in the East Village of New York City where it presents many of the quintessential issues of today. The characters struggle with everyday life in addition to some heavy obstacles such as AIDS and drug abuse. The performance can make the audience feel inspired and uplifted in the end.

However, the credit can not be entirely paid to Jonathan Larson—the cast of *Rent* in itself is awesome. The stars are extremely energetic and talented. Most of the cast is making their Broadway debut in *Rent* which sets the enthusiasm level on stage at an ultimate high.

The *Rent* CD was released last month and can be ordered in the bookstore. The CD is one of the best original cast recordings of a Broadway Musical that I have ever heard.

If you are thinking of seeing *Rent* I would suggest buying the tickets well in advance because they are selling out fast! *Rent* is playing at the Nederlander Theatre located at 208 West 41 Street, New York City. Call 212-307-4100 for tickets.

Husband-wife duo to fill Bucknell Hall with music

By Marni Harriman

"I set a goal for myself and say I'm going to play." And play she will.

The campus is invited to Bucknell Hall to experience the melodic sounds of Mary Hannigan's flute and the piano accompaniment of her husband, Barry Hannigan, professor of music.

According to Hannigan, it was her original idea to give the first performance in 1978. This musical performance has now become an annual flute recital, with her husband accompanying her on piano. Hannigan sees this annual performance as a way to keep active and as another challenge for both herself and her husband to accomplish.

With the input of her husband, Hannigan has chosen all the pieces to be performed. First, she decides what pieces she enjoys playing and what would be a challenge. She then tries to assemble the program with a contrast of styles and moods.

In this performance there will be five pieces on the program, with a brief intermission after the third.

The first piece is a tribute to Johann Sebastian Bach, but the composer is unknown.

The duo will then be performing "Fantasy," by Gaubert, also a flautist, which is a Paris conservatory contest piece. It contains two contrasting sections—one is slow and methodical while the other demonstrates challenging technique. "The flute tends to sour, like everything he has written," Hannigan added.

Mary Hannigan will perform five pieces of different styles and moods on the flute at 8 p.m. Thursday in Bucknell Hall.

Hannigan is especially excited for the third piece, which is a world premiere for the composer, Larry Nielson, professor of theory and composition at Westchester University in Philadelphia. The Hannigans have known the composer for over 10 years, and he actually wrote the piece especially for their musical talents.

The Hannigans and Nielson have worked closely, as they are still making changes for the performance.

The couple received rough copies of the piece over a year ago, and since then endless phone conversations between the two parties have resulted in some rewrites of the work.

"This piece is a part of all of us," Hannigan expressed.

The second half of the performance will begin with "Ballade," by Carl Reineche, who was of the late Romantic era. This piece will be performed in its original form, designated for the flute and orchestra.

"Sonata," by Robert Muczynski, is the final piece. It can be described as an angular, rhythmic piece that retains a Neoclassical component, along with elements of jazz. The composer is largely influenced by modern studio musicians.

Hannigan has been playing the flute for more than 30 years. She has spent her life pursuing the instrument seriously. "It comes from within," she explained. "You discover you can't live without it."

Hannigan is a very self-motivated musician, who has been inspired by many flautists. In particular, Geoffrey Gilbert, a British flautist, greatly influenced her and her work.

"He really changed me as a player, as well as affecting me personally. He was incredible," Hannigan said.

The Hannigans performance will take place on Thursday, October 17 at 8 p.m. in Bucknell Hall.

Barry Hannigan, professor of music, will accompany the recital.

Students, alumni join in one-act plays

By Erin Windle
and Emily Thorne

The Tustin Studio Theater will be transformed into a cafe setting mimicking the 1960s decade which Gary Grant, Chair of Theater Department, described as having an "intimate and informal atmosphere" for the presentation of "Tonight at Le Cafe Tustin: An Evening of One Acts." These plays are part of the continuing celebration of Bucknell's Sesquicentennial. The plays, "Comings and Goings," "Icarus' Mother" and "Speaking the Language," directed by Grant, were all written by University alumni who are now playwrights, and star University alumni and current students.

"Comings and Goings," written by Megan Terry, who is an artist-in-residence at the University this season, illustrates the unique interactions in relationships such as mother/son, guru/student, comedian/heckler and boyfriend/girlfriend. There are only two set roles in the play: he and she. The student actors performing "Comings and Goings" do not know who exactly will portray the "he" and who will portray the "she" until a spinner is spun only seconds before the actor must play the role on stage. The spinner is spun throughout each scene, giving the play a dramatically chaotic and attention-grasping quality.

The roles of he and she will be played by Liz Asti '00, Alexandra Franklin '00, Kelly George '00, Donald Jones '98, Liz Maccie '97, Lindsay Rosenberg '99, Todd Ross '98, Tom Markley '96 and Jon Uffelman '90. The musical score will be created by Peppy Kokinas and her band, Antigony Rising, and University alumni.

> *"It is a test for actors to switch in and out of different roles and energies. It is fun not being confined to one role."*
> *—Tom Markley '96*

Markley enjoys performing in this play because, "It is a test for actors to switch in and out of different roles and energies. It is fun not being confined to one role."

Franklin, an energetic first year student, was chosen to perform "Comings and Goings" because of her successful improvisational sketches at auditions. "Gary Grant challenges me to look in different directions and to find inspiration within myself," Franklin said emphatically.

"Icarus' Mother," written by Pulitzer-prize winning playwright, Sam Shepard, will also be performed. Shepard, who is married to Jessica Lange, starred in the movie *The Right Stuff*. The plot of "Icarus' Mother" revolves around the relationship of five friends. Cast members include Shannon Kearns '97, Chris Scholl '99, Maccie, Ross and Uffelman.

Uffelman currently lives in New York City and has had the opportunity to work with Beth Henry, a Pulitzer Prize winner. "It was an incredible opportunity," he explained, "She is generous with her insights and allows an actor freedom to perform at his own will."

"Speaking the Language," the third-one act play to be performed, was written by Bernardo Solano, an artist-in-residence this season at the University. The play is a sequel to "Speak Spanish for Me," which was written by Dave Ames '94. Ames' play follows the lives of four freshmen at Yale. "Speaking the Language" shows how their lives change after graduation. Two members of the cast are Kearns and Ross while the remaining roles will be portrayed by alumni.

Ross enjoys working with Solano in his play. "It was very stimulating to work with Bernardo Solano on this project. I hope to work with him again in the future."

While not acting, other theater alumni are volunteering with the background preparation of the one act plays. Mark Mansavage, University graduate, is in charge of costumes and Rich Dionne GR designed the poster used for advertising "Le Cafe Tustin: A Night of One Acts," which includes a picture of Harvey Powers, the man who designed the Tustin Theatre.

The show will take place at 8 p.m. on October 18, 19 and 20 in the Tustin Studio Theater.

Coffeehouse performer to jazz up the Bison

By Shetal Mithani
Bucknellian Staff Writer

Brett Brown '00 knows how to judge a good performance.

When he first walks onto the stage, he feels anxiety form a knot in his stomach. The spotlight shines down as he sits in the center of the stage and picks up his guitar.

As beautiful, jazzy notes start pouring into the ears of the audience, people start clapping and bouncing to the notes. The knot in his stomach releases its grip, and nothing but the music takes hold.

"I like an audience that pays attention and I like people who get up and start dancing," Brown said.

From 9 p.m. until 11 p.m. on Wednesday, October 16th, Brown will perform at Coffeehouse in the Bison.

Brown said he is definitely playing the guitar and he may play the mandolin and harmonica.

Brown's music consists of blues, jazz, blue-grass and rock and roll. He writes his own songs, but he still doesn't know which ones he'll play at the Bison.

"I really enjoy writing [my own songs]. Bob Dylan has really inspired my song writing," Brown said.

According to Brown, performing is not a rarity for him. He has performed on stage since fifth grade and he has played the guitar since fourth grade.

"I've grown up with music. I guess my parents really got me into playing musical instruments," Brown said.

Brown, however, is still not sure how serious he'll take his music in the future as a career. He's pretty sure he'll major in either business or history.

"I know I'll still play the guitar for the rest of my life. I can't just sit around without playing," he said.

Alumna, Rochester Orchestra to help Weis Center celebrate Sesquicentennial year

D'Anna Fortunato '67 to join musical talents with renowned orchestra, prodigy cellist for Weis Center event

By Rachel Doebber
Bucknellian Staff Writer

What do a child cello prodigy, a former University music student and a famous American orchestra all have in common? Give up?

Combining all their talents, these performers will be presenting a concert as a Weis Center Sesquicentennial event.

The Rochester Philharmonic Orchestra, renowned cellist, Alisa Weilerstein and alumna mezzo-soprano D'Anna Fortunato '67 will be performing together on October 25 at 8 p.m.

"We got such a great response from the Louisville Orchestra concert that we decided to try to find an American orchestra to perform for the Weis Center's Sesquicentennial event. The Rochester Philharmonic is one of the top notch orchestras in the United States. They were also very willing to cooperate in programming the event with us where we could bring in other soloists," said Bill Boswell, director of cultural events for Bucknell University, when asked why the Rochester Philharmonic was chosen.

According to Boswell, it also works out well because Rochester is not too far away. Therefore they could travel here on the 25th, perform and leave that same night.

Led by Robert Bernhardt, principal conductor and artistic director, the Rochester Philharmonic, which was founded in 1923, will feature many pieces, all written by American composers including Aaron Copland, Leonard Bernstein, David Ott and William Grant Still.

Since this concert is to commemorate the University's Sesquicentennial, one selection will feature a song written by a famous hymnist who was also a music professor at the University during the late 1800s

"We wanted the content of the performance to be special and also to make a lot of connections with Bucknell," Boswell said, referring to the presentation of Aaron Copland's *Old American Songs* which includes his arrangement of Robert Lowry's hymn, "Shall We Gather at the River" that will be sung by Fortunato.

Born in Pittsburgh to parents of Italian and German descent, Fortunato studied at the University for a few years and later graduated from the New England Conservatory of Music where she currently is a professor of voice.

She has made many appearances as a concert soloist with performance groups including the National Symphony, San Francisco Symphony, New Jersey Symphony, the Chamber Music Society of Lincoln Center and St. Luke's Ensemble.

Fortunato has also sung the lead role in opera companies such as the New York City Opera, Rochester Opera Theater and Kentucky Opera.

In addition to her many stage engagements, Fortunato has recorded CDs for various recording companies including six Baroque CDs for Newport Classics and her portrayal of Dido in Purcell's *Dido and Aeneas* for Harmonia Mundi.

"We love D'Anna and so we try to bring her back as often as possible. She was received very well the two previous times she performed here," Boswell added.

At 14 years of age, Weilerstein is a member of the Young Artist Program at the Cleveland Institute of Music and is the youngest cellist to have ever been accepted into the Cleveland Orchestra Youth Orchestra. This past summer, she was invited to be a guest artist at the Aspen Music Festival and will soon perform as a soloist with the Santa Rosa Symphony.

Weilerstein, who began playing the cello at age 4 1/2, also performs with her parents in their Weilerstein Trio all over the country in places such as Cleveland, Chicago and Eastman School of Music in Rochester, NY.

Weilerstein was recommended to Boswell as a soloist through her agency.

"There's an intrinsic excitement in hearing a child prodigy perform before they really become famous," Boswell explained and then added, "This should also be a different solo performance compared to past ones because she [Weilerstein] is a cellist whereas most soloists are violinists or pianists."

Tickets for this event can be purchased by mail, phone or in person at the Weis Center Box Office, Tuesday through Friday from 11:30 a.m. to 5:30 p.m. Tickets for students, faculty and staff with Bucknell ID are $10 while general admission is $20.

For more information, call 524-1000.

D'Anna Fortunato '67, a mezzo-soprano, will perform with the Philharmonic Orchestra at 8 p.m. October 25 in the Weis Center.

SCIENCE AND TECHNOLOGY

Accessibility increases as CCS networks campus

NETWORK From page 1

The timetable for the entire project, as presently proposed by the committee, seeks to have "one connection per pillow" in every dorm room by the fall of 1998. The three stage process will begin over January break of this year with completion of the networking of Larison hall. At this time, all of the hardware and wiring is in place to actually activate these connections.

The second stage will occur over the summer break of this year, with Carey House, Harris Hall, Hulley House, Larison Cottage, Smith Hall, Swartz Hall (all wings), and Vedder Hall being connected. The remaining University owned residence halls will be connected over the summer of 1998.

According to Spencer, the decision to network all of the first year student residence halls first was made by the President's office to maximize the attractiveness of the University to prospective students. Additionally, academic structures such as foundation seminars and EG100, which have traditionally been where most students are first introduced to the University's computer system, would provide a forum for teaching students how to use these new capabilities.

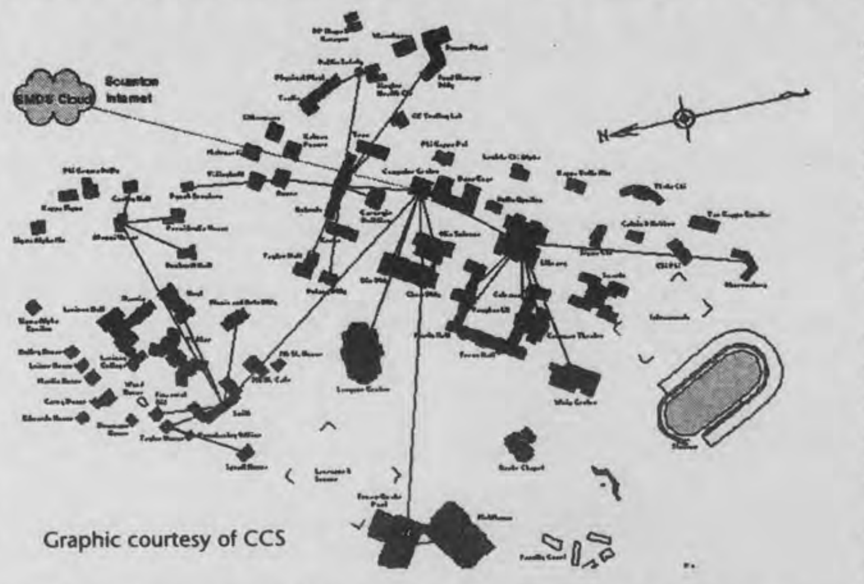
The University is undertaking this project for several reasons. Among them are constant demands made by faculty for the latest technology available for the distribution of information, student demand (as exemplified by the constant demand for more modems), and also due to concerns expressed by the University admissions office.

At the annual open house held for incoming students, Spencer cited questions about residence hall networking as "simply the largest" class of questions asked of the CCS representatives.

Examples of capabilities which would become available in a networked dorm room are vastly improved access to the web, distribution of video, greater accessibility to electronic communication resources, and greater accessibility of student's personal computer resources. Students would potentially be able to share their own computers over the network, allowing them to access the contents of their hard drives from any computer on the network, or even use their computers for personal mail or web servers.

When asked why the University is choosing to implement this project now, Spencer cited the desire of the President's office to make the entire project part of the upcoming capital campaign, and better organization and preparedness on CCS's part.

"We're no longer in crisis mode," he said, referring to the organization's past difficulties in meeting the University's demand for its services.



Graphic courtesy of CCS

CCS is the main network distribution point with three other distribution points located at Roberts Hall, Smith Hall and the Bertrand Library.

Important issues which are still being resolved by the committee are the fact that non-University owner residence halls, such as many fraternities, will not be networked, how computer labs may be affected, what printing capabilities will be made available over the network, what software will be made available, whether CCS has sufficient staffing to cover the expected increase in demand for its services, and if students will be asked to pay a "technology tax" if they choose to take advantage of their connections.

Computer labs have traditionally not only met the needs of those students unable to afford their own machines, but also of those doing work which required either fast network connections or access to resources only available via direct connection.

With the distribution capabilities traditionally available only in labs to the dorms, the demand for labs may decrease in the future. Spencer notes that "labs will always exist ... for those users needing specialized hardware," but that the need for general purpose labs may diminish.

Presently, almost any computer connected to the network is capable of printing to any printer connected to the network. Once students become connected the amount of printing done may increase tremendously, increasing the University's costs. This may threaten CCS's policy of offering no-charge printing (which is uncommon among our peer schools) or force it to adopt technology which would limit printing to those computers located in labs.

The issue of what software will be made available stems from the phrasing of the licensing agreements on many software packages owned by the University. Many of these licenses qualify that the covered software is authorized to be run only within University labs, on University owned machines, or only for a limited number of copies to run simultaneously.

As the proposed room connections would allow students to run many of the network accessible software on their personal machines, potential licensing violations could arise. CCS already has technology available which would allow them to control access to these applications for Macintosh-based computers, but not as extensively for IBM compatibles.

One of the most significant issues lies in whether CCS will have sufficient resources to cover the increase in demand for its services. "We presently support approximately 15,000 network connections, this proposal would increase that number to 28,000" said Spencer. Although the number of supported connections will more than double, only two new full time employees have been added to CCS's staff.

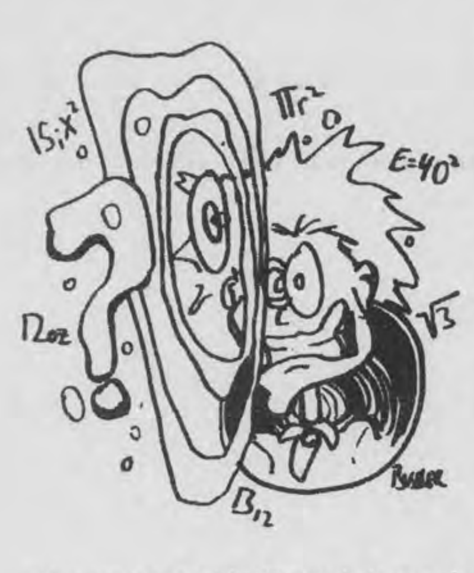
To cover this gap, Spencer said "creative staffing solutions" would have to be adopted. Spencer proposed doing this by expanding CCS's already large student staff (presently 100 students) with a series of Residential Computing Consultant (RCC) positions. These students would be available within the residential setting to answer questions about the network and provide basic support for residential computer users.

Although details about the responsibilities and compensation of the proposed RCC position were unavailable, Spencer suggested that they would be deployed in a ratio of approximate one for every 100 students.

An issue of concern to all students is how this $1.6 million proposal will be paid for. Although some funding will likely come from the capital campaign, Spencer raised the possibility of a "technology fee" charged to students for use of their residential network connection. He noted that it might be more appropriate to charge those students who use the capabilities, rather than a unilateral tuition increase.

Residential networking not only will be happening, but will be happening very soon. Those students who sit waiting for web pages to load across their slow modem connection can't wait.

Solution to last week's Brain Teaser



January 1st 1900 was a Monday.

January 1st 1901 was a Tuesday.

January 1st in successive years moves one day of the week, except after a leap year, when it moves two days.

Any number divisible by the number of days in a week can be ignored.

January 1st 1934 was 34+34/4=42 (Divisible by seven) which was a Monday.

The sentence with 12 words is merely a mnemonic giving the number by which the days from the 1st of January to the 1st of each month exceed a multiple of seven.

Flu vaccine recommended

By Matt Christ

As old man winter settles in, it becomes time for sore throats, nasal congestion and other symptons that may be mistaken for the common cold. Although colds can be caused by any of 150-200 different viruses, influenza, commonly referred to as the flu, is caused by only a few viruses.

To reduce your risk of catching the flu, it is advisable to wash your hands often, because touching an infected person or object, then touching your nose or eyes is a common way of transmitting the virus. Objects such as doorknobs and computer keyboards carry germs and are easily forgotten as likely surfaces that can transmit the virus.

In general, it is wise to increase resistance to the sickness by eating well, staying rested, avoiding unnecessary stress and exercising reqularly. Limiting or discontinuing smoking is also recommended because it irritates the nose and throat in addition to diminishing the body's resistance to germs.

Specifically, flu vaccine is recommended as a further precautionary measure against contracting influenza

According to Donald Stechschulte, medical director at the Student Health Services, flu shots will be available weekdays for one month beginning Tuesday, October 1, 1996 between the hours of 9-11:30 a.m. There will be a fee of $5 to all students, active employees and their dependents, dependents of retirees, and employees who retired after May 31, 1993. For those who retired from Bucknell prior to June 1, 1993, there will be no charge.

It is important to note the following recommendations and considerations.

The vaccine is brief and requires only a 20 minute waiting period after the shot to secure against adverse side effects.

Annual vaccination is strongly recommended by the U.S. Public Health Service for all individuals at increased risk of adverse consequences from infections of the lower respiratory tract. These "high-risk" conditions are:

1. Acquired or congenital heart disease
2. Chronic respiratory disease
3. Chronic renal disease
4. Diabetes
5. Chronic anemias
6. Chronic aspirin therapy
7. Persons over the age of 65

Groups that can transmit influenza to persons at high risk include household members (including children) of persons in high-risk groups (the elderly, transplant recipients, persons with AIDS).

Dr. Stechschulte advises that side effects of vaccination are few and may consist of local reaction, e.g, pain and redness at site of injection for one or two days. Systemic reactions infrequently may result in fever, malaise and aching for one or two days; allergic reactions may result if recipient is sensitive to eggs. There is also a very low risk of developing Guillain-Barre syndrome, an uncommon paralytic condition which is usually self-limited, and, in most cases, reversible.

Even though there are thousands of remedies for influenza, there is no true cure. Remedies only make it easier to endure the siege. So this winter, take the doctor's advice and get the influenza vaccine.

Vienna:
An ancient city with modern importance.

Vienna is an elegant city in the center of Europe. Its baroque architecture, cultural importance and proximity to all Europe has to offer make it an ideal place to study the politics and cultures of Central Europe. —Athletic Director Rick Hartzell

Grapplers to sponsor new women's sport

Club of ex-wrestlers to donate funds; Women's water polo and golf are front runners

By E.J. Crawford and Brett Tomlinson
Bucknellian Staff Writers

The Bucknell Grapplers Club has agreed to donate $30,000 over three years to the athletic department budget in order to fund a new varsity women's sport at Bucknell, bringing to life one of the most innovative solutions to the gender equity issue in the history of college athletics.

Wrestling Coach Bob Ferraro said, "I think the Grapplers Club has used great foresight in dealing with gender equity... it deals with the issue in a positive way."

The idea of funding a new women's team was brought up a few years ago by members within the Grapplers Club, which is essentially made up of all former Bucknell wrestlers from the past 40 years.

"We were concerned that men's sports, in particular wrestling, would have to cut down their rosters... and thus cutting the student experience," said Grapplers Club spokesman Tom Rivoire, a former wrestler who is currently a lawyer in Spring, Texas. He also added that "someone had to provide leadership in women's athletics, and to attempt to make up for slights in years past."

Bucknellian File Photo

The Bucknell Grapplers Club, which is composed of former Bison wrestlers, has offered financial support for a new women's sport.

Thus, the Grapplers Club, in conjunction with many informal talks with "people within the University," submitted its proposal to the athletic department last spring. After ironing out the details, Director of Athletics Rick Hartzell accepted the offer, and the University's Gender Task Force began working on recommendations for the new women's sport. The new sport will bring the total number of women's programs to 13, one shy of the 14 men's varsity programs.

"I think the genesis of the idea was 'how can we help solve a problem, how can we also solidify our position as a program' in terms of wrestling," Hartzell said.

When asked about why they did not develop the plan within the structure of the University,

Volleyball stampedes through league

By Jacob Lipman
Bucknellian Staff Writer

This week in women's volleyball, Bucknell escaped with a win at West Point and then rebounded with a solid defeat of Lafayette at home. The two victories put the Bison into a tie atop the Patriot League, along with arch-rival Colgate. Bucknell now has a 13-5 record overall including 3-0 in league play.

The Bison were given a scare by Army this Saturday. The Cadets had a record of 1-14 before the match but that did not stop them from giving Bucknell trouble.

"We went into the Army match a little over confident," said Coach Cindy Opalski.

After winning game one by a 15-11 score, the Bison lost the next two games, 15-4, 15-2. Bucknell came back to win game four, 15-4, forcing the tie-breaking fifth game. In the final game, the Bison managed to win by a score of 15-10, and thus averting their first Patriot League loss.

Melissa Wharton '98 led the Bison offense with 18 kills. She also notched two solo blocks and five block assists. Susie Teitsworth '97, who is currently ranked 15th in the nation in digs, had 16 digs in this match.

In Tuesday night's match with Lafayette, Bucknell was determined not to give a repeat of Saturday's performance for the home crowd. The Bison were in control throughout the match, as they handed the Leopards their first league loss this season. The final score was 15-8, 15-8, 15-10.

The first game started out well for Bucknell. After taking a 3-2 lead, Emily Pomeroy '99 gave the Bison a boost with her excellent hitting. Pomeroy finished three of the next four plays with smashing kills. Amy Turnshek '98 then added a service ace to put the Bison up 5-2.

A few plays later, Pomeroy did it again. This time she blasted one from the back row, making the score 8-2.

Lafayette closed the gap a little by scoring three points in a row. However with the score 9-5, Bucknell ran off five straight points, making it 14-5. Though the final point eluded the Bison for a short time, Turnshek served another ace to end game one.

Early on in the second game, Wharton gave Bucknell some momentum with a powerful kill for a sideout. The Bison went on a 4-0 run, highlighted by a great block by Pomeroy and Teitsworth. However, Lafayette charged back, scoring three consecutive points to tie the game at 4-4.

Once again, Wharton put a stop to the Lafayette run with another kill. This time the Bison ran off five straight points before turning the serve over to Lafayette. Wharton capped the run with a well-placed hit.

Jonah Half—The Bucknellian

Susie Teitsworth '98 (front) puts up a block for the 13-5 Bison.

Following the Bucknell string of points, Lafayette was able to cut into the Bison lead, making the score 9-7. Hitting from the middle, Heather Rendle '97 spiked the ball into the back left corner for the kill, ending the run by the Leopards.

The Bison stretched their lead to 12-7 and Pomeroy added another point with a service ace. After a point by Lafayette, Bucknell put an end to the second game behind kills from Michelle Lesh '00 and Tristen Voget '99.

Bucknell set the tone of the third game during the opening rally. The team combined to block three Lafayette hits during this play. Despite losing the rally, the Bison went on to take a 2-0 lead. Heather Montaperto '97 extended the lead with a kill that deflected

LEAGUE From Page 1

Scholarship issue threatens future of Patriot League

Holy Cross's departure puts the Patriot League in a precarious position because it would drop the league membership to six schools, the minimum number of schools for an NCAA certified conference. If Holy Cross leaves, the United States Military Academy has said it might leave as well, causing a complete collapse of the league.

According to Director of Athletics Rich Hartzell, the most viable step for salvaging the league may be to appease Holy Cross.

"I think there is a pretty good chance that a permissive policy will be adopted in the league that would allow Holy Cross to give athletic scholarships in basketball," Hartzell said.

Hartzell said that the league has been great for Bucknell, and he supports the University's position on financial aid as need-based only.

"We like the way we are, we think the way we do it now works, we think we are able to recruit good student athletes, and I think we've proven that," Hartzell said.

Due to its geographic location, Bucknell may have the most at stake in resolving the scholarship issue and keeping the league intact. Army and Navy would most likely have no trouble finding a new league, while Lehigh and Lafayette have a geographic advantage if they are forced to compete as independents.

"To sit out here in central to western Pennsylvania as a Division I independent is suicide for us," Hartzell said.

There are no comparable schools, athletically, in close proximity to Bucknell, so it would be tough for athletic teams to entice other schools to make road trips to central Pennsylvania.

The greater issue for the University is the potential for a chain reaction of scholarships in the league. If Holy Cross is permitted to give basketball scholarships and they win the Patriot League, other schools may be inclined to follow suit, not only in basketball, but in other sports as well.

The University does not award merit-based financial aid, and, according to Hartzell, starting with basketball scholarships would send the wrong message.

"I'm uncomfortable having the first merit scholarships be for basketball players," Hartzell said. "If it was a broad application of that principle, then I'd feel a little differently."

The University does not award merit-based scholarships for non-Patriot League sports. This practice is permitted by league rules and practiced at other schools like Lehigh, which does give scholarships for wrestling, but Bucknell voluntarily remains need-based only.

Athletically, Bucknell has been successful in the Patriot League since its inception in 1990, winning four of the six Presidents' Cup awards for overall athletic success.

Outside the league, Bucknell has struggled against schools that give athletic scholarships, but the Bison athletic teams have been as effective as the rest of the league against non-league foes.

Hartzell does not believe that scholarships will give Holy Cross a clear advantage in basketball, but if the rest of the league begins giving scholarships, Bucknell could be outmuscled in recruiting.

"If Colgate, Lehigh, and Lafayette all of a sudden decide to change and go to merit, then it makes a big problem for us, because now the kind of men and women that we're recruiting to play basketball are going to make decisions to go elsewhere, based on finances," Hartzell said.

Flash in the Pan

League Championship Series: The Major League Baseball League Championship Series began yesterday, with the surprising Baltimore Orioles taking on the New York Yankees in the American League series in New York, and the St. Louis Cardinals meeting the defending-World Series champion Atlanta Braves in Atlanta. The Yankees-Orioles series was scheduled to begin on Tuesday, but heavy rains drenched Yankee Stadium, postponing game one.

Armstrong Diagnosed with Cancer: American cycling superstar Lance Armstrong began chemotherapy this week after being diagnosed with testicular cancer. According to doctors, Armstrong's cancer has already spread to his abdomen and lungs. The former world cycling champion was examined last week after experiencing pain in his groin. The malignant testicle was discovered immediately and removed. After further tests, it was determined that the cancer had spread and Armstrong immediately started a 12-week chemotherapy treatment. Armstrong, 25, is optimistic and hopes to return to the pro cycling tour next year.

Woods Wins in Vegas: After taking a week off, golfing phenom Tiger Woods returned to the PGA Tour and came back from four strokes behind the leader on Sunday, defeating Davis Love III in a sudden death playoff for his first Tour win. In just six weeks, Woods has climbed to 40th on the Tour money list for 1996. The 20 year-old has secured a spot on the Tour next year, and now has a chance at finishing in the top 30 on the money list to qualify for the Tour Players Championship.

Morrison Gets Offer from Foreman: Boxer Tommy Morrison, who retired earlier this year after contracting HIV, announced that he wanted to return to the ring for one final bout, and since his announcement, the boxing world has responded positively. George Foreman has offered to fight Morrison in a rematch sometime in 1997. Morrison has not accepted the offer yet.

Florida Retains Top Spot: The Florida Gators remained ranked number one in college football after a blowout win over Arkansas. In other college football news, the Northwestern Wildcats came back to the spotlight with a 17-16 victory over Michigan. Kicker Brian Gowins made a 39-yard field goal for the Wildcats with 13 seconds left to cap a 17 point comeback in the fourth quarter.

College Football Top 10

1. Florida 5-0
2. Ohio State 4-0
3. Florida State 4-0
4. Arizona State 5-0
5. Nebraska 3-1
6. Miami 4-0
7. Alabama 5-0
8. Tennessee 3-1
9. Penn State 5-1
10. Colorado 3-1

SCIENCE AND TECHNOLOGY

Accessibility increases as CCS networks campus

NETWORK From page 1

The timetable for the entire project, as presently proposed by the committee, seeks to have "one connection per pillow" in every dorm room by the fall of 1998. The three stage process will begin over January break of this year with completion of the networking of Larison hall. At this time, all of the hardware and wiring is in place to actually activate these connections.

The second stage will occur over the summer break of this year, with Carey House, Harris Hall, Hulley House, Larison Cottage, Smith Hall, Swartz Hall (all wings), and Vedder Hall being connected. The remaining University owned residence halls will be connected over the summer of 1998.

According to Spencer, the decision to network all of the first year student residence halls first was made by the President's office to maximize the attractiveness of the University to prospective students. Additionally, academic structures such as foundation seminars and EG100, which have traditionally been where most students are first introduced to the University's computer system, would provide a forum for teaching students how to use these new capabilities.

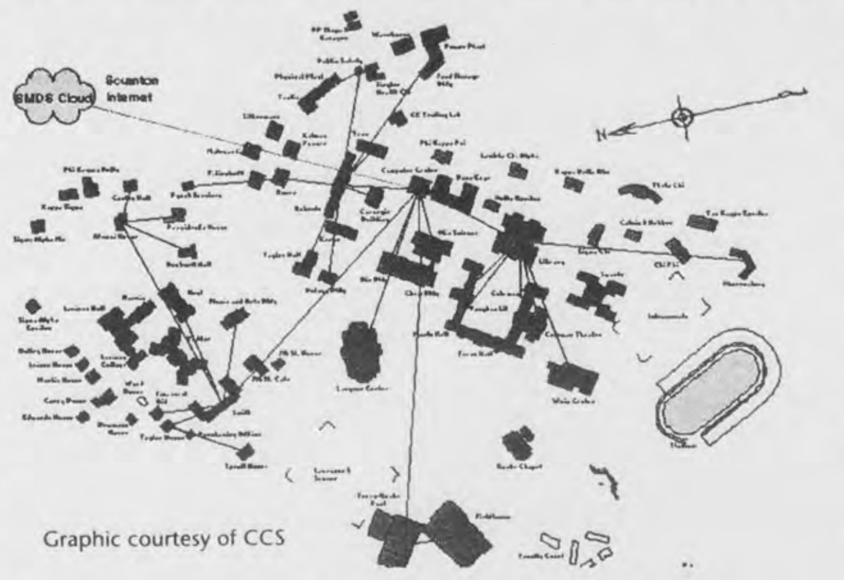
The University is undertaking this project for several reasons. Among them are constant demands made by faculty for the latest technology available for the distribution of information, student demand (as exemplified by the constant demand for more modems), and also due to concerns expressed by the University admissions office.

At the annual open house held for incoming students, Spencer cited questions about residence hall networking as "simply the largest" class of questions asked of the CCS representatives.

Examples of capabilities which would become available in a networked dorm room are vastly improved access to the web, distribution of video, greater accessibility to electronic communication resources, and greater accessibility of student's personal computer resources. Students would potentially be able to share their own computers over the network, allowing them to access the contents of their hard drives from any computer on the network, or even use their computers for personal mail or web servers.

When asked why the University is choosing to implement this project now, Spencer cited the desire of the President's office to make the entire project part of the upcoming capital campaign, and better organization and preparedness on CCS's part.

"We're no longer in crisis mode," he said, referring to the organization's past difficulties in meeting the University's demand for its services.



Graphic courtesy of CCS

CCS is the main network distribution point with three other distribution points located at Roberts Hall, Smith Hall and the Bertrand Library.

Important issues which are still being resolved by the committee are the fact that non-University owner residence halls, such as many fraternities, will not be networked, how computer labs may be affected, what printing capabilities will be made available over the network, what software will be made available, whether CCS has sufficient staffing to cover the expected increase in demand for its services, and if students will be asked to pay a "technology tax" if they choose to take advantage of their connections.

Computer labs have traditionally not only met the needs of those students unable to afford their own machines, but also of those doing work which required either fast network connections or access to resources only available via direct connection.

With the distribution capabilities traditionally available only in labs to the dorms, the demand for labs may decrease in the future. Spencer notes that "labs will always exist ... for those users needing specialized hardware," but that the need for general purpose labs may diminish.

Presently, almost any computer connected to the network is capable of printing to any printer connected to the network. Once students become connected the amount of printing done may increase tremendously, increasing the University's costs. This may threaten CCS's policy of offering no-charge printing (which is uncommon among our peer schools) or force it to adopt technology which would limit printing to those computers located in labs.

The issue of what software will be made available stems from the phrasing of the licensing agreements on many software packages owned by the University. Many of these licenses qualify that the covered software is authorized to be run only within University labs, on University owned machines, or only for a limited number of copies to run simultaneously.

As the proposed room connections would allow students to run many of the network accessible software on their personal machines, potential licensing violations could arise. CCS already has technology available which would allow them to control access to these applications for Macintosh-based computers, but not as extensively for IBM compatibles.

One of the most significant issues lies in whether CCS will have sufficient resources to cover the increase in demand for its services. "We presently support approximately 15,000 network connections, this proposal would increase that number to 28,000" said Spencer. Although the number of supported connections will more than double, only two new full time employees have been added to CCS's staff.

To cover this gap, Spencer said "creative staffing solutions" would have to be adopted. Spencer proposed doing this by expanding CCS's already large student staff (presently 100 students) with a series of Residential Computing Consultant (RCC) positions. These students would be available within the residential setting to answer questions about the network and provide basic support for residential computer users.

Although details about the responsibilities and compensation of the proposed RCC position were unavailable, Spencer suggested that they would be deployed in a ratio of approximate one for every 100 students.

An issue of concern to all students is how this $1.6 million proposal will be paid for. Although some funding will likely come from the capital campaign, Spencer raised the possibility of a "technology fee" charged to students for use of their residential network connection. He noted that it might be more appropriate to charge those students who use the capabilities, rather than a unilateral tuition increase.

Residential networking not only will be happening, but will be happening very soon. Those students who sit waiting for web pages to load across their slow modem connection can't wait.

Grapplers to sponsor new women's sport

Club of ex-wrestlers to donate funds; Women's water polo and golf are front runners

By E.J. Crawford and Brett Tomlinson
Bucknellian Staff Writers

The Bucknell Grapplers Club has agreed to donate $30,000 over three years to the athletic department budget in order to fund a new varsity women's sport at Bucknell, bringing to life one of the most innovative solutions to the gender equity issue in the history of college athletics.

Wrestling Coach Bob Ferraro said, "I think the Grapplers Club has used great foresight in dealing with gender equity... it deals with the issue in a positive way."

The idea of funding a new women's team was brought up a few years ago oy members within the Grapplers Club, which is essentially made up of all former Bucknell wrestlers from the past 40 years.

"We were concerned that men's sports, in particular wrestling, would have to cut down their rosters... and thus cutting the student experience," said Grapplers Club spokesman Tom Rivoire, a former wrestler who is currently a lawyer in Spring, Texas. He also added that "someone had to provide leadership in women's athletics, and to attempt to make up for slights in years past."

Thus, the Grapplers Club, in conjunction with many informal talks with "people within the University," submitted its proposal to the athletic department last spring. After ironing out the details, Director of Athletics Rick Hartzell accepted the offer, and the University's Gender Task Force began working on recommendations for the new women's sport. The new sport will bring the total number of women's programs to 13, one shy of the 14 men's varsity programs.

"I think the genesis of the idea was 'how can we help solve a problem, how can we also solidify our position as a program' in terms of wrestling," Hartzell said.

When asked about why they did not develop the plan within the structure of the University,

Volleyball stampedes through league

By Jacob Lipman
Bucknellian Staff Writer

This week in women's volleyball, Bucknell escaped with a win at West Point and then rebounded with a solid defeat of Lafayette at home. The two victories put the Bison into a tie atop the Patriot League, along with arch-rival Colgate. Bucknell now has a 13-5 record overall including 3-0 in league play.

The Bison were given a scare by Army this Saturday. The Cadets had a record of 1-14 before the match but that did not stop them from giving Bucknell trouble.

"We went into the Army match a little over confident," said Coach Cindy Opalski.

After winning game one by a 15-11 score, the Bison lost the next two games, 15-4, 15-2. Bucknell came back to win game four, 15-4, forcing the tie-breaking fifth game. In the final game, the Bison managed to win by a score of 15-10, and thus averting their first Patriot League loss.

Melissa Wharton '98 led the Bison offense with 18 kills. She also notched two solo blocks and five block assists. Susie Teitsworth '97, who is currently ranked 15th in the nation in digs, had 16 digs in this match.

In Tuesday night's match with Lafayette, Bucknell was determined not to give a repeat of Saturday's performance for the home crowd. The Bison were in control throughout the match, as they handed the Leopards their first league loss this season. The final score was 15-8, 15-8, 15-10.

The first game started out well for Bucknell. After taking a 3-2 lead, Emily Pomeroy '99 gave the Bison a boost with her excellent hitting. Pomeroy finished three of the next four plays with smashing kills. Amy Turnshek '98 then added a service ace to put the Bison up 5-2.

A few plays later, Pomeroy did it again. This time she blasted one from the back row, making the score 8-2.

Lafayette closed the gap a little by scoring three points in a row. However with the score 9-5, Bucknell ran off five straight points, making it 14-5. Though the final point eluded the Bison for a short time, Turnshek served another ace to end game one.

Early on in the second game, Wharton gave Bucknell some momentum with a powerful kill for a sideout. The Bison went on a 4-0 run, highlighted by a great block by Pomeroy and Teitsworth. However, Lafayette charged back, scoring three consecutive points to tie the game at 4-4.

Once again, Wharton put a stop to the Lafayette run with another kill. This time the Bison ran off five straight points before turning the serve over to Lafayette. Wharton capped the run with a well-placed hit.

Following the Bucknell string of points, Lafayette was able to cut into the Bison lead, making the score 9-7. Hitting from the middle, Heather Rendle '97 spiked the ball into the back left corner for the kill, ending the run by the Leopards.

The Bison stretched their lead to 12-7 and Pomeroy added another point with a service ace. After a point by Lafayette, Bucknell put an end to the second game behind kills from Michelle Lesh '00 and Tristen Voget '99.

Bucknell set the tone of the third game during the opening rally. The team combined to block three Lafayette hits during this play. Despite losing the rally, the Bison went on to take a 2-0 lead. Heather Montaperto '97 extended the lead with a kill that deflected

LEAGUE From Page 1

Scholarship issue threatens future of Patriot League

Holy Cross's departure puts the Patriot League in a precarious position because it would drop the league membership to six schools, the minimum number of schools for an NCAA certified conference. If Holy Cross leaves, the United States Military Academy has said it might leave as well, causing a complete collapse of the league.

According to Director of Athletics Rich Hartzell, the most viable step for salvaging the league may be to appease Holy Cross.

"I think there is a pretty good chance that a permissive policy will be adopted in the league that would allow Holy Cross to give athletic scholarships in basketball," Hartzell said.

Hartzell said that the league has been great for Bucknell, and he supports the University's position on financial aid as need-based only.

"We like the way we are, we think the way we do it now works, we think we are able to recruit good student athletes, and I think we've proven that," Hartzell said.

Due to its geographic location, Bucknell may have the most at stake in resolving the scholarship issue and keeping the league intact. Army and Navy would most likely have no trouble finding a new league, while Lehigh and Lafayette have a geographic advantage if they are forced to compete as independents.

"To sit out here in central to western Pennsylvania as a Division I independent is suicide for us," Hartzell said.

There are no comparable schools, athletically, in close proximity to Bucknell, so it would be tough for athletic teams to entice other schools to make road trips to central Pennsylvania.

The greater issue for the University is the potential for a chain reaction of scholarships in the league. If Holy Cross is permitted to give basketball scholarships and they win the Patriot League, other schools may be inclined to follow suit, not only in basketball, but in other sports as well.

The University does not award merit-based financial aid, and, according to Hartzell, starting with basketball scholarships would send the wrong message.

"I'm uncomfortable having the first merit scholarships be for basketball players," Hartzell said. "If it was a broad application of that principle, then I'd feel a little differently."

The University does not award merit-based scholarships for non-Patriot League sports. This practice is permitted by league rules and practiced at other schools like Lehigh, which does give scholarships for wrestling, but Bucknell voluntarily remains need-based only.

Athletically, Bucknell has been successful in the Patriot League since its inception in 1990, winning four of the six Presidents' Cup awards for overall athletic success.

Outside the league, Bucknell has struggled against schools that give athletic scholarships, but the Bison athletic teams have been as effective as the rest of the league against non-league foes.

Hartzell does not believe that scholarships will give Holy Cross a clear advantage in basketball, but if the rest of the league begins giving scholarships, Bucknell could be outmuscled in recruiting.

"If Colgate, Lehigh, and Lafayette all of a sudden decide to change and go to merit, then it makes a big problem for us, because now the kind of men and women that we're recruiting to play basketball are going to make decisions to go elsewhere, based on finances," Hartzell said.

Flash in the Pan

League Championship Series: The Major League Baseball League Championship Series began yesterday, with the surprising Baltimore Orioles taking on the New York Yankees in the American League series in New York, and the St. Louis Cardinals meeting the defending-World Series champion Atlanta Braves in Atlanta. The Yankees-Orioles series was scheduled to begin on Tuesday, but heavy rains drenched Yankee Stadium, postponing game one.

Armstrong Diagnosed with Cancer: American cycling superstar Lance Armstrong began chemotherapy this week after being diagnosed with testicular cancer. According to doctors, Armstrong's cancer has already spread to his abdomen and lungs. The former world cycling champion was examined last week after experiencing pain in his groin. The malignant testicle was discovered immediately and removed. After further tests, it was determined that the cancer had spread and Armstrong immediately started a 12-week chemotherapy treatment. Armstrong, 25, is optimistic and hopes to return to the pro cycling tour next year.

Woods Wins in Vegas: After taking a week off, golfing phenom Tiger Woods returned to the PGA Tour and came back from four strokes behind the leader on Sunday, defeating Davis Love III in a sudden death playoff for his first Tour win. In just six weeks, Woods has climbed to 40th on the Tour money list for 1996. The 20 year-old has secured a spot on the Tour next year, and now has a chance at finishing in the top 30 on the money list to qualify for the Tour Players Championship.

Morrison Gets Offer from Foreman: Boxer Tommy Morrison, who retired earlier this year after contracting HIV, announced that he wanted to return to the ring for one final bout, and since his announcement, the boxing world has responded positively. George Foreman has offered to fight Morrison in a rematch sometime in 1997. Morrison has not accepted the offer yet.

Florida Retains Top Spot: The Florida Gators remained ranked number one in college football after a blowout win over Arkansas. In other college football news, the Northwestern Wildcats came back to the spotlight with a 17-16 victory over Michigan. Kicker Brian Gowins made a 39-yard field goal for the Wildcats with 13 seconds left to cap a 17 point comeback in the fourth quarter.

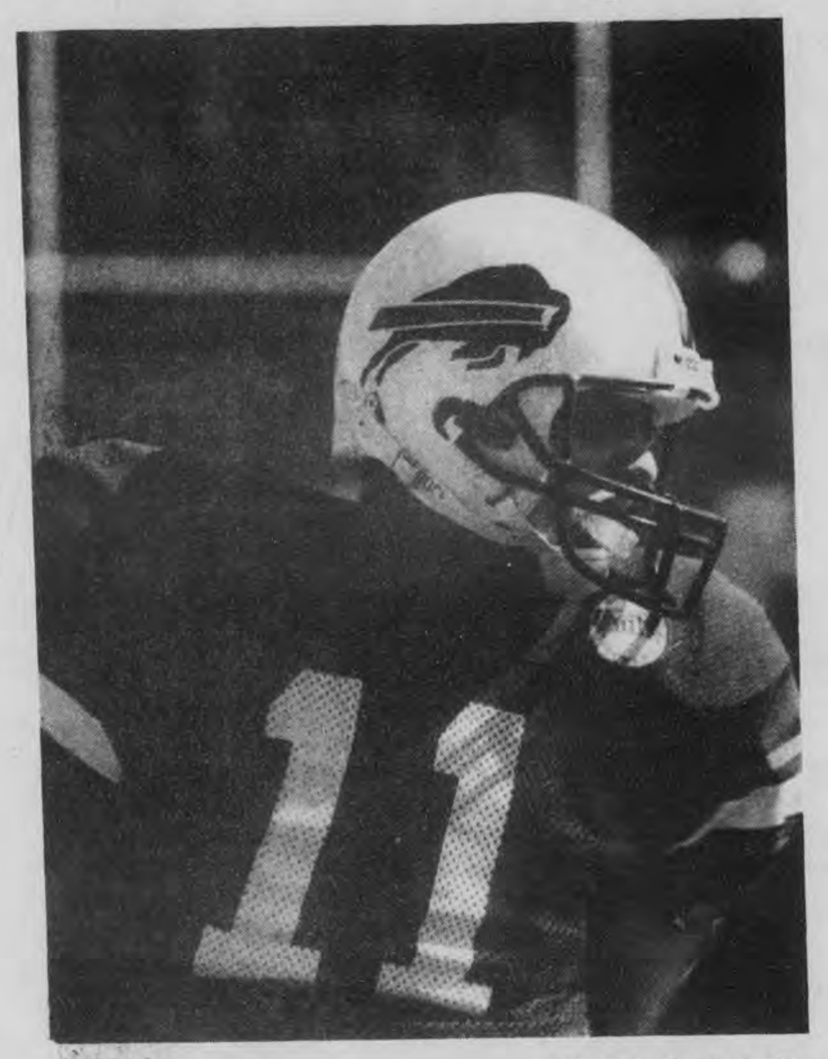
Football drops heartbreaker to Penn in double OT

Fox gets Bison offense back on track with 235 yards and two touchdowns



Jonah Half—The Bucknellian

Jim Fox's clutch play-calling helped Bucknell to tie the game.

BY BRETT TOMLINSON
Bucknellian Staff Writer

After struggling with his confidence last week, quarterback Jim Fox '97 got a vote of confidence from the coaching staff, getting the opportunity to call his own plays and bring the Bison offense back late in Saturday's game against Pennsylvania.

Fox responded, driving the offense 61 yards for a touchdown to tie the game, but his efforts were not enough for a win, as the Bison (1-3, 0-0) lost a heartbreaker, 30-21 in overtime.

"We decided 'Jimmy it's your turn, we're not calling any plays, no huddle, you call 'em,'" said Head Coach Tom Gadd. "He marched us right down and scored a touchdown."

Fox completed 22 of 36 passes for 235 yards, making a remarkable turnaround and jump-starting the sluggish Bucknell offense. "The line blocked well, the receivers made plays, and I think that gave us all confidence," said Fox. As far as running the no huddle offense, Fox said, "I like it because it gives you a little freedom."

Fox got the offense moving early, driving Bucknell 62 yards on its first possession for a touchdown and a 7-0 lead. Tailback Chris Peer '98, who got the nod to replace the injured Rich Lemon '97 just 10 minutes before kickoff, showed no jitters as he carried the ball 34 times for 91 yards in the game.

While the Bucknell offense played a solid, ball control offense, the defense was aggressive and effective against the talented Quakers. The only big play surrendered by the Bison defense in regulation was a 48-yard bomb in the second quarter, which set up Penn's first score.

A blocked punt by the Quakers in the third quarter set up Penn's second touchdown. Tailback Jasen Scott fumbled the ball at the goal line, but a Quaker teammate pounced on the ball for six points. The point after was good, and Bucknell trailed 14-7 despite dominating the game offensively.

Bucknell managed to even the score, taking advantage of an interception by George Howanitz '97 and driving the ball 61 yards for the score. Ron Rockett caught a 13-yard touchdown pass to cap the scoring drive early in the fourth quarter.

Late in the fourth quarter, Bucknell got its final opportunity to win the game in regulation after Erich Muzi '99 set up the Bison with excellent field position with a 16-yard punt return.

Fox moved the Bison down the field to set up a Rich Miller '97 field goal attempt, but on a third down play at the Penn 22, Fox was called for intentional grounding as he threw an incomplete pass with a Penn defender draped around his legs.

The penalty was debatable, but Gadd was not bitter about the call. "When you allow a play to decide the outcome of a football game, you take your chances," Gadd said. "They [the referees] called it the best they could."

Gadd decided against trying the 49-yard field goal that Bucknell faced after the grounding call, and Penn intercepted a Fox pass on the next play. The Quakers failed to capitalize on the turnover as time expired, sending Bucknell to overtime for the first time this season.

Under a new NCAA rule, all football games that end in a tie will be decided by overtime, but the rule is nothing new for Bucknell, since the Patriot League adopted the measure before last season.

Fox wasted no time in the first overtime, taking over on the overtime-standard 25-yard line and connecting with Cal Wilcox '97 on the third play of the period for a touchdown and a 21-14 lead.

Penn's offense was efficient as well, scoring on its second play with a similar touchdown pass to the tight end. The captains reconvened at midfield for the coin toss for the second overtime.

This time, Penn took possession first, and Bucknell held the Quaker offense to a field goal after a third down stand at the 10 yard line.

Bucknell drove to the eight yard line, but the Quakers forced a field goal attempt which proved to be Bucknell's downfall. Penn charged the Bison with a host of leaping players, and Miller's kick was not high enough to clear the defense. The kick was returned for a touchdown to make the final score 30-21.

Despite the loss, Gadd was proud of his squad and its efforts, especially after two disappointing performances in the past two weeks.

After last week's 101 yards of total offense, Gadd and the coaching staff knew that it was time to get tough. "We challenged them. I mean, it was not a pretty sight around here this week, but these are men... and they needed to understand that what they did last week was unacceptable."

The offense responded with 330 yards of total offense, while the defense held Penn under 275 yards.

"They came out today and accepted a challenge and put their hearts on their sleeves and played," Gadd said after the game.

Jonah Half—The Bucknellian

Rich Miller '97 attempted a 25-yard field goal to tie the game in double overtime. The kick was blocked and returned for a touchdown as Bucknell lost its third straight game at home. Ironically, Penn defeated Bucknell last year with a late field goal in regulation. This year, the same Quaker kicker, Josiah Greathouse, provided the winning points with his kick in double overtime. Bucknell travels to New Haven, Conn. this week to face Yale.

Reactions to the Overtime Rule

BY BRETT TOMLINSON

Under a new NCAA rule, all ties in football will be broken in overtime. The overtime system adopted by the NCAA is different from the NFL's overtime and is designed to be an even test of strength.

Each team is given one possession of the ball at the opposing team's 25 yard line. A coin toss determines who goes first, and if the teams are still tied after the first set of possessions, another coin toss and another set of possessions follows until one team leads at the end of a set.

Bucknell is familiar with the rule because the Patriot League used it last season. In 1995, Bucknell won its first overtime game ever, beating Colgate 21-14.

Despite Bucknell's heartbreaking overtime loss on Saturday, the Bison players and coaches seemed to be in favor of the new NCAA overtime rule.

Kicker Rich Miller '97, whose field goal attempt was blocked in the second overtime to give Penn the victory, supports the rule. "If I didn't like the pressure, I wouldn't be out there," Miller said. "I want to know who wins."

Coach Tom Gadd, who is now 1-1 in overtime games, said, "At least you resolve the issue, rather than going into that locker room with a tie. I'm in favor of the tie breaker. It just didn't go our way [Saturday]."

GRAPPLERS

From Page 11

Rivoire said, "We didn't want to wait for all the bureaucratic nonsense."

Now that the University has accepted the proposal, the next step is to decide on which women's sport will be sponsored by the new funds.

The Gender Task Force, which has been examining gender equity at Bucknell for the past year, will work with Hartzell and President William D. Adams in determining what women's sport gets the funding for varsity status. Hartzell mentioned water polo and golf as the front-runners.

"Women's water polo has been very successful, and with the hope that the [Capital Campaign] will yield a new pool, [sponsoring water polo] makes a lot of sense," Hartzell said.

Rivoire said, "The water polo team has been varsity in all but name and funding," and added that water polo would probably be the Grapplers Club top choice.

"Water polo is attractive to us in that it is a winter sport and could lead to possible doubleheaders [with the wrestling team]," said Rivoire.

Hartzell said, "Women's golf also makes some sense because we have a facility, and we have some interest."

Rivoire said women's golf would probably be his second choice.

The official plan under Grapplers Club proposal is that they will contribute $12,000 in the first year of the plan, $10,000 in the second, and $8,000 in the third, with a possible extension.

Ferraro added that "[the new women's team] is not just getting money, they can also use the Grapplers Club to network for recruiting, etc."

The money will be used to cover some of the costs of the wrestling budget, so that athletic department funds will be freed to support the new women's sport.

According to Hartzell, the Grapplers Club funds will probably not completely cover the costs of starting the new program. "My guess would be that yes, there will have to be some sort of supplement there in order to make the program viable, but it kind of depends on what [sport] it is," Hartzell said.

Despite the fanfare, the Grapplers Club does bring up some doubts about the future of the wrestling team, as well as other problems with Title IX, which ensures that universities cannot spend a disproportionate amount of money on men's sports. Says Rivoire, "the [Grapplers] Club certainly was concerned... with Bucknell athletics and Title IX," but also emphasized that "the wrestling team was never in trouble of being canceled," a sentiment reiterated by Ferraro and Hartzell.

Although the proposal is a significant step towards gender equity in athletics at Bucknell, Hartzell insists that the University needs to show more of a commitment to equity.

"I feel strongly that the gender equity issue is a University problem, a University concern, and to have it solved by outside entities, the Grapplers Club or whomever, is uncomfortable for me," Hartzell said. "I applaud the Grapplers club for thinking of a novel idea, but at the same time... I think [gender equity] is a long-standing University problem, since 1976, that just hasn't been addressed in a fashion that is necessary in order to put us in a position of equity."

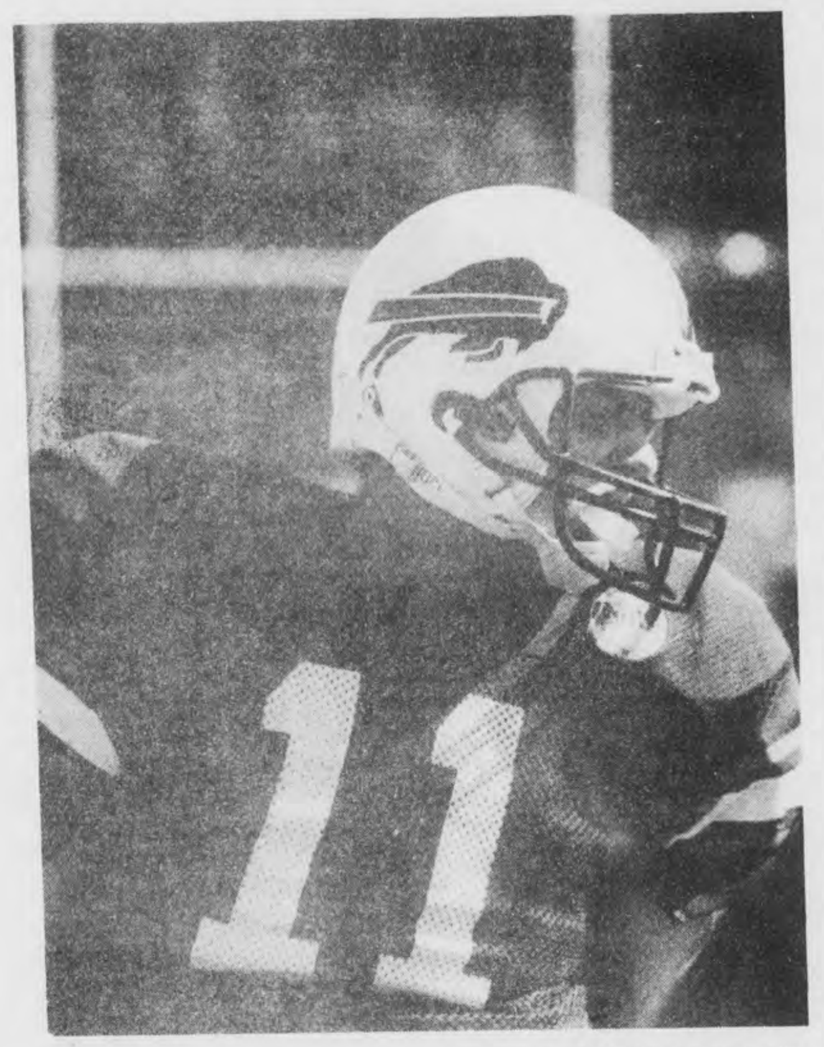
Football drops heartbreaker to Penn in double OT

Fox gets Bison offense back on track with 235 yards and two touchdowns



Jonah Half—The Bucknellian

Jim Fox's clutch play-calling helped Bucknell to tie the game.

By Brett Tomlinson
Bucknellian Staff Writer

After struggling with his confidence last week, quarterback Jim Fox '97 got a vote of confidence from the coaching staff, getting the opportunity to call his own plays and bring the Bison offense back late in Saturday's game against Pennsylvania.

Fox responded, driving the offense 61 yards for a touchdown to tie the game, but his efforts were not enough for a win, as the Bison (1-3, 0-0) lost a heartbreaker, 30-21 in overtime.

"We decided 'Jimmy it's your turn, we're not calling any plays, no huddle, you call 'em,'" said Head Coach Tom Gadd. "He marched us right down and scored a touchdown."

Fox completed 22 of 36 passes for 235 yards, making a remarkable turnaround and jump-starting the sluggish Bucknell offense. "The line blocked well, the receivers made plays, and I think that gave us all confidence," said Fox. As far as running the no huddle offense, Fox said, "I like it because it gives you a little freedom."

Fox got the offense moving early, driving Bucknell 62 yards on its first possession for a touchdown and a 7-0 lead. Tailback Chris Peer '98, who got the nod to replace the injured Rich Lemon '97 just 10 minutes before kickoff, showed no jitters as he carried the ball 34 times for 91 yards in the game.

While the Bucknell offense played a solid, ball control offense, the defense was aggressive and effective against the talented Quakers. The only big play surrendered by the Bison defense in regulation was a 48-yard bomb in the second quarter, which set up Penn's first score.

A blocked punt by the Quakers in the third quarter set up Penn's second touchdown. Tailback Jasen Scott fumbled the ball at the goal line, but a Quaker teammate pounced on the ball for six points. The point after was good, and Bucknell trailed 14-7 despite dominating the game offensively.

Bucknell managed to even the score, taking advantage of an interception by George Howanitz '97 and driving the ball 61 yards for the score. Ron Rockett caught a 13-yard touchdown pass to cap the scoring drive early in the fourth quarter.

Late in the fourth quarter, Bucknell got its final opportunity to win the game in regulation after Erich Muzi '99 set up the Bison with excellent field position with a 16-yard punt return.

Fox moved the Bison down the field to set up a Rich Miller '97 field goal attempt, but on a third down play at the Penn 22, Fox was called for intentional grounding as he threw an incomplete pass with a Penn defender draped around his legs.

The penalty was debatable, but Gadd was not bitter about the call. "When you allow a play to decide the outcome of a football game, you take your chances," Gadd said. "They [the referees] called it the best they could."

Gadd decided against trying the 49-yard field goal that Bucknell faced after the grounding call, and Penn intercepted a Fox pass on the next play. The Quakers failed to capitalize on the turnover as time expired, sending Bucknell to overtime for the first time this season.

Under a new NCAA rule, all football games that end in a tie will be decided by overtime, but the rule is nothing new for Bucknell, since the Patriot League adopted the measure before last season.

Fox wasted no time in the first overtime, taking over on the overtime-standard 25-yard line and connecting with Cal Wilcox '97 on the third play of the period for a touchdown and a 21-14 lead.

Penn's offense was efficient as well, scoring on its second play with a similar touchdown pass to the tight end. The captains reconvened at midfield for the coin toss for the second overtime.

This time, Penn took possession first, and Bucknell held the Quaker offense to a field goal after a third down stand at the 10 yard line.

Bucknell drove to the eight yard line, but the Quakers forced a field goal attempt which proved to be Bucknell's downfall. Penn charged the Bison with a host of leaping players, and Miller's kick was not high enough to clear the defense. The kick was returned for a touchdown to make the final score 30-21.

Despite the loss, Gadd was proud of his squad and its efforts, especially after two disappointing performances in the past two weeks.

After last week's 101 yards of total offense, Gadd and the coaching staff knew that it was time to get tough. "We challenged them. I mean, it was not a pretty sight around here this week, but these are men... and they needed to understand that what they did last week was unacceptable."

The offense responded with 330 yards of total offense, while the defense held Penn under 275 yards.

"They came out today and accepted a challenge and put their hearts on their sleeves and played," Gadd said after the game.

Jonah Half—The Bucknellian

Rich Miller '97 attempted a 25-yard field goal to tie the game in double overtime. The kick was blocked and returned for a touchdown as Bucknell lost its third straight game at home. Ironically, Penn defeated Bucknell last year with a late field goal in regulation. This year, the same Quaker kicker, Josiah Greathouse, provided the winning points with his kick in double overtime. Bucknell travels to New Haven, Conn. this week to face Yale.

Reactions to the Overtime Rule

By Brett Tomlinson

Under a new NCAA rule, all ties in football will be broken in overtime. The overtime system adopted by the NCAA is different from the NFL's overtime and is designed to be an even test of strength.

Each team is given one possession of the ball at the opposing team's 25 yard line. A coin toss determines who goes first, and if the teams are still tied after the first set of possessions, another coin toss and another set of possessions follows until one team leads at the end of a set.

Bucknell is familiar with the rule because the Patriot League used it last season. In 1995, Bucknell won its first overtime game ever, beating Colgate 21-14.

Despite Bucknell's heartbreaking overtime loss on Saturday, the Bison players and coaches seemed to be in favor of the new NCAA overtime rule.

Kicker Rich Miller '97, whose field goal attempt was blocked in the second overtime to give Penn the victory, supports the rule. "If I didn't like the pressure, I wouldn't be out there," Miller said. "I want to know who wins."

Coach Tom Gadd, who is now 1-1 in overtime games, said, "At least you resolve the issue, rather than going into that locker room with a tie. I'm in favor of the tie breaker. It just didn't go our way [Saturday]."

GRAPPLERS

From Page 11

Rivoire said, "We didn't want to wait for all the bureaucratic nonsense."

Now that the University has accepted the proposal, the next step is to decide on which women's sport will be sponsored by the new funds.

The Gender Task Force, which has been examining gender equity at Bucknell for the past year, will work with Hartzell and President William D. Adams in determining what women's sport gets the funding for varsity status. Hartzell mentioned water polo and golf as the front-runners.

"Women's water polo has been very successful, and with the hope that the [Capital Campaign] will yield a new pool, [sponsoring water polo] makes a lot of sense," Hartzell said.

Rivoire said, "The water polo team has been varsity in all but name and funding," and added that water polo would probably be the Grapplers Club top choice.

"Water polo is attractive to us in that it is a winter sport and could lead to possible doubleheaders [with the wrestling team]," said Rivoire.

Hartzell said, "Women's golf also makes some sense because we have a facility, and we have some interest."

Rivoire said women's golf would probably be his second choice.

The official plan under Grapplers Club proposal is that they will contribute $12,000 in the first year of the plan, $10,000 in the second, and $8,000 in the third, with a possible extension.

Ferraro added that "[the new women's team] is not just getting money, they can also use the Grapplers Club to network for recruiting, etc."

The money will be used to cover some of the costs of the wrestling budget, so that athletic department funds will be freed to support the new women's sport.

According to Hartzell, the Grapplers Club funds will probably not completely cover the costs of starting the new program. "My guess would be that yes, there will have to be some sort of supplement there in order to make the program viable, but it kind of depends on what [sport] it is," Hartzell said.

Despite the fanfare, the Grapplers Club does bring up some doubts about the future of the wrestling team, as well as other problems with Title IX, which ensures that universities cannot spend a disproportionate amount of money on men's sports. Says Rivoire, "the [Grapplers] Club certainly was concerned... with Bucknell athletics and Title IX," but also emphasized that "the wrestling team was never in trouble of being canceled," a sentiment reiterated by Ferraro and Hartzell.

Although the proposal is a significant step towards gender equity in athletics at Bucknell, Hartzell insists that the University needs to show more of a commitment to equity.

"I feel strongly that the gender equity issue is a University problem, a University concern, and to have it solved by outside entities, the Grapplers Club or whomever, is uncomfortable for me," Hartzell said. "I applaud the Grapplers club for thinking of a novel idea, but at the same time... I think [gender equity] is a long-standing University problem, since 1976, that just hasn't been addressed in a fashion that is necessary in order to put us in a position of equity."

Women sneak by Leopards

Beetna Kim—The Bucknellian

Liz Woodrow '98 has helped an injury-plagued squad to a 3-2 record in the Patriot League, and with it a probable playoff berth.

By Eric Keber

Bucknellian Staff Writer

Despite the many injuries plaguing the squad, the Bucknell women's soccer team (4-4-1) came away with their second Patriot League shutout with a 1-0 victory over Lafayette (2-4) on Saturday.

The parent's weekend crowd watched a scoreless contest until 10 minutes had elapsed in the second half, when Colleen Butler '00 scored her first collegiate goal off an assist from Jody Ravetz '98.

"I was just excited to help out the team," remarked Butler on her goal. "We really needed the win to get us into the tournament."

Head Coach Toby Lovecchio was pleased with the win although he hopes his team will play better in future games.

"It wasn't a very exciting game. We had a couple of nice scoring opportunities," Lovecchio said. "Fortunately we were able to score. We got the win but we are not playing as well as we can and the kids know it."

Bucknell had control of the ball for most of the game and both teams played physically and aggressively.

"They [Lafayette] were really aggressive the first half and I think they pushed us around but the second half we came out stronger," Lovecchio said.

This was the first game that Butler had started because injuries had forced Lovecchio to rearrange his lineup.

"She's been playing pretty well. She is giving us control, maintaining possession, and she's a pretty good passer. We're not missing anything by playing her, she's definitely good enough."

Unfortunately Butler sprained her ankle later in the half and had to be assisted off the field. She will most likely miss the next game.

The Bison will also be without their starting stopper, the aptly named Sarah Stopper '00, who is out with a knee/hamstring injury. Katie McElligott '00 moved back to take Stopper's position allowing Butler to start. The women are missing tri-captain Karen Spall '98 who is out for the season because of knee surgery and Lindsay Pelletier '00 who is sick with mononucleosis. Goalie Becky Snover '97, who collected eight saves against Lafayette, was injured in the second half when she was hit in the face making a sliding save. She was replaced by Dana Rofey '00, but will be back for the next game.

The win was an important one for the Bison. Besides breaking a three game winless streak it improved their Patriot League record to 3-2. With only one league game, Bucknell is in good position to make the Patriot League Tournament.

The team will spend fall break in New Mexico. The main concern that Lovecchio has is the higher altitude and thinner air.

The women host a struggling Scranton team on Wednesday at 7:00 p.m.

Dustin Riccio—The Bucknellian

Ranked opponents deflate polo

Bison fall to top 20 foes Brown, Queens, and Massachusetts

By Erica Freidlander

Bucknellian Staff Writer

The Bucknell men's water polo team traveled to Brown University last weekend to play a tournament against the home team, UMASS and Queens. The trip proved to be frustrating as the Bison dropped all three games to their three "Top 20" opponents.

A Friday-night game against 18th-ranked Brown kicked off Bucknell's weekend.

Despite Brown's high ranking and skilled play, the Bison remained in the game throughout. Due to defensive problems, the team gave up two late goals. The Bison lost their first game of the weekend 8-6.

Bucknell had a chance to rest and prepare for the following day's games that night. They knew that the next two games would be equally as difficult as the game against Brown, but they were determined to reverse their fortunes.

The first game of the morning was against Queens, a water polo team ranked in the top 15 in the nation. Bucknell came out strong against the outstanding team and they remained close in score for the first three quarters.

Mike Wooster, the men's team coach said, "Queens' team was deeper on the bench. Our team lacks that depth. We just couldn't keep up."

The Bison men played a great game offensively but could not surpass the Queens team. Queens broke away late in the game, winning 13-6.

The last game of the weekend for Bucknell was against UMass, also ranked in the top 15. The Bison were tired after a grueling game against Queens and with two players injured, the third game did not look promising.

UMass came out explosively, taking the lead in the first quarter. Bucknell was able to play well defensively, aided by goalie Zach Blixt, '99, who blocked several powerful shots. The Bison men were unable to take the lead and finished off their weekend with another 13-6 loss, this time to the Minutemen.

Wooster stated that the weekend's games were more of a training trip for the Bucknell team. "It was a tough lineup but it helped us perfect the basics."

Bucknell will be traveling to George Washington University during fall break to play a series of games. The tournament which will include teams such as Washington and Lee, University of Richmond and the host Colonials, determines the rankings for Southern Championships the following weekend.

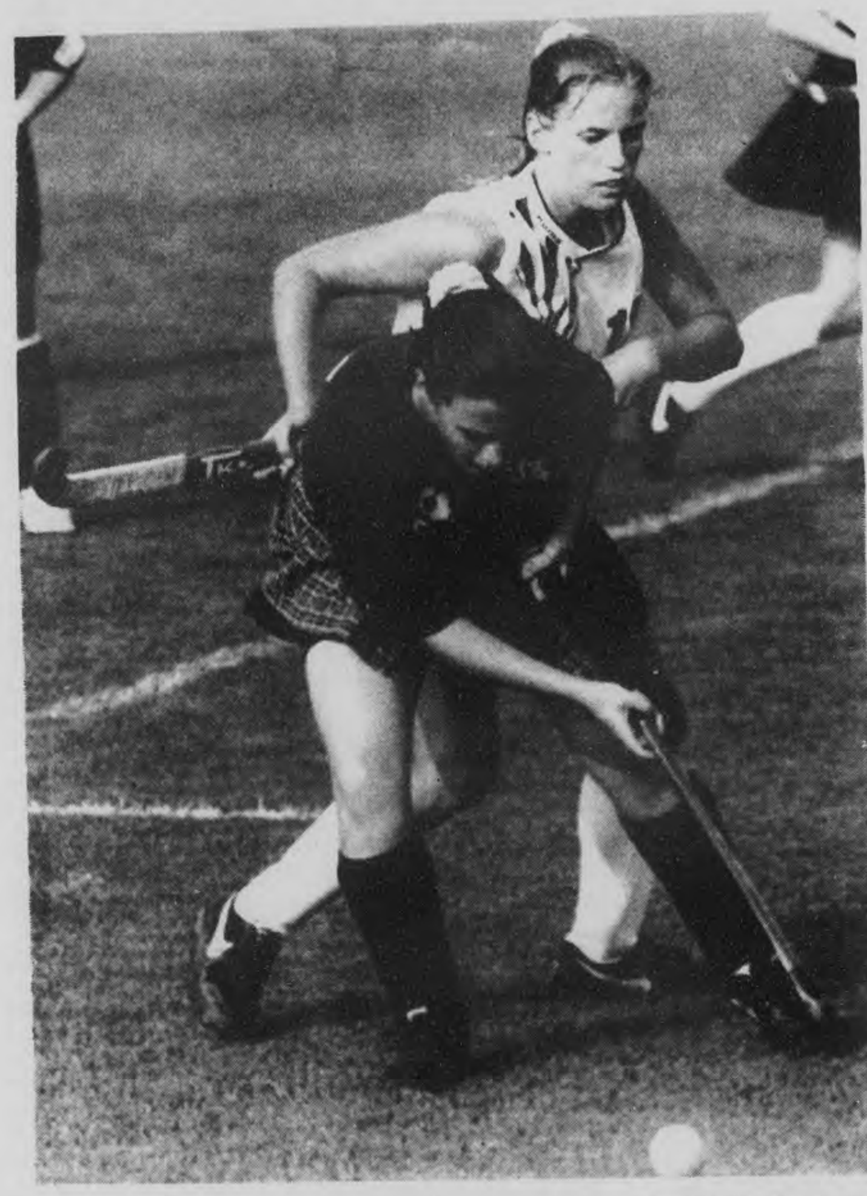
Field hockey edged out by Lehigh



Bucknellian File Photo

Co-captain Dani Johnston '97 was an integral part of the Bison attack which outshot Lehigh 29 to 7 in Saturday's loss.

By Haley Futterknecht

Bucknellian Staff Writer

The Bucknell field hockey team lost its third Patriot League game on Saturday in a 2-1 match against Lehigh.

The game was scoreless when a penalty stroke was called against Bison goalkeeper Maureen Breslin '99. The Mountain Hawks' stroker responded, putting the ball in the upper right-hand corner of the cage for the first goal, giving Lehigh a 1-0 halftime lead.

The score was 2-0 with the addition of another Lehigh goal in the second half when the Bison made their comeback charge.

Co-captain Megan Bossuyt '97 connected with a beautiful shot from just inside the 25 yard line.

Unfortunately, the Bison could not get anymore past the Lehigh goalkeeper, and the penalty whistle was heard a bit more prevalently in favor of the Mountain Hawks than the Bison would have liked.

However the Bison's overall performance was excellent. Jaime Paldin '98 said, "We totally dominated the game. There seemed to be nothing more we could have done. It was extremely frustrating. The ball just wouldn't go in the goal cage."

The Bison proved their determination by their scoring attempts. They outshot Lehigh 29 to 7.

Tina Jones '98 shared in Paldin's exasperation saying, "There were simply no connections made. We played well, but we didn't capitalize."

Assistant Coach Gina Lucido added, "I feel that it was the best game Bucknell University field hockey has played. It was very frustrating as a coach, because the players did everything they possibly could to win, but we didn't win. I can honestly say that we were the better team. In sports one usually feels the best team should win, but it doesn't always happen that way, which we found out on Saturday."

Bucknell field hockey is currently 1-3 in the Patriot League with two more league games to go. Lucido explains, "We have to best our last two Patriot League games, Colgate and Fairfield, to get into the tournament. Once we're in the tournament, it's a clean slate."

The Bison enjoy their next three games on turf. They travel to Georgetown on Sunday, Virginia Commonwealth on Tuesday, and Lock Haven on Wednesday. Lucido said, "As a coach, I am positive about the future. The team is growing and not regressing. If they keep playing how they're playing and raising their level of play a little every day, hopefully things will fall into place."

Bison cross-country continues to dominate

By Chris Ellis

Bucknellian Staff Writer

In their final meets before the ultra-competitive Penn State invitational in two weeks, both Bucknell cross-country teams recorded impressive wins over eight strong teams at last week's Lafayette Invitational.

The men's team, winners by a 39-58 score over second-place Williams, was actually expecting a much tougher test at the nine-team invitational. After one mile, Bucknell's top runner was trailing Williams' first three runners, but by the time the race reached its halfway mark, the Bison were well on their way to an easy victory.

"We were kind of hoping that we'd get more competition [in the invitational]," Head Coach Art Gulden said. "We actually expected better competition. We won't have that problem at Penn State."

The men, led by Steve Roeser '97, earned four of the top nine places in the win. Williams' Tom Billo won the individual title and Pennsylvania's Marc Wilkinson finished second, but from that point on, Bucknell dominated the meet.

Roeser placed third overall with a time of 25:31, just seven seconds off Billo's pace. Matt Kodak '99, winner of Bucknell's first two individual meets, finished just one second behind Roeser in fourth. Wally Dietrich '99 (seventh) and Tom Trollope '99 (ninth) also recorded strong finishes for the Bison.

After one off week for some last-second preparation, Bucknell will travel to Penn State for an Invitational on October 26th. The meet should be Bucknell's toughest before the Patriot League championships.

"There will be at least five nationally ranked teams there. This will be a real step up," Gulden said. With the way we're improving, though, I would expect us to do very well. It's a good way to test ourselves.

The women's team had a similarly easy time in its meet. Bucknell's 35 total points in the meet were more than enough to distance the Bison from rivals Penn (70), Williams (91), and Maryland (109). Bucknell had dropped a one-point decision to Delaware in a dual meet last week, but rebounded to rout the Blue Hens at Lafayette. Delaware, with 143 points, finished a disappointing fifth.

Again, the Bucknell women were forced to rally from behind. It was Gulden's strategy to send the team out slow in the invitational, a strategy that cost the Bison against Delaware last week but reaped huge rewards in this meet.

"At the one mile mark, we were way behind, but at two miles, we had the race wrapped up." Gulden said. "It's tough to run at a constant pace with so many teams in front of you, but the women held their poise really well."

Maryland's Katie Barnes won the women's race with a time of 18:17, but again, Bucknell's runners were well represented near the top. Julie Sweitzer's '99 third place finish led a pack of six Bucknell runners that ran among the top 15 finishers. No other school was represented by more than two runners in the top 15.

With no meet this week, Gulden will have an opportunity to assess his teams' performances and further prepare for the challenging test awaiting the Bison in two weeks. With three meets in the books, though, he sees no reason why the team shouldn't fare well at Penn State and beyond.

"We're definitely making the progress we need to make," Gulden said after the Lafayette win. "This just shows that the program we're running is correct, and that the kids are doing the job and running tough. I see no reason why we shouldn't do extremely well at Penn State."

Men rebound from loss, down Millersville

Team ends three game losing streak but loss to Army puts men on verge of playoff elimination

By E.J. Crawford

Buckenllian Staff Writer

Bucknell men's soccer suffered a damaging blow to its playoff hopes this past weekend, as it fell to Patriot League nemesis Army 2-1, a loss that drops Bucknell to 1-3 in the conference. The team rebounded, however, for a much-needed victory against Millersville as Scott Gilroy '00 scored the game winner with just over 16 minutes to play. The victory over Millersville ran the men's record to 5-5 for the year, and ended a three game losing streak.

Michael Morris—The Bucknellian

Brian Rowley '98 and the rest of the Bison defense has limited opponents to 17 goals in 10 games this season, including three shutouts.

Bucknell and Army battled to a scoreless tie for the majority of the first half, as the Bison continually pushed the ball to their offensive third, but were unable to generate any scoring.

With the first half coming to a close, Army finally broke through with a header that barely floated past senior goalie Corey Harbold, and put the Cadets up 1-0.

The Army lead would be short-lived however, as the Bison broke through a minute later as Gilroy fed Myles Perkins '98 to send the game into halftime tied at 1-1. The goal was Perkins first of the season.

The second half began much as the first, and for another 25 minutes the score remained knotted at one, until Army was able to punch in a goal at the 20:42 mark of the second half.

Despite numerous opportunities, the Bison were then shut down by Army's staunch defense, and the Cadets escaped with a 2-1 victory.

"We were able to move the ball into their opposing third, but we just couldn't get any lucky bounces," said senior captain Doug Sweet.

For the game, Harbold registered three saves, and the Bison outshot the favored Cadets 15-7.

Bucknell next took on division III Millersville in their next contest, and they opened as if the Army game was still on their minds, as Sweet said: "We definitely came out a little bit flat."

The combination of the Bison's slow start, combined with a strong start by Millersville, resulted in a 1-0 Millersville lead at halftime. The lone first-half goal came 15 minutes into the game, and Millersville held on for the first half lead.

The Bison responded quickly after halftime, as Brian Carr '00 scored his third goal of the season off an assist from Kevin McClure '98. This set the scene for Gilroy, who scored off an assist from Perkins for his second game winning goal of the season.

Sweet put the game in perspective. "Although we didn't play as well as we're capable of playing, it was good to see us come back and win."

The men's squad takes to the road during fall break, with away games at American, Richmond, and Mt. St. Mary's, none of which they've played in recent years. After these away games, the Bison return for their last two League games against Navy and Lafayette.

This makes for a formidable task, as Navy and Lafayette are probably the two strongest teams in the League, and the Bison are "in a must-win situation," as one more League loss will eliminate them from playoff contention.

Fast Fact:
Scott Gilroy '00 leads the Patriot League in scoring with three goals and two assists.

VOLLEYBALL

From Page 11

off a defender before going out of bounds. Another ace by Pomeroy put the Bison ahead 4-0. Finally, with Bucknell leading 7-0, Lafayette scored a lone point.

Shortly after the point by Lafayette, the Bison began to pull away again. Voget and Cameron Adams '99 combined on a block to give Bucknell a 10-1 lead.

With the score 12-1 in favor of the Bison, the lead began to dwindle quickly. The Leopards capitalized on errors made by the Bison to score eight consecutive points. This was as close as Lafayette would get.

Wharton served a timely ace, giving Bucknell a 14-9 lead. An ace by the Lafayette server was the last score for the Leopards. Voget finished the game with a tap along the sideline.

The Bison defense was led by Teitsworth, who had 12 digs. Wharton headed Bucknell's offense with 15 kills while Pomeroy and Teitsworth had 11 and 9 kills respectively. Wharton and Pomeroy each added three block assists and totaled three solo blocks as well. Turnshek, the current assist leader in the Patriot League, added 27 assists in the victory.

"Lafayette's strategy could have worked but we stayed focused," Opalski said.

The Bison fly out to the Golden State this fall break. The team will look to stay focused against three very strong opponents from the Big West Conference while in California.

They will open up against Cal. St. Fullerton on Saturday. The Bison will then meet Cal. St. Northridge and UC-Irvine on Monday and Tuesday respectively.

Following Bucknell's return home, the Bison will travel to Colgate. It will be the first meeting for the two teams since last season's Patriot League championship match in which Colgate upset the Bison 3-games-to-1.

Ranked opponents deflate polo

Bison fall to top 20 foes Brown, Queens, and Massachusetts

BY ERICA FREIDLANDER
Bucknellian Staff Writer

The Bucknell men's water polo team traveled to Brown University last weekend to play a tournament against the home team, UMASS and Queens. The trip proved to be frustrating as the Bison dropped all three games to their three "Top 20" opponents.

A Friday-night game against 18th-ranked Brown kicked off Bucknell's weekend.

Despite Brown's high ranking and skilled play, the Bison remained in the game throughout. Due to defensive problems, the team gave up two late goals. The Bison lost their first game of the weekend 8-6.

Bucknell had a chance to rest and prepare for the following day's games that night. They knew that the next two games would be equally as difficult as the game against Brown, but they were determined to reverse their fortunes.

The first game of the morning was against Queens, a water polo team ranked in the top 15 in the nation. Bucknell came out strong against the outstanding team and they remained close in score for the first three quarters.

Mike Wooster, the men's team coach said, "Queens' team was deeper on the bench. Our team lacks that depth. We just couldn't keep up."

The Bison men played a great game offensively but could not surpass the Queens team. Queens broke away late in the game, winning 13-6.

The last game of the weekend for Bucknell was against UMass, also ranked in the top 15. The Bison were tired after a grueling game against Queens and with two players injured, the third game did not look promising.

UMass came out explosively, taking the lead in the first quarter. Bucknell was able to play well defensively, aided by goalie Zach Blixt, '99, who blocked several powerful shots. The Bison men were unable to take the lead and finished off their weekend with another 13-6 loss, this time to the Minutemen.

Wooster stated that the weekend's games were more of a training trip for the Bucknell team. "It was a tough lineup but it helped us perfect the basics."

Bucknell will be traveling to George Washington University during fall break to play a series of games. The tournament which will include teams such as Washington and Lee, University of Richmond and the host Colonials, determines the rankings for Southern Championships the following weekend.

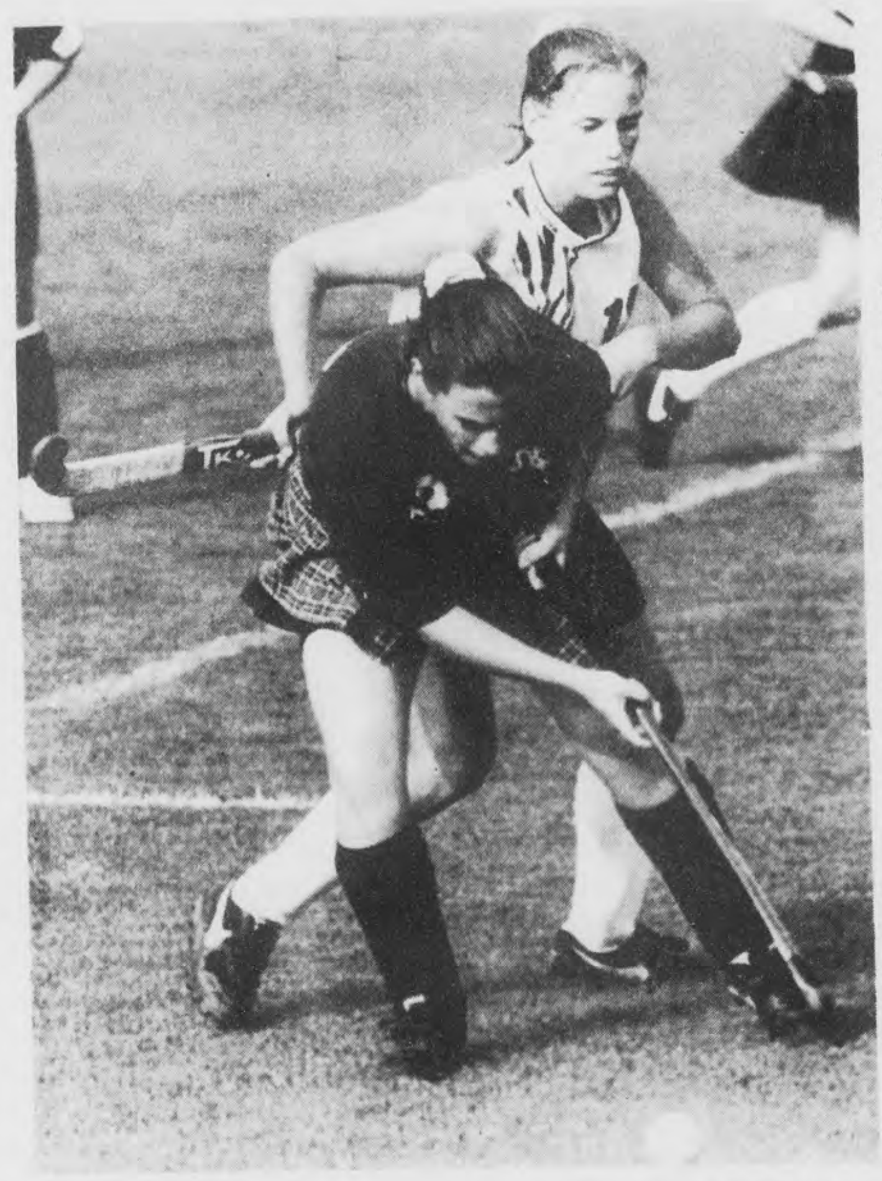
Field hockey edged out by Lehigh



Bucknellian File Photo

Co-captain Dani Johnston '97 was an integral part of the Bison attack which outshot Lehigh 29 to 7 in Saturday's loss.

BY HALEY FUTTERKNECHT
Bucknellian Staff Writer

The Bucknell field hockey team lost its third Patriot League game on Saturday in a 2-1 match against Lehigh.

The game was scoreless when a penalty stroke was called against Bison goalkeeper Maureen Breslin '99. The Mountain Hawks' stroker responded, putting the ball in the upper right-hand corner of the cage for the first goal, giving Lehigh a 1-0 halftime lead.

The score was 2-0 with the addition of another Lehigh goal in the second half when the Bison made their comeback charge.

Co-captain Megan Bossuyt '97 connected with a beautiful shot from just inside the 25 yard line.

Unfortunately, the Bison could not get anymore past the Lehigh goalkeeper, and the penalty whistle was heard a bit more prevalently in favor of the Mountain Hawks than the Bison would have liked.

However the Bison's overall performance was excellent. Jaime Paldin '98 said, "We totally dominated the game. There seemed to be nothing more we could have done. It was extremely frustrating. The ball just wouldn't go in the goal cage."

The Bison proved their determination by their scoring attempts.

They outshot Lehigh 29 to 7.

Tina Jones '98 shared in Paldin's exasperation saying, "There were simply no connections made. We played well, but we didn't capitalize."

Assistant Coach Gina Lucido added, "I feel that it was the best game Bucknell University field hockey has played. It was very frustrating as a coach, because the players did everything they possibly could to win, but we didn't win. I can honestly say that we were the better team. In sports one usually feels the best team should win, but it doesn't always happen that way, which we found out on Saturday."

Bucknell field hockey is currently 1-3 in the Patriot League with two more league games to go. Lucido explains, "We have to best our last two Patriot League games, Colgate and Fairfield, to get into the tournament. Once we're in the tournament, it's a clean slate."

The Bison enjoy their next three games on turf. They travel to Georgetown on Sunday, Virginia Commonwealth on Tuesday, and Lock Haven on Wednesday. Lucido said, "As a coach, I am positive about the future. The team is growing and not regressing. If they keep playing how they're playing and raising their level of play a little every day, hopefully things will fall into place."

Bison cross-country continues to dominate

BY CHRIS ELLIS
Bucknellian Staff Writer

In their final meets before the ultra-competitive Penn State invitational in two weeks, both Bucknell cross-country teams recorded impressive wins over eight strong teams at last week's Lafayette Invitational.

The men's team, winners by a 39-58 score over second-place Williams, was actually expecting a much tougher test at the nine-team invitational. After one mile, Bucknell's top runner was trailing Williams' first three runners, but by the time the race reached its halfway mark, the Bison were well on their way to an easy victory.

"We were kind of hoping that we'd get more competition [in the invitational]," Head Coach Art Gulden said. "We actually expected better competition. We won't have that problem at Penn State."

The men, led by Steve Roeser '97, earned four of the top nine places in the win. Williams' Tom Billo won the individual title and Pennsylvania's Marc Wilkinson finished second, but from that point on, Bucknell dominated the meet.

Roeser placed third overall with a time of 25:31, just seven seconds off Billo's pace. Matt Kodak '99, winner of Bucknell's first two individual meets, finished just one second behind Roeser in fourth. Wally Dietrich '99 (seventh) and Tom Trollope '99 (ninth) also recorded strong finishes for the Bison.

After one off week for some last-second preparation, Bucknell will travel to Penn State for an Invitational on October 26th. The meet should be Bucknell's toughest before the Patriot League championships.

"There will be at least five nationally ranked teams there. This will be a real step up," Gulden said. With the way we're improving, though, I would expect us to do very well. It's a good way to test ourselves.

The women's team had a similarly easy time in its meet. Bucknell's 35 total points in the meet were more than enough to distance the Bison from rivals Penn (70), Williams (91), and Maryland (109). Bucknell had dropped a one-point decision to Delaware in a dual meet last week, but rebounded to rout the Blue Hens at Lafayette. Delaware, with 143 points, finished a disappointing fifth.

Again, the Bucknell women were forced to rally from behind. It was Gulden's strategy to send the team out slow in the invitational, a strategy that cost the Bison against Delaware last week but reaped huge rewards in this meet.

"At the one mile mark, we were way behind, but at two miles, we had the race wrapped up." Gulden said. "It's tough to run at a constant pace with so many teams in front of you, but the women held their poise really well."

Maryland's Katie Barnes won the women's race with a time of 18:17, but again, Bucknell's runners were well represented near the top. Julie Sweitzer's '99 third place finish led a pack of six Bucknell runners that ran among the top 15 finishers. No other school was represented by more than two runners in the top 15.

With no meet this week, Gulden will have an opportunity to assess his teams' performances and further prepare for the challenging test awaiting the Bison in two weeks. With three meets in the books, though, he sees no reason why the team shouldn't fare well at Penn State and beyond.

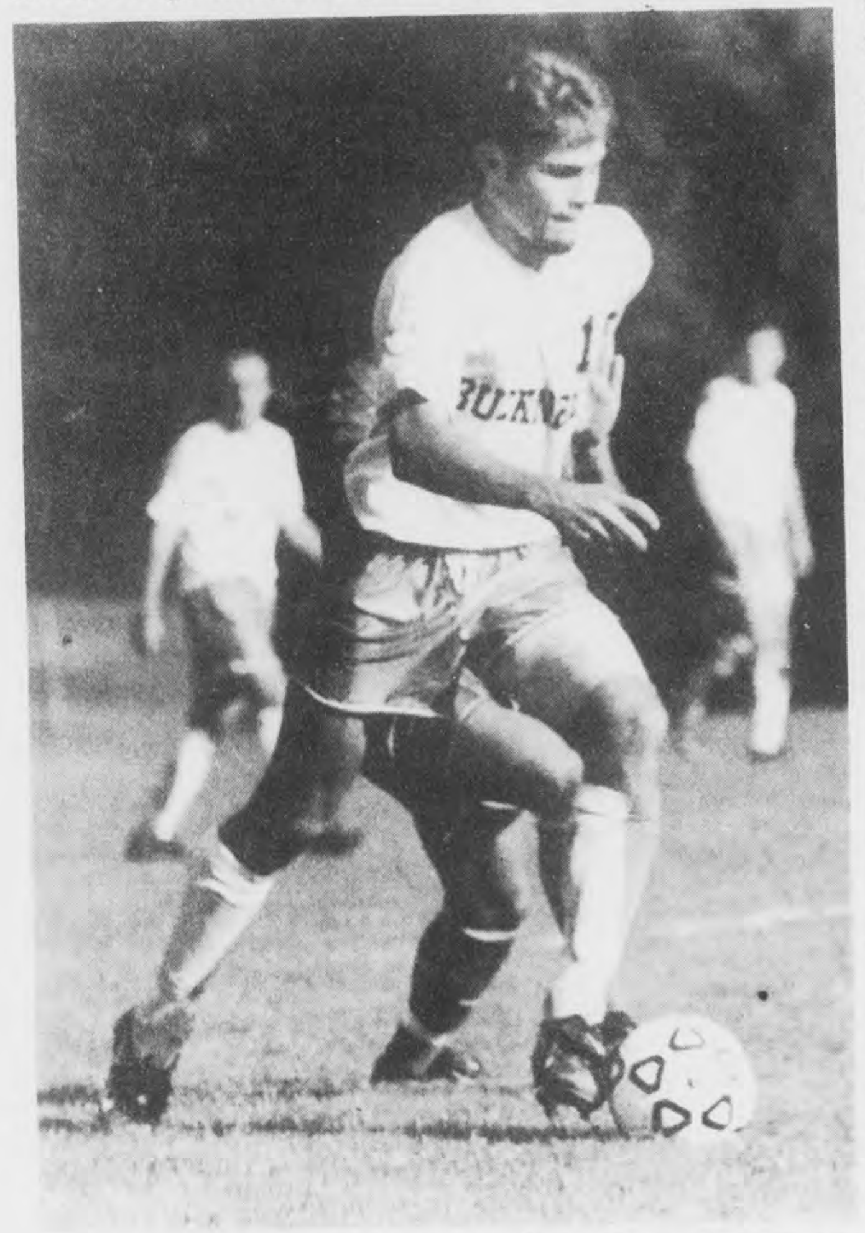
"We're definitely making the progress we need to make," Gulden said after the Lafayette win. "This just shows that the program we're running is correct, and that the kids are doing the job and running tough. I see no reason why we shouldn't do extremely well at Penn State."

Men rebound from loss, down Millersville

Team ends three game losing streak but loss to Army puts men on verge of playoff elimination

BY E.J. CRAWFORD
Buckenllian Staff Writer

Bucknell men's soccer suffered a damaging blow to its playoff hopes this past weekend, as it fell to Patriot League nemesis Army 2-1, a loss that drops Bucknell to 1-3 in the conference. The team rebounded, however, for a much-needed victory against Millersville as Scott Gilroy '00 scored the game winner with just over 16 minutes to play. The victory over Millersville ran the men's record to 5-5 for the year, and ended a three game losing streak.



Michael Morris—The Bucknellian

Brian Rowley '98 and the rest of the Bison defense has limited opponents to 17 goals in 10 games this season, including three shutouts.

Bucknell and Army battled to a scoreless tie for the majority of the first half, as the Bison continually pushed the ball to their offensive third, but were unable to generate any scoring.

With the first half coming to a close, Army finally broke through with a header that barely floated past senior goalie Corey Harbold, and put the Cadets up 1-0.

The Army lead would be short-lived however, as the Bison broke through a minute later as Gilroy fed Myles Perkins '98 to send the game into halftime tied at 1-1. The goal was Perkins first of the season.

The second half began much as the first, and for another 25 minutes the score remained knotted at one, until Army was able to punch in a goal at the 20:42 mark of the second half.

Despite numerous opportunities, the Bison were then shut down by Army's staunch defense, and the Cadets escaped with a 2-1 victory.

"We were able to move the ball into their opposing third, but we just couldn't get any lucky bounces," said senior captain Doug Sweet.

For the game, Harbold registered three saves, and the Bison outshot the favored Cadets 15-7.

Bucknell next took on division III Millersville in their next contest, and they opened as if the Army game was still on their minds, as Sweet said: "We definitely came out a little bit flat."

The combination of the Bison's slow start, combined with a strong start by Millersville, resulted in a 1-0 Millersville lead at halftime. The lone first-half goal came 15 minutes into the game, and Millersville held on for the first half lead.

The Bison responded quickly after halftime, as Brian Carr '00 scored his third goal of the season off an assist from Kevin McClure '98. This set the scene for Gilroy, who scored off an assist from Perkins for his second game winning goal of the season.

Sweet put the game in perspective. "Although we didn't play as well as we're capable of playing, it was good to see us come back and win."

The men's squad takes to the road during fall break, with away games at American, Richmond, and Mt. St. Mary's, none of which they've played in recent years. After these away games, the Bison return for their last two League games against Navy and Lafayette.

This makes for a formidable task, as Navy and Lafayette are probably the two strongest teams in the League, and the Bison are "in a must-win situation," as one more League loss will eliminate them from playoff contention.

Fast Fact:
Scott Gilroy '00 leads the Patriot League in scoring with three goals and two assists.

VOLLEYBALL

From Page 11

off a defender before going out of bounds. Another ace by Pomeroy put the Bison ahead 4-0. Finally, with Bucknell leading 7-0, Lafayette scored a lone point.

Shortly after the point by Lafayette, the Bison began to pull away again. Voget and Cameron Adams '99 combined on a block to give Bucknell a 10-1 lead.

With the score 12-1 in favor of the Bison, the lead began to dwindle quickly. The Leopards capitalized on errors made by the Bison to score eight consecutive points. This was as close as Lafayette would get.

Wharton served a timely ace, giving Bucknell a 14-9 lead. An ace by the Lafayette server was the last score for the Leopards. Voget finished the game with a tap along the sideline.

The Bison defense was led by Teitsworth, who had 12 digs. Wharton headed Bucknell's offense with 15 kills while Pomeroy and Teitsworth had 11 and 9 kills respectively. Wharton and Pomeroy each added three block assists and totaled three solo blocks as well. Turnshek, the current assist leader in the Patriot League, added 27 assists in the victory.

"Lafayette's strategy could have worked but we stayed focused," Opalski said.

The Bison fly out to the Golden State this fall break. The team will look to stay focused against three very strong opponents from the Big West Conference while in California.

They will open up against Cal. St. Fullerton on Saturday. The Bison will then meet Cal. St. Northridge and UC-Irvine on Monday and Tuesday respectively.

Following Bucknell's return home, the Bison will travel to Colgate. It will be the first meeting for the two teams since last season's Patriot League championship match in which Colgate upset the Bison 3-games-to-1.

Alomar incident exposes leadership

It is very frustrating to be a baseball fan in America today. The postseason is shaping up to be one of the best in years, with a great mix of young stars, respected veterans, and brilliant coaches. At the same time, a scandal involving one of the finest athletes in the game has put a negative slant on the game in general.

Roberto Alomar is a superb hitter, an extraordinary fielder, and, until a last week, he was one of the most respected young players in baseball. When Alomar spit in the face of umpire John Hirschbeck, he humiliated the law and order of the game of baseball. Yet, somehow American League president Dr. Gene Budig did not feel the incident was enough to keep Alomar out of the playoffs. Interim Commissioner Bud Selig had neither the guts nor the brains to set Budig straight on the issue, and as a result, a rift developed between the administrators of baseball and the umpires. Cooperation is at an all time low in major league baseball, and a weak administration is to blame.

Commentary

Brett Tomlinson

Brett Tomlinson
Sports Co-Editor

The umpires had a right to be upset at the light punishment levied on Alomar. In another era, perhaps, spitting in an umpires face would have been a minor offense in the rowdy game of baseball, but the Alomar incident was clearly not minor. It showed that the overpaid, underappreciative stars of the game have been inflated so much that they believe they are above the rules, and the slap on the wrist dished out by Budig confirmed that, in some cases, they are above the rules. Having Alomar on national television was obviously more important than letting the players know that spitting in an umpire's face is not acceptable.

Selig has tried to appease the umpires by planning a meeting between players, owners, and administrators in November, but the best thing Selig can do for baseball right now is vacate the commissioner's chair and let a permanent, non-partisan leader take control. Selig has clearly been overly sympathetic to owners, and his mishandling of the Alomar incident proves that he does not have control in his current position. He should return to his job as President of the Milwaukee Brewers on a full time basis.

As for a replacement, there is no clear choice within the realm of Major League Baseball. Baseball needs to search for a commissioner who has a strong sense of tradition, and at the same time, a willingness to experiment and get baseball back on track with competitive marketing.

It is clear that baseball is no longer the national pastime. Kids in the United States are playing a wide variety of sports, and baseball is gradually becoming just another sport.

From a spectator's standpoint, baseball is as exciting as it has ever been. In fact, traditionalists would argue, it is perhaps too exciting, as home runs have become extraordinarily common. Yet, despite all of the slugging and scoring, America just does not love baseball like it once did. The major factor in the declining interest in baseball is the lack of cooperation and leadership from players, owners, and now umpires.

Major League Baseball lost its last great commissioner, A. Bartlett Giamatti, to a heart attack before he had the chance to turn things around, and there has not been a worthy replacement in the commissioner's chair since Giamatti's death in 1989. There are quite a few worthy candidates for commissioner, including George Will, a true student of the game and a great spokesman as well; Tommy Lasorda, who would need medical clearance to take the stressful post; and Jim Bunning, who once pitched a perfect game and now pitches proposals in Congress.

The Alomar spitting incident has brought the need for better leadership in baseball back to the spotlight, and while the timing is not ideal, it still needs to be addressed. In the meantime, baseball fans can sit back an watch what should be an interesting set of league championship series, as two of the greatest shortstops of all time make what could be their last appearances in postseason play. It only happens once a year, so enjoy it.

Tennis splits weekend league matches

By Jared Silliker
Bucknellian Staff Writer

In splitting two home matches over Parents Weekend, downing Holy Cross, 8-2, and falling to Army, 5-4, the Bucknell women's tennis team moved to 5-3 on the season, and for head coach Rose Ewan, things are looking up.

Up to the top of the Patriot League, that is.

Thomas Marotta—The Bucknellian
Katie Roland '99 and the Bison split two weekend matches.

With a 2-2 Patriot League mark, the Bucknell women are looking up at three teams in the standings—Lafayette, Army and Colgate.

Bucknell's two league losses have come at the hands of Lafayette and Army and both have been by one-match margins.

But with these close encounters with Army and Lafayette, and another match ahead against Colgate at home on Tuesday, Ewan is quite optimistic.

"We really have as much talent as those teams," Ewan said. "We are fairly young, though, but if we stay healthy and continue to play intelligently, we have a shot at beating Colgate, which would create quite a logjam at the top of the Patriot League."

The youth Ewan touched on is no joke, either. Ewan is currently starting four first years in the top six, including Laura Leslie at No. 1 singles. Blakely Lauria holds a 4-1 mark at No. 3/4 singles, Kristen Jones is 2-2 at No. 5 singles and Kerry Callaghan is 4-1 at No. 6 singles. Jones (with Leslie) and Callaghan (with Wendy Eason '98) also hold winning records at No. 2 and 3 doubles, respectively.

Both Lauria and Callaghan swept their matches this past weekend. Callaghan needed two tie-breakers to down Army's Elizabeth Scheron, while Lauria finished in straight sets in both matches.

"Blakely has been our most consistent performer, having moved up from No. 5 singles, where I thought she might play," noted Ewan. "And Kristen has progressed with each match she's played, mostly in getting over some nerves."

"All of the freshmen are getting stronger as we go. Moving to college tennis is just a big adjustment for them," added Ewan. "And the upperclassmen are playing well also and keeping spirits high, especially co-captains Rebecca Korb '97 and Sue Vincent '97."

The Bucknell women get a chance to avenge their close losses October 19-20, when they travel to Lehigh for the Patriot League Championships.

Club Sport Report: Ultimate Frisbee

Ultimate makes strides at sectionals

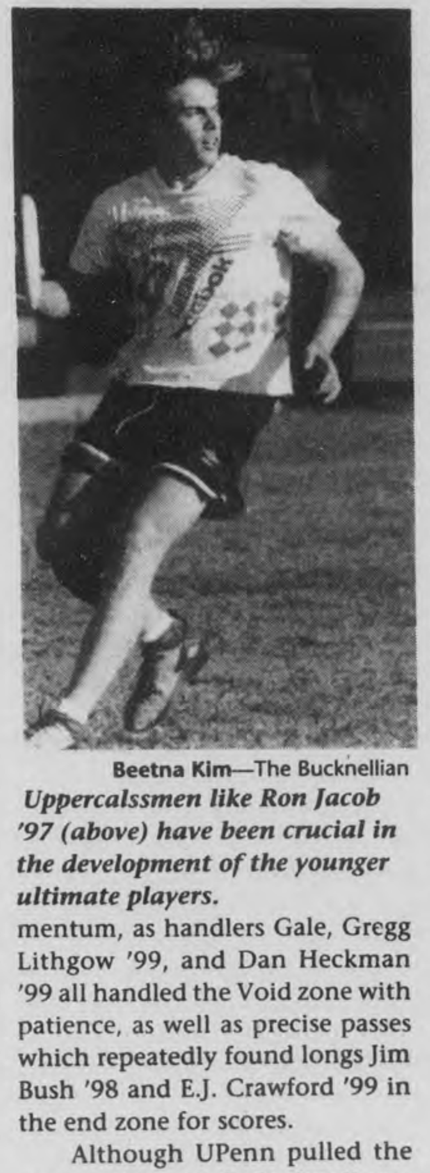
Mudsharks finish third in pool; advance to second day at Lehigh

By E.J. Crawford
Bucknellian Team Correspondent

This past weekend, as most students slept, the Mudsharks, the Bucknell men's Ultimate team, traveled to Lehigh for sectionals, which are held twice a year. The Mudsharks were grouped with four other teams in one of four five-team pools. The top finishers for each pool automatically qualify for regionals, and the teams that finish second and third in the pools compete for the four remaining spots to come out of the Pennsylvania/ Delaware section.

Despite the overlap of Parents Weekend, the Mudsharks were able to send what team captain Brain Gale '97 deemed as "a good, small, corps of dedicated players." In typical fashion the Mudsharks drew a first round bye, which mean they would be forced to play four games in a row, of which they would need two victories to make it to the second day.

The Mudsharks opened play against the UPenn Void, a team not renowned for their glowing spirit. However, the Mudsharks counter-acted the poor spirit of the Void by playing with twice their usual spirit, which, along with the sage advice of team mentor Yoda, boosted the Mudsharks out to an early 6-2 lead, and the squad went to halftime with a 7-4 lead. The Mudsharks opened the second half with the same momentum, as handlers Gale, Gregg Lithgow '99, and Dan Heckman '99 all handled the Void zone with patience, as well as precise passes which repeatedly found longs Jim Bush '98 and E.J. Crawford '99 in the end zone for scores.



Beetna Kim—The Bucknellian
Uppercalssmen like Ron Jacob '97 (above) have been crucial in the development of the younger ultimate players.

Although UPenn pulled the score within 11-8, Bucknell was able to hold on for a 13-9 victory. Despite their fine play, the highlight of the game was Sanatan Golden '99 winning an 11-man game of rock, paper, scissors, as he threw a rock to everyone else's scissors. Although still unconfirmed, the Mudshark team, along with any team that the Mudsharks have communicated with, believe this to be the first time one man has ever won a game of rock, paper, scissors ever.

Unfortunately, the thrill of Sanantan's glorious victory did not carry over, as the Mudsharks fell to two highly spirited club teams by the score of 13-6 and 13-8, respectively. Despite the losses, Gale was very happy with the overall play and effort of the team, summing up the effort by succinctly stating, "We rocked!"

The tough play of the Mudshark team paid off in the final game, as needing a win to advance to Sunday's play, the spirited Sharks used the speed of Steve Grimes '99, Drew Turner '99, and lone first-year Pete Wise, along with the precise cuts of sophomores Scott Diperna and Sheldon Wallbrown, to wear down the team of Mr. Yuk from Carnegie Mellon. The Bucknell squad jumped out to an early lead, and then cruised to a 13-5 victory in what sophomore handler Dan Heckman called "one of the best games we've played this year."

The win qualified the Mudsharks for Sunday's play, in which they took on a club team of alumni for Delaware. The Sharks came out strong, and were "in every single point," but in the end the experience of the Delaware squad won out, and the Mudsharks were denied their first trip to regionals in four years.

Overall, Gale seemed pleased with the showing of the squad, which did not win a single game in either of last year's sectionals, and credits the maturation of this year's large sophomore class for the big difference. "Overall, last year's freshman have come a really long way, and now truly lead this team. Last year we too often relied on one or two players to win the game, whereas this year we have much more of a team."

And hopefully, with the continued maturation of this year's sophomores, as well as the emergence of this year's freshman class, the Mudsharks will take quite a bite out of the competition in the Spring, as well as the Spring Sectionals.

Golfers finish third in league tournament

By E.J. Crawford
Bucknellian Staff Writer

The Bucknell men's golf team fired a three-day total of 954 to comfortably take third place at this year's Patriot League Championships. The Bison three day total trailed Lehigh, the League victor, by 19 strokes, but was 12 better than fourth place finisher Army.

The Bison were led by Josh Hartman '98, who shot a closing day 75 to lead the men's squad to its third place finish. Overall, Hartman shot a 235 for the three rounds, which led the Bison, and placed the junior fourth place overall in the individual championships.

Also weighing in with an impressive performance was Bryan Sun '99, who scored back-to back 77s to open the tournament, but faded to an 82 on the last day, and ended the tournament in a tie for fifth in the individual title hunt.

Todd Schneider '99 led the rest of Bucknell's golfers with a 243, followed by Mark McGinley '97 with a 245, Eric Shortz '98 with a 250, and Tony Calandra '99 with a 252.

In the final team standings, the Naval academy finished 12 strokes behind the dominant Lehigh squad, with Bucknell, Army, Holy Cross, Colgate, and Lafayette rounding out the League scores.

For the fall season, Hartman leads the Bison in scoring with a 78.8 average, followed by Sun with a 79.6, and both Calandra and first-year Brad Borman tallying an average of 79.7.

There are quite a few worthy candidates for commissioner, including George Will, a true student of the game and a great spokesman as well; Tommy Lasorda, who would need medical clearance to take the stressful post; and Jim Bunning, who once pitched a perfect game and now pitches proposals in Congress.

The Alomar spitting incident has brought the need for better leadership in baseball back to the spotlight, and while the timing is not ideal, it still needs to be addressed. In the meantime, baseball fans can sit back an watch what should be an interesting set of league championship series, as two of the greatest shortstops of all time make what could be their last appearances in postseason play. It only happens once a year, so enjoy it.

Tennis splits weekend league matches

BY JARED SILLIKER
Bucknellian Staff Writer

In splitting two home matches over Parents Weekend, downing Holy Cross, 8-2, and falling to Army, 5-4, the Bucknell women's tennis team moved to 5-3 on the season, and for head coach Rose Ewan, things are looking up.

Up to the top of the Patriot League, that is.

Thomas Marotta—The Bucknellian
Katie Roland '99 and the Bison split two weekend matches.

With a 2-2 Patriot League mark, the Bucknell women are looking up at three teams in the standings—Lafayette, Army and Colgate.

Bucknell's two league losses have come at the hands of Lafayette and Army and both have been by one-match margins.

But with these close encounters with Army and Lafayette, and another match ahead against Colgate at home on Tuesday, Ewan is quite optimistic.

"We really have as much talent as those teams," Ewan said. "We are fairly young, though, but if we stay healthy and continue to play intelligently, we have a shot at beating Colgate, which would create quite a logjam at the top of the Patriot League."

The youth Ewan touched on is no joke, either. Ewan is currently starting four first years in the top six, including Laura Leslie at No. 1 singles. Blakely Lauria holds a 4-1 mark at No. 3/4 singles, Kristen Jones is 2-2 at No. 5 singles and Kerry Callaghan is 4-1 at No. 6 singles. Jones (with Leslie) and Callaghan (with Wendy Eason '98) also hold winning records at No. 2 and 3 doubles, respectively.

Both Lauria and Callaghan swept their matches this past weekend. Callaghan needed two tie-breakers to down Army's Elizabeth Scheron, while Lauria finished in straight sets in both matches.

"Blakely has been our most consistent performer, having moved up from No. 5 singles, where I thought she might play," noted Ewan. "And Kristen has progressed with each match she's played, mostly in getting over some nerves."

"All of the freshmen are getting stronger as we go. Moving to college tennis is just a big adjustment for them," added Ewan. "And the upperclassmen are playing well also and keeping spirits high, especially co-captains Rebecca Korb '97 and Sue Vincent '97."

The Bucknell women get a chance to avenge their close losses October 19-20, when they travel to Lehigh for the Patriot League Championships.

Club Sport Report: Ultimate Frisbee

Ultimate makes strides at sectionals

Mudsharks finish third in pool; advance to second day at Lehigh

BY E.J. CRAWFORD
Bucknellian Team Correspondent

This past weekend, as most students slept, the Mudsharks, the Bucknell men's Ultimate team, traveled to Lehigh for sectionals, which are held twice a year. The Mudsharks were grouped with four other teams in one of four five-team pools. The top finishers for each pool automatically qualify for regionals, and the teams that finish second and third in the pools compete for the four remaining spots to come out of the Pennsylvania/ Delaware section.

Despite the overlap of Parents Weekend, the Mudsharks were able to send what team captain Brain Gale '97 deemed as "a good, small, corps of dedicated players." In typical fashion the Mudsharks drew a first round bye, which mean they would be forced to play four games in a row, of which they would need two victories to make it to the second day.

The Mudsharks opened play against the UPenn Void, a team not renowned for their glowing spirit. However, the Mudsharks counter-acted the poor spirit of the Void by playing with twice their usual spirit, which, along with the sage advice of team mentor Yoda, boosted the Mudsharks out to an early 6-2 lead, and the squad went to halftime with a 7-4 lead. The Mudsharks opened the second half with the same momentum, as handlers Gale, Gregg Lithgow '99, and Dan Heckman '99 all handled the Void zone with patience, as well as precise passes which repeatedly found longs Jim Bush '98 and E.J. Crawford '99 in the end zone for scores.

Beetna Kim—The Bucknellian
Uppercalssmen like Ron Jacob '97 (above) have been crucial in the development of the younger ultimate players.

Although UPenn pulled the score within 11-8, Bucknell was able to hold on for a 13-9 victory. Despite their fine play, the highlight of the game was Sanatan Golden '99 winning an 11-man game of rock, paper, scissors, as he threw a rock to everyone else's scissors. Although still unconfirmed, the Mudshark team, along with any team that the Mudsharks have communicated with, believe this to be the first time one man has ever won a game of rock, paper, scissors ever.

Unfortunately, the thrill of Sanantan's glorious victory did not carry over, as the Mudsharks fell to two highly spirited club teams by the score of 13-6 and 13-8, respectively. Despite the losses, Gale was very happy with the overall play and effort of the team, summing up the effort by succinctly stating, "We rocked!"

The tough play of the Mudshark team paid off in the final game, as needing a win to advance to Sunday's play, the spirited Sharks used the speed of Steve Grimes '99, Drew Turner '99, and lone first-year Pete Wise, along with the precise cuts of sophomores Scott Diperna and Sheldon Wallbrown, to wear down the team of Mr. Yuk from Carnegie Mellon. The Bucknell squad jumped out to an early lead, and then cruised to a 13-5 victory in what sophomore handler Dan Heckman called "one of the best games we've played this year."

The win qualified the Mudsharks for Sunday's play, in which they took on a club team of alumni for Delaware. The Sharks came out strong, and were "in every single point," but in the end the experience of the Delaware squad won out, and the Mudsharks were denied their first trip to regionals in four years.

Overall, Gale seemed pleased with the showing of the squad, which did not win a single game in either of last year's sectionals, and credits the maturation of this year's large sophomore class for the big difference. "Overall, last year's freshman have come a really long way, and now truly lead this team. Last year we too often relied on one or two players to win the game, whereas this year we have much more of a team."

And hopefully, with the continued maturation of this year's sophomores, as well as the emergence of this year's freshman class, the Mudsharks will take quite a bite out of the competition in the Spring, as well as the Spring Sectionals.

Golfers finish third in league tournament

BY E.J. CRAWFORD
Bucknellian Staff Writer

The Bucknell men's golf team fired a three-day total of 954 to comfortably take third place at this year's Patriot League Championships. The Bison three day total trailed Lehigh, the League victor, by 19 strokes, but was 12 better than fourth place finisher Army.

The Bison were led by Josh Hartman '98, who shot a closing day 75 to lead the men's squad to its third place finish. Overall, Hartman shot a 235 for the three rounds, which led the Bison, and placed the junior fourth place overall in the individual championships.

Also weighing in with an impressive performance was Bryan Sun '99, who scored back-to back 77s to open the tournament, but faded to an 82 on the last day, and ended the tournament in a tie for fifth in the individual title hunt.

Todd Schneider '99 led the rest of Bucknell's golfers with a 243, followed by Mark McGinley '97 with a 245, Eric Shortz '98 with a 250, and Tony Calandra '99 with a 252.

In the final team standings, the Naval academy finished 12 strokes behind the dominant Lehigh squad, with Bucknell, Army, Holy Cross, Colgate, and Lafayette rounding out the League scores.

For the fall season, Hartman leads the Bison in scoring with a 78.8 average, followed by Sun with a 79.6, and both Calandra and first-year Brad Borman tallying an average of 79.7.

BY TRACY THIFFAULT
Bucknellian Staff Writer

Both the Democratic and Republican panels successfully defended their respective positions in the "Firing Line" debate last Saturday, despite previous expectations of the Republicans winning by a landslide.

It was a proud moment for the University and an excellent opportunity for the community to gain firsthand knowledge of the upcoming presidential election.

Senator Kay Bailey Hutchinson, R-Texas, Speaker of the House Newt Gingrich, R-GA, and Representative Rob Andrews, D-NJ, were among the panelists who fought it out, discussing topics ranging from education to abortion.

The panelists formed persuasive arguments which produced an important discussion influential to voters.

Hutchinson's points were clear; the audience was silent whenever she spoke. She commented on the need to "bring back the spirit of entrepreneurship" and expressed her view that the subject of abortion cannot be fashioned in the government arena.

Michael Kinsley, the moderator of the debate, added a bit of humor when he began the debate with the top 10 reasons why the "Firing Line" debate was better than the Presidential debate last week. Gingrich, who was born in nearby Harrisburg, PA, also received laughs when he brought out a large, white, ice bucket and compared it to the United States.

Other speakers included former Democratic Presidential candidate George McGovern, former Secretary of State Henry

Sex offense dilemma evaluated as campus unites against assaults

"Right-to-Know" pamphlet publishes substantiated reports

BY KATHRYN ARDINGER
Bucknellian Staff Writer

NEWS ANALYSIS

In light of recent reports, students, faculty and staff are taking part in condemning sexual assault on campus by promoting campus awareness and taking action.

Despite these activities, no one knows whether the recent surge in the reports of sexual assault reflects an increase in reporting or an increase in assaults.

A 1988 national study found that "one in four college women will have experienced a rape or an attempted rape during their college years," said Janice Butler, director of the Women's Resource Center.

"I think that Bucknell's situation is comparable to national figures when we look at senior survey data and look at the number of women who say that they have felt pressured or coerced into having sex when they didn't really want to," Butler said.

Graduating seniors complete a survey in which one of the questions addresses personal experience with sexual assault.

To match the national figures, approximately 74 women in the class of 1996 would have been assaulted at some time during their tenure at Bucknell.

The "Your Right-to-Know" brochure distributed in September reported only three sexual offenses, one forcible and two non-forcible, for the 1995 calendar year.

While this may be a low statistic and positive for the campus, the number may be misleading. The University is required by Public Law #101-542, the College and University Student Right-to-Know Act, to report crime statistics, campus security and law enforcement policies and reporting procedures to the United States Department of Education and to the University community.

While the University complies with this Act, students, faculty and staff may not realize what the statistic represents and how it is computed. Promoting awareness and educating the campus community includes understanding what "three sex offenses" for the 1995 calendar year actually means.

This statistic does not necessarily mean that only three sex offenses were reported last year. It means that the Sexual Assault Reporting Group met at the end of the academic year, reviewed the reports and then determined which instances met certain predetermined criteria and could be carried as statistics.

The Sexual Assault Reporting group is comprised of Kari Conrad, director of housing and residential life, who serves as the sexual assault judicial administrator, Richard Chapman, dean of students, Gerald Commerford, associate dean of students, Elias Abelson, the University counsel, Vincent DeCerchio, director of Public Safety and Butler.

Conrad said that reports are sent to her by any person who has received "any type of disclosure from students reporting sexual assault." Conrad explained that almost any report that can be substantiated is included in the statistic stated in "Your Right-To-Know."

When a sexual assault is disclosed to a faculty member, coach or resident assistant, that professional staff member is obligated to fill out a confidential, anonymous report form if the student gives him/her permission to do so.

"One of the things that we did last year was institute this way of keeping track because we knew that many students were reluctant to use the Judicial System or to file a grievance, and so this way we can get a more accurate picture of what is happening, whether or not they follow through with the Judicial System," Butler said.

The Sexual Assault Reporting group meets at the end of every academic year and reviews the reports that Conrad has received. Conrad said that the group asks whether it is likely that this incident actually occurred when looking at each report.

Abelson explained that "we are not making any kind of judgment except whether the information we have is sufficient to meet the standard imposed on us for reporting."

It is the responsibility of the Sexual Assault Reporting group to determine which instances meet the criteria for sexual assault according to the University's definition.

An important purpose of the

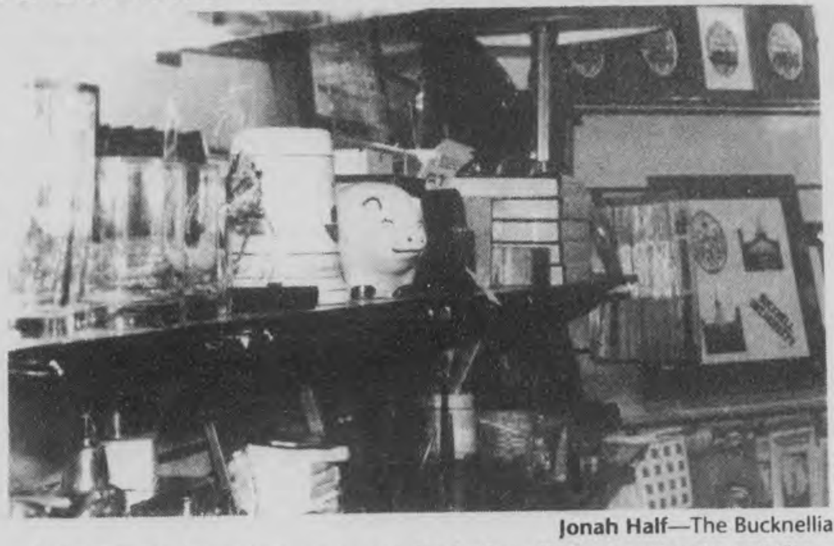
Bookstore draws record $4.5 million in sales

BY BETH MARTIN
Bucknellian Staff Writer



Jonah Half—The Bucknellian

Although text books seem overpriced, Dan Roberts, director of the Bookstore, said profits come from sales of novelty items.

The University Bookstore had record sales during the 1995-1996 fiscal year amounting to almost $4.5 million. It's net profit of just under $300,000 was also record-setting.

Dan Roberts, director of the Bookstore said, although sales are "not significantly higher than last year," the small increase can be attributed to the bookstore's addition of computer hardware sales.

Roberts said, "Frankly, we do quite well." He pointed out that compared to other universities the bookstore does not do well in sales per bookstore employee.

This ratio is balanced by a successful sales per student rate. The average sales per full-time student of fifty-five similar university bookstores was $528 last year. Bucknell averaged $1360.

Roberts said these rates indicate that "better customer services result in students spending more money."

The bookstore is not a non-profit enterprise. It is an auxiliary agency of the University, which is a not-for-profit institution. Roberts said any profit made by the bookstore will be put into the general University fund. He said it is "essentially a case of the University taking money out of one pocket and putting it into another."

Michael Moohr, professor of economics, said that the funds "go right back into the University for things such as varsity and club sports, and faculty salaries."

Roberts said it is important for students to realize that "there is not a lot of net profit in textbook sales." Though textbooks are generally marked up 25 percent from their retail price, approximately 23.5 percent of that is spent in running the department. The bookstore does not usually receive

Students celebrate with service

BY KATHRYN WRIGHTSON
Bucknellian Staff Writer

Community service by Bucknellians on campus and in the Lewisburg community has been the focus this week as part of the University's Sesquicentennial Celebration.

On Monday, students cleaned areas on campus, including the first-year quad, the academic quad and Swartz Field. Thirty-four teams signed up to participate in a basketball contest on Tuesday, raising $850 to benefit the Red Cross and Susquehanna Valley Women in Transition (SVWIT).

Yesterday, representatives from local agencies met with students in the Langone Center Mall to discuss what they do and provide opportunities for students to become involved with their organizations.

Auto incidents harm cars, injure student

BY KARIN DAVIDSON
Bucknellian Staff Writer

Beetna Kim—The Bucknellian

This car owned by Becky Snover '97, along with five others ,were hit Sunday night. The driver responsible for the accidents was arrested.

Homecoming has come and gone and has left damaged vehicles, an injured student, and cause for concern in its wake.

An inebriated student driving a motor vehicle damaged six cars, not including his own as he drove down Seventh Street towards Market Street on Sunday morning at approximately 2:15, said Becky Snover '97 whose car was involved in the incident.

Though not at the scene at the time, Snover heard reports from friends which the Lewisburg Police confirmed for her. Thomas Martin '97 is allegedly responsible.

According to Snover, Martin had consumed alcohol before driving his vehicle down Seventh Street where he first hit a car on the right side of the road before swerving to the left, hitting another car, and returning the right side and hitting Snover's car. Witnesses were at the scene, and the police were notified.

At press time the police report was not yet available, but Snover said charges are being filed and the proper steps are being taken.

A female University student, whose name has not been released, was struck by a motor vehicle Sunday at approximately 7 p.m. according to a Public Safety report.

The accident occurred on Sev-

Kissinger, Democrat political consultant Bob Shrum, historian Arthur M. Schlesinger Jr., and William F. Buckley Jr., founder of "Firing Line" and "National Review".

President William D. Adams gave a short speech introducing the debate. He said he hoped that the debate would help students, faculty, alumni and other members of the community be better informed of the election.

The debate, which was aired live on Public Broadcasting System from the Weis Center, was another event in celebration of the University's Sesquincentennial year.

Twice a year, PBS runs a debate on a political topic connected to their show, "Firing Line." Because of the University's celebrations and the fact that Pennsylvania is a key state in the election, the debate was filmed here.

Alumnus Benjamin Eliot and members of the sesquicentennial steering committee, including, Sharon Poff, director of public relations, and Nancy Cook, Weis Center operations manager, were responsible for arranging the event.

Although the debate was well formatted, it failed to reach consensus on the topic "Resolved: The Republican Party is Better Able to Run the Country for the Next Four Years Than the Democratic Party."

When Shrum asked the Republicans why they do not favor a straightforward term limits bill, they responded by stating that they did and that the Democrats opposed it. They commented that the subject of term limits was a "cute" debate topic but nothing substantial.

Because of responses such as this, the panelists were able to reach few conclusions.

Students responded well to the debate. Douglas Welty '00 said "I thought both sides did very well. However, the debate really didn't affect my decision; I would have voted the same if I had watched the debate or not."

SERVICE

From page 1

Bison Volunteers and the philanthropy chairs of Greek organizations were available today in the Mall to educate Bucknellians about the opportunities they have for community involvement. The Bucknell Service Team, who organizes community service for all non-Greek groups, will be in the Mall on Friday.

The week concludes with Greek Service Make a Difference Day on Saturday, where students will clean, paint and perform odd jobs for people in the Lewisburg community, and on Sunday with a lecture delivered by Mary Louise Schweikert. Schweikert, head of Fostering Grandparents for the Lewisburg area, will speak on the importance of giving and how giving has changed her life.

The week was organized by members of the Bucknell Service Team, Susie Shindler '97 and Tracy Griffen '97, and their committee: Libby Mitchell '98, Kelly Bogdan '98, Shelly Dabney GR, and Carolyn Mauer '97.

Shindler said, "I think we are very privileged in our resources throughout the campus and outside the campus community." Citing the activities that have been held this week, Shindler said, "What we are doing this week makes it easy for students to get involved."

"Being that we are so privileged it is an honor and a responsibility to give back what we've been given ourselves," Shindler said of the importance of community service.

Associate Dean Ruth Burnham, community service advisor and member of the Sesquicentennial Steering Committee, said, "Bucknellians have a history of involvement in community service from the earliest days of the University. The University mentions civic involvement in its mission statement, so it was very important that service was included in the Sesquicentennial observation."

The University mission statement states, "Bucknell expects its students to be concerned with two closely related types of development: that of the productive citizen and that of the person working toward intellectual maturity and self-awareness."

Referring to the campus cleanup Burnham said, "Several aspects are proving to be so popular that we may make them annual events."

Burnham recognized the efforts of students in planning and executing this week's events, "This community service week is a student effort. The students have done a tremendous job and they deserve a lot of credit," she said.

INCIDENTS

From page 1

enth Street and Moore Avenue behind the crosswalk at the downhill side of the Langone Center.

The victim stated at the time she had severe pain in her right arm and she was transported to Evangelical Hospital by ambulance.

A rag, which was stuffed into a gas tank and lit, was the cause of a car fire Sunday morning at approximately 3:20 a.m.

Public Safety responded to the fire in the lower Harris parking lot and found junior Julie Barbone's 1986 Saab 900 on fire. The W. M. Cameron Fire Company also responded, although the fire was put out with fire extinguishers.

When the Public Safety officers discovered the cause of the fire, they asked the Lewisburg Police to respond.

A public safety report said Barbone was asked if she had anyone to suspect of this act and she responded in the negative.

"I think this a really sick thing and I can't believe something like this would happen at Bucknell. It's really disturbing," Barbone said.

She also confirmed that the Lewisburg police are investigating the case.

ASSAULTS

From page 1

group is to come together and make sure that cases are not being counted more than once, Conrad added.

Some criteria the group uses to determine what reports will be used in the statistics are: whether or not Public Safety or the police were able verify that the incident occurred, whether they were able to conduct some sort of investigation, and whether there is sufficient information to lead the group to reasonably conclude that the incident most probably occurred, DeCerchio said.

It may be helpful for students to have the statistics presented in more detail. Butler suggests that the University report the statistic required by the College and University Student Right-to-Know Act, as well as report additional statistics about judicial board outcomes, which is the practice at some other universities and colleges.

"I have been for a long time an advocate of having outcomes of these situations reported because I don't think it is as helpful if you get a "Your Right-To-Know" statistic that says three assaults happened on campus, but you don't know what the outcome was," Butler said.

When asked about Butler's suggestion Conrad said "I would definitely support that."

Commerford said, "This is what the government requires us to do. The other information is certainly something to consider."

The campus community has rallied together by performing a variety of actions to put a halt to sexual assault on this campus, including the faculty petition, the student rally last Friday, and the creation of an action group comprised of students, faculty and staff.

> ***"We need to get at some of the less extreme forms of sexism and gender bias."***
>
> *—Janice Butler, director of Woman's Resource Center*

DeCerchio suggested that the correct way to tackle this problem is by reporting every sex offense situation to the police. The only way that sexual assault is going to stop is by sending out the message to the perpetrator that every situation will be investigated, he said.

Butler suggested that part of the solution needs to come from a change in the climate of the community. "We need to get at some of the less extreme forms of sexism and gender bias," she said.

PUBLIC SAFETY LOG

October 16, 1996

TRUCK FIRE AND HAZMAT SPILL — A Public Safety Officer responded to the Physical Plant for a contractor's truck which had caught fire due to a hydraulic fluid leak. The fire was extinguished and the spill was contained.

October 17, 1996

INFORMATION — A Lewisburg Police Officer reported to Public Safety that he stopped a University student carrying a real estate sign. The student was cited for underage drinking after admitting to consuming beer.

CRIMINAL MISCHIEF — A Bucknell West resident reported to a Public Safety Officer that unknown person(s) scratched the passenger side of his vehicle. Investigation is continuing.

INFORMATION/CONFISCATED PAINT BALL GUN — A Public Safety Officer confiscated a paintball gun from a University student at Sigma Alpha Epsilon Fraternity.

INFORMATION — A visitor to the Lewisburg High School football game agreed to leave the stadium after reportedly entering into a verbal altercation with another fan.

October 18, 1996

INFORMATION/ASSIST LEWISBURG POLICE DEPARTMENT — A University student was cited by a Lewisburg Police officer for attempting to enter the Bull Run Inn with false identification.

INFORMATION/MISSING BOOKBAG — A visitor reported to a Public Safety Officer a missing backpack taken from the exterior of Tustin Gym during a dance class. The backpack was located and returned to the visitor.

INFORMATION/POSSIBLE ACT 64 VIOLATION — A Public Safety Officer was called to Larison Hall for the odor of marijuana. Four University students were questioned and a visual search was conducted with negative results.

INFORMATION/ASSIST LEWISBURG POLICE DEPARTMENT — A University alumnus reported to a Public Safety Officer that his vehicle had been hit in front of Sigma Alpha Epsilon Fraternity by a vehicle that left the scene. The operators of both vehicles were located and the matter referred to Lewisburg Police Department.

INFORMATION/LIGHT POLE FIRE — A Public Safety Officer responded to an extinguished fire in a light at the front of Vedder Hall. A technician was called to repair the light.

October 19, 1996

INFORMATION/ODOR OF SMOKE — A Public Safety Officer responded to Smith Hall where a partially burned ear of corn was located in the stairwell. The investigation is continuing.

INFORMATION — A Public Safety Officer responded to the Langone Center for a vehicle off an embankment. Bucks Sunoco was contacted to place the vehicle in service.

LARCENY — A University student reported to a Public Safety Officer that unknown person(s) had stolen a bicycle from the bike rack behind Carey House. The investigation is continuing.

THEFT — A University student reported to a Public Safety Officer that unknown person(s) had stolen a wiper blade and student decal from a vehicle parked on Fraternity Road. The investigation is continuing.

October 20, 1996

ALCOHOL/UNDERAGE CONSUMPTION — A University student was cited outside Sigma Chi for underage consumption of beer. The student refused medical treatment for an abrasion.

MEDICAL AIDED/STUDENT HEATH SERVICE TRANSPORT TO EVANGELICAL HOSPITAL — A University student was transported to Evangelical Hospital Emergency Room to be treated for abdominal pains.

MEDICAL AIDED/STUDENT HEALTH SERVICE TRANSPORT — A student requested transportation to Evangelical Hospital for treatment of an abrasion and chipped tooth.

CAR FIRE/SUSPECTED ARSON — A Public Safety Officer responded to Lower Harris Parking Lot to extinguish a suspicious vehicle fire. The investigation is continuing.

INFORMATION — A Public Safety Officer responded to Sigma Chi Fraternity and requested a member to assist in locating a visitor who was awaiting a parent for transportation home.

INFORMATION/ASSIST LEWISBURG POLICE DEPARTMENT — A Public Safety Officer assisted in providing information to Lewisburg Police regarding a University student vehicle in a hit and run accident on S. 7th St.

INFORMATION/MOTOR VEHICLE/PEDESTRIAN ACCIDENT — A Public Safety Officer, Lewisburg Police and East Buffalo Township Police responded to 7th and Walker St.. for a University student struck by a vehicle operated by another University student. The injured student was transported to Evangelical Hospital for treatment and the investigation is continuing.

INFORMATION/SOLICITATION — A Public Safety Officer responded to the Langone Center for an individual selling necklaces and belts. The solicitor was informed of University policy and left the campus.

October 21, 1996

INFORMATION/SUSPICIOUS PERSON —A Public Safety Officer responded to Trax Hall for the report of a suspicious person selling magazines. The individual was later located, advised of University policy and left the campus.

VEHICLE ACCIDENT — A Public Safety Officer and East Buffalo Township Police responded to the entrance of Bucknell West for a vehicle accident involving vehicles operated by two University students.

October 22, 1996

DISORDERLY CONDUCT — A University student reported to a Public Safety Officer that while he was walking from the Bertrand Library to Swartz Hall he was verbally harassed and shoved/pushed by an unknown male. The investigation is continuing.

INFORMATION /BENT SPRINKLER PIPE — A Public Safety Officer responded to Phi Kappa Psi for a sprinkler pipe which was bent during a registered party held at the Fraternity, which will provide payment for the repairs.

Courtesy of the Department of Public Safety

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

HAPPY JACK WRITES FOR NEWS, WHY DON'T YOU?

News Briefs

National News

Simpson was the killer, attorney says in opening statement

SANTA MONICA, California — A plaintiff's attorney opened the civil trial against O.J. Simpson by telling the jury that Ron Goldman "died with his eyes open" and saw the former football star just before his life ended.

"In his last minutes, with his eyes open, he saw who killed Nicole, so he had to die," said Daniel Petrocelli, an attorney for Goldman's family. "With his eyes open he saw Orenthal James Simpson."

Goldman died solely because he could identify the killer of Simpson's ex-wife, Nicole Brown Simpson, Petrocelli said after detailing what he said was a timeline of the events of June 12, 1994, when Ms. Simpson and her friend Goldman were murdered outside her Brentwood home.

FBI official charged with obstruction in Ruby Ridge case

WASHINGTON — The FBI admits making serious mistakes at its 1992 siege of Randy Weaver's mountain cabin at Ruby Ridge, Idaho. But federal authorities say E. Michael Kahoe — a high-ranking bureau manager — broke the law.

Kahoe, former chief of the Violent Crimes and Major Offenders Section at FBI headquarters in Washington, D.C., was charged Tuesday with obstruction of justice for concealing a bureau critique of the siege, making it appear as though the report never existed.

The charge carries a penalty of up to 10 years in prison and a $250,000 fine.

The federal complaint, known as a felony information, says Kahoe concealed and destroyed an FBI headquarters document "that was sought by prosecutors in preparation for the murder trial pertaining to the Ruby Ridge incident."

Wildfires: Strong winds retreat but will return

SOUTHERN CALIFORNIA — With the prospect that strong winds would return, thousands of firefighters raced Wednesday to contain wildfires that have burned at least 35,000 acres, destroyed more than 100 homes and injured 12 of their colleagues, including one who was in critical condition.

The flames were fanned by hot, dry Santa Ana winds that gusted up to 71 mph earlier in the week and were expected to return by Saturday, Deputy Los Angeles County Fire Chief Darrell Higuchi told CNN during a live interview.

U.S. Interior Secretary Bruce Babbitt notes the vulnerability of the fire zone. Higuchi said it was critical to reach 100 percent containment by Saturday of a wildfire northwest of Los Angeles in Malibu. As of yesterday morning, the fire was 30 percent contained, Higuchi said.

Oklahoma City votes to close the street in front of bomb site

OKLAHOMA CITY, Oklahoma — The Oklahoma City Council voted unanimously Tuesday to permanently close the street in front of the former site of the Alfred P. Murrah Federal Building, where 168 people died in a 1995 bombing.

Area merchants objected to the proposal, saying closing the street would hurt their business.

Families of bombing victims pressured the council to include the one-block stretch of Fifth Street in a planned memorial to those killed in the explosion.

"I'm in tears with joy that we had a nine-nothing vote," said Bud Welch, whose daughter Julie died in the blast. "It's really important that this community be completely unified."

The street has been closed on a temporary basis since the explosion ripped the building apart on April 19. In addition to the fatalities, more than 500 people were injured in the blast. Timothy McVeigh and Terry Nichols are charged in the bombing and await trial in Denver, Colorado.

World News

Palestinians to Chirac: 'Vive la France'

RAMALLAH, West Bank — French President Jacques Chirac received a hero's welcome Wednesday in the Palestinian territories where he made the first speech to the Palestinian legislature by a head of state.

He urged Palestinian leaders to renounce violence and respect democratic principles as the best means for achieving statehood. Chirac also criticized Israel, where he had spent the previous two days, and called on Prime Minister Benjamin Netanyahu to live up to agreements signed by the previous government.

Thousands of Palestinians, including flag-waving school children, lined the streets of self-ruled Ramallah to welcome Chirac, a vocal advocate of an independent Palestinian state. Many chanted "Vive la France" and "Vive la Palestine."

Later, he received an equally warm welcome in Gaza. Chirac flew on to Amman, Jordan, where he was met by King Hussein. The French leader will go on to Lebanon and Egypt later this week.

Afghan foes battle for heights north of Kabul

KABUL, Afghanistan — Rival Afghan militia pounded each other with artillery, mortar and rocket fire yesterday, vying for heights overlooking one of two roads leading into Taliban-held Kabul, witnesses and rival commanders said.

Forces of the ousted Burhanuddin Rabbani government said they launched a major assault to capture the De Sabz pass leading into northeast Kabul, towards which they have been moving back after pulling out last month when the Taliban attacked.

"We are progressing. We have taken control of the high positions (on De Sabz pass) and we will soon clear the Taliban's remaining positions," Mehrabodin Masstan, spokesman for ousted government military chief Ahmed Shah Massoud, told reporters behind Massoud lines.

However, by late-afternoon there were no signs of a major advance by Massoud or Abdul Rashid Dostum, whose forces had arrived last week, on the eastern side of the plain girded by craggy hills leading to Kabul.

Brundtland to step down as Norway's prime minister

OSLO, Norway — Norwegian Prime Minister Gro Harlem Brundtland, who has dominated her country's politics for more than 15 years, surprised Parliament Wednesday by announcing her resignation, effective tomorrow.

Brundtland, 57, who said she would recommend Labor Party protege Thorbjoern Jagland, 45, as her successor, did not give a reason for stepping down. But she has been mentioned as a possible candidate for the post of United Nations secretary-general.

The decision to resign was made a year ago, she said during a question-and-answer session in Parliament. Brundtland said she decided to leave office now to make it clear to voters who will be Labor's prime minister candidate in national elections to be held in November 1997.

It was the timing of the announcement — not the resignation itself — that came as a surprise. Brundtland had already said she wanted to step down, but the announcement was not expected so soon

Prisoners compete for queen of the jailhouse

MEXICO CITY — Beauty contests are pretty much the same in any part of the world, but a recent winner in a Mexico City pageant had unusual vital statistics for a beauty queen. Miriam Flores is tall, brunette, and is serving five years, nine months for robbery.

All the contestants for "Miss Mexico Jailhouse," held last Sunday, were prisoners, in what authorities think was the first jailhouse beauty contest in history. Flores beat 13 other competitors on the catwalk, in evening wear, and in the spotlight of a general knowledge quiz.

Contestants and spectators alike welcomed the break from the everyday routine of prison life. "I feel great, this is a distraction in middle of the monotony," said Lucia, one of the women who attended the event.

National and World News Briefs compiled by Anna Foca from the CNN Interactive Website

BOOKSTORE

From page 1

any discount for buying textbooks in bulk.

Moohr also pointed out that the bookstore "does not make much money on textbooks," and acquires most of its revenue from sales of nonessentials, such as clothing and gift items. He added, "Many of these nonessential are purchased by non-Bucknellians, such as people passing through on tours or alumni."

Roberts also discussed the sale of used textbooks. "The used book market has nothing to do with the original price of the book. In general, we buy it for half of the current retail price, and sell it for 75 percent of that price."

Mike Walters '00 said that he was not surprised at the high cost of textbooks, and doesn't consider the bookstore to be unfair in its prices. "I was at the University of Pennsylvania last weekend, and the textbooks there are also really expensive."

The bookstore's various expenses include employee salaries, building rental, postage, depreciation, and Visa/Mastercard fees.

"Employees of the University, who are defined as eligible by personnel, receive a 15 percent discount on most items sold in the store," Roberts said. The discount does not include computers or class rings. Departments receive a 25 percent discount on office supplies.

Roberts noted that Bucknell "students should praise themselves" for helping to keep bookstore prices down, pointing to the low rate of "merchandise shortage," or shoplifting. The average merchandise shortage for comparable university bookstores was 1.2 percent of sales, and Bucknell's was only .4 percent.

Roberts added that only one backpack has been lost in the bookstore during his five years there. Thus, he sees no need to install expensive electronic devices to monitor shoplifters.

Some students and faculty have expressed concerns that the bookstore has strayed from its original purpose in providing educational aids. They point to things, such as the elaborate gift and jewelry collections that are displayed at the front of the bookstore. The books occupy less floor space than nonessential items, and are located at the back of the store.

Pallavi Rayan '99 said, "I feel that the bookstore has un–useful articles like its potpourri, candles, and dishtowels. How many people really buy holiday items there without a Bucknell insignia? They should take that stuff away."

However, other students find that these items are useful. One student, who did not wish to be named, said "I like the greeting cards and gifts. It's a convenience, plus the bill goes home to my parents." She added, "When I was a first-year student without a car it was hard to get shampoo and cards. I really appreciated the bookstore then."

Committee to choose director of Greek Affairs

BY ERIC BLOEM

Bucknellian Staff Writer

Within the next two months expect a new face to appear as part of University administration. A committee has been searching for a candidate to fill the position of director of Greek Affairs. This position was left vacant last year when Edward Dadez left the University.

Myra Legg has been filling the postion as the acting director of Greek Affairs

Joyce Bylander, associate dean of students and a member of the search committee, said there have been many applicants for the position. That number has been narrowed down to four individuals, two men and two women, said Bylander. "Most people have had some connection with a local or national fraternity or sorority."

All four of the possible applicants have visited campus for additional interviews. Bylander further stated that the committee is "hoping, within the next month to bring back one or two of the applicants," for third interviews.

There are many criterion which the committee must take into consideration when appointing the new director of Greek Affairs. Bylander said that there were certain requirements such as education and number of years experience, but most importantly, they are looking for "an advocate for the [Greek] system and advocate for Bucknell."

The role of director of Greek Affairs will basically remain the same, said Bylander. There will be more of a concentration on community building. This could be facilitated in a number a manners. One way is to integrate the many offices on campus with Greek Affairs, such as the Women's Resource Center and multi-cultural organizations.

In addition, Bylander said that recently, the Greek community and the University community have drifted apart. One of the goals for the new director is to bring these two communities closer together. She stated that there is a "tendency for students to drift away from their role as a university student" when they enter a fraternity or sorority. Bylander stressed that this "does not put us in opposition with one another."

The new director must "help fraternities and sororities to reach the full potential of what they say in their missions and to be the kind of organization they want to be," said Bylander.

Stephen Stamos, the chair of the committee, declined to comment on the difficult procedure of choosing a new director. He said that he did not want to create any type of expectation on behalf of the committee at such an early stage in the game.

Bylander said that, "It would be an exciting goal to have someone on campus at the beginning of next semester."

Concerns raised about "SchoolSucks" website

Students can find research papers online

BY TARA DRISCOLL

Bucknellian Staff Writer

The week of test cramming and up-all-night paper writing before fall break could have been much less harsh had University students known about a new Web site where the motto "Download your workload" has become a cliche.

The Web site, called "School Sucks," located at http:www.schoolsucks.com, was created by Kenneth A. Sahr, a student at Florida International University. It was created as a free reference for students to use to see the papers of students across the globe on subjects like English and science. Sahr hopes to eventually include thousands of students research papers in the Web library.

The site is divided into six categories: the arts, history, business, English, law, and science. Within each category exists separate folders that break down into more specific topics. At present, some categories contain as few as five papers, or as many as 14.

An invitation for plagiarism and dishonesty could be tempting. However, Richard Waller, associate professor of history, is not concerned. "These things are quite pointless because in my department we don't set the kind of essays that can be taken from the Web site. Yes, plagiarism does occur at this university, but if you're going to learn anything, it is not going to be from random students papers across the nation."

"Students come here to be taught by professors. It is dangerous for those who use this—they lose, but on campus, there is no need to panic," Waller said.

Professors have access to the site as well. Waller says that students are kidding themselves if they think faculty will not recognize a plagiarized paper.

Even as a reference, students must recognize that what they are accessing is, in many cases, amateur material, or even very grossly introductory level work. A paper from the site on John F. Kennedy, for example, begins with a weak introduction, and barely contains a thesis statement. On the other hand, an analysis of Robert Frost's poem is well-written and insightful, worth looking at for both understanding and interpretation.

University students would find little use for the substandard material; however, the site itself is fairly new, and given time, the potential for strong references is a possibility.

Sahr is aware that some of the papers featured are, "less than satisfactory" works. But in a letter at the Web site, he contends, "that the papers featured are a cross reference of the level of students across the globe." What exists is a library of imperfections, one in which access to model material is not always received.

Caroline Garrett '00 said, "I don't think too many people know about this Web site. I think a certain part of the Bucknell community would use this, not to say strictly for plagiarism, but also as a reference."

Garrett, like many other students on campus, expressed no desire to view the material.

Brian Baxter '00 said that he does not doubt students have the potential to use the material in a negative way. Although he is not interested in the resource, he said that some people will give into the easy access. "There are kids who buy texts some places, why wouldn't they do it for free?"

This is what has some professors worried. Diane Lowenthal, associate professor of political science, is concerned, not with the fact that the texts are available, but that students who use the material as a resource will learn in a somewhat skewed way. "Most of the material in the papers really isn't that useful," Lowenthal said. "There's definitely a more reliable source out there, but if students prefer to use what they find at this site, they must cite the source. This is a problem only if they do not. I would hope that students could find a better source."

Janice Buechler '97 offered a suggestion to Sahr's Web site. "I think it would be safer if the site was a place where students could leave the ideas and not an essay that could just be printed out. Ideas would promote research, and that is all what is necessary to really gain from the college experience."

FIRING LINE

From page 1

Kissinger, Democrat political consultant Bob Shrum, historian Arthur M. Schlesinger Jr., and William F. Buckley Jr., founder of "Firing Line" and "National Review".

President William D. Adams gave a short speech introducing the debate. He said he hoped that the debate would help students, faculty, alumni and other members of the community be better informed of the election.

The debate, which was aired live on Public Broadcasting System from the Weis Center, was another event in celebration of the University's Sesquincentennial year.

Twice a year, PBS runs a debate on a political topic connected to their show, "Firing Line." Because of the University's celebrations and the fact that Pennsylvania is a key state in the election, the debate was filmed here.

Alumnus Benjamin Eliot and members of the sesquicentennial steering committee, including, Sharon Poff, director of public relations, and Nancy Cook, Weis Center operations manager, were responsible for arranging the event.

Although the debate was well formatted, it failed to reach consensus on the topic "Resolved: The Republican Party is Better Able to Run the Country for the Next Four Years Than the Democratic Party."

When Shrum asked the Republicans why they do not favor a straightforward term limits bill, they responded by stating that they did and that the Democrats opposed it. They commented that the subject of term limits was a "cute" debate topic but nothing substantial.

Because of responses such as this, the panelists were able to reach few conclusions.

Students responded well to the debate. Douglas Welty '00 said "I thought both sides did very well. However, the debate really didn't affect my decision; I would have voted the same if I had watched the debate or not."

SERVICE

From page 1

Bison Volunteers and the philanthropy chairs of Greek organizations were available today in the Mall to educate Bucknellians about the opportunities they have for community involvement. The Bucknell Service Team, who organizes community service for all non-Greek groups, will be in the Mall on Friday.

The week concludes with Greek Service Make a Difference Day on Saturday, where students will clean, paint and perform odd jobs for people in the Lewisburg community, and on Sunday with a lecture delivered by Mary Louise Schweikert. Schweikert, head of Fostering Grandparents for the Lewisburg area, will speak on the importance of giving and how giving has changed her life.

The week was organized by members of the Bucknell Service Team, Susie Shindler '97 and Tracy Griffen '97, and their committee: Libby Mitchell '98, Kelly Bogdan '98, Shelly Dabney GR, and Carolyn Mauer '97.

Shindler said, "I think we are very privileged in our resources throughout the campus and outside the campus community." Citing the activities that have been held this week, Shindler said, "What we are doing this week makes it easy for students to get involved."

"Being that we are so privileged it is an honor and a responsibility to give back what we've been given ourselves," Shindler said of the importance of community service.

Associate Dean Ruth Burnham, community service advisor and member of the Sesquicentennial Steering Committee, said, "Bucknellians have a history of involvement in community service from the earliest days of the University. The University mentions civic involvement in its mission statement, so it was very important that service was included in the Sesquicentennial observation."

The University mission statement states, "Bucknell expects its students to be concerned with two closely related types of development: that of the productive citizen and that of the person working toward intellectual maturity and self-awareness."

Referring to the campus cleanup Burnham said, "Several aspects are proving to be so popular that we may make them annual events."

Burnham recognized the efforts of students in planning and executing this week's events, "This community service week is a student effort. The students have done a tremendous job and they deserve a lot of credit," she said.

INFORMATION — A visitor to the Lewisburg High School football game agreed to leave the stadium after reportedly entering into a verbal altercation with another fan.

October 18, 1996

INFORMATION/ASSIST LEWISBURG POLICE DEPARTMENT — A University student was cited by a Lewisburg Police officer for attempting to enter the Bull Run Inn with false identification.

INFORMATION/MISSING BOOKBAG — A visitor reported to a Public Safety Officer a missing backpack taken from the exterior of Tustin Gym during a dance class. The backpack was located and returned to the visitor.

INFORMATION/POSSIBLE ACT 64 VIOLATION — A Public Safety Officer was called to Larison Hall for the odor of marijuana. Four University students were questioned and a visual search was conducted with negative results.

INFORMATION/ASSIST LEWISBURG POLICE DEPARTMENT — A University alumnus reported to a Public Safety Officer that his vehicle had been hit in front of Sigma Alpha Epsilon Fraternity by a vehicle that left the scene. The operators of both vehicles were located and the matter referred to Lewisburg Police Department.

INFORMATION/LIGHT POLE FIRE — A Public Safety Officer responded to an extinguished fire in a light at the front of Vedder Hall. A technician was called to repair the light.

October 19, 1996

INFORMATION/ODOR OF SMOKE — A Public Safety Officer responded to Smith Hall where a partially burned ear of corn was located in the stairwell. The investigation is continuing.

INFORMATION — A Public Safety Officer responded to the Langone Center for a vehicle off an embankment. Bucks Sunoco was contacted to place the vehicle in service.

LARCENY — A University student reported to a Public Safety Officer that unknown person(s) had stolen a bicycle from the bike rack behind Carey House. The investigation is continuing.

THEFT — A University student reported to a Public Safety Officer that unknown person(s) had stolen a wiper blade and student decal from a vehicle parked on Fraternity Road. The investigation is continuing.

October 20, 1996

ALCOHOL/UNDERAGE CONSUMPTION — A University student was cited outside Sigma Chi for underage consumption of beer. The student refused medical treatment for an abrasion.

MEDICAL AIDED/STUDENT HEATH SERVICE TRANSPORT TO EVANGELICAL HOSPITAL — A University student was transported to Evangelical Hospital Emergency Room to be treated for abdominal pains.

MEDICAL AIDED/STUDENT HEALTH SERVICE TRANSPORT — A student requested transportation to Evangelical Hospital for treatment of an abrasion and chipped tooth.

CAR FIRE/SUSPECTED ARSON — A Public Safety Officer responded to Lower Harris Parking Lot to extinguish a suspicious vehicle fire. The investigation is continuing.

INFORMATION — A Public Safety Officer responded to Sigma Chi Fraternity and requested a member to assist in locating a visitor who was awaiting a parent for transportation home.

INFORMATION/ASSIST LEWISBURG POLICE DEPARTMENT — A Public Safety Officer assisted in providing information to Lewisburg Police regarding a University student vehicle in a hit and run accident on S. 7th St.

INFORMATION/MOTOR VEHICLE/PEDESTRIAN ACCIDENT — A Public Safety Officer, Lewisburg Police and East Buffalo Township Police responded to 7th and Walker St.. for a University student struck by a vehicle operated by another University student. The injured student was transported to Evangelical Hospital for treatment and the investigation is continuing.

INFORMATION/SOLICITATION — A Public Safety Officer responded to the Langone Center for an individual selling necklaces and belts. The solicitor was informed of University policy and left the campus.

October 21, 1996

INFORMATION/SUSPICIOUS PERSON —A Public Safety Officer responded to Trax Hall for the report of a suspicious person selling magazines. The individual was later located, advised of University policy and left the campus.

VEHICLE ACCIDENT — A Public Safety Officer and East Buffalo Township Police responded to the entrance of Bucknell West for a vehicle accident involving vehicles operated by two University students.

October 22, 1996

DISORDERLY CONDUCT — A University student reported to a Public Safety Officer that while he was walking from the Bertrand Library to Swartz Hall he was verbally harassed and shoved/pushed by an unknown male. The investigation is continuing.

INFORMATION /BENT SPRINKLER PIPE — A Public Safety Officer responded to Phi Kappa Psi for a sprinkler pipe which was bent during a registered party held at the Fraternity, which will provide payment for the repairs.

Courtesy of the Department of Public Safety

Editor's Note: The Public Safety Log is a weekly compilation of all verified incidents reported to Public Safety Officials from initial campus crime reports. The staff of *The Bucknellian* has no control over which events are included or omitted.

HAPPY JACK WRITES FOR NEWS, WHY DON'T YOU?

Simpson was the killer, attorney says in opening statement

SANTA MONICA, California — A plaintiff's attorney opened the civil trial against O.J. Simpson by telling the jury that Ron Goldman "died with his eyes open" and saw the former football star just before his life ended.

"In his last minutes, with his eyes open, he saw who killed Nicole, so he had to die," said Daniel Petrocelli, an attorney for Goldman's family. "With his eyes open he saw Orenthal James Simpson."

Goldman died solely because he could identify the killer of Simpson's ex-wife, Nicole Brown Simpson, Petrocelli said after detailing what he said was a timeline of the events of June 12, 1994, when Ms. Simpson and her friend Goldman were murdered outside her Brentwood home.

FBI official charged with obstruction in Ruby Ridge case

WASHINGTON — The FBI admits making serious mistakes at its 1992 siege of Randy Weaver's mountain cabin at Ruby Ridge, Idaho. But federal authorities say E. Michael Kahoe — a high-ranking bureau manager — broke the law.

Kahoe, former chief of the Violent Crimes and Major Offenders Section at FBI headquarters in Washington, D.C., was charged Tuesday with obstruction of justice for concealing a bureau critique of the siege, making it appear as though the report never existed.

The charge carries a penalty of up to 10 years in prison and a $250,000 fine.

The federal complaint, known as a felony information, says Kahoe concealed and destroyed an FBI headquarters document "that was sought by prosecutors in preparation for the murder trial pertaining to the Ruby Ridge incident."

Wildfires: Strong winds retreat but will return

SOUTHERN CALIFORNIA — With the prospect that strong winds would return, thousands of firefighters raced Wednesday to contain wildfires that have burned at least 35,000 acres, destroyed more than 100 homes and injured 12 of their colleagues, including one who was in critical condition.

The flames were fanned by hot, dry Santa Ana winds that gusted up to 71 mph earlier in the week and were expected to return by Saturday, Deputy Los Angeles County Fire Chief Darrell Higuchi told CNN during a live interview.

U.S. Interior Secretary Bruce Babbitt notes the vulnerability of the fire zone. Higuchi said it was critical to reach 100 percent containment by Saturday of a wildfire northwest of Los Angeles in Malibu. As of yesterday morning, the fire was 30 percent contained, Higuchi said.

Oklahoma City votes to close the street in front of bomb site

OKLAHOMA CITY, Oklahoma — The Oklahoma City Council voted unanimously Tuesday to permanently close the street in front of the former site of the Alfred P. Murrah Federal Building, where 168 people died in a 1995 bombing.

Area merchants objected to the proposal, saying closing the street would hurt their business.

Families of bombing victims pressured the council to include the one-block stretch of Fifth Street in a planned memorial to those killed in the explosion.

"I'm in tears with joy that we had a nine-nothing vote," said Bud Welch, whose daughter Julie died in the blast. "It's really important that this community be completely unified."

The street has been closed on a temporary basis since the explosion ripped the building apart on April 19. In addition to the fatalities, more than 500 people were injured in the blast. Timothy McVeigh and Terry Nichols are charged in the bombing and await trial in Denver, Colorado.

World News

Palestinians to Chirac: 'Vive la France'

RAMALLAH, West Bank — French President Jacques Chirac received a hero's welcome Wednesday in the Palestinian territories where he made the first speech to the Palestinian legislature by a head of state.

He urged Palestinian leaders to renounce violence and respect democratic principles as the best means for achieving statehood. Chirac also criticized Israel, where he had spent the previous two days, and called on Prime Minister Benjamin Netanyahu to live up to agreements signed by the previous government.

Thousands of Palestinians, including flag-waving school children, lined the streets of self-ruled Ramallah to welcome Chirac, a vocal advocate of an independent Palestinian state. Many chanted "Vive la France" and "Vive la Palestine."

Later, he received an equally warm welcome in Gaza. Chirac flew on to Amman, Jordan, where he was met by King Hussein. The French leader will go on to Lebanon and Egypt later this week.

Afghan foes battle for heights north of Kabul

KABUL, Afghanistan — Rival Afghan militia pounded each other with artillery, mortar and rocket fire yesterday, vying for heights overlooking one of two roads leading into Taliban-held Kabul, witnesses and rival commanders said.

Forces of the ousted Burhanuddin Rabbani government said they launched a major assault to capture the De Sabz pass leading into northeast Kabul, towards which they have been moving back after pulling out last month when the Taliban attacked.

"We are progressing. We have taken control of the high positions (on De Sabz pass) and we will soon clear the Taliban's remaining positions," Mehrabodin Masstan, spokesman for ousted government military chief Ahmed Shah Massoud, told reporters behind Massoud lines.

However, by late-afternoon there were no signs of a major advance by Massoud or Abdul Rashid Dostum, whose forces had arrived last week, on the eastern side of the plain girded by craggy hills leading to Kabul.

Brundtland to step down as Norway's prime minister

OSLO, Norway — Norwegian Prime Minister Gro Harlem Brundtland, who has dominated her country's politics for more than 15 years, surprised Parliament Wednesday by announcing her resignation, effective tomorrow.

Brundtland, 57, who said she would recommend Labor Party protege Thorbjoern Jagland, 45, as her successor, did not give a reason for stepping down. But she has been mentioned as a possible candidate for the post of United Nations secretary-general.

The decision to resign was made a year ago, she said during a question-and-answer session in Parliament. Brundtland said she decided to leave office now to make it clear to voters who will be Labor's prime minister candidate in national elections to be held in November 1997.

It was the timing of the announcement — not the resignation itself — that came as a surprise. Brundtland had already said she wanted to step down, but the announcement was not expected so soon

Prisoners compete for queen of the jailhouse

MEXICO CITY — Beauty contests are pretty much the same in any part of the world, but a recent winner in a Mexico City pageant had unusual vital statistics for a beauty queen. Miriam Flores is tall, brunette, and is serving five years, nine months for robbery.

All the contestants for "Miss Mexico Jailhouse," held last Sunday, were prisoners, in what authorities think was the first jailhouse beauty contest in history. Flores beat 13 other competitors on the catwalk, in evening wear, and in the spotlight of a general knowledge quiz.

Contestants and spectators alike welcomed the break from the everyday routine of prison life. "I feel great, this is a distraction in middle of the monotony," said Lucia, one of the women who attended the event.

National and World News Briefs compiled by Anna Foca from the CNN Interactive Website

BOOKSTORE

From page 1

any discount for buying textbooks in bulk.

Moohr also pointed out that the bookstore "does not make much money on textbooks," and acquires most of its revenue from sales of nonessentials, such as clothing and gift items. He added, "Many of these nonessential are purchased by non-Bucknellians, such as people passing through on tours or alumni."

Roberts also discussed the sale of used textbooks. "The used book market has nothing to do with the original price of the book. In general, we buy it for half of the current retail price, and sell it for 75 percent of that price."

Mike Walters '00 said that he was not surprised at the high cost of textbooks, and doesn't consider the bookstore to be unfair in its prices. "I was at the University of Pennsylvania last weekend, and the textbooks there are also really expensive."

The bookstore's various expenses include employee salaries, building rental, postage, depreciation, and Visa/Mastercard fees.

"Employees of the University, who are defined as eligible to personnel, receive a 15 percent discount on most items sold in the store," Roberts said. The discount does not include computers or class rings. Departments receive a 25 percent discount on office supplies.

Roberts noted that Bucknell "students should praise themselves" for helping to keep bookstore prices down, pointing to the low rate of "merchandise shortage," or shoplifting. The average merchandise shortage for comparable university bookstores was 1.2 percent of sales, and Bucknell's was only .4 percent.

Roberts added that only one backpack has been lost in the bookstore during his five years there. Thus, he sees no need to install expensive electronic devices to monitor shoplifters.

Some students and faculty have expressed concerns that the bookstore has strayed from its original purpose in providing educational aids. They point to things, such as the elaborate gift and jewelry collections that are displayed at the front of the bookstore. The books occupy less floor space than nonessential items, and are located at the back of the store.

Pallavi Rayan '99 said, "I feel that the bookstore has un-useful articles like its potpourri, candles, and dishtowels. How many people really buy holiday items there without a Bucknell insignia? They should take that stuff away."

However, other students find that these items are useful. One student, who did not wish to be named, said "I like the greeting cards and gifts. It's a convenience, plus the bill goes home to my parents." She added, "When I was a first-year student without a car it was hard to get shampoo and cards. I really appreciated the bookstore then."

Committee to choose director of Greek Affairs

BY ERIC BLOEM
Bucknellian Staff Writer

Within the next two months expect a new face to appear as part of University administration. A committee has been searching for a candidate to fill the position of director of Greek Affairs. This position was left vacant last year when Edward Dadez left the University.

Myra Legg has been filling the postion as the acting director of Greek Affairs

Joyce Bylander, associate dean of students and a member of the search committee, said there have been many applicants for the position. That number has been narrowed down to four individuals, two men and two women, said Bylander. "Most people have had some connection with a local or national fraternity or sorority."

All four of the possible applicants have visited campus for additional interviews. Bylander further stated that the committee is "hoping, within the next month to bring back one or two of the applicants," for third interviews.

There are many criterion which the committee must take into consideration when appointing the new director of Greek Affairs. Bylander said that there were certain requirements such as education and number of years experience, but most importantly, they are looking for "an advocate for the [Greek] system and advocate for Bucknell."

The role of director of Greek Affairs will basically remain the same, said Bylander. There will be more of a concentration on community building. This could be facilitated in a number a manners. One way is to integrate the many offices on campus with Greek Affairs, such as the Women's Resource Center and multi-cultural organizations.

In addition, Bylander said that recently, the Greek community and the University community have drifted apart. One of the goals for the new director is to bring these two communities closer together. She stated that there is a "tendency for students to drift away from their role as a university student" when they enter a fraternity or sorority. Bylander stressed that this "does not put us in opposition with one another."

The new director must "help fraternities and sororities to reach the full potential of what they say in their missions and to be the kind of organization they want to be," said Bylander.

Stephen Stamos, the chair of the committee, declined to comment on the difficult procedure of choosing a new director. He said that he did not want to create any type of expectation on behalf of the committee at such an early stage in the game.

Bylander said that, "It would be an exciting goal to have someone on campus at the beginning of next semester."

Concerns raised about "SchoolSucks" website

Students can find research papers online

BY TARA DRISCOLL
Bucknellian Staff Writer

The week of test cramming and up-all-night paper writing before fall break could have been much less harsh had University students known about a new Web site where the motto "Download your workload" has become a cliche.

The Web site, called "School Sucks," located at http:www.schoolsucks.com, was created by Kenneth A. Sahr, a student at Florida International University. It was created as a free reference for students to use to see the papers of students across the globe on subjects like English and science. Sahr hopes to eventually include thousands of students research papers in the Web library.

The site is divided into six categories: the arts, history, business, English, law, and science. Within each category exists separate folders that break down into more specific topics. At present, some categories contain as few as five papers, or as many as 14.

An invitation for plagiarism and dishonesty could be tempting. However, Richard Waller, associate professor of history, is not concerned. "These things are quite pointless because in my department we don't set the kind of essays that can be taken from the Web site. Yes, plagiarism does occur at this university, but if you're going to learn anything, it is not going to be from random students papers across the nation."

"Students come here to be taught by professors. It is dangerous for those who use this—they lose, but on campus, there is no need to panic," Waller said.

Professors have access to the site as well. Waller says that students are kidding themselves if they think faculty will not recognize a plagiarized paper.

Even as a reference, students must recognize that what they are accessing is, in many cases, amateur material, or even very grossly introductory level work. A paper from the site on John F. Kennedy, for example, begins with a weak introduction, and barely contains a thesis statement. On the other hand, an analysis of Robert Frost's poem is well-written and insightful, worth looking at for both understanding and interpretation.

University students would find little use for the substandard material; however, the site itself is fairly new, and given time, the potential for strong references is a possibility.

Sahr is aware that some of the papers featured are, "less than satisfactory" works. But in a letter at the Web site, he contends, "that the papers featured are a cross reference of the level of students across the globe." What exists is a library of imperfections, one in which access to model material is not always received.

Caroline Garrett '00 said, "I don't think too many people know about this Web site. I think a certain part of the Bucknell community would use this, not to say strictly for plagiarism, but also as a reference."

Garrett, like many other students on campus, expressed no desire to view the material.

Brian Baxter '00 said that he does not doubt students have the potential to use the material in a negative way. Although he is not interested in the resource, he said that some people will give into the easy access. "There are kids who buy texts some places, why wouldn't they do it for free?"

This is what has some professors worried. Diane Lowenthal, associate professor of political science, is concerned, not with the fact that the texts are available, but that students who use the material as a resource will learn in a somewhat skewed way. "Most of the material in the papers really isn't that useful," Lowenthal said. "There's definitely a more reliable source out there, but if students prefer to use what they find at this site, they must cite the source. This is a problem only if they do not. I would hope that students could find a better source."

Janice Buechler '97 offered a suggestion to Sahr's Web site. "I think it would be safer if the site was a place where students could leave the ideas and not an essay that could just be printed out. Ideas would promote research, and that is all that is necessary to really gain from the college experience."

EDITORIAL

The University should go beyond requirements to educate students

Something good has come from something very bad, but something even better is desired. There is absolutely no excuse for sexual assaults, yet they are an unfortunate factor in today's society. There are different ways of handling this reality, and the Bucknell community should be saluted in certain aspects and upbraided in others.

Students, faculty and staff have rallied to support heightened awareness of sexual assault. Organizers, participants and attenders of Friday's rally against rape are to be commended. The 436 names on the circulated petition make a strong statement and prove there is dedication to overcoming this problem. Steps to create an action group comprised of students, faculty and staff signify that this community is responding to the crisis.

Unfortunately, the University is not providing a united front to prevent sexual assault. There is no doubt that the University condemns sex offences, yet it is not doing all it can in regard to preventative measures.

In September of each academic year, students receive a pamphlet entitled "Your Right-To-Know." Required by government policy, this document is supposed to make individuals invested in colleges and universities aware of the happenings in their community.

While the University is complying with this Act, it should go beyond what is required.

The published statistics are misleading. Only cases in which substantial evidence is found by the Sexual Assault Reporting Board are included in the data, which is only broken down into the categories of forcible and non-forcible assault.

Through this method, students never know the actual number of sexual assaults reported. Because knowledge and awareness lead to prevention, it is important for students to be aware of these figures.

To make the statistics more effective, they should be broken down into categories such as the following: total number of sexual assaults reported, number found to be substantiated, number brought to the judicial board and the results of the hearings.

It is the University's job to educate its students. No one wins when sexual offence is disguised.

LETTERS

Athletic scholarships a help, not a hindrance to academic reputations

To the Editor:

For the past 10 years, I have been the radio and television voice of the Bucknell athletic teams, a position that I enjoy immensely. During that time, I have not only described the action of many great Bison teams, but have offered my opinions on what is transpiring on the field or the court. After reading both the front page story, "The Patriot League is Falling Down," and your editorial, "Greed Threatens to Ruin the Patriot League," I felt that someone needed to write a dissenting opinion.

I found it interesting that *The Bucknellian* would imply that giving athletic scholarships "would undermine the academic credibility of the University." Do you think that Duke or Stanford undermines their academic credibility by giving out athletic scholarships? Over the last 10 years, Duke is arguably the best men's basketball program and Stanford the best women's basketball program.

I don't believe that either have hurt their academic reputation; in fact, just the opposite has occurred, because the teams have brought tremendous exposure to their universities. Just because you give an athletic scholarship doesn't mean that you can admit someone who isn't qualified. The admission office would be the ones to decide if a student/athlete is admitted to Bucknell, just like it is now.

I believe that if you gave athletic scholarships, there would be a good possibility of attracting even a better caliber of student. With more to offer, Bucknell would be able to not only out-recruit the Ivy League, but also get student-athletes who would prefer to attend such a prestigious university like Bucknell, but opt for a scholarship instead.

The question of the cost of three men's and three women's basketball scholarships a year, for a total of 12 on each team was raised by the editorial. Currently, the players can be on financial aid, with some receiving the equivalent of a full ride, if they qualify. So depending on how many student-athletes are currently receiving aid and for how much, the cost would be the difference between the two. I have no idea of that number, but do realize that it would not cost the University 24 tuitions.

I believe that the Patriot League has been very good for Bucknell University and for our teams to remain Division I, it must thrive and grow. Playing against schools that are similar in size, academics, and geography (for travel purposes) are what makes good leagues. Playing with similar resources (money, entrance requirements, and facilities, to name a few things) make the league fair.

When I prepare to broadcast a game, I read up on the players, their statistics, and team history. I thought I would share some of my "research." When the Patriot League formed in 1986, (then called the Colonial League), it was a football-only conference. The original five playing members were Bucknell, Colgate, Lafayette, Lehigh, and Holy Cross. At the time Holy Cross played scholarship football and it was agreed that they would phase out scholarships over time.

Holy Cross played 1986, '87 and '88 with four classes of scholarship players and had at least one scholarship class on the roster through the 1991 season. In that time, the Crusaders compiled a league record of 25-1 and an overall record of 60-5-1, with four of the losses coming to Boston College and Army and one of them against a non-scholarship team.

The other four schools, all playing non-scholarship football, were very competitive with one another. In that time span their records in the Patriot League were: Bucknell (10-17), Colgate (12-14), Lafayette (15-13) and Lehigh (14-13-1). The basketball league began play with the '90-'91 season and Fordham with a full compliment of athletic scholarships won the league the first two season.

I decided to look at what the Bucknell men's and women's basketball teams have done over the last five years against non-scholarship and scholarship opponents. The Bucknell men have a Patriot League record of 49-19 and an out-of-conference record against scholarship teams of 18-31. When you break it down to road games against scholarship teams, it drops to 7-23.

On the women's side, Bucknell is 32-36 in the Patriot League, 15-39 against scholarship teams, and 5-19 against scholarship teams on the road. These numbers would lead me to believe that if a significant number of Patriot League teams went scholarship that these numbers would have a real chance of appearing for the whole season.

Over the years, Bucknell has built an outstanding basketball tradition that I would like to see enhanced. The interest and spirit generated just a few seasons ago was tremendous, when the men's team won over 20 games and looked to be headed to the NCAA Tournament, prompting fans (students, faculty, staff and Lewisburg area residents) to camp out in sub-freezing weather for a chance to buy tickets to a home regular season and Patriot League Tournament games.

I am not saying that scholarship guarantees a winning team, far from it, but if you want to play Division I sports, I believe that since over 95 percent of the teams give scholarships, we should too, if we wish to remain competitive.

Another thing many people don't realize is that Bucknell gave athletic scholarships up until the early 70's. The decision to give merit-based aid comes down to philosophy. It is for most people a belief. Your are for it or against it. I happen to be for it.

Many will say that athletics shouldn't be the first area to receive merit-based aid on this campus and to that I say that I agree. But, I believe in merit-based aid across the board. On the air, I would suggest that a team might go for it on fourth and one, instead of punting. This is one of those cases.

Irresponsible exaggerations cause of fraternity fight

To the Editor:

I am writing in reference to *The Bucknellian* article concerning the "brawl" which occurred at T.K.E. the Saturday night of Parent's Weekend. The writer of the article had the intention of accurately portraying what transpired that evening, but unfortunately did not present the facts correctly.

That night there was an incident involving an intoxicated individual, who was not on the invite list, and was asked to leave the party due to unruly and obnoxious behavior. The individual was physically ejected from the house and then recruited a large group of people who came up to T.K.E. about fifteen minutes later. This group in no way "casually greeted" the brothers as was quoted in *The Bucknellian*.

This is a glaring misrepresentation of the facts. I went to the door that night when I heard shouting and tried to talk to the people there or at least to calm them down. This was a mistake because certain individuals in the group, reported by *The Bucknellian* last week to be "curious," started yelling obscenities and death threats and then proceeded to throw punches at me. I was knocked to the ground and fortunately pulled away by someone in the crowd. Thankfully, Public Safety arrived and ended the incident before it could escalate. The details of this unfortunate incident are unclear at best and are being investigated by the proper authorities.

I am not interested in pointing fingers or assigning blame for what took place, nor of proportion. It was embarrassing enough to have such a disgraceful display on a Parent's Weekend without having inflammatory and inaccurate statements printed in *The Bucknellian*. Beyond the obvious insult to the reputation of my house, it does a great disservice to the entire Greek system at this university when an incident concerning a few individuals is exaggerated in such an irresponsible manner.

Bucknell community should rededicate itself to eradicating sexual violence

To the Editor:

As the father of a teenage daughter, as a physician who has dealt with the aftermath of sexual violence and as a member of the Bucknell community, I am simultaneously saddened, outraged and in some ways feel responsible for the report of the seven incidents of acquaintance sexual assaults that have recently occurred on our campus.

I am saddened because the young women who came to this community did not want nor anticipate these kinds of events occurring in their lives—events that literally alter lives in a profound way.

I am saddened for the perpetrator who feels that sexual intimacy is there for the taking, and not part of a meaningful relationship.

I am saddened for the community because violence done against one is done against us all.

I am outraged because the mere thought of violence of any kind is abhorrent to me, but it is more poignant to think that these were people who knew one another, yet advantage was still taken.

And finally I feel also, as a member of this institution, responsible. What could we have done to prevent these events from taking place? What example could we have demonstrated to show that this behavior is absolutely unacceptable? What can we do now to ensure that it never happens again?

I would ask that every member of the community rededicate him or herself to the task of working to eradicate sexual violence and to ensure that every student, faculty and staff member, male and female alike, enjoy basic freedom from fear of any kind.

LETTERS POLICY

The Bucknellian *welcomes readers' comments on important campus, national, and international issues. Letters must be submitted by 5 p. m. Tuesday to appear in Thursday's issue. All letters must be typewritten in 12 point New York font and signed by the author.* ***Letters must contain less than 750 words.*** *We reserve the right to edit letters for length or libel. We attempt to publish all responsible material, but we reserve the right not to publish due to spacing, technical, legal, or other problems.*

Authors wishing to remain anonymous must make arrangements with the advisor to The Bucknellian, *Katherine Wheatcroft.*

Address letters to The Bucknellian, *Box C–3952, Bucknell University, Lewisburg, PA 17837, bring them to our offices in the basement of the central wing of Roberts Hall, or submit them electronically to bucknellian@bucknell.edu. On campus submissions by Macintosh users may also be placed in* The Bucknellian *"drop box," accessible by guest login to the computer "Schubert" in the "Acad" AppleTalk zone.*

SUBSCRIPTIONS POLICY

Subscriptions are available at $45 per year, $30 per semester. To subscribe, send payment and address to The Bucknellian *Subscriptions, Box C–3952, Lewisburg, PA 17837. Subscriptions are mailed first-class on the Friday following publication. Please send change-of-address information to the above location as well.*

QUESTIONS AND COMMENTS

To register questions or comments, please call our offices at (717) 524-1551 or (717) 524-1520, write to us at Box C-3952, or send a facsimile to us at (717) 524-1176. Internet-savvy writers can contact us via email at bucknellian@bucknell.edu.

OPINIONS

Sexual assault is far more than "disturbing"

BY NORA DANIELS
Bucknellian Staff Writer

I have never been assaulted, sexually or otherwise, but I know victims of rape, assault, and harassment. Theirs are not nice stories, but a tragedy of violence and pain. Bucknell is not supposed to be a place where this type of crime happens, but so far this year, it has occurred. Sadly, it took "a number of alleged acquaintance sexual assaults" for a public reaction, which we received in our mailboxes on October 7.

Signed by both the President and the Dean of Students, the "open letter" states that any "sexual assault on our campus is disturbing." I looked up the word "disturbing" in the dictionary, and found out that its synonyms include "unsettling" and "troubling." So sexual assault on campus, or even in general, is "troubling?"

I hope that everyone sees the understatement in such a term. To me, something that is "troubling" is that I have a test tomorrow that I have not studied much for—it is not too bad, and it definitely will not affect me in a year or even a month. Victims of sexual assault, on the other hand, will be affected forever. That is a little more than "troubling."

The University plans to continue to "educate students, to raise awareness and sensitivity about this issue, to communicate the unacceptability of sexual assault...and support" the victims of such abuse. Those are good goals, but are they enough? Will education, awareness, and sensitivity help both the victims and the perpetrators?

Victims of all crimes need support, but they also need to see that others are protected. The criminals that hurt others in this way need help too—they need to be shown the consequences of their actions so that they do not become repeat offenders. There punishment must be definitive.

The letter notes that "the larger community" is being negatively affected, so we need to stand together as a "larger community" in hate—hate against those who assault, hate against those who hurt others in this way. The rally we had here on campus was a good start, but more is needed.

We must continue in "condemning" sexual violence of all sorts now and in the future. And only then can we truly agree with the letter that says, "the University cannot and will not tolerate sexual assault and abuse."

Mandatory foundation seminars waste academic time

BY ARGUN ULGEN

David Erwin '00 walks into his room after finishing classes for the day. In time he starts to complain. "For those who did not get a foundation seminar that relates to his major, it is a semester of a lot of work with little meaning. Sometimes, I find that students have been discouraged to do their work due to lack of interest in these courses!" Erwin, a computer sciences major, feels that his foundation seminar CHANCE is presenting him with a great deal of work that has little relevance to computer sciences.

To some degree, there are students who feel the same way as Erwin. Foundation seminars are supposed to provide freshmen with the invaluable experience of learning how to analyze certain texts, use the library more efficiently, and presenting written and oral reports.

For some students, it has been a great way to discover a potential major. On the other hand, some students who are eager to dive into the field of sciences or mathematics could not fit these particular classes into their schedules due to the University's foundation seminar requirement.

Those freshmen who are disgruntled about these seminars do have valid arguments. For example, as an arts and sciences student, I wanted to fulfill my lab requirement as quickly as possible. In order to do this, I requested to take Chemistry 109. But a serious problem came up when I had a conflict with my foundation seminar and chemistry on my schedule. I didn't even want to take "Archimedes Level" nor did I have any interest in it. And yet this requirement prevented me from getting into my desired course until the second week of the school year.

In general, certain foundation seminars have caused serious course conflicts between core courses that are desired by students and the seminars that "ease students into their first year," as stated by Prof. Janet Knoedler.

One may wonder, "how is a course like supermarket biology going to prepare me for a major in chemical engineering or economics?" Most faculty would argue that the foundation seminar, if not related to a certain major, will expand a student's horizons on research. But freshmen at a top school like Bucknell are eager to dive into their majors and are determined to experiment with core courses in their particular field.

For those freshmen who do have majors, many of them see their foundation seminar as a "filler" course. Other first-year students may have to wait another year to take that course that they waited all summer long to take due to that spot dedicated towards a foundation seminar.

And what about the workload of these courses. Some of these foundation seminars are dedicated to discussion in which students enjoy the luxury of a light course in their first year. But horror stories of other foundation seminars tells a different story.

Alyssa Polychronopolous '98 states that "as a freshman, my foundation seminar was the most work of all. I had four tests, re-

LETTER

Faculty and staff unite to sign petition against rape and all coerced sexual acts

To the Editor:

We the undersigned faculty and staff members express our abhorrence of rape, and of all coerced sexual acts, on the Bucknell campus and in the community at large.

We pledge ourselves to work alongside concerned students to change the abusive behavior of some men toward women, and to change the campus climate of alcohol and drug abuse.

OPINIONS

Comparison of Hillary and Elizabeth another political campaign tactic to sway public opinion

BY ALLISON PRICE
Bucknellian Staff Writer

The *New York Times* recently ran a magazine feature article on Elizabeth Dole on the campaign trail for her husband entitled "Running Against Hillary; but what is Elizabeth Dole running for?" The title fits the article much more aptly once you get below the surface of what seems to be just another article on the superficial noise swirling around Mrs. Dole and Hillary Rodham Clinton.

The question of what Mrs. Dole is running for also goes a lot deeper than just what political office she may secretly want to run for once the polite, campaign parlor games of image are no longer necessary after the presidential election. Remember, she will still be the same person.

The article describes Mrs. Dole as an extremely competent, intelligent woman who carries a "shoe-coordinated ladylike bag in public and a masculine, no nonsense attaché case that she takes out in private." This pretty much sums up life for many American women, those who admire Mrs. Dole and those who dislike her—or maybe it is just her manufactured persona. This is the game most women play and it is incredibly difficult to admit.

I do not believe most women think twice about the attache case, that most men are put off by them or that Elizabeth Dole would lose votes for her husband if she showed up for an appearance carrying one.

However, this should be put in the context of American elections. Most Americans would agree that honesty is lacking from the American political process, and the issue of not only honesty, but more importantly authenticity, confronts you from many directions. The ridiculous standards to which we hold Elizabeth Dole, and more profoundly and loudly Hillary Clinton, are within them as well as ourselves.

"She's just more of a lady," one admirer told the *New York Times* journalist. I am not quite sure what the stereotypical lady entails anymore, however, all these ideas come from some deep personal terrain that is societally, and in this case politically, rewarded.

While President Clinton currently annihilates Bob Dole in the polls, Mrs. Dole is highly favored over Hillary Clinton. In 1992, Barbara Bush was also preferred over Mrs. Clinton. After Mrs. Bush's speech at that year's Republican convention, people were awed to realize she had the punch revealed in her speech. As Molly Ivins quipped around the time, it was the voters' own fault if they believed she was as colorless as her position.

The game broke down, yet the perceptions of Barbara Bush and the old type "ultimate helpmate" political spouse image outlived the speech. The urge to cringe is equal when Hillary Rodham Clinton sews at a union appearance to prove she can and when Elizabeth Dole beams as her husband compliments her by saying she won't get herself all messed in policy activism. Does anyone in the United States doubt Elizabeth Dole's handle on policy?

The reality is Mrs. Clinton and Mrs. Dole are not all that different as far as life experience and decisions. Both are Ivy League educated and successful lawyers, both fought misconceptions of and discrimination against women in that field. Both had high powered careers, Mrs. Dole's culminating in a cabinet position in which colleagues remember her espousing some pretty progressive views.

Both women have made sacrifices in the wake of their husbands successes, and I believe both have an inner orientation towards activism. Both are, and advise their husbands as, peers. Mrs. Dole will continue to run the American Red Cross if her husband is elected.

However, reversing the labels on both women makes Mrs. Dole the hard core "liberal Democrat." It is all in the perceptions.

We as people and voters cling to sterility and certainty, while denying ourselves the complexity and authenticity which is inherently noble and useful. What people admire in Elizabeth Dole they ridicule in Hillary Clinton. Not only do we want it both ways, we want it as clean and clear as possible.

Unfortunately, the compromises Elizabeth Dole has made are devastating in terms of their implications—opposing family leave, gun control, as well as oversimplifying issues of reproductive choice. Mrs. Dole is on the record as formerly supporting the Equal Rights Amendment.

The main difference Mrs. Dole cites as separating her from Hillary Clinton is her own belief that government in the end is not about helping people or playing an active role in American lives. If this conservative belief was truly believed and followed by conservatives, why would any one of them bother to run for public office? Of course government changes things.

No matter how you look at it, both Elizabeth Dole and Hillary Rodham Clinton have built a life and career around this complex reality.

Until we recognize this and the need for authenticity in both politics and government, we can never grow beyond public shoe-matching-hand-bags and private possibilities.

War creates enemies of fellow human beings

Trip to France's Normandy Beach and World War II American and German cemeteries vividly illustrates the horror created by war

BY DEREK POWELL
Bucknellian Staff Writer from abroad

"What this world needs is another war."

My grandmother often says this statement. It doesn't come from ignorance, as she lived through World War II, but rather from frustration at today's society and all of the problems that it has created. In her view, war would wipe out such troubles and allow the "winner" to start from scratch, without all of the problems that plague the world today.

But can such a statement be true? Perhaps an answer can be found here in Normandy, France, the site of some of the most intense battles of World War II.

During my trip to Normandy, I visited the American cemetery. I started to ponder for the first time what my grandma had talked about: the wars, the armies, the rationing, etc. I thought that perhaps with these visits I could more easily grasp what she had said. But really, it wasn't easier.

I had it all there in front of me: the movies of Omaha Beach et al., the costumes, the stories, the graves, the history. I walked down to the beach and sifted my hands through the sand, trying to perhaps extract some piece of long-lost history. It didn't come. My *comprehension* is there: why the war was fought, what these graves mean, what the cemetery was about. What I didn't feel was the *understanding* of these artifacts. I comprehend that the people in these graves were fighting for peace, freedom and liberty of not only those in Europe, but for those in the United States. Because of their actions, I am able to live my life as freely as I choose.

But at the same time, I am unable to understand, or truly piece together this history. I don't feel grateful, honorable or patriotic. All I see are the graves, the beaches, the memorial artifacts. I have the history and am able to connect to the artifacts with the powers of deduction. What I am not able to do, however, is to realize how such a powerful period has crafted the present day.

To make this issue even more complex, I visited the German cemetery following my trip to La Pointe du Hoc—where France has preserved the landscape from 1942 with crumbling barracks and the obvious craters of enemy bombing. At the German cemetery, I had to further investigate my knowledge of WWII and compare it to what was displayed in front of me.

One way to try to understand the war is in a comparison of the two gravesites. The American one can only be described as "patriotic" with lots of marble, flags waving in the breeze, stone sculptures, fountains, etc. The mood, though serene, was also slightly in-your-face with its patriotic, almost effacing, tone.

My friend explained that for her, the cemetery is "really a celebration and a true commemoration of those individuals who indeed sacrificed literally everything for us—you and me." Fair enough, for I cannot imagine sacrificing my liberties for the advancement of a supreme race. But at the same time, if I cannot even feel the pain of these men, how am I supposed to justify the grandiose establishment in which they are buried?

By contrast, the German cemetery was truly Teutonic in demeanor. The gravesites were marked with a simple dark gray plaque, the sculptures minimal, the flowers tasteful. I cannot say with total certainty that this decor is due to its almost apologetic tone, but the form does follow a general German style—simple yet elegant, functional without being flashy. It did what it did, and made no grand statements. Style over substance.

Once politics enters into the fray and sets aesthetics aside, it is easy enough to notice the absence of the Star of David in the German gravesite.

My first thoughts were, "It's rather ironic that the Germans have the audacity to maintain a gravesite on French ground," but then I looked at the issue again. My brow furrows, even now. Here were German soldiers, some as young as 15, going to fight for a cause they didn't even understand, let alone believe in. They were used by the government to further its cause, as the government measured the pros and cons of slaughtering innocent lives and decided that the former outweighed the latter.

I realize how embarrassing it must be, even now, for the Germans to evoke sympathy for their lost ones. As I was reading one of the testaments from a soldier, I forgot that it was a German soldier I was reading about. The pain and suffering that was conveyed in his writing was evident, though when I realized that it was a German soldier I was reading about, and not one of the Allied Forces, I wanted to say, "But this is what you got yourself into. You died for the wrong cause." And in a way, that's true, I think—fighting for world supremacy only comes at the cost of exterminating countless others, and sacrificing one's country in the meantime.

When I think about it, the horror of so many deaths for an unjust cause comes only second to the extermination in the concentration camps. In the camps death was intentional, and though morally wrong, it was for a "cause." How ironic, then, that the very same "cause" cost millions of German soldiers their lives.

In the gravesite museum, the German pamphlets say how much they are working toward peace and how it must be maintained. How true. I only hope that the intentions therein are as true.

My grandma is wrong when she says, "What this world needs is another war." What she needs to do is to go back and see exactly what war did to the world, and how in some ways we're still recovering from it.

War only creates enemies of fellow human beings, disagreement where there should only be accord, and hate when there should be respect. Some say that war is the only way to achieve these fundamentals. In actuality, war does nothing but destroy them—and in the process, destroys the hope of achieving such basic essentials.

Speak Out

Did you find your foundation seminar was useful, why or why not?

Michelle McAllister '99
"Yes, I definitely found it useful. The class was social justice, and through different readings and discussions it made me view issues differently than before. It caused me to change some of my opinions."

Cary Beattie '99
"I did not think it was that important and I didn't really like it as a speciality freshman class."

Corrie Drummond '98
"I found it useful because it was a class of all freshmen and my advisor was there to be there for us. More than just for academic stimulus, it was nice to have a class of all freshmen."

Kirsten McLaughlin '97
"No it wasn't useful at all because it did not provide a framework for any of the other courses I took at Bucknell."

FOUNDATION SEMINARS

From page 5

ports and projects all semester long. And it didn't correlate to my major either." The fact of the matter is that the foundation seminar, dedicated to easing a student into his or her freshman year, may force him to pay less attention to his core requirements.

There are a variety of solutions to some of the problems that foundation seminars currently are presenting:

a) The best foundation seminar at Bucknell is EG 100. The focus of this seminar is to help all prospective engineering students become accustomed to certain aspects of their field. Why can't all foundation seminars be this way? Our course handbook should divide each explanation of foundation seminars to lists under majors. For example, all foundation seminars that deal with economics should be listed under this course title. This will help students make more intelligent decisions on what foundation seminars to choose.

b) There should be a preference system for choosing foundation seminars. When freshmen choose their foundation seminars, they have to put six checks next to the foundation seminars of their choice. This is no way of indicating which seminar they'd rather prefer. If a freshman received a first choice seminar, chances are he or she will be more interested in the course.

c) Students should be given a choice on whether or not to take a foundation seminar. There are certain students at this school who are already very strong writers and who are very decisive on their majors. In some cases, they may be thinking about an honors thesis before the first day of class starts. Others do have difficulties in research and may find a foundation seminar extremely useful to build their skills. To solve this problem, foundation seminars should only be required for students who have not scored a four or above on certain AP exams in the social sciences. This will give those extremely well qualified students the option of diving into the major earlier.

It seems that our faculty intends for our foundation seminars to broaden our horizons, help us get adjusted to Bucknell, and possibly lead us to a decision on our majors. In essence, a foundation seminar could be an excellent experience.

But in order for this to happen, we need a more organized choice system for foundation seminars, as well as the option of certain well prepared students being exempt from the foundation seminar requirement.

As the faculty may see foundation seminars as rather flexible, it is time that the students stop seeing them as tedious.

SCIENCE AND TECHNOLOGY

Astronaut comes in for a landing at the University

BY ALISON DUGAN

Imagine being part of NASA at the onset of a new era of technological advance. Imagine being one of the pioneering women involved in the space program. Imagine being able to circle the earth 18 times a day.

Rhea Seddon, Ph.D, this year's Health Scholar in Residence, has experienced these opportunities not once, but three times. Seddon made her three space flights in 1985, 1991 and 1993.

Seddon spent the early part of the week in visitation to the University, giving lectures and speaking to classes.

Afer receiving her bachelor's degree from the University of California at Berkeley and her doctorate of medicine from the University of Tennessee College of Medicine, Seddon began her career as a physician.

Seddon is married to fellow astronaut Robert "Hoot" Gibson. She is mother to four children, including Julie Gibson '98, an International Relations and French major.

"I had plans to be a physician, but I was really interested in the space program and I remembered its beginnings. I thought, 'wouldn't it be fun to be on a space station as a doctor?' I did some things to prepare myself to get into NASA later on. I diversified my studies and kept myself in good shape," Seddon said.

"As I finished my residency, I found out for the first time that NASA had plans to take physicians, scientists and women on a life sciences space mission. I seized the opportunity and applied to the program in 1977."

As part of the life sciences space mission in 1991, Seddon participated in 18 different experiments over the course of nine days.

These experiments were designed to test the effects of weightlessness on the body. They investigated both physical and sensory reactions to the changed environment.

Seddon commented that, "one of the most interesting things was learning to work in this brand new environment where even walking was difficult."

The first of a series of tests studied lung function in space. As a result of weightlessness, fluid in the body shifts towards the abdominal region. The shifting was thought to cause fluid to enter the lungs and decrease lung capacity. The results of various inhalation and exhalation exercises evidenced the fact that the body is capable of adapting to new conditions.

Astronauts found that muscles atrophy in space in the same manner they atrophy from disuse on Earth. Since the calf muscles in the lower leg were not required for mobility and support, much of the blood and fluids normally present in the legs shifted to other parts of the body.

This not only resulted in slight atrophy of the calf muscles, but also in a lowering of blood pressure. These adverse effects could be felt by the astronauts for weeks after they returned from space.

An experiment designed to test perception used visual stimuli to investigate the ability of the body to perceive motion. Under normal conditions, gravitational pressure on the inner ear acts as a system of balance in the body.

Since there is no pressure acting on the inner ear in space, the body adapts by using the eye to determine balance. To test this, an astronaut was secured in front of a rotating tube. As the eyes focused on the moving cylinder, the body responded by sensing that it too, was in motion.

Seddon recalls her experiences as times of continual learning. Her career with NASA has now led her to Vanderbilt University in Nashville, TN, where she was raised.

While she is no longer employed as a full time astronaut, Seddon conducts experimental research for NASA two days a week. The rest of her time is spent working in the medical center at the University.

Seddon's career has been anything but traditional and when asked of her experiences, she replied, "There are times when I wondered what I was doing, but it is definitely very interesting work."

Rhea Seddon, Ph.D. and astronaut, is also the mother of Julie Gibson '98. Seddon is married to fellow astronaut Robert "Hoot" Gibson.

New technology: Acoustics used to make ice, keep drinks cold

How it Works

Chip Audette

Chip Audette
Bucknellian Columnist

As part of our mechanical engineering senior design project, fellow senior design members and myself are joining talents with Charles Kinsley, professor of mechanical engineering, to try to build a thermoacoustic refrigerator. A thermoacoustic refrigerator is unlike any other refrigerator available today because it cools simply with sound. By eliminating the need for ozone damaging chemicals like the ones present in today's refrigerators, this type of refrigerator could satisfy an ever increasing need for a reliable, efficient, yet environmentally-friendly refrigerator.

We are working to design and build a device which will use sound to cool water. Using sound as a source of refrigeration is a technology which is still very early in its development. Many issues involved with building efficient thermoacoustic devices have yet to be explored and there is great opportunity for advancement. Therefore, we will spend this semester learning about thermoacoustic refrigeration as well as designing an actual thermoacoustic device. Next semester, the device will be built.

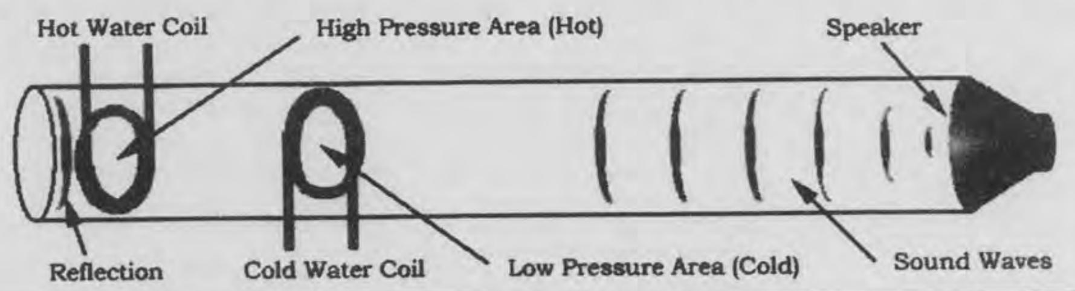
The ability to cool with sound is based on what is known as the thermoacoustic effect. The thermoacoustic effect describes the relationship between sound waves and temperature changes in a gas. This effect says that sound can be used to heat and cool air, or, conversely, that hot and cold air can be used to create sound. In a thermoacoustic refrigerator, the thermoacoustic effect is used to create a region of cold air by using powerful sound waves.

To understand this phenomenon, it is necessary to understand that sound is really just our perception of pressure waves which pass through the air. These waves are small fluctuations in localized air pressure which travel through the air like waves. Just as there are peaks and troughs in the waves on a pond, there are peaks and troughs in pressure waves. In pressure waves, however, the "peaks" are regions of high pressure and the "troughs" are regions of low pressure. As a parcel of gas is pushed around by a passing pressure wave, it is alternatively compressed by the high pressure region and expanded by the low pressure region. Gases, by their nature, will become hot when compressed and will become cool when expanded. Therefore, the temperature of a parcel of gas will oscillate between hot and cold as it is affected by the pressure waves.

To actually build a device which cools using the thermoacoustic effect, then, it is necessary to have some sort of gas and something to make sound. The heart of a thermoacoustic refrigerator, therefore, is a tube full of gas, usually air or helium. At one end of the tube is a powerful speaker to create sound. If the tube is the right length and the sound is at the right frequency, this device will be able to create a region of cool air within the tube. Usually, however, a collection of small water pipes are inserted into the tube so that water can be cooled. This water could then be used to cool the main compartment of the refrigerator where food is kept.

The interesting part of the device is that the sound level required to achieve any noticeable cooling effect is *extremely* high. The sound level inside the tube of gas needs to be around 170 dB (or louder) to induce a usable temperature difference. For comparison, the sound level of normal conversation is measured around 60 dB while a rocket blasting off is measured around 150 dB. Because the sound inside of the device is louder than a rocket, there will be real difficulty in making a device which, outside of the tube, is quiet enough to sit in someone's kitchen.

The design and construction of a thermoacoustic refrigerator will hold many unforeseen difficulties because this is a new technology with little history and few previous examples.



Brain Teasers

A Fair Division

Two brothers inherited a herd of sheep. They sold all of them, receiving for each sheep the same number of dollars as there were sheep in the herd. The money was given to them in $10 bills except for an excess amount, less than $10, that was in silver dollars. They divided the bills between them by placing them on a table and alternately taking a bill until there were none left.

Solution to Brain Teasers(at left)

We were told that the two brothers who inherited a herd of sheep sold each sheep for the same number of dollars as there were sheep. If the number of sheep is n, the total number of dollars received is n^2. This was paid in $10 bills plus an excess, less than $10, paid in silver dollars.

By alternately taking bills, the older brother drew both first and last, and so the total amount must contain an odd number of 10's. Since the square of any multiple of 10 contains an even number of 10's, we conclude that n (number of sheep) must end in a digit, the square of which contains an odd number of 10's. Only two digits, four and six, have such squares: 16 and 36. Both squares end in six, and so n^2 (the total amount received for the sheep) is a number ending in six. The excess amount consisted of six dollars.

After the younger brother took the $6, he still had $4 less than his brother. To even things up the older brother wrote a check for $2. It is surprising how many good mathematicians will work the problem correctly up to this last step, then forget that the check must be $2 instead of $4.

OPINIONS

Comparison of Hillary and Elizabeth another political campaign tactic to sway public opinion

BY ALLISON PRICE
Bucknellian Staff Writer

The *New York Times* recently ran a magazine feature article on Elizabeth Dole on the campaign trail for her husband entitled "Running Against Hillary; but what is Elizabeth Dole running for?" The title fits the article much more aptly once you get below the surface of what seems to be just another article on the superficial noise swirling around Mrs. Dole and Hillary Rodham Clinton.

The question of what Mrs. Dole is running for also goes a lot deeper than just what political office she may secretly want to run for once the polite, campaign parlor games of image are no longer necessary after the presidential election. Remember, she will still be the same person.

The article describes Mrs. Dole as an extremely competent, intelligent woman who carries a "shoe-coordinated ladylike bag in public and a masculine, no nonsense attaché case that she takes out in private." This pretty much sums up life for many American women, those who admire Mrs. Dole and those who dislike her—or maybe it is just her manufactured persona. This is the game most women play and it is incredibly difficult to admit.

I do not believe most women think twice about the attache case, that most men are put off by them or that Elizabeth Dole would lose votes for her husband if she showed up for an appearance carrying one.

However, this should be put in the context of American elections. Most Americans would agree that honesty is lacking from the American political process, and the issue of not only honesty, but more importantly authenticity, confronts you from many directions. The ridiculous standards to which we hold Elizabeth Dole, and more profoundly and loudly Hillary Clinton, are within them as well as ourselves.

"She's just more of a lady," one admirer told the *New York Times* journalist. I am not quite sure what the stereotypical lady entails anymore, however, all these ideas come from some deep personal terrain that is societally, and in this case politically, rewarded.

While President Clinton currently annihilates Bob Dole in the polls, Mrs. Dole is highly favored over Hillary Clinton. In 1992, Barbara Bush was also preferred over Mrs. Clinton. After Mrs. Bush's speech at that year's Republican convention, people were awed to realize she had the punch revealed in her speech. As Molly Ivins quipped around the time, it was the voters' own fault if they believed she was as colorless as her position.

The game broke down, yet the perceptions of Barbara Bush and the old type "ultimate helpmate" political spouse image outlived the speech. The urge to cringe is equal when Hillary Rodham Clinton sews at a union appearance to prove she can and when Elizabeth Dole beams as her husband compliments her by saying she won't get herself all messed in policy activism. Does anyone in the United States doubt Elizabeth Dole's handle on policy?

The reality is Mrs. Clinton and Mrs. Dole are not all that different as far as life experience and decisions. Both are Ivy League educated and successful lawyers, both fought misconceptions of and discrimination against women in that field. Both had high powered careers, Mrs. Dole's culminating in a cabinet position in which colleagues remember her espousing some pretty progressive views.

Both women have made sacrifices in the wake of their husbands successes, and I believe both have an inner orientation towards activism. Both are, and advise their husbands as, peers. Mrs. Dole will continue to run the American Red Cross if her husband is elected.

However, reversing the labels on both women makes Mrs. Dole the hard core "liberal Democrat." It is all in the perceptions.

We as people and voters cling to sterility and certainty, while denying ourselves the complexity and authenticity which is inherently noble and useful. What people admire in Elizabeth Dole they ridicule in Hillary Clinton. Not only do we want it both ways, we want it as clean and clear as possible.

Unfortunately, the compromises Elizabeth Dole has made are devastating in terms of their implications—opposing family leave, gun control, as well as oversimplifying issues of reproductive choice. Mrs. Dole is on the record as formerly supporting the Equal Rights Amendment.

The main difference Mrs. Dole cites as separating her from Hillary Clinton is her own belief that government in the end is not about helping people or playing an active role in American lives. If this conservative belief was truly believed and followed by conservatives, why would any one of them bother to run for public office? Of course government changes things.

No matter how you look at it, both Elizabeth Dole and Hillary Rodham Clinton have built a life and career around this complex reality.

Until we recognize this and the need for authenticity in both politics and government, we can never grow beyond public shoe-matching-hand-bags and private possibilities.

War creates enemies of fellow human beings

Trip to France's Normandy Beach and World War II American and German cemeteries vividly illustrates the horror created by war

BY DEREK POWELL
Bucknellian Staff Writer from abroad

"What this world needs is another war."

My grandmother often says this statement. It doesn't come from ignorance, as she lived through World War II, but rather from frustration at today's society and all of the problems that it has created. In her view, war would wipe out such troubles and allow the "winner" to start from scratch, without all of the problems that plague the world today.

But can such a statement be true? Perhaps an answer can be found here in Normandy, France, the site of some of the most intense battles of World War II.

During my trip to Normandy, I visited the American cemetery. I started to ponder for the first time what my grandma had talked about: the wars, the armies, the rationing, etc. I thought that perhaps with these visits I could more easily grasp what she had said. But really, it wasn't easier.

I had it all there in front of me: the movies of Omaha Beach et al., the costumes, the stories, the graves, the history. I walked down to the beach and sifted my hands through the sand, trying to perhaps extract some piece of long-lost history. It didn't come. My *comprehension* is there: why the war was fought, what these graves mean, what the cemetery was about. What I didn't feel was the *understanding* of these artifacts. I comprehend that the people in these graves were fighting for peace, freedom and liberty of not only those in Europe, but for those in the United States. Because of their actions, I am able to live my life as freely as I choose.

But at the same time, I am unable to understand, or truly piece together this history. I don't feel grateful, honorable or patriotic. All I see are the graves, the beaches, the memorial artifacts. I have the history and am able to connect to the artifacts with the powers of deduction. What I am not able to do, however, is to realize how such a powerful period has crafted the present day.

To make this issue even more complex, I visited the German cemetery following my trip to La Pointe du Hoc—where France has preserved the landscape from 1942 with crumbling barracks and the obvious craters of enemy bombing. At the German cemetery, I had to further investigate my knowledge of WWII and compare it to what was displayed in front of me.

One way to try to understand the war is in a comparison of the two gravesites. The American one can only be described as "patriotic" with lots of marble, flags waving in the breeze, stone sculptures, fountains, etc. The mood, though serene, was also slightly in-your-face with its patriotic, almost effacing, tone.

My friend explained that for her, the cemetery is "really a celebration and a true commemoration of those individuals who indeed sacrificed literally everything for us—you and me." Fair enough, for I cannot imagine sacrificing my liberties for the advancement of a supreme race. But at the same time, if I cannot even feel the pain of these men, how am I supposed to justify the grandiose establishment in which they are buried?

By contrast, the German cemetery was truly Teutonic in demeanor. The gravesites were marked with a simple dark gray plaque, the sculptures minimal, the flowers tasteful. I cannot say with total certainty that this decor is due to its almost apologetic tone, but the form does follow a general German style—simple yet elegant, functional without being flashy. It did what it did, and made no grand statements. Style over substance.

Once politics enters into the fray and sets aesthetics aside, it is easy enough to notice the absence of the Star of David in the German gravesite.

My first thoughts were, "It's rather ironic that the Germans have the audacity to maintain a gravesite on French ground," but then I looked at the issue again. My brow furrows, even now. Here were German soldiers, some as young as 15, going to fight for a cause they didn't even understand, let alone believe in. They were used by the government to further its cause, as the government measured the pros and cons of slaughtering innocent lives and decided that the former outweighed the latter.

I realize how embarrassing it must be, even now, for the Germans to evoke sympathy for their lost ones. As I was reading one of the testaments from a soldier, I forgot that it was a German soldier I was reading about. The pain and suffering that was conveyed in his writing was evident, though when I realized that it was a German soldier I was reading about, and not one of the Allied Forces, I wanted to say, "But this is what you got yourself into. You died for the wrong cause." And in a way, that's true, I think—fighting for world supremacy only comes at the cost of exterminating countless others, and sacrificing one's country in the meantime.

When I think about it, the horror of so many deaths for an unjust cause comes only second to the extermination in the concentration camps. In the camps death was intentional, and though morally wrong, it was for a "cause." How ironic, then, that the very same "cause" cost millions of German soldiers their lives.

In the gravesite museum, the German pamphlets say how much they are working toward peace and how it must be maintained. How true. I only hope that the intentions therein are as true.

My grandma is wrong when she says, "What this world needs is another war." What she needs to do is to go back and see exactly what war did to the world, and how in some ways we're still recovering from it.

War only creates enemies of fellow human beings, disagreement where there should only be accord, and hate when there should be respect. Some say that war is the only way to achieve these fundamentals. In actuality, war does nothing but destroy them—and in the process, destroys the hope of achieving such basic essentials.

Speak Out

Did you find your foundation seminar was useful, why or why not?

Michelle McAllister '99
"Yes, I definitely found it useful. The class was social justice, and through different readings and discussions it made me view issues differently than before. It caused me to change some of my opinions."

Cary Beattie '99
"I did not think it was that important and I didn't really like it as a speciality freshman class."

Corrie Drummond '98
"I found it useful because it was a class of all freshmen and my advisor was there to be there for us. More than just for academic stimulus, it was nice to have a class of all freshmen."

Kirsten McLaughlin '97
"No it wasn't useful at all because it did not provide a framework for any of the other courses I took at Bucknell."

FOUNDATION SEMINARS

From page 5

ports and projects all semester long. And it didn't correlate to my major either." The fact of the matter is that the foundation seminar, dedicated to easing a student into his or her freshman year, may force him to pay less attention to his core requirements.

There are a variety of solutions to some of the problems that foundation seminars currently are presenting:

a) The best foundation seminar at Bucknell is EG 100. The focus of this seminar is to help all prospective engineering students become accustomed to certain aspects of their field. Why can't all foundation seminars be this way? Our course handbook should divide each explanation of foundation seminars to lists under majors. For example, all foundation seminars that deal with economics should be listed under this course title. This will help students make more intelligent decisions on what foundation seminars to choose.

b) There should be a preference system for choosing foundation seminars. When freshmen choose their foundation seminars, they have to put six checks next to the foundation seminars of their choice. This is no way of indicating which seminar they'd rather prefer. If a freshman received a first choice seminar, chances are he or she will be more interested in the course.

c) Students should be given a choice on whether or not to take a foundation seminar. There are certain students at this school who are already very strong writers and who are very decisive on their majors. In some cases, they may be thinking about an honors thesis before the first day of class starts. Others do have difficulties in research and may find a foundation seminar extremely useful to build their skills. To solve this problem, foundation seminars should only be required for students who have not scored a four or above on certain AP exams in the social sciences. This will give those extremely well qualified students the option of diving into the major earlier.

It seems that our faculty intends for our foundation seminars to broaden our horizons, help us get adjusted to Bucknell, and possibly lead us to a decision on our majors. In essence, a foundation seminar could be an excellent experience.

But in order for this to happen, we need a more organized choice system for foundation seminars, as well as the option of certain well prepared students being exempt from the foundation seminar requirement.

As the faculty may see foundation seminars as rather flexible, it is time that the students stop seeing them as tedious.

SCIENCE AND TECHNOLOGY

Astronaut comes in for a landing at the University

BY ALISON DUGAN

Imagine being part of NASA at the onset of a new era of technological advance. Imagine being one of the pioneering women involved in the space program. Imagine being able to circle the earth 18 times a day.

Rhea Seddon, Ph.D, this year's Health Scholar in Residence, has experienced these opportunities not once, but three times. Seddon made her three space flights in 1985, 1991 and 1993.

Seddon spent the early part of the week in visitation to the University, giving lectures and speaking to classes.

Afer receiving her bachelor's degree from the University of California at Berkeley and her doctorate of medicine from the University of Tennessee College of Medicine, Seddon began her career as a physician.

Seddon is married to fellow astronaut Robert "Hoot" Gibson. She is mother to four children, including Julie Gibson '98, an International Relations and French major.

"I had plans to be a physician, but I was really interested in the space program and I remembered its beginnings. I thought, 'wouldn't it be fun to be on a space station as a doctor?' I did some things to prepare myself to get into NASA later on. I diversified my studies and kept myself in good shape," Seddon said.

"As I finished my residency, I found out for the first time that NASA had plans to take physicians, scientists and women on a life sciences space mission. I seized the opportunity and applied to the program in 1977."

As part of the life sciences space mission in 1991, Seddon participated in 18 different experiments over the course of nine days.

These experiments were designed to test the effects of weightlessness on the body. They investigated both physical and sensory reactions to the changed environment.

Seddon commented that, "one of the most interesting things was learning to work in this brand new environment where even walking was difficult."

The first of a series of tests studied lung function in space. As a result of weightlessness, fluid in the body shifts towards the abdominal region. The shifting was thought to cause fluid to enter the lungs and decrease lung capacity. The results of various inhalation and exhalation exercises evidenced the fact that the body is capable of adapting to new conditions.

Astronauts found that muscles atrophy in space in the same manner they atrophy from disuse on Earth. Since the calf muscles in the lower leg were not required for mobility and support, much of the blood and fluids normally present in the legs shifted to other parts of the body.

This not only resulted in slight atrophy of the calf muscles, but also in a lowering of blood pressure. These adverse effects could be felt by the astronauts for weeks after they returned from space.

An experiment designed to test perception used visual stimuli to investigate the ability of the body to perceive motion. Under normal conditions, gravitational pressure on the inner ear acts as a system of balance in the body.

Since there is no pressure acting on the inner ear in space, the body adapts by using the eye to determine balance. To test this, an astronaut was secured in front of a rotating tube. As the eyes focused on the moving cylinder, the body responded by sensing that it too, was in motion.

Seddon recalls her experiences as times of continual learning. Her career with NASA has now led her to Vanderbilt University in Nashville, TN, where she was raised.

While she is no longer employed as a full time astronaut, Seddon conducts experimental research for NASA two days a week. The rest of her time is spent working in the medical center at the University.

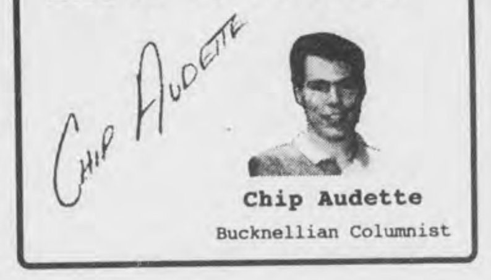
Seddon's career has been anything but traditional and when asked of her experiences, she replied, "There are times when I wondered what I was doing, but it is definitely very interesting work."

STS
40
RHEA SEDDON

Rhea Seddon, Ph.D. and astronaut, is also the mother of Julie Gibson '98. Seddon is married to fellow astronaut Robert "Hoot" Gibson.

New technology: Acoustics used to make ice, keep drinks cold

How it Works



Chip Audette
Bucknellian Columnist

As part of our mechanical engineering senior design project, fellow senior design members and myself are joining talents with Charles Kinsley, professor of mechanical engineering, to try to build a thermoacoustic refrigerator. A thermoacoustic refrigerator is unlike any other refrigerator available today because it cools simply with sound. By eliminating the need for ozone damaging chemicals like the ones present in today's refrigerators, this type of refrigerator could satisfy an ever increasing need for a reliable, efficient, yet environmentally-friendly refrigerator.

We are working to design and build a device which will use sound to cool water. Using sound as a source of refrigeration is a technology which is still very early in its development. Many issues involved with building efficient thermoacoustic devices have yet to be explored and there is great opportunity for advancement. Therefore, we will spend this semester learning about thermoacoustic refrigeration as well as designing an actual thermoacoustic device. Next semester, the device will be built.

The ability to cool with sound is based on what is known as the thermoacoustic effect. The thermoacoustic effect describes the relationship between sound waves and temperature changes in a gas. This effect says that sound can be used to heat and cool air, or, conversely, that hot and cold air can be used to create sound. In a thermoacoustic refrigerator, the thermoacoustic effect is used to create a region of cold air by using powerful sound waves.

To understand this phenomenon, it is necessary to understand that sound is really just our perception of pressure waves which pass through the air. These waves are small fluctuations in localized air pressure which travel through the air like waves. Just as there are peaks and troughs in the waves on a pond, there are peaks and troughs in pressure waves. In pressure waves, however, the "peaks" are regions of high pressure and the "troughs" are regions of low pressure. As a parcel of gas is pushed around by a passing pressure wave, it is alternatively compressed by the high pressure region and expanded by the low pressure region. Gases, by their nature, will become hot when compressed and will become cool when expanded. Therefore, the temperature of a parcel of gas will oscillate between hot and cold as it is affected by the pressure waves.

To actually build a device which cools using the thermoacoustic effect, then, it is necessary to have some sort of gas and something to make sound. The heart of a thermoacoustic refrigerator, therefore, is a tube full of gas, usually air or helium. At one end of the tube is a powerful speaker to create sound. If the tube is the right length and the sound is at the right frequency, this device will be able to create a region of cool air within the tube. Usually, however, a collection of small water pipes are inserted into the tube so that water can be cooled. This water could then be used to cool the main compartment of the refrigerator where food is kept.

The interesting part of the device is that the sound level required to achieve any noticeable cooling effect is *extremely* high. The sound level inside the tube of gas needs to be around 170 dB (or louder) to induce a usable temperature difference. For comparison, the sound level of normal conversation is measured around 60 dB while a rocket blasting off is measured around 150 dB. Because the sound inside of the device is louder than a rocket, there will be real difficulty in making a device which, outside of the tube, is quiet enough to sit in someone's kitchen.

The design and construction of a thermoacoustic refrigerator will hold many unforeseen difficulties because this is a new technology with little history and few previous examples.

Cooking with Katie

KATIE JONES

CORNMEAL CRUSTED ONION RINGS

Cluttered with rampant flavor and teary-eyed aroma, these onion rings demand attention. They offer a sweet and crunchy alternative to the grease clogged variety gobbled with an amusement park burger. Not only are they lower in overall fat, but the use of olive oil (*very* low saturated fat: 2g/14g) replaces the artery blocking extravaganza with a distinctively trendy stamp.

Ingredients:

1 small red onion
2 eggs
1/4 cup milk
1/2 cup flour
3/4 cup white stoneground cornmeal
1 T finely grated Parmesan
1-2 t freshly ground black pepper
1 t coarse salt
2 garlic cloves, sliced into quarters
1 T olive oil

Prepare onion:
Slice onion into 1/4 inch wedges, popping out rings. Set aside.

Prepare flour mixture:
Measure flour into a second bowl, whisk in salt and pepper.

The amount of flour will vary, so don't worry about exact measurement... as for the salt and pepper, adjustments may be necessary depending on your taste.

Prepare egg batter:
In a small wide mouthed bowl, lightly beat eggs with milk.

Prepare cornmeal:
In a third bowl, whisk together cornmeal and parmesan.

Prepare RINGS:
Returning to the onion rings, start with 2 or 3; place in flour mixture, shaking until coated. Dip into egg batter, and submerge in the cornmeal. Place on a baking sheet, in one layer. Repeat steps until all rings are covered.

Heat the olive oil in a non-stick skillet on medium. Add garlic quarters, and allow them to cook until their aroma becomes noticeable. This is known as infusing oil, in this case, "garlic infused oil." Remove cloves, and discard; garlic is done as soon as you can smell it, so be careful not to burn it.

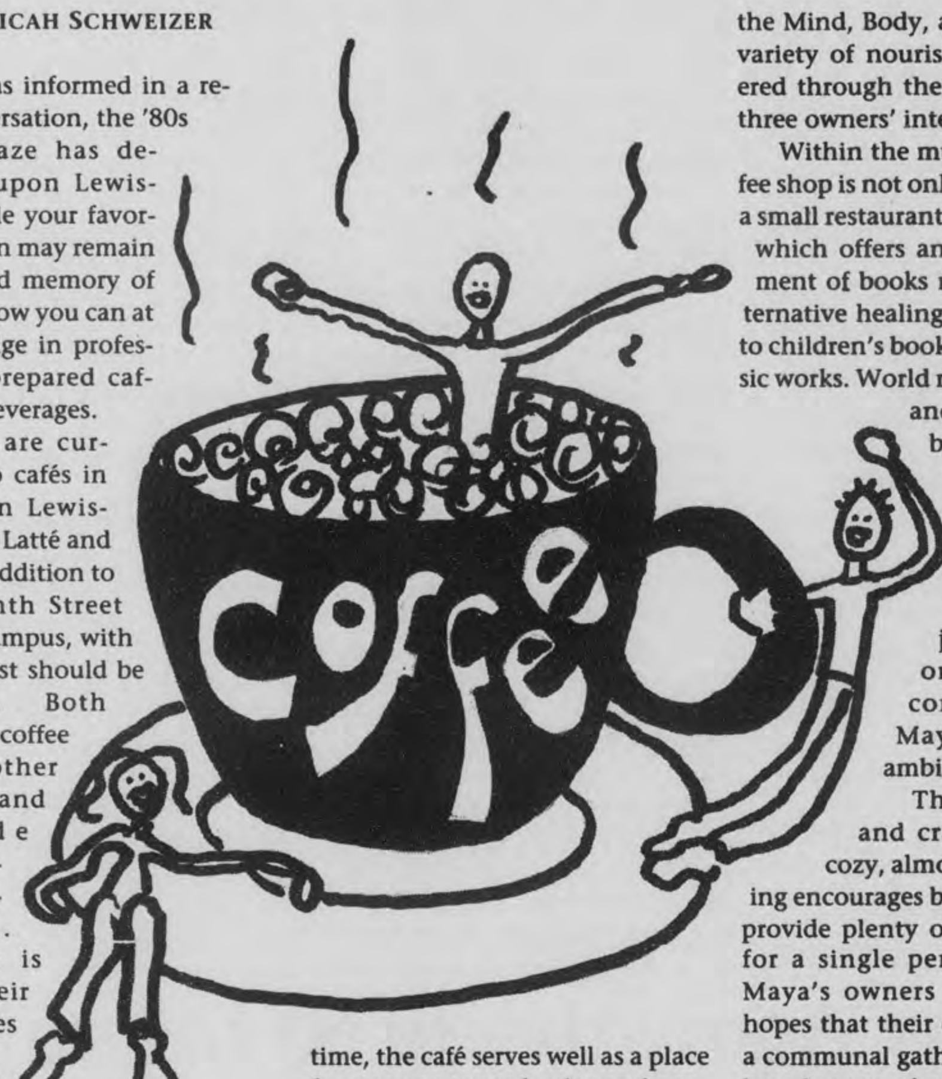
Carefully place battered rings in hot oil, nesting them so as to fit them in the skillet. Cover and cook for about 3 minutes, checking to be sure they don't burn. Flip and continue heating, uncovered until both sides are golden and crisp.

Serve immediately.

Notes: The charm of these onion rings is not only in the intrigue that they lend to your palate, as their superficial smile also invokes vain curiosity. The purple tone of the red onion is well accented by the golden cornmeal, which allows them to be served as an almost elegant side dish, as opposed to their boring cousins. They're quite tasty with omelettes, grilled chicken or *Portabella Mushroom Vegetable Burgers*... next week!

Local Color: Stimulating cafes for the coffee and book lover alike

By Micah Schweizer



As I was informed in a recent conversation, the '80s coffee craze has descended upon Lewisburg. While your favorite '80s icon may remain a cherished memory of the past, now you can at least indulge in professionally prepared caffeinated beverages.

There are currently two cafés in downtown Lewisburg, Café Latté and Maya (in addition to the Seventh Street Café on campus, with which most should be familiar). Both serve fine coffee (and other goodies) and provide unique atmospheres. But that is where their similarities end.

Café Latté, located at 21 North Third Street (right around the corner from CVS), provides a comfortable and uncomplicated atmosphere for its customers. Inspired by the Seattle coffee scene, owners Joyce and Jay Schwenk advertise Café Latté as "Seattle's Sunshine in a Cup," suggesting that it may serve as an antidote to rain and a place of comfort.

Although this café is spatially open, consisting of two rooms and some outdoor seating in front and in a back court-yard, the atmosphere is surprisingly private and confidential. Yet at the same time, one is not secluded.

The owners intend for their café to be a gathering place for both the University and the Lewisburg communities. At the same time, the café serves well as a place for a person to read, relax and ponder alone or with a newspaper and a cup of coffee.

The café's menu covers standard, but high quality, coffee shop fare: baked goods of many sorts, ice cream, sandwiches and a broad range of hot and cold beverages. Additionally, Café Latté offers an evening of poetry on the third Wednesday of each month, where all are welcome to try out original works on the audience or read the tried and true.

Café Latté is open Monday through Friday from 7 a.m. until 9 p.m., Saturday from 8 a.m. until 9 p.m., and Sunday from 8 a.m. until 5 p.m.

Maya, located at 113 Market Street, between Front and Second Streets, is the newest café in town. As the sign at the entrance states, Maya provides "Nourishment for the Mind, Body, and Spirit." This variety of nourishment is delivered through the merging of the three owners' interests.

Within the multi-roomed coffee shop is not only a café, but also a small restaurant and a bookstore which offers an eclectic assortment of books ranging from alternative healing and spirituality to children's books and some classic works. World music is also sold and played in the background, and there is a strong Native American theme, exhibited through books, jewelry and decorations, which contributes to Maya's distinctive ambiance.

The many nooks and crannies and the cozy, almost cluttered feeling encourages browsing and can provide plenty of entertainment for a single person. However, Maya's owners express strong hopes that their café may also be a communal gathering place for a broad range of people. Specifically, they hope to tap into the University population.

In addition to fine coffee of many sorts, the café offers classy, vegetarian based food which is prepared fresh on a daily basis by co-owner Kerry Hoffman, who studied at the Pittsburgh Culinary Institute. A light meal is not at all out of the question at Maya.

Maya is closed on Mondays. From Tuesday through Thursday it is open from 10 a.m. until 6 p.m. Saturday and Sunday it's open from 10 a.m. until 5 p.m.

Both of these cafés offer their own type of coffee shop experience and have appeals that will beckon to different people at different times. I recommend giving both a try. In addition to Café Latté and Maya, two more cafés will be coming to Lewisburg in the not too distant future.

I imagine that with all this caffeine pulsing through the veins of Lewisburg, a night life can't be too far away. However, until then, I will do my best to inform the readers of this column about happenings and activities in the area.

Jonah Half—The Bucknellian

Micah Schweizer:

New columnist

Local Color will be a biweekly column right here in the Features section.

You'll find Micah Schweizer '00 to be a fascinating host on a journey through the area. From local businesses to outdoor adventures, Schweizer will introduce you to the world that lies right here in Central Pennsylvania.

Having lived in the area for eight years, Schweizer has spent a good deal of time delving into some serious local adventuring. Along the way he has found things to do to amuse himself and intends to pass his findings on to the University Community.

Schweizer says his journalistic inspiration comes from the French comic strip character, Tin Tin.

WANTED: The Siskel and Ebert of Food

Win free dinners to restaurants of your choice... and your own column in The Bucknellian!

The Scoop

I know that we Americans, Generation X'ers and Bucknellians just love to go out to eat. So what I ask is that those of you who consider yourselves experts at such endeavors stand tall, come forth and proclaim to Bucknellians near and far your opinion of local restaurants. *The Bucknellian* Features section invites you to participate in a battle of sorts: a "food critic" contest.

Prize

**There are rewards to having read this far... *The Bucknellian* will pick up your check for each of your monthly outings that you will review.

**A monthly feature in *The Bucknellian* created by you... you'll keep students, faculty, staff and parents posted on the best and worst of local restaurants.

Rules

1. You (or with a partner would be especially interesting...) dine at a restaurant of your choice.
2. Come up with a critique of the restaurant, the food, the prices, the ambiance, the service, the menu and whatever else you feel so inclined to include.
3. Write up your restaurant review as if it were to appear in *The Bucknellian*.
4. Mail a copy of your review to Box C2099 or to *The Bucknellian*, attention to Features by November 8.
5. Remember that you are not advertising for this restaurant. Be honest about your opinion.
6. Questions, comments, concerns? Call Melissa at x5364.

Students rally against rape and sexual assault

Signing to "Unite against rape and sexual assault," these students show support for victims. The sign was an effort to show campus-wide support and to commit to not tolerating violence and abuse at the University.

All photos taken by Beetna Kim

> ***The letter from Dean Chapman and President Adams brought to our attention the seriousness of the frequency of rape and sexual assault on this campus. As a result, we created a coalition for the purpose of bringing this issue into the consciousness of our community. In order to develop this consciousness, we decided that we needed to take action and move beyond the written word. This rally is action. We hope to bring people together not only as individuals, but as a larger community that demands respect of each other.***
>
> *—Statement of purpose by concerned students that planned the rally against rape and sexual assault*

Students think and absorb the statistics, facts and statements presented to them about sexual assault—a harsh reality on our campus.

Upper right: President William D. Adams attended the rally and spoke to let the community know in person that neither he nor the University will tolerate rape or sexual assault.

Left: Laura Plaskin '97 explained that 78 women are raped every hour. Stickers to make this known and remembered were worn by many.

Kari Conrad, director of housing and residential life, looks on as Jim Wiltgen of student housing brings a startling statistic to light: One in four college women are raped. Wiltgen brought this home using his family as an example, which would mean that according to this statistic one of his four sisters would have been raped.

Students look on as Nathan Grossman '99 reads the letter from Dean of Students Richard Chapman and President Adams that first informed students of the seven reported sexual assaults that occurred so far this semester.

The purposes of this rally *are not limited to but most definitely include the following:*

1. To provide support for survivors of sexual assault and rape

2. To raise community awareness of the many elements that play a role in sexual assault and rape including:
- *the definition of sexual assault and rape*
- *the link between alcohol and sexual assault and rape*
- *resources available*
- *sexual assault and rape prevention strategies*

And finally, we want to catalyze a community response to the occurrences of rape and sexual assault on this campus

If you are interested in joining this newly formed group, contact Mukta Dhurnale at x5600.

Cooking with Katie

KATIE JONES

CORNMEAL CRUSTED ONION RINGS

Cluttered with rampant flavor and teary-eyed aroma, these onion rings demand attention. They offer a sweet and crunchy alternative to the grease clogged variety gobbled with an amusement park burger. Not only are they lower in overall fat, but the use of olive oil (*very* low saturated fat: 2g/14g) replaces the artery blocking extravaganza with a distinctively trendy stamp.

Ingredients:

1 small red onion
2 eggs
1/4 cup milk
1/2 cup flour
3/4 cup white stoneground cornmeal
1 T finely grated Parmesan
1-2 t freshly ground black pepper
1 t coarse salt
2 garlic cloves, sliced into quarters
1 T olive oil

Prepare onion:
Slice onion into 1/4 inch wedges, popping out rings. Set aside.

Prepare flour mixture:
Measure flour into a second bowl, whisk in salt and pepper.

The amount of flour will vary, so don't worry about exact measurement... as for the salt and pepper, adjustments may be necessary depending on your taste.

Prepare egg batter:
In a small wide mouthed bowl, lightly beat eggs with milk.

Prepare cornmeal:
In a third bowl, whisk together cornmeal and parmesan.

Prepare RINGS:
Returning to the onion rings, start with 2 or 3; place in flour mixture, shaking until coated. Dip into egg batter, and submerge in the cornmeal. Place on a baking sheet, in one layer. Repeat steps until all rings are covered.

Heat the olive oil in a non-stick skillet on medium. Add garlic quarters, and allow them to cook until their aroma becomes noticeable. This is known as infusing oil, in this case, "garlic infused oil." Remove cloves, and discard; garlic is done as soon as you can smell it, so be careful not to burn it.

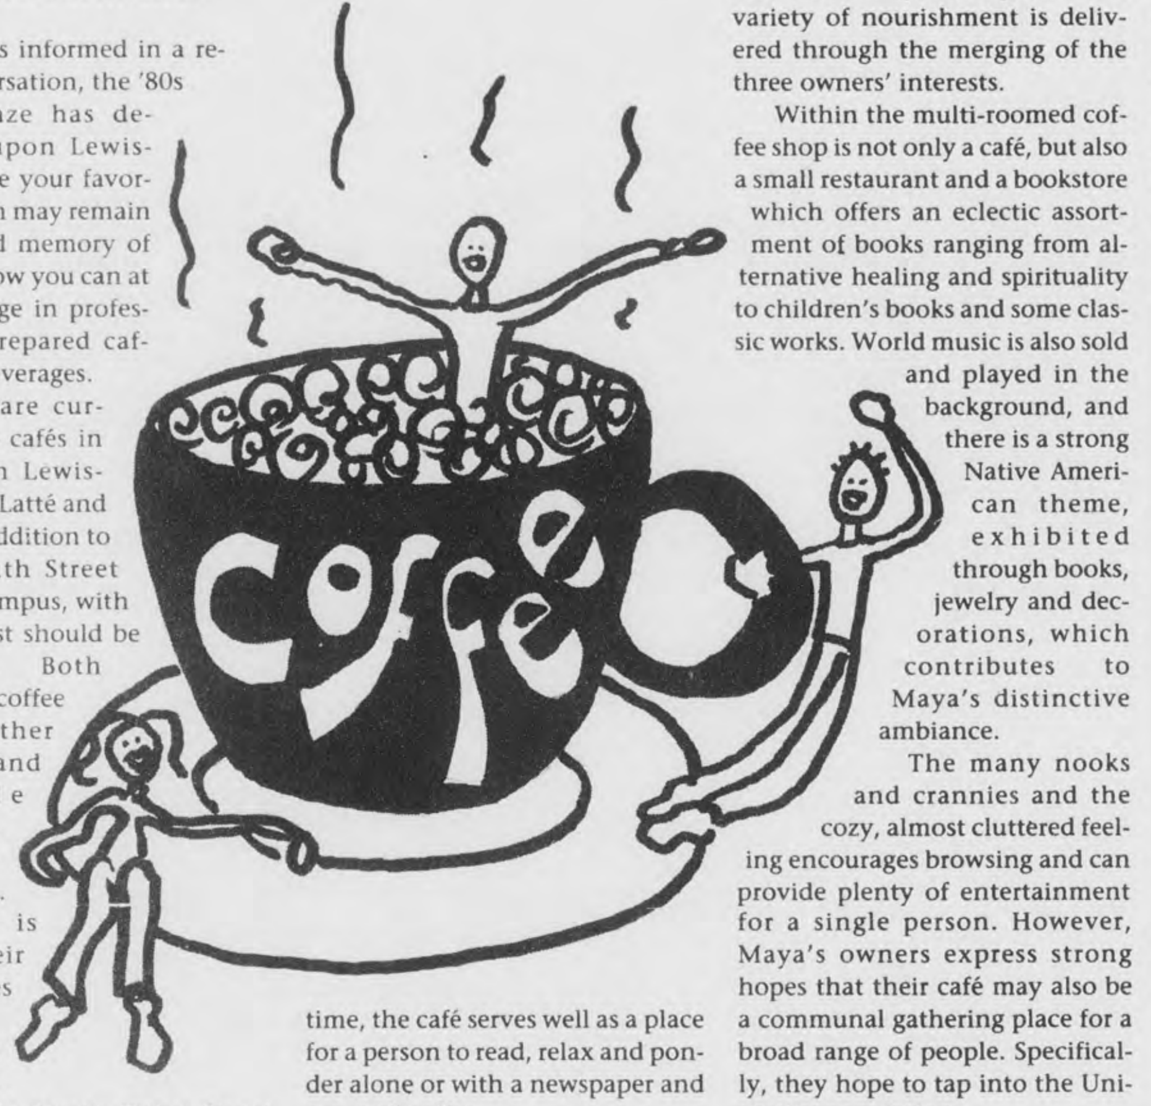
Carefully place battered rings in hot oil, nesting them so as to fit them in the skillet. Cover and cook for about 3 minutes, checking to be sure they don't burn. Flip and continue heating, uncovered until both sides are golden and crisp.

Serve immediately.

Notes: The charm of these onion rings is not only in the intrigue that they lend to your palate, as their superficial smile also invokes vain curiosity. The purple tone of the red onion is well accented by the golden cornmeal, which allows them to be served as an almost elegant side dish, as opposed to their boring cousins. They're quite tasty with omelettes, grilled chicken or *Portabella Mushroom Vegetable Burgers*... next week!

Local Color: Stimulating cafes for the coffee and book lover alike

BY MICAH SCHWEIZER



As I was informed in a recent conversation, the '80s coffee craze has descended upon Lewisburg. While your favorite '80s icon may remain a cherished memory of the past, now you can at least indulge in professionally prepared caffeinated beverages.

There are currently two cafés in downtown Lewisburg, Café Latté and Maya (in addition to the Seventh Street Café on campus, with which most should be familiar). Both serve fine coffee (and other goodies) and provide unique atmospheres. But that is where their similarities end.

Artist to present "That Ain't No Way to Treat a Lady"

Nancy Hulse to protest violence against women with multimedia performance; presentation to highlight National Domestic Violence Awareness Month

BY ANNE PUTNAM
Bucknellian Staff Writer

Did you know that there are twice as many animal shelters in the United States than battered women shelters?

Any more frightened knowing one out of every four women in the US will be raped before she is 21 years old? How do you feel knowing that every nine seconds a woman is battered in the United States?

These appalling statistics of domestic violence will be highlighted during "That Ain't No Way to Treat a Lady," an upcoming program sponsored by the Women's Resource Center and Susquehanna Valley Women in Transition.

Nancy Hulse, a performance artist, will demonstrate against domestic violence using a multimedia approach. Her program will include music, dance, poetry, video segments and audience participation. Often she chooses a male from the audience to assist in her performance.

Originally from North Adams, Massachusetts, Hulse became a performance artist while counseling women in crisis, after receiving a bachelor's degree from Corpus Christi University in Texas. Her passion to educate others on domestic violence came from personal experience.

Hulse was married with three children, when her marraige became abusive. She was able to escape her husband and began the fight for others like herself. Unfortunately, the abuse struck again. This time, her daughter was the victim of domestic violence.

Hulse combined her talents to form "Womankind," a weekly call-in cable TV show that includes issues confronting women today.

Hulse feels that the word "women" is too gender specific and tries to avoid this by replacing it with "womyn."

The use of "womyn" and her feeling that society tolerates violence are just a few of Hulse's ideologies.

Hulse is deeply devoted to the war against violence and combats violence using different methods.

Within her performance, she uses props to develop an example relationship. This relationship begins normally; emphasizing the point that anyone can be involved. Verbal confrontation begins the violence and develops to show how abuse culminates.

Following her depiction of violence, Hulse's ideals highlight possible solutions with the audience's heightened awareness of the pervasive violence in our culture.

Hulse's first aim to stop domestic violence is to involve discussions of battered women with a focus on men.

She feels this change of focus is the beginning of a solution to get somewhere. Women, by stopping everything, create a venue for change. Hulse believes that women must do the following things in order to stop the violence against women:

"Stop taking care of men. Stop having sex. Stop going to church. Stop voting."

Hulse says that these ideals, if implemented by women, would paralyze the United States.

Hulse has said, "I'll perform any place [with the] hope if I educate people, domestic violence will stop."

Nancy Hulse will be visiting the campus Monday at 7:30 p.m. to perform in Langone's Gallery Theater.

> ***"Stop taking care of men. Stop having sex. Stop going to church. Stop voting."***
> *—Nancy Hulse, guest speaker on domestic violence and sexual assault*

The Women's Resource Center joins forces with Susquehanna Valley Women in Transition to bring performance artist Nancy Hulse to the University to raise greater consciousness and demonstrate against domestic violence.

Dance the Salsa at Cumbre Coffeehouse

Two popular Hispanic dances to be taught by club's students and faculty

BY RACHEL DOEBBER
Bucknellian Staff Writer

"We're just out to have fun. We're a happy people who love to dance," said Sukie Claudio '99, co-president of Cumbre, about Cumbre's sponsoring of Coffeehouse.

Cumbre, which means "peak" in Spanish, is a club which according to Claudio, "offers support to students of Hispanic origin and information about Hispanic culture to the campus."

Hispanic students "need an outlet where they can discuss ideas related to being Hispanic in a supportive and comforting atmosphere since this campus is very homogenous," Claudio said when asked about the purpose of Cumbre at the University.

"However, one does not need to be of Hispanic descent in order to be a member of Cumbre. They just need to have an interest in Hispanic culture and ideas," she said.

Margarita Scott '99, one of the acting vice-presidents of Cumbre, said that Cumbre's Salsa Party, held last year in the Seventh Street Cafe where they taught Hispanic dances, was so successful that they decided to host a Cumbre Coffeehouse where they would teach the salsa and merengue.

Why teach these two dances as opposed to other Hispanic dances?

According to Scott, the salsa and merengue are two of the most popular form of Hispanic dances and performed often in Hispanic culture.

The members of Cumbre who will be teaching those interested in learning to dance the salsa and merengue are mostly students of Puerto Rican descent and members of the outside community, including faculty of Hispanic origin.

Cumbre Coffeehouse is being presented in recognition of the focus semester, Latin American studies, and according to Scott, "to promote Cumbre."

The campus is invited to dance salsa-style with the members of Cumbre at Coffeehouse at 9 p.m. on Wednesday in the Bison.

Company to hit Tustin Theatre with "Crisis"

This student produced and directed production portrays a comic look at a very unique family and their life together

BY DAVID CARPENTER
Bucknellian Staff Writer

Ready to start a new season here at Bucknell, Company, a student-run production theater experience, will be performing their fall one act play, "'dentity Crisis,"

The play, "'dentity Crisis", written by Chris Durang and directed by Kristin Belaski '98, is a crazy comedy about one messed up family, where the son, Robert (Chris Scholl '99) is also the granddad, father and a French count. The mother, Edith, (Nisa Bryant '98) thinks she invented cheese and is in love with her son, husband and the count all at the same time. While this is going on, the daughter Jane, (Elena Dodge '99) tries to figure out her life with her psychologist, Mr. Summers (Rich Dionne GR), who, let's just say, did some role playing with his wife Mrs. Summers (Kim Kalaher '98).

Confused? Well, the one way to figure out this crisis is to see "'dentity Crisis."

This is the first time that Company has done a comedy. The history of the theater troupe is short, but rapidly growing with each production. In the spring semester of 1994, an two-month opening in which there would be no plays existed in the University's theatrical schedule. This was because Bob Gainer, associate professor of theatre, went on a sabbatical.

"At that time we wanted to create a unique experience of direction and production," said Stacy Ayrton, who is the co-founder of the group along with Dionne.

"The goal of Company was to have the students do every aspect of a show from producing and directing to running lights and publicity," Dionne added.

The first play the company performed was "Chocolate Cake," which was directed by Karen Forgione '99. She is now the producer of "'dentity Crisis."

Company continued with a few more performances last year and the year before, including "The Intruder" and "Anecdotes."

"No facilities were open for the spring of last year, and this presented a problem," Ayrton continued, relating the history of Company. "Rich found out about a play that Ken Irving '96 wrote. Since he was doing it for his senior thesis, we were able to get the use of Tustin to perform it and "Anecdotes" was born."

This year, an experienced and seasoned member of Company was needed to direct the fall one-act play. The person that came to mind was Belaski, who is making her directorial debut.

"The play was chosen by me after reading honestly thousands of one acts," Belaski related one day before rehearsal. "I really wanted to do a comedy and this is something that Company hasn't tried to do."

In this play, Jane is living around crazy people telling her lies, which in turn leads Jane on her journey to insanity.

"I like how this play, in its own unique way, relates to everyday life," Belaski said. "People can have their own strong opinions about something and outside society can tell you something different and you begin to believe what society says."

The playwright Christopher Durang, who attended Yale Drama School, went through a period of depression, just like his main character Jane does. Belaski, admiring his work, said, "Chris Durang generates a unique style of humor: strong and sometimes dark, but never black, absurd, but relevant and insightful."

A messed up comedy about insane families, split personalities, a lovestruck count, the invention of cheese, sex changes, Tinkerbell and even some banana bread, "'dentity Crisis" will be presented at 7 p.m. Saturday in Tustin Studio Theater.

Admission is free to everyone. Tomorrow evening there will be an open dress rehearsal for anyone who can't make the Saturday night performance or just wants to come see it that night.

> ***"The play was chosen by me after reading honestly thousands of one acts. I really wanted to do a comedy and this is something that Company hasn't tried to do."***

Artist to present "That Ain't No Way to Treat a Lady"

Nancy Hulse to protest violence against women with multimedia performance; presentation to highlight National Domestic Violence Awareness Month

BY ANNE PUTNAM
Bucknellian Staff Writer

Did you know that there are twice as many animal shelters in the United States than battered women shelters?

Any more frightened knowing one out of every four women in the US will be raped before she is 21 years old? How do you feel knowing that every nine seconds a woman is battered in the United States?

These appalling statistics of domestic violence will be highlighted during "That Ain't No Way to Treat a Lady," an upcoming program sponsored by the Women's Resource Center and Susquehanna Valley Women in Transition.

Nancy Hulse, a performance artist, will demonstrate against domestic violence using a multimedia approach. Her program will include music, dance, poetry, video segments and audience participation. Often she chooses a male from the audience to assist in her performance.

Originally from North Adams, Massachusetts, Hulse became a performance artist while counseling women in crisis, after receiving a bachelor's degree from Corpus Christi University in Texas. Her passion to educate others on domestic violence came from personal experience.

Hulse was married with three children, when her marraige became abusive. She was able to escape her husband and began the fight for others like herself. Unfortunately, the abuse struck again. This time, her daughter was the victim of domestic violence.

Hulse combined her talents to form "Womankind," a weekly call-in cable TV show that includes issues confronting women today.

Hulse feels that the word "women" is too gender specific and tries to avoid this by replacing it with "womyn."

The use of "womyn" and her feeling that society tolerates violence are just a few of Hulse's ideologies.

Hulse is deeply devoted to the war against violence and combats violence using different methods.

> *"Stop taking care of men. Stop having sex. Stop going to church. Stop voting."*
> *—Nancy Hulse, guest speaker on domestic violence and sexual assault*

Within her performance, she uses props to develop an example relationship. This relationship begins normally; emphasizing the point that anyone can be involved. Verbal confrontation begins the violence and develops to show how abuse culminates.

Following her depiction of violence, Hulse's ideals highlight possible solutions with the audience's heightened awareness of the pervasive violence in our culture.

Hulse's first aim to stop domestic violence is to involve discussions of battered women with a focus on men.

She feels this change of focus is the beginning of a solution to get somewhere. Women, by stopping everything, create a venue for change. Hulse believes that women must do the following things in order to stop the violence against women:

"Stop taking care of men. Stop having sex. Stop going to church. Stop voting."

Hulse says that these ideals, if implemented by women, would paralyze the United States.

Hulse has said, "I'll perform any place [with the] hope if I educate people, domestic violence will stop."

Nancy Hulse will be visiting the campus Monday at 7:30 p.m. to perform in Langone's Gallery Theater.

The Women's Resource Center joins forces with Susquehanna Valley Women in Transition to bring performance artist Nancy Hulse to the University to raise greater consciousness and demonstrate against domestic violence.

Dance the Salsa at Cumbre Coffeehouse

Two popular Hispanic dances to be taught by club's students and faculty

BY RACHEL DOEBBER
Bucknellian Staff Writer

"We're just out to have fun. We're a happy people who love to dance," said Sukie Claudio '99, co-president of Cumbre, about Cumbre's sponsoring of Coffeehouse.

Cumbre, which means "peak" in Spanish, is a club which according to Claudio, "offers support to students of Hispanic origin and information about Hispanic culture to the campus."

Hispanic students "need an outlet where they can discuss ideas related to being Hispanic in a supportive and comforting atmosphere since this campus is very homogenous," Claudio said when asked about the purpose of Cumbre at the University.

"However, one does not need to be of Hispanic descent in order to be a member of Cumbre. They just need to have an interest in Hispanic culture and ideas," she said.

Margarita Scott '99, one of the acting vice-presidents of Cumbre, said that Cumbre's Salsa Party, held last year in the Seventh Street Cafe where they taught Hispanic dances, was so successful that they decided to host a Cumbre Coffeehouse where they would teach the salsa and merengue.

Why teach these two dances as opposed to other Hispanic dances?

According to Scott, the salsa and merengue are two of the most popular form of Hispanic dances and performed often in Hispanic culture.

The members of Cumbre who will be teaching those interested in learning to dance the salsa and merengue are mostly students of Puerto Rican descent and members of the outside community, including faculty of Hispanic origin.

Cumbre Coffeehouse is being presented in recognition of the focus semester, Latin American studies, and according to Scott, "to promote Cumbre."

The campus is invited to dance salsa-style with the members of Cumbre at Coffeehouse at 9 p.m. on Wednesday in the Bison.

Company to hit Tustin Theatre with "Crisis"

This student produced and directed production portrays a comic look at a very unique family and their life together

BY DAVID CARPENTER
Bucknellian Staff Writer

Ready to start a new season here at Bucknell, Company, a student-run production theater experience, will be performing their fall one act play, "'dentity Crisis,"

The play, "'dentity Crisis", written by Chris Durang and directed by Kristin Belaski '98, is a crazy comedy about one messed up family, where the son, Robert (Chris Scholl '99) is also the granddad, father and a French count. The mother, Edith, (Nisa Bryant '98) thinks she invented cheese and is in love with her son, husband and the count all at the same time. While this is going on, the daughter Jane, (Elena Dodge '99) tries to figure out her life with her psychologist, Mr. Summers (Rich Dionne GR), who, let's just say, did some role playing with his wife Mrs. Summers (Kim Kalaher '98).

> *"The play was chosen by me after reading honestly thousands of one acts. I really wanted to do a comedy and this is something that Company hasn't tried to do."*
> *——Kristin Belaski '98, director*

Confused? Well, the one way to figure out this crisis is to see "'dentity Crisis."

This is the first time that Company has done a comedy. The history of the theater troupe is short, but rapidly growing with each production. In the spring semester of 1994, an two-month opening in which there would be no plays existed in the University's theatrical schedule. This was because Bob Gainer, associate professor of theatre, went on a sabbatical.

"At that time we wanted to create a unique experience of direction and production," said Stacy Ayrton, who is the co-founder of the group along with Dionne.

"The goal of Company was to have the students do every aspect of a show from producing and directing to running lights and publicity," Dionne added.

The first play the company performed was "Chocolate Cake," which was directed by Karen Forgione '99. She is now the producer of "'dentity Crisis."

Company continued with a few more performances last year and the year before, including "The Intruder" and "Anecdotes."

"No facilities were open for the spring of last year, and this presented a problem," Ayrton continued, relating the history of Company. "Rich found out about a play that Ken Irving '96 wrote. Since he was doing it for his senior thesis, we were able to get the use of Tustin to perform it and "Anecdotes" was born."

This year, an experienced and seasoned member of Company was needed to direct the fall one-act play. The person that came to mind was Belaski, who is making her directorial debut.

"The play was chosen by me after reading honestly thousands of one acts," Belaski related one day before rehearsal. "I really wanted to do a comedy and this is something that Company hasn't tried to do."

In this play, Jane is living around crazy people telling her lies, which in turn leads Jane on her journey to insanity.

"I like how this play, in its own unique way, relates to everyday life," Belaski said. "People can have their own strong opinions about something and outside society can tell you something different and you begin to believe what society says."

The playwright Christopher Durang, who attended Yale Drama School, went through a period of depression, just like his main character Jane does. Belaski, admiring his work, said, "Chris Durang generates a unique style of humor: strong and sometimes dark, but never black, absurd, but relevant and insightful."

A messed up comedy about insane families, split personalities, a lovestruck count, the invention of cheese, sex changes, Tinkerbell and even some banana bread, "'dentity Crisis" will be presented at 7 p.m. Saturday in Tustin Studio Theater.

Admission is free to everyone. Tomorrow evening there will be an open dress rehearsal for anyone who can't make the Saturday night performance or just wants to come see it that night.

Patriot League Player of the Week:
Susie Teitsworth '97 was named Patriot League Defensive Player of the Week in volleyball for the third time this year.

Bison stampede Tigers into mud

Jonah Half—The Bucknellian

Terence Parham '98, races to the end zone after a fumble recovery. The play was called back when officials ruled that the fumble was ground-caused.

By Brett Tomlinson
Bucknellian Staff Writer

After two frustrating losses to Ivy League opponents, the Bucknell football team looked to be headed for a third straight heartbreaker on Saturday as the Bison were clinging a 10-6 lead in the fourth quarter.

However, fate was on Bucknell's side. There were no intentional grounding calls like the one that took Bucknell out of field goal range at the end of the Penn game, and there were no tragic turnovers like the two interceptions Yale returned for touchdowns last week.

The pressure fell squarely on the shoulders of the Bucknell defense, and as usual they responded, stuffing the Tigers on their final three drives to win on the treacherous mud soaked field of Christy Mathewson Memorial Stadium.

"They've [the defense] played excellent football for three weeks in a row and have completely nullified three football teams," said coach Tom Gadd.

Bucknell's defense has been aggressive all season, using extraordinary quickness to compensate for a lack of size, but the Bison seemed to be at a disadvantage on the slippery surface against a very physical Princeton team.

"We went from emphasizing quickness to just trying to keep your feet up underneath you and be physical," said linebacker Wally Hurdley '98.

The defense stayed on their feet and won the physical battles, holding Tiger rushing star Marc Washington to 65 yards rushing. Field conditions may have hindered Washington, but in the passing game, Bucknell's defense was dominant.

Princeton quarterback Jackie Dempsey threw two interceptions from his own end zone under heavy pressure from the defensive front. Bucknell's coverage was nearly flawless, with free safety George Howanitz '97 calling the shots and picking up his team-leading fourth interception.

Offensively, Bucknell's line struggled to maintain solid footing, but key play-action passing from Jim Fox '97 helped the Bison move the ball.

Overall, the offensive execution was as sloppy as the field, with the two teams combining for 14 fumbles, but Bucknell was able to keep turnovers from hurting them, recovering four Princeton fumbles and losing only two.

The fumble fever may have hurt the offense, but it made the mud bowl even more enjoyable for the defense.

"We were having fun," Hurdley said. "We don't have to hold onto the ball. We get to take it."

Aside from the fun and games, Saturday's win was important for Bucknell as the team prepares for its Patriot League schedule. After outplaying both Penn and Yale but walking away with two losses, the Bison proved they could win a close game against a physical football team.

"We've just had so much frustration these past two weeks," said Hurdley, who led the Bison with eight tackles this week. "We knew if we played as hard as we could and played physical and as a team, things would work out."

Bucknell finished its non-league schedule at 2-4, but that mark means nothing heading into the Patriot League schedule. Lafayette won the League championship two years ago after losing all of its non-league games.

According to Gadd, the Bison still have work to do in order to contend for their first-ever Patriot League crown, but a win against Princeton was a step in the right direction.

"We think that we can compete with the other teams in this league," said Gadd. "We needed to get some momentum. We needed to start feeling good about ourselves."

The Bison open the League schedule this Saturday at Holy Cross, and continue on with two more road games at Lehigh and Lafayette. Bucknell will return home for its final two games against Fordham and Colgate.

Bison open with momentum
Look for plenty of offense in League opener at Holy Cross

By Luke David and John Siris
Bucknellian Staff Writers

Forget about the season-opening thrashing of Towson State, forget about the four straight losses, and forget about the mud-soaked homecoming victory in which both teams barely topped 200 yards of combined offense; Bucknell opens its Patriot League schedule this weekend at Holy Cross and the season is new again. Just as the leaves in Lewisburg have changed, the Bison hope to change their dismal 0-10 record in Worcester and come of age in a so far adolescent season.

The Bison-Crusader matchup is intriguing because both teams struggled early, but have shown signs of improvement in their most recent games. Holy Cross (1-5, 1-0) comes off a disappointing 28-25 loss to Harvard in which QB Dan Bolden came off the bench to throw for 295 yards and three touchdowns. This weekends contest is made even more interesting by the fact that these two teams go together like Becky and Bucky Bison. Holy Cross's powerful offense will face BU's stingy defense, while Bucknell's struggling offense will try to get through a Crusader defense that has given up 31.8 points a game.

At the helm of the HC offense will most likely be Bolden, this year's projected starter who returned from an early-season injury last week. The Crusaders use a wide-open offense that uses four and five receivers at times and has averaged 219.6 passing yards so far this season. Juniors Jeff Laboranti and Brian Hopkins have combined for 62 catches and have scored six of their nine passing touchdowns. When they aren't throwing the ball, Holy Cross will be happy to hand the ball to JR. Walz, a junior tailback who has averaged 72.5 yards a game and 5.2 yards a carry so far this fall.

Holy Cross will score their points, but unlike BU's previous opponents, they may not be able to stop the sputtering Bison offense. Bucknell gained a mere 80 yards of offense last week and has not been able to establish a solid running game on a consistent basis. Holy Cross has been scorched by several opponents and Gadd's unit will have to start scoring points to earn a victory. The one bright spot on the Crusader defense is middle linebacker David Streeter (6'1", 220 pounds) who led the Patriot League with 159 tackles last season.

The start of League play offers the Bison a chance to keep their momentum as the games become more meaningful. According to Steve Pratico, a junior who leads the team with 3.5 sacks, "We're ready to win this one; we have confidence and we know we can win the tight ones."

Let's hope so, Steve. We're both picking BU to win this one.

Men finish 4th at Penn State

By Chris Ellis
Bucknellian Staff Writer

The Bucknell men's cross-country team went into last week's Penn State Invitational looking to find a clear definition of where they stood in regard to nationally-respected competition. The Penn State Invitational, which included 10 teams from all across the east coast, was expected to provide a good yardstick to gauge the previously untested Bison.

The verdict of the meet: a resounding uncertainty.

Bucknell finished fourth in the 10 team field, behind three teams ranked in the national top 10, but ahead of several others that were close to nationally-ranked status. The host Nittany Lions won the meet going away with a score of 32 points, but Missouri (72), James Madison (85), Bucknell (121), and West Virginia (124) were all close behind.

"We're not disappointed with our finish, but we maybe were expecting more," said Matt Kodak '99. "We haven't really had a lot of competition this year, so this was a bit of a wake-up call for us."

Head Coach Art Gulden blamed the team's fourth-place finish on early race timidity. Bucknell was in seventh place after one mile, and the huge deficit was simply too much to overcome against the nation's top teams.

Mike O'Donell—The Bucknellian

Aaron Knobloch '98 is a member of the men's cross country team.

"We ran a little too conservative early—I can take a lot of the blame for that," Gulden said. "We also may have lacked some confidence and experience for a meet like this."

See X-COUNTRY, page 14

Flash in the Pan

World Series: The defending champion Atlanta Braves hold a 2-1 lead over the AL champion New York Yankees after the first three games of the 1996 fall classic. Nineteen year-old Andrew Jones set the stage for the Braves game 1 victory by homering in his first two at-bats, and the Braves, bolstered by the pitching of John Smoltz, crushed the lethargic Yanks 12-1. The Yankees made it a little closer on Monday, but their bats were again held silent, this time by Greg Maddux, and the Braves cruised to a 4-0 victory. In game three, the Yankees bounced back behind the solid pitching of David Cone and the powerful bat of Bernie Williams. Williams, the ALCS MVP, hit a home run and a single in the 5-2 Yankee victory over last year's World Series MVP, Braves pitcher Tom Glavine.

Tiger on Fire: Tiger Woods, needing a solid finish to ensure a trip to the Tour Championship and a spot in next year's U.S. Open, came through big time with a victory in the Walt Disney Classic. Woods was awarded the victory after Taylor Smith, with whom Woods was tied after regulation, was disqualified for using an illegal putter in his final round. The victory pushed Woods' season total to over $700,00 in roughly two months, which ranks as one of the most successful two-month stretches in PGA history. Woods' past month is only surpassed by that of Greg Norman's last year.

Shula, Mora Finish Season Early: On Tuesday, Cincinnati Bengal coach Dave Shula, son of legendary coach Don Shula, was fired, and New Orleans head coach Jim Mora quit. Shula was on shaky ground after following up a promising previous season with a 1-6 start that included blowing a 21-0 lead over the 49ers this past weekend. His dismissal was not a surprise, as Shula had yet to produce a winning season, and recently became the fastest coach to lose 50 games. Offensive coordinator and former Jets head coach Bruce Coslet replaces Shula. Mora stepped down after a profanity-laced outburst following the Saints recent loss to Carolina. Mora's leaving was a surprise to the Saints organization, and they have yet to name a replacement for the man with the longest tenure in professional football.

MLS United with First Champion: Midfielder Mario Etcheverry had two assists to lead the D.C. United to a 3-2 victory over the L.A. Galaxy for the first ever MLS title. The Galaxy had held a 2-0 lead behind goals by Eduardo Hurtado and Clint Peay, but the United fought back, scoring on two corner kicks, including the game winner by Eddie Pope four minutes into overtime to give the United the title.

Bison stampede Tigers into mud

Jonah Half—The Bucknellian

Terence Parham '98, races to the end zone after a fumble recovery. The play was called back when officials ruled that the fumble was ground-caused.

BY BRETT TOMLINSON
Bucknellian Staff Writer

After two frustrating losses to Ivy League opponents, the Bucknell football team looked to be headed for a third straight heartbreaker on Saturday as the Bison were clinging a 10-6 lead in the fourth quarter.

However, fate was on Bucknell's side. There were no intentional grounding calls like the one that took Bucknell out of field goal range at the end of the Penn game, and there were no tragic turnovers like the two interceptions Yale returned for touchdowns last week.

The pressure fell squarely on the shoulders of the Bucknell defense, and as usual they responded, stuffing the Tigers on their final three drives to win on the treacherous mud soaked field of Christy Mathewson Memorial Stadium.

"They've [the defense] played excellent football for three weeks in a row and have completely nullified three football teams," said coach Tom Gadd.

Bucknell's defense has been aggressive all season, using extraordinary quickness to compensate for a lack of size, but the Bison seemed to be at a disadvantage on the slippery surface against a very physical Princeton team.

"We went from emphasizing quickness to just trying to keep your feet up underneath you and be physical," said linebacker Wally Hurdley '98.

The defense stayed on their feet and won the physical battles, holding Tiger rushing star Marc Washington to 65 yards rushing. Field conditions may have hindered Washington, but in the passing game, Bucknell's defense was dominant.

Princeton quarterback Jackie Dempsey threw two interceptions from his own end zone under heavy pressure from the defensive front. Bucknell's coverage was nearly flawless, with free safety George Howanitz '97 calling the shots and picking up his team-leading fourth interception.

Offensively, Bucknell's line struggled to maintain solid footing, but key play-action passing from Jim Fox '97 helped the Bison move the ball.

Overall, the offensive execution was as sloppy as the field, with the two teams combining for 14 fumbles, but Bucknell was able to keep turnovers from hurting them, recovering four Princeton fumbles and losing only two.

The fumble fever may have hurt the offense, but it made the mud bowl even more enjoyable for the defense.

"We were having fun," Hurdley said. "We don't have to hold onto the ball. We get to take it."

Aside from the fun and games, Saturday's win was important for Bucknell as the team prepares for its Patriot League schedule. After outplaying both Penn and Yale but walking away with two losses, the Bison proved they could win a close game against a physical football team.

"We've just had so much frustration these past two weeks," said Hurdley, who led the Bison with eight tackles this week. "We knew if we played as hard as we could and played physical and as a team, things would work out."

Bucknell finished its non-league schedule at 2-4, but that mark means nothing heading into the Patriot League schedule. Lafayette won the League championship two years ago after losing all of its non-league games.

According to Gadd, the Bison still have work to do in order to contend for their first-ever Patriot League crown, but a win against Princeton was a step in the right direction.

"We think that we can compete with the other teams in this league," said Gadd. "We needed to get some momentum. We needed to start feeling good about ourselves."

The Bison open the League schedule this Saturday at Holy Cross, and continue on with two more road games at Lehigh and Lafayette. Bucknell will return home for its final two games against Fordham and Colgate.

Bison open with momentum
Look for plenty of offense in League opener at Holy Cross

BY LUKE DAVID AND JOHN SIRIS
Bucknellian Staff Writers

Forget about the season-opening thrashing of Towson State, forget about the four straight losses, and forget about the mud-soaked homecoming victory in which both teams barely topped 200 yards of combined offense; Bucknell opens its Patriot League schedule this weekend at Holy Cross and the season is new again. Just as the leaves in Lewisburg have changed, the Bison hope to change their dismal 0-10 record in Worcester and come of age in a so far adolescent season.

The Bison-Crusader match-up is intriguing because both teams struggled early, but have shown signs of improvement in their most recent games. Holy Cross (1-5, 1-0) comes off a disappointing 28-25 loss to Harvard in which QB Dan Bolden came off the bench to throw for 295 yards and three touchdowns. This weekends contest is made even more interesting by the fact that these two teams go together like Becky and Bucky Bison. Holy Cross's powerful offense will face BU's stingy defense, while Bucknell's struggling offense will try to get through a Crusader defense that has given up 31.8 points a game.

At the helm of the HC offense will most likely be Bolden, this year's projected starter who returned from an early-season injury last week. The Crusaders use a wide-open offense that uses four and five receivers at times and has averaged 219.6 passing yards so far this season. Juniors Jeff Laboranti and Brian Hopkins have combined for 62 catches and have scored six of their nine passing touchdowns. When they aren't throwing the ball, Holy Cross will be happy to hand the ball to JR. Walz, a junior tailback who has averaged 72.5 yards a game and 5.2 yards a carry so far this fall.

Holy Cross will score their points, but unlike BU's previous opponents, they may not be able to stop the sputtering Bison offense. Bucknell gained a mere 80 yards of offense last week and has not been able to establish a solid running game on a consistent basis. Holy Cross has been scorched by several opponents and Gadd's unit will have to start scoring points to earn a victory. The one bright spot on the Crusader defense is middle linebacker David Streeter (6'1", 220 pounds) who led the Patriot League with 159 tackles last season.

The start of League play offers the Bison a chance to keep their momentum as the games become more meaningful. According to Steve Pratico, a junior who leads the team with 3.5 sacks, "We're ready to win this one; we have confidence and we know we can win the tight ones."

Let's hope so, Steve. We're both picking BU to win this one.

Men finish 4th at Penn State

BY CHRIS ELLIS
Bucknellian Staff Writer

Mike O'Donell—The Bucknellian

Aaron Knobloch '98 is a member of the men's cross country team.

The Bucknell men's cross-country team went into last week's Penn State Invitational looking to find a clear definition of where they stood in regard to nationally-respected competition. The Penn State Invitational, which included 10 teams from all across the east coast, was expected to provide a good yardstick to gauge the previously untested Bison.

The verdict of the meet: a resounding uncertainty.

Bucknell finished fourth in the 10 team field, behind three teams ranked in the national top 10, but ahead of several others that were close to nationally-ranked status. The host Nittany Lions won the meet going away with a score of 32 points, but Missouri (72), James Madison (85), Bucknell (121), and West Virginia (124) were all close behind.

"We're not disappointed with our finish, but we maybe were expecting more," said Matt Kodak '99. "We haven't really had a lot of competition this year, so this was a bit of a wake-up call for us."

Head Coach Art Gulden blamed the team's fourth-place finish on early race timidity. Bucknell was in seventh place after one mile, and the huge deficit was simply too much to overcome against the nation's top teams.

"We ran a little too conservative early—I can take a lot of the blame for that," Gulden said. "We also may have lacked some confidence and experience for a meet like this."

Flash in the Pan

World Series: The defending champion Atlanta Braves hold a 2-1 lead over the AL champion New York Yankees after the first three games of the 1996 fall classic. Nineteen year-old Andrew Jones set the stage for the Braves game 1 victory by homering in his first two at-bats, and the Braves, bolstered by the pitching of John Smoltz, crushed the lethargic Yanks 12-1. The Yankees made it a little closer on Monday, but their bats were again held silent, this time by Greg Maddux, and the Braves cruised to a 4-0 victory. In game three, the Yankees bounced back behind the solid pitching of David Cone and the powerful bat of Bernie Williams. Williams, the ALCS MVP, hit a home run and a single in the 5-2 Yankee victory over last year's World Series MVP, Braves pitcher Tom Glavine.

Tiger on Fire: Tiger Woods, needing a solid finish to ensure a trip to the Tour Championship and a spot in next year's U.S. Open, came through big time with a victory in the Walt Disney Classic. Woods was awarded the victory after Taylor Smith, with whom Woods was tied after regulation, was disqualified for using an illegal putter in his final round. The victory pushed Woods' season total to over $700,00 in roughly two months, which ranks as one of the most successful two-month stretches in PGA history. Woods' past month is only surpassed by that of Greg Norman's last year.

Shula, Mora Finish Season Early: On Tuesday, Cincinnati Bengal coach Dave Shula, son of legendary coach Don Shula, was fired, and New Orleans head coach Jim Mora quit. Shula was on shaky ground after following up a promising previous season with a 1-6 start that included blowing a 21-0 lead over the 49ers this past weekend. His dismissal was not a surprise, as Shula had yet to produce a winning season, and recently became the fastest coach to lose 50 games. Offensive coordinator and former Jets head coach Bruce Coslet replaces Shula. Mora stepped down after a profanity-laced outburst following the Saints recent loss to Carolina. Mora's leaving was a surprise to the Saints organization, and they have yet to name a replacement for the man with the longest tenure in professional football.

MLS United with First Champion: Midfielder Mario Etcheverry had two assists to lead the D.C. United to a 3-2 victory over the L.A. Galaxy for the first ever MLS title. The Galaxy had held a 2-0 lead behind goals by Eduardo Hurtado and Clint Peay, but the United fought back, scoring on two corner kicks, including the game winner by Eddie Pope four minutes into overtime to give the United the title.

Volleyball struggles in California

BY JACOB LIPMAN
Bucknellian Staff Writer

Jonah Half—The Bucknellian
Tristen Voget '99 passes the ball while her Bison teammates look on.

The past couple of weeks have definitely not been good to the Bucknell's women's volleyball team. The team struggled during its visit to California over fall break, losing all three matches. The following weekend, the losing skid reached five matches as the Bison were defeated by Colgate and James Madison. However, Bucknell rebounded from the previous losses and held off American in the final match of the weekend.

The team's overall record is currently 14-10, including a 3-1 record versus Patriot League opponents.

The Bison had high hopes of pulling off a few upsets while in California, but it was not meant to be. The first match for Bucknell was Cal. St. Fullerton. The Bison kept it close in the first game but Cal. St. Fullerton pulled out the win. The next two games did not go as well as the first and Cal. St. Fullerton swept Bucknell 15-11, 15-5, 15-4.

Melissa Wharton '98 had 10 kills to go along with a solo block and 3 block assists. Also playing well for the Bison was Tristen Voget '99, who contributed eight kills and two solo blocks.

The second match pitted Bucknell versus Cal. St. Northridge, the leader of the Big Sky conference. Once again, the Bison played reasonably well in the first game. Unfortunately, they were smashed in the following two games. The final score was 15-7, 15-2, 15-1 in favor of Cal. St. Northridge.

Wharton and Emily Pomeroy '99 led the Bison with seven kills and two blocks each. The key statistic through the two matches was the team's serving. After two matches, the Bison had only two service aces compared with 17 service errors.

In the final match, Bucknell was defeated in three games by UC-Irvine. Results from the match were not available at press time.

Shortly after returning from California, the Bison had to hit the road for three more matches. The first opponent was arch-rival and co-leader of the Patriot League, Colgate.

Bucknell showed some improvement from their previous trip and kept it close, but the Red Raiders won the first two games. The Bison looked like they were going to come back in the third game as they jumped to a 10-2 lead. However, Colgate stormed back and sent the Bison to their first league loss by a score of 15-10, 15-11, 15-12.

Wharton and Voget paced the Bison offense with 12 and nine kills respectively. Wharton also added two solo blocks and three block assists. Susie Teitsworth '97 also had a solid game, recording seven kills, three aces and 17 digs.

Later in the day, Bucknell played against James Madison. The results were the same as the previous match, with the Bison being swept yet again. Hitting and receiving errors plagued the Bison in their 15-11, 15-8, 15-6 defeat.

For the umpteenth time, Wharton led Bucknell in kills, this time with 12 of them. Teitsworth finished with 15 digs and Allison Morris '97 added 10 digs as well.

The final match of the weekend against American began with the Bison losing their sixteenth straight game. The team was able to put an end to that ugly streak with a key win in game two. The Bison then followed that up with another win in the third game.

Bucknell had a good chance to win the fourth game but American topped the Bison in a close one by a 16-14 score. Bucknell had one more chance in game five to end their losing streak. The Bison rose to the challenge and won the final game, giving them a 8-15, 15-11, 15-10, 14-16, 15-10 victory. The team hit excellently in the tie-breaker, racking up seven kills in only 11 attempts.

The Bison hit very well in the match and many players finished with double digits in kills. Wharton led the team with 19 kills, while Heather Rendle '97 and Voget totaled 16 and 15 kills respectively. Michelle Lesh '00 had a personal best 14 kills and Teitsworth added 10 kills.

Wharton also led the team with six blocks. She was followed by Rendle, who had five blocks and Lesh finished with four. Defensively, Teitsworth was excellent as she recorded 16 digs. For the weekend, she totaled 48 digs as compared to only five receiving errors. For her outstanding play in these matches, Teitsworth was recognized as the Patriot League's Defensive Player of the Week.

This weekend, Bucknell will play against Cornell at home. The match is at 1 p.m. Saturday in Davis Gym. The Bison will then travel to Lehigh on Tuesday, where they will try to clinch second place in the Patriot League.

Athlete Profile — Cross Country

Kodak having a picture-perfect season

BY CHRIS ELLIS
Bucknellian Staff Writer

When asked to assess the technical aspects of Matt Kodak's seemingly overnight ascent to stardom for the Bucknell cross-country team, head coach Art Gulden could do nothing but laugh. After all, how can minor physical tinkering explain the rise to national prominence of a sophomore runner who wasn't even on Bucknell's final varsity team last season?

"You can make it really complicated and give all kinds of reasons for it, but there's just no need to do that," Gulden said. "He's a perfect example of a great work ethic. If you do the work and compete hard, good things will come for you. And they have."

The success hasn't come easy for Kodak, but then again, nothing has come easy for the unlikely starter who will lead Bucknell's run at the Patriot League Championship in two weeks. He has been testing his ability to the max since the day he enrolled at Bucknell.

Kodak, a top-notch runner in high school, chose Bucknell over Boston College, North Carolina and Wake Forest, a choice that was based almost entirely on the historical distinction of Gulden and the Bucknell cross-country team.

Kristin Feldner—The Bucknellian
Cross-country runner Matt Kodak '99

"All the schools that I looked at were strong academically, but I knew that I wanted to run here," Kodak said. "Actually, I was a bit scared to run here."

Those fears were compounded in his first collegiate meet, a dual meet against Rutgers that the Bison won handily. Kodak's performance, though, was less than encouraging. He finished 15th overall (11th on the team), a finish that didn't seem to fit with his impressive high school credentials.

The rest of the season was just as disheartening. Kodak finished no higher than sixth on the team all season long, and was a disappointing 36th overall in the Patriot League Championships. When it came time for Gulden to select runners to compete in the season-ending IC4A championships, Kodak was left off of the roster.

But that's where his troubles ended—and the work began.

"I really didn't know what to expect at the collegiate level," said Kodak. "That first season was kind of a wake-up call for me. It reminded me of how much work I really had to do."

Kodak devoted last summer to working on his skills, running a consistent 70 miles a week, among other things—and that work has paid off in a big way this season. Kodak surprised almost everyone by winning Bucknell's first dual meet— and then by leading the team to the line again the next week. Kodak has continued his success throughout the year, finishing among Bucknell's top two runners in every meet and placing an extraordinary ninth overall in the 10-team, nationally-distinguished Penn State Invitational last week despite being out of the top 30 at the one-mile mark. Rather than lose his cool after falling behind early, Kodak kept his pace—a pace that was good enough to overtake almost all of the very talented field.

"If you're in a race against Matt Kodak, you better be a lot tougher or more talented," Gulden said. "He's certainly not going to beat himself."

Kodak has two more years to test his abilities against the nation's best, but also has a goal much closer to home. Bucknell, a regular visitor to the national championship meet in the '70s and '80s hasn't competed there in several years. Kodak wants his sophomore class to be the one to lead them back.

"I think that I, and my entire class as a team, want to go to nationals before we leave," Kodak said. "Our class definitely has the ability to do that, and we definitely want to do that. I guess that would be our goal".

And with Kodak leading them, that goal will be more than one step closer.

Melanie Smith—The Bucknellian

Field Hockey picks up win

BY HALEY FUTTERKNECHT
Bucknellian Staff Writer

The Bucknell field hockey team rallied to a 3-2 win in overtime last night against Patriot-League rival Colgate. The win, which raised the Bison's league record to 2-3, interrupted a 3-game losing streak.

The women came out of their journey south over fall break with no wins to add to their record.

The Bison lost to Georgetown, but fought back to give Virginia Commonwealth a close contest before falling in overtime. Bucknell then traveled back north to take on Lock Haven and lost in a shutout.

Against Georgetown, the Bison struggled offensively and lost 5-1 to a dominant Hoya team. The lone Bucknell goal was scored via a direct shot by senior co-captain Megan Bossuyt.

Georgetown outshot Bucknell 31 to 10. Freshman Kanda Kratzer, who made 17 saves for the Bison, was peppered in goal.

The Bison were defeated again the next day at Virginia Commonwealth with a disappointing 2-3 loss in overtime. Sarah Catlin '98 gave Bucknell the lead midway through the first half with an impressive penalty stroke.

Senior Kate McIlvain solidified the lead for the Bison on a penalty corner rebound one minute into the second half. The Rams, however, rallied from a 2-0 deficit to tie the Bison. Virginia Commonwealth took advantage of an early opportunity in overtime and closed out the game 3-2.

Bucknell outshot Virginia Commonwealth 30 to 12. The goal was tended by Maureen Breslin '99 who recorded four saves for the Bison. Junior Jaime Paldin said, "The losses have been extremely frustrating for the entire team. We can't figure it out."

Bucknell dropped their third straight loss during fall break against Lock Haven. Lock Haven shut out the Bison 4-0, but outshot Bucknell by a mere 21 to 15. Kratzer tended goal for the Bison and recorded 5 saves.

The Bison have an overall record of 6-8 and a Patriot League record of 2-3 after their win against Colgate. They have one more Patriot League games left on their schedule.

A loss in yesterday's Colgate game would have eliminated Bucknell from post-season play in the Patriot League Tournament.

Before the game, Paldin said, "We will have to lay it all out on the line against Colgate. We haven't played in a while, so we are really prepared and psyched up to play. We need to play together and not as individuals. We must support, communicate and play as a team." Junior Tina Jones added, "Our game against Colgate matters. The desire to win Wednesday's game is greater than the desire to win any of the others."

Bucknell field hockey holds a 4-1 record on their home turf at the Mods Fields.

Women's soccer edged by PSU

BY MATT ANSLEY
Bucknellian Staff Writer

Despite goalkeeper senior Becky Snover's eleven saves, the Bucknell women's soccer team lost to Penn State University by a 2-0 score on Tuesday evening. The loss drops Bucknell to a 7-6-1 record for the season.

At 12-2-2, the Nittany Lions have won five straight games. Penn State freshman Kelly Convey scored both goals, one in each half, to create the victory. This was a non-conference game, as Penn State is in the Big Ten and Bucknell is in the Patriot League. The two programs are very different, yet the Bison held their own.

"We played very well," said Coach Toby Lovecchio. "Penn State is ranked 15th in the country. They have a totally scholarship program, and we don't. Based on that, I'd say we did really well."

The Bison did a good job offensively, despite the scoreless finish. Bucknell did score one goal, on which play the ball was ruled out of bounds prior to the shot.

"We created a lot of opportunities, and took about six or seven shots," said Lovecchio. "We scored one goal, which was overruled. If we had put one of those away, we might have been able to tie that game."

The Bison defense remained strong against Penn State. While the offense continued to struggle with scoring, Bucknell played strong mentally. Despite a few mistakes that cost them the game, the Bison played in a manner they can be proud of.

"If we keep playing smart, hopefully we can convert and one game come back and start scoring," said Lovecchio. That we did so well against this kind of competition is a very positive sign here in the home stretch."

On Saturday, the Bison will face Navy in the final game of their Patriot League regular season. The winner of this game will go into the Patriot League championship as the third seed, and the loser will end up the number four seed.

"Either way, this is a big game. Both teams have a shot," said Lovecchio. They won last yet, even though we were seeded first. They upset us, but I wouldn't have really called it an upset; we both had good teams."

In fact, Bucknell is still looking for its first win at the Patriot League Championships. The Bison, like very few other schools, have made the playoffs each and every year.

"We're still looking for a first round tournament victory," said Lovecchio. "This year is as good of a chance as any. We have a very strong team, and if we play the way we did [on Tuesday night] our chances are particularly good. I'm excited, because the playoffs are a whole new ball game."

X-COUNTRY

From Page 13

After the poor first mile, during which no Bucknell runner was in the overall top 25, the Bison settled down to recover and post some impressive individual finishes. Kodak finished a very impressive ninth for Bucknell with a time of 26:48, 43 seconds behind the winning time posted by Haverford's Karl Paranya.

"Kodak was obviously extraordinary," Gulden said. "He fell behind pretty far in the first mile, but kept his cool and ran very well at the end."

In addition to Kodak, Jonathan Dietrich also recovered from a slow start to place among the meet's elite, finishing 14th with a time of 27:01. Bob Chandler (32nd), Steve Roeser (34th), and Dave Granger (60th) also recorded commendable finishes for the Bison.

The women's team also left the Penn State meet with mixed emotions. The team ran sixth in the eight-team field with 175 points, lagging far behind eventual victor Missouri (46 points), but defeating very strong teams from James Madison and Buffalo.

The women faced a similar predicament as the men, as a slow start forced the team to play catch-up from the one mile mark. The Bison responded to the challenge well, but the competition, as well as the course, dictated that any more of a comeback would be impossible.

"This isn't a wide open course—it's very confined and zig-zagy, so it's really tough to pass people on," Gulden said. "We ran well at the end, but just put ourselves too far behind."

Penn State's Kim McGreevy won with a time of 17:38, but sophomore Julie Sweitzer finished the 5000 meter race in 18:54 to finish 19th and lead the Bucknell contingent. Mandy McTavish, a State College native, continued her recent surge of good running by finishing 39th overall with a time of 19:25.

"Mandy continues to improve physically and mentally, and the results are starting to show that," Gulden said. "She's also gaining a lot of confidence."

Both teams will use the upcoming week off to prepare for the Patriot League Championships to be held Nov. 2 at Lafayette.

Women's tennis battles fatigue, takes 4th at Leagues

Colgate takes Patriot League title with 5-3 win over Army

BY JARED SILLIKER
Bucknellian Staff Writer

Two days, 22 matches against three teams, 47 sets and approximately 14 hours of tennis. This is what the Bucknell women's tennis team had to endure this past weekend as they traveled to Lehigh to compete in the Patriot League Championships.

Although exhausted both physically and mentally, the Bucknell women did manage to capture fourth place behind Colgate, Army and Lafayette. With extreme parity among the top four teams, however, Head Coach Rose Ewan was still very positive about the caliber of tennis that her players put forth. "The girls gave absolutely everything they had, and they were really only a few breaks away from winning some of the close matches," said Ewan.

In Bucknell's semifinal matchup against Army, all six singles matches went to three sets, as No. 1 Laura Leslie '00 and No. 5 Kristin Jones '00 both earned victories. Leslie and Jones also teamed up for an 8-6 doubles win to tally the third point against Army.

"It's tough when we have to come back so quickly and they're (Army) on fresh legs," said Ewan about the busy schedule her players had to deal with.

Seeded third, the Bucknell women downed Holy Cross in the first round, 5-2, behind straight-set victories by Katie Roland '99, Blakely Lauria '00, Jones and Kerry Callaghan '00. The Bison then only had one hour of rest before facing No. 2 seed Army.

In the match for third place on Sunday, Bucknell fell to Lafayette, 5-2, as Callaghan and Wendy Eason '98 scored the two lone Bucknell victories.

"I really couldn't ask them to do anything different. They all played well and some of their opponents just had good days," said Ewan. "They spent themselves so much that I didn't even know what to say to those who lost."

Bucknell did, despite the exhaustion, show some improvement versus Army. Leslie avenged a regular-season loss to her opponent, prevailing 6-3, 3-6, 6-2, while Roland improved on a 6-1, 6-1 season loss, falling 6-2, 4-6, 6-4 at No. 2 singles.

Colgate downed Army, 5-3, to take home the 1996 Patriot League Championship.

Bucknell plays at Duquesne this Saturday.

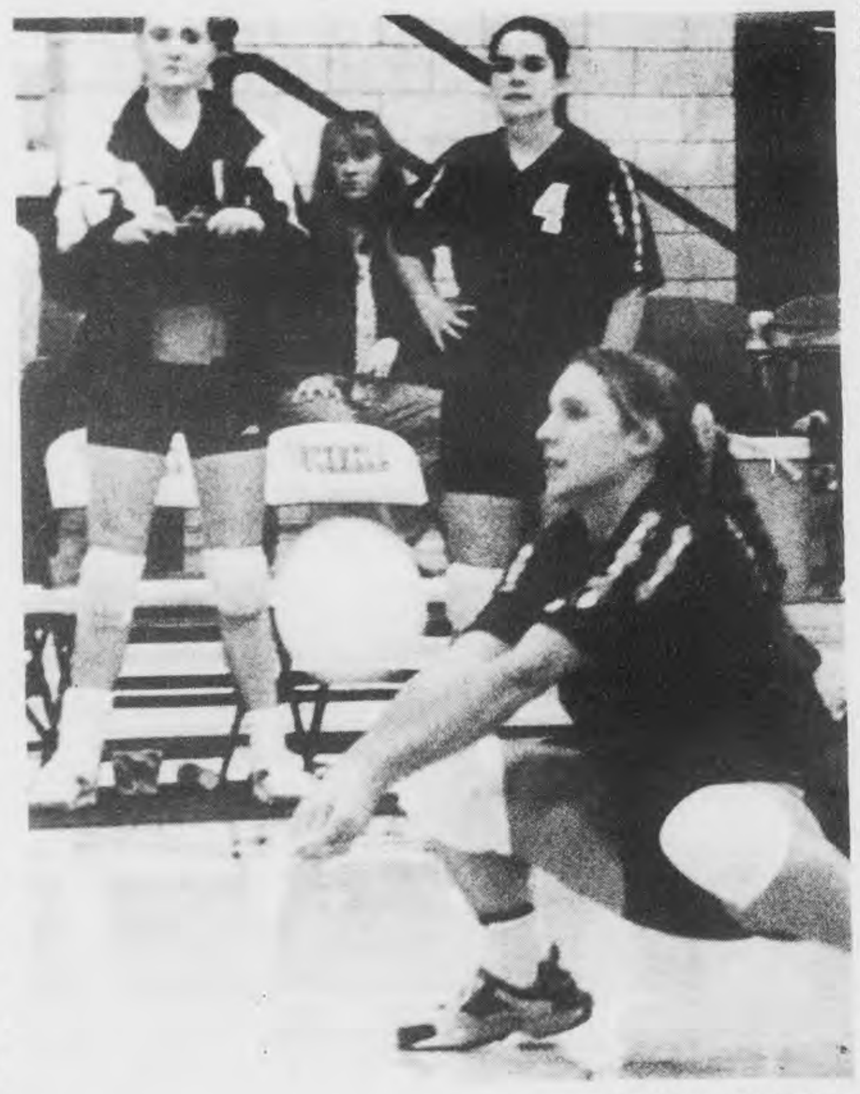
Volleyball struggles in California

BY JACOB LIPMAN

Bucknellian Staff Writer



Jonah Half—The Bucknellian

Tristen Voget '99 passes the ball while her Bison teammates look on.

The past couple of weeks have definitely not been good to the Bucknell's women's volleyball team. The team struggled during its visit to California over fall break, losing all three matches. The following weekend, the losing skid reached five matches as the Bison were defeated by Colgate and James Madison. However, Bucknell rebounded from the previous losses and held off American in the final match of the weekend.

The team's overall record is currently 14-10, including a 3-1 record versus Patriot League opponents.

The Bison had high hopes of pulling off a few upsets while in California, but it was not meant to be. The first match for Bucknell was Cal. St. Fullerton. The Bison kept it close in the first game but Cal. St. Fullerton pulled out the win. The next two games did not go as well as the first and Cal. St. Fullerton swept Bucknell 15-11, 15-5, 15-4.

Melissa Wharton '98 had 10 kills to go along with a solo block and 3 block assists. Also playing well for the Bison was Tristen Voget '99, who contributed eight kills and two solo blocks.

The second match pitted Bucknell versus Cal. St. Northridge, the leader of the Big Sky conference. Once again, the Bison played reasonably well in the first game. Unfortunately, they were smashed in the following two games. The final score was 15-7, 15-2, 15-1 in favor of Cal. St. Northridge.

Wharton and Emily Pomeroy '99 led the Bison with seven kills and two blocks each. The key statistic through the two matches was the team's serving. After two matches, the Bison had only two service aces compared with 17 service errors.

In the final match, Bucknell was defeated in three games by UC-Irvine. Results from the match were not available at press time.

Shortly after returning from California, the Bison had to hit the road for three more matches. The first opponent was arch-rival and co-leader of the Patriot League, Colgate.

Bucknell showed some improvement from their previous trip and kept it close, but the Red Raiders won the first two games. The Bison looked like they were going to come back in the third game as they jumped to a 10-2 lead. However, Colgate stormed back and sent the Bison to their first league loss by a score of 15-10, 15-11, 15-12.

Wharton and Voget paced the Bison offense with 12 and nine kills respectively. Wharton also added two solo blocks and three block assists. Susie Teitsworth '97 also had a solid game, recording seven kills, three aces and 17 digs.

Later in the day, Bucknell played against James Madison. The results were the same as the previous match, with the Bison being swept yet again. Hitting and receiving errors plagued the Bison in their 15-11, 15-8, 15-6 defeat.

For the umpteenth time, Wharton led Bucknell in kills, this time with 12 of them. Teitsworth finished with 15 digs and Allison Morris '97 added 10 digs as well.

The final match of the weekend against American began with the Bison losing their sixteenth straight game. The team was able to put an end to that ugly streak with a key win in game two. The Bison then followed that up with another win in the third game.

Bucknell had a good chance to win the fourth game but American topped the Bison in a close one by a 16-14 score. Bucknell had one more chance in game five to end their losing streak. The Bison rose to the challenge and won the final game, giving them a 8-15, 15-11, 15-10, 14-16, 15-10 victory. The team hit excellently in the tie-breaker, racking up seven kills in only 11 attempts.

The Bison hit very well in the match and many players finished with double digits in kills. Wharton led the team with 19 kills, while Heather Rendle '97 and Voget totaled 16 and 15 kills respectively. Michelle Lesh '00 had a personal best 14 kills and Teitsworth added 10 kills.

Wharton also led the team with six blocks. She was followed by Rendle, who had five blocks and Lesh finished with four. Defensively, Teitsworth was excellent as she recorded 16 digs. For the weekend, she totaled 48 digs as compared to only five receiving errors. For her outstanding play in these matches, Teitsworth was recognized as the Patriot League's Defensive Player of the Week.

This weekend, Bucknell will play against Cornell at home. The match is at 1 p.m. Saturday in Davis Gym. The Bison will then travel to Lehigh on Tuesday, where they will try to clinch second place in the Patriot League.

Athlete Profile — Cross Country

Kodak having a picture-perfect season

BY CHRIS ELLIS

Bucknellian Staff Writer

When asked to assess the technical aspects of Matt Kodak's seemingly overnight ascent to stardom for the Bucknell cross-country team, head coach Art Gulden could do nothing but laugh. After all, how can minor physical tinkering explain the rise to national prominence of a sophomore runner who wasn't even on Bucknell's final varsity team last season?

"You can make it really complicated and give all kinds of reasons for it, but there's just no need to do that," Gulden said. "He's a perfect example of a great work ethic. If you do the work and compete hard, good things will come for you. And they have."

The success hasn't come easy for Kodak, but then again, nothing has come easy for the unlikely starter who will lead Bucknell's run at the Patriot League Championship in two weeks. He has been testing his ability to the max since the day he enrolled at Bucknell.

Kodak, a top-notch runner in high school, chose Bucknell over Boston College, North Carolina and Wake Forest, a choice that was based almost entirely on the historical distinction of Gulden and the Bucknell cross-country team.

Kristin Feldner—The Bucknellian

Cross-country runner Matt Kodak '99

"All the schools that I looked at were strong academically, but I knew that I wanted to run here," Kodak said. "Actually, I was a bit scared to run here."

Those fears were compounded in his first collegiate meet, a dual meet against Rutgers that the Bison won handily. Kodak's performance, though, was less than encouraging. He finished 15th overall (11th on the team), a finish that didn't seem to fit with his impressive high school credentials.

The rest of the season was just as disheartening. Kodak finished no higher than sixth on the team all season long, and was a disappointing 36th overall in the Patriot League Championships. When it came time for Gulden to select runners to compete in the season-ending IC4A championships, Kodak was left off of the roster.

But that's where his troubles ended—and the work began.

"I really didn't know what to expect at the collegiate level," said Kodak. "That first season was kind of a wake-up call for me. It reminded me of how much work I really had to do."

Kodak devoted last summer to working on his skills, running a consistent 70 miles a week, among other things—and that work has paid off in a big way this season. Kodak surprised almost everyone by winning Bucknell's first dual meet— and then by leading the team to the line again the next week. Kodak has continued his success throughout the year, finishing among Bucknell's top two runners in every meet and placing an extraordinary ninth overall in the 10-team, nationally-distinguished Penn State Invitational last week despite being out of the top 30 at the one-mile mark. Rather than lose his cool after falling behind early, Kodak kept his pace—a pace that was good enough to overtake almost all of the very talented field.

"If you're in a race against Matt Kodak, you better be a lot tougher or more talented," Gulden said. "He's certainly not going to beat himself."

Kodak has two more years to test his abilities against the nation's best, but also has a goal much closer to home. Bucknell, a regular visitor to the national championship meet in the '70s and '80s hasn't competed there in several years. Kodak wants his sophomore class to be the one to lead them back.

"I think that I, and my entire class as a team, want to go to nationals before we leave," Kodak said. "Our class definitely has the ability to do that, and we definitely want to do that. I guess that would be our goal"

And with Kodak leading them, that goal will be more than one step closer.

Melanie Smith—The Bucknellian

Field Hockey picks up win

BY HALEY FUTTERKNECHT

Bucknellian Staff Writer

The Bucknell field hockey team rallied to a 3-2 win in overtime last night against Patriot-League rival Colgate. The win, which raised the Bison's league record to 2-3, interrupted a 3-game losing streak.

The women came out of their journey south over fall break with no wins to add to their record.

The Bison lost to Georgetown, but fought back to give Virginia Commonwealth a close contest before falling in overtime. Bucknell then traveled back north to take on Lock Haven and lost in a shutout.

Against Georgetown, the Bison struggled offensively and lost 5-1 to a dominant Hoya team. The lone Bucknell goal was scored via a direct shot by senior co-captain Megan Bossuyt.

Georgetown outshot Bucknell 31 to 10. Freshman Kanda Kratzer, who made 17 saves for the Bison, was peppered in goal.

The Bison were defeated again the next day at Virginia Commonwealth with a disappointing 2-3 loss in overtime. Sarah Catlin '98 gave Bucknell the lead midway through the first half with an impressive penalty stroke.

Senior Kate McIlvain solidified the lead for the Bison on a penalty corner rebound one minute into the second half. The Rams, however, rallied from a 2-0 deficit to tie the Bison. Virginia Commonwealth took advantage of an early opportunity in overtime and closed out the game 3-2.

Bucknell outshot Virginia Commonwealth 30 to 12. The goal was tended by Maureen Breslin '99 who recorded four saves for the Bison. Junior Jaime Paldin said, "The losses have been extremely frustrating for the entire team. We can't figure it out."

Bucknell dropped their third straight loss during fall break against Lock Haven. Lock Haven shut out the Bison 4-0, but outshot Bucknell by a mere 21 to 15. Kratzer tended goal for the Bison and recorded 5 saves.

The Bison have an overall record of 6-8 and a Patriot League record of 2-3 after their win against Colgate. They have one more Patriot League games left on their schedule.

A loss in yesterday's Colgate game would have eliminated Bucknell from post-season play in the Patriot League Tournament.

Before the game, Paldin said, "We will have to lay it all out on the line against Colgate. We haven't played in a while, so we are really prepared and psyched up to play. We need to play together and not as individuals. We must support, communicate and play as a team." Junior Tina Jones added, "Our game against Colgate matters. The desire to win Wednesday's game is greater than the desire to win any of the others."

Bucknell field hockey holds a 4-1 record on their home turf at the Mods Fields.

Women's soccer edged by PSU

BY MATT ANSLEY

Bucknellian Staff Writer

Despite goalkeeper senior Becky Snover's eleven saves, the Bucknell women's soccer team lost to Penn State University by a 2-0 score on Tuesday evening. The loss drops Bucknell to a 7-6-1 record for the season.

At 12-2-2, the Nittany Lions have won five straight games. Penn State freshman Kelly Convey scored both goals, one in each half, to create the victory. This was a non-conference game, as Penn State is in the Big Ten and Bucknell is in the Patriot League. The two programs are very different, yet the Bison held their own.

"We played very well," said Coach Toby Lovecchio. "Penn State is ranked 15th in the country. They have a totally scholarship program, and we don't. Based on that, I'd say we did really well."

The Bison did a good job offensively, despite the scoreless finish. Bucknell did score one goal, on which play the ball was ruled out of bounds prior to the shot.

"We created a lot of opportunities, and took about six or seven shots," said Lovecchio. "We scored one goal, which was overruled. If we had put one of those away, we might have been able to tie that game."

The Bison defense remained strong against Penn State. While the offense continued to struggle with scoring, Bucknell played strong mentally. Despite a few mistakes that cost them the game, the Bison played in a manner they can be proud of.

"If we keep playing smart, hopefully we can convert and one game come back and start scoring," said Lovecchio. That we did so well against this kind of competition is a very positive sign here in the home stretch."

On Saturday, the Bison will face Navy in the final game of their Patriot League regular season. The winner of this game will go into the Patriot League championship as the third seed, and the loser will end up the number four seed.

"Either way, this is a big game. Both teams have a shot," said Lovecchio. They won last yet, even though we were seeded first. They upset us, but I wouldn't have really called it an upset; we both had good teams."

In fact, Bucknell is still looking for its first win at the Patriot League Championships. The Bison, like very few other schools, have made the playoffs each and every year.

"We're still looking for a first round tournament victory," said Lovecchio. "This year is as good of a chance as any. We have a very strong team, and if we play the way we did [on Tuesday night] our chances are particularly good. I'm excited, because the playoffs are a whole new ball game."

X-COUNTRY

From Page 13

After the poor first mile, during which no Bucknell runner was in the overall top 25, the Bison settled down to recover and post some impressive individual finishes. Kodak finished a very impressive ninth for Bucknell with a time of 26:48, 43 seconds behind the winning time posted by Haverford's Karl Paranya.

"Kodak was obviously extraordinary," Gulden said. "He fell behind pretty far in the first mile, but kept his cool and ran very well at the end."

In addition to Kodak, Jonathan Dietrich also recovered from a slow start to place among the meet's elite, finishing 14th with a time of 27:01. Bob Chandler (32nd), Steve Roeser (34th), and Dave Granger (60th) also recorded commendable finishes for the Bison.

The women's team also left the Penn State meet with mixed emotions. The team ran sixth in the eight-team field with 175 points, lagging far behind eventual victor Missouri (46 points), but defeating very strong teams from James Madison and Buffalo.

The women faced a similar predicament as the men, as a slow start forced the team to play catch-up from the one mile mark. The Bison responded to the challenge well, but the competition, as well as the course, dictated that any more of a comeback would be impossible.

"This isn't a wide open course—it's very confined and zigzagy, so it's really tough to pass people on," Gulden said. "We ran well at the end, but just put ourselves too far behind."

Penn State's Kim McGreevy won with a time of 17:38, but sophomore Julie Sweitzer finished the 5000 meter race in 18:54 to finish 19th and lead the Bucknell contingent. Mandy McTavish, a State College native, continued her recent surge of good running by finishing 39th overall with a time of 19:25.

"Mandy continues to improve physically and mentally, and the results are starting to show that," Gulden said. "She's also gaining a lot of confidence."

Both teams will use the upcoming week off to prepare for the Patriot League Championships to be held Nov. 2 at Lafayette.

Women's tennis battles fatigue, takes 4th at Leagues

Colgate takes Patriot League title with 5-3 win over Army

BY JARED SILLIKER

Bucknellian Staff Writer

Two days, 22 matches against three teams, 47 sets and approximately 14 hours of tennis. This is what the Bucknell women's tennis team had to endure this past weekend as they traveled to Lehigh to compete in the Patriot League Championships.

Although exhausted both physically and mentally, the Bucknell women did manage to capture fourth place behind Colgate, Army and Lafayette. With extreme parity among the top four teams, however, Head Coach Rose Ewan was still very positive about the caliber of tennis that her players put forth. "The girls gave absolutely everything they had, and they were really only a few breaks away from winning some of the close matches," said Ewan.

In Bucknell's semifinal matchup against Army, all six singles matches went to three sets, as No. 1 Laura Leslie '00 and No. 5 Kristin Jones '00 both earned victories. Leslie and Jones also teamed up for an 8-6 doubles win to tally the third point against Army.

"It's tough when we have to come back so quickly and they're (Army) on fresh legs," said Ewan about the busy schedule her players had to deal with.

Seeded third, the Bucknell women downed Holy Cross in the first round, 5-2, behind straight-set victories by Katie Roland '99, Blakely Lauria '00, Jones and Kerry Callaghan '00. The Bison then only had one hour of rest before facing No. 2 seed Army.

In the match for third place on Sunday, Bucknell fell to Lafayette, 5-2, as Callaghan and Wendy Eason '98 scored the two lone Bucknell victories.

"I really couldn't ask them to do anything different. They all played well and some of their opponents just had good days," said Ewan. "They spent themselves so much that I didn't even know what to say to those who lost."

Bucknell did, despite the exhaustion, show some improvement versus Army. Leslie avenged a regular-season loss to her opponent, prevailing 6-3, 3-6, 6-2, while Roland improved on a 6-1, 6-1 season loss, falling 6-2, 4-6, 6-4 at No. 2 singles.

Colgate downed Army, 5-3, to take home the 1996 Patriot League Championship.

Bucknell plays at Duquesne this Saturday.

J - E - T- S

(A four letter word for loser)

October 26, 1995. That is the last time the woeful N.Y. Jets won a football game. By this Sunday the Jets will have gone 367 days without winning a single football game—not one game, and at this point it appears that Nate Newton has a better chance of winning the Boston marathon than the Jets do of winning another game this year. The Jets reinforced this belief this weekend, as the NFL's most inept team fumbled away a chance to beat the Bills, ironically the last team they defeated, to lose 25-22. The sad part about this loss is that I'm still trying to figure out how the Jets scored 22 points—they're that bad. How bad is that, you ask? Well, for starters, they're 0-8. But even more so, the Jets are not even in the games they're losing, as the average score of a Jets loss this season is 27-14. So what has gone so miserably wrong for the franchise that once saved the AFL? Let's explore some possibilities...

Commentary

E.J. Crawford
Sports Co-Editor

Rich Kotite. I really can't say this enough: Rich Kotite is the WORST coach in football history, and that includes the pee-wee ranks. I know people are always saying that coaches get too much of the blame, but simply look at Kotite's record, even the three stooges would be able to tell you that Kotite is horrible. He followed up a 7 game losing streak to end his Eagles career by taking over the Jets, and has since led them to a combined 3-21 record. Total, that makes this makes Coach Kotite , and I use the term "coach" very liberally, 3-28 over that stretch. To further point out Kotite's ineptitude, look at how well the Eagles have done since he left. Last year, even with a short, overweight scrambler with an average arm at the helm, the Eagles were able to muster a 10-6 record, and advanced to the second round of the playoffs; this year they are 5-2, and on pace to make another playoff performance. Meanwhile, the Jets have gone from a mediocre team with some promise to the laughing stock of football. They are ill-prepared for games and show a total lack of discipline and drive, both of which are key qualities a coach should provide. What I truly don't understand is why Kotite was hired in the first place. He was the old offensive coordinator of the Mess, I mean the Jets, during the Joe Walton era, which now look like the good old days. During that time the Jets continually struggled with their offense, which is one of the reasons the Jets let Kotite leave when Bruce Coslet was hired. So why bring him back? It simply makes no sense. Anyway, onto reason #2 of why the Jets stink...

Poor drafting. Obviously, over the years bypassing players such as Dan Marino, Jerry Rice, Emmitt Smith, and Junior Seau in favor of Ken O' Brien, Al Toon, Blair Thomas, and Jeff Lageman is foolish; but there is no need to cry over spilled milk—well, at least not too much. More recently the Jets have failed to address their needs and have neglected the most important areas when trying to rebuild a football team. If you can't control the line of scrimmage, you can't win in football. Yet the Jets continually overlook their pathetic lines to draft tight ends and linebackers, areas where the team is not deficient. The most appalling evidence of this was the 1995 draft, when Kotite promised that the Jets would take defensive lineman Warren Sapp if he was still available. When the ninth pick rolled around, the Jets passed on Sapp to take Kyle Brady, a tight end from Penn State. Two years later Sapp is developing into a solid defensive lineman with a Pro Bowl future, while the most notable thing Brady has done is call Cris Carter in an MCI Friends and Family commercial. In fact, Brady has struggled mightily all year, and can't even catch as well as a little 12 year-old brat in Yankee stadium. Problem #3:

Free agency. No one, including the big orange idiots in Tampa or the soggy Seahawks, have made bigger mistakes in free agency than the Jets. Their blunders have helped to create an All-Pro secondary in Kansas City, as well as creating a budding superstar in Cincinnati. But their biggest mistakes have been their pick-ups. Dexter Carter was of no help, and so far tackles David Williams and Jumbo Elliot have spent more time on the trainer's table than on the field, not that they're very good even when they do play. In addition, the Jets have recently learned that inexpensive backup Frank Reich is every bit the quarterback of their 25 million dollar man, Neil O' Donnell, which again is not saying much, as neither man is ranked among the top 25 quarterbacks in the NFL. This brings me to #4...

Bad luck. As bad as the Jets are, they haven't gotten many breaks, unless you count bones, in which case the Jets probably lead the NFL. This season alone, the Jets have lost last year's defensive rookie of the year Hugh Douglas to a broken ankle, last year's team MVP Marvin Jones to a broken leg, this year's top pick Keyshawn Johnson to a knee injury, which also befell prized free agent receiver Jeff Graham, receiver Webster Slaughter to a bad hamstring, in addition to O' Donnell's separated shoulder. Erik Howard, Marvin Washington, Bobby Houston, Williams, and finally Elliot, all starters, have all missed games this season. The Jets, the only non-expansion team not to win their division since the AFL-NFL merger, have also been victimized by numerous bad officiating calls, and even the League issued them an apology for the officiating in their game against the Redskins.

I know this all sounds terribly depressing; in fact it is, but there is some good news—I hear that Orlando Pace likes the color green.

Men's soccer snaps streak against LIU

By E.J. Crawford
Bucknellian Staff Writer

Bucknell men's soccer is experiencing some bumps on their road back to the winning ways they established earlier in the season. The Bison went on their road trip fresh off ending their three game losing streak, but were unable to turn things around, dropping contests to American, Richmond and Mt. St. Mary's before righting themselves with a home victory against Long Island University. The team finished the week with an overall record of 6-8.

Of all of the three losses, the one to American was the hardest. American came into the game on a hot streak that included a victory over top 10 St. Louis University, but struggled with the tenacious Bison.

American jumped out to an early lead, but the Bison soon countered, as Myles Perkins '98 scored off an assist from captain Wright Ramsey '98 at the 38:40 mark of the first half.

The game remained knotted throughout the second half, and regulation ended in a 1-1 tie. "We really came on in the second half and played great soccer." said Coach Craig Reynolds.

But despite all the Bison's hard work, it was a "fluke goal" that did them in in the overtime, as a ball with heavy topspin just curved over senior Corey Harbold's head to win the game for the Eagles. American scored a meaningless goal as overtime expired to complete their 3-1 victory.

The Bison then fell to a talented Richmond squad, as "we failed to control [Richmond's] quick and gifted strikers" and "never recovered from a sluggish first half," said Reynolds. The sluggish first half left the Bison in a 3-0 hole, and the game ended in a 5-2 victory for the Spiders.

The men's squad then travelled to Mt. St. Mary's in what Reynolds deemed a "very winnable game," but again the Bison came out sluggishly, and although they stepped up play in the second half, Mt. St. Mary's was still able to take advantage of their scoring opportunities, and cruised to a 2-0 shutout victory.

With their long road trip behind them, the Bison returned home to play Long Island University, a traditionally strong program suffering an off year. Bucknell basically controlled the game throughout, but was able to generate only one first-half goal by freshman Ryan Savell off an assist from Brian Ruddy '98.

A key turning point occurred early in the second half, as senior captain Doug Sweet cleared a ball only inches from tying the game, and shifting the momentum away from the Bison. "Doug Sweet's really helped to give us momentum, and once we scored the second goal we took control of the game," said Coach Reynolds.

Micahel Nevin '00 scored that second goal, and he was followed by goals from Ruddy and Brad Willock '99. Ryan Cummings '99, Scott Gilroy '00 and Brendon Whitworth '98 all registered assists in Bucknell's victory. Goalkeeper Corey Harbold had three saves in registering his fourth shutout of the season.

Bucknell played Penn State last night in a game that in a 1-0 lose, and their next game is against a "solid" Monmouth team that defeated them by a goal last season. After that, the men play League foe navy in a must-win game if Bucknell wants to remain in contention for a Patriot League playoff berth.

Ruggers win thriller

By Karen Dziuma
Bucknellian Team Correspondent

Last weekend, the Bucknell women's rugby club traveled to Haverford to take on the seventh ranked team in the league. Despite the rainy conditions, the ruggers managed to squeak by this unexpectedly tough team.

Even though the field was a huge puddle, Bucknell began the first half with high spirits. From the starting whistle, the combined Bryn Mawr/Haverford team proved to be an aggressive squad. The game remained scoreless for the first twenty minutes as both teams battled for control of the game.

Bryn Mawr/Haverford scored with about ten minutes remaining in the first half, but failed to make their kick. Bucknell struggled to tie up the score by the end of the half, but was not able to.

Down by five at halftime, Bucknell went into the second half determined to score. Off a scrum close to the try zone, Megan Kull '98, with quick thinking, scored Bucknell's first try. Freshman Lindsay Currier kicked for the extra two points and Bucknell led 7-5.

Both teams continued to struggle to gain control of the slippery ball, but soon after, Bryn Mawr/Haverford succeeded to score another try, making the score 10-7. Not wanting to waste the trip on Homecoming weekend with a loss, Bucknell fired themselves up and stepped up the level of play.

Off a kick from Megan McCarthy '99, Anne Mayer '98 managed to place the ball in the try zone before sliding out of bounds, pushing Bucknell ahead by a score of 12-10. Bucknell continued to hold off an aggressive team until the end of the game, when a sigh of relief could be heard by the faithful fans and coaches as Bucknell emerged victorious.

"This was definitely a team victory. Everyone pulled together and gave 100% of their energy to win this game," said coaches Jim Mathias and Bob Langton.

In spite of the numerous injuries, Bucknell played a strong defensive and offensive game. Forwards Erin Crowley '99, Karen Dziuma '99, Bridget Lewis '97, Andrea Maas '98, Beth Botzer '98, Deb Yates '98 and Jessie Liddell '99 succeeded in holding a strong Bryn Mawr/Haverford forward line.

Backs Laura Collins '99, Christy Berwager '99, Cara DeVito '99 and Alyssa Gady '98 played an aggressive game, consistently moving the ball up the field.

Bucknell faces national champion Princeton this weekend at home. The team will also be competing in the Union's Championship Tournament in two weekends, with a good chance of going further in the post-season than past Bucknell teams.

Erin Leidl—The Bucknellian

Bucknell's hard hitting women's rugby club beat Haverford/Bryn Mawr Saturday. They face Princeton at home this week.

Trick or Treat!?!

The Haunts are 'A Haunting, the Ghouls are 'A Ghosting. Come join the fun.

BY BETH MARTIN
Bucknellian Staff Writer

Halloween, first called Samhaim Eve, originated in ancient Britain and Ireland as a Celtic festival. Occurring on October 31, it celebrated the end of summer, and the night before the new year. People believed that on this day the souls of the dead revisited their homes, and ghosts, witches, hobgoblins, black cats, fairies, and demons wandered about. Huge bonfires were built upon hilltops to assuage these pagan forces.

In addition, the ancient British and Irish thought Halloween was the best time to make predictions about marriage, health, luck and death, and they often invoked the devil for assistance.

The Christian festival of All Hallow's Eve, celebrated on the same date, was greatly influenced by the traditional pagan festival. Gradually, Halloween became a secular observance.

In Scotland, young people used to assemble for a game to ascertain which of them would marry during the year and in what order the marriages would occur.

Immigrants to the United States, particularly the Irish, introduced Halloween customs that became popular in the late 19th century. Boys and young men often participated in a Mischief Making Night, overturning sheds and outhouses, and breaking windows.

The jack-o'-lantern probably derived its name from a night watchman. Although it is usually carved from a native pumpkin in the United States, in Scotland many use a turnip.

In modern times, Halloween is widely celebrated in the United States. Halloween Parades, costume parties, trick-or-treating, mischief night, and candy are things Americans commonly associate with October 31.

Recently, Halloween has become a source of anxiety for many. Kally Malik '00 said "Halloween is much more suspicious today than even 10 years ago. There are all these stories about people giving out poisoned candy and children getting molested while trick-or treating. If I had children, I definitely would not let them go trick-or-treating alone, and I wouldn't let them eat their candy either."

In Kulpmont Borough, a local community which held trick-or-treating on Monday night, someone soaked candy in gasoline and other toxins, before handing it out to children. According to the Kulpmont Police Department, they have confirmed that six people are ill from the candy. Investigations are continuing.

Students reflected on past Halloween experiences. Karen Middleton '00 said "One year I was a daisy dressed all in green with leaves coming out of my head. Another time my friend and I took a 23 year-old English guy around with us. He was so excited about all the candy he got."

Mike Nicolella '99 said "I remember when my Mom found all these old clothes and made me dress up as a Mexican. My friend and I went out trick-or-treating, but after awhile we had only gotten a half pillowcase of candy each. My Dad told me to look in bushes because little kids sometimes store their candy there, but we couldn't find any around. Then we hiked all the way over to a wealthy neighborhood, but we only got pennies and crumbly candy so we left. On the way home there weren't even any houses to go to. We were pretty disappointed."

HAPPY HAUNTING!!

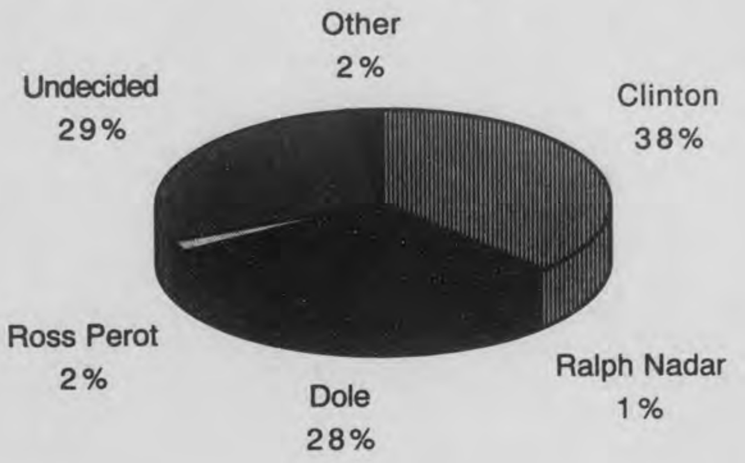
Clinton tops student poll



BY NICOLE MAESTRI
Bucknellian Staff Writer

With the general elections quickly approaching, citizens across the country are deciding which candidate will receive their vote on Nov. 5. A poll of a portion of the student body, conducted by *The Bucknellian* found that many students, while registered to vote, were still undecided as to which candidate they would endorse this election year.

The poll, conducted last week, questioned approximately 300 randomly selected students and received 288 responses.

Of this group of students, 29 percent questioned were still undecided as to who they would vote for in the election. Twenty-eight percent said they would vote for Dole and 38 percent would vote for Clinton, but one-third still remained undecided.

Gregory Sanjian, professor of political science, felt that this indecision could translate into inaction. "That is a fairly large number of undecided and that is unusual. It suggests that they have not thought about the election much and may fit into the category of people who won't be voters. If they're undecided this late, they probably won't vote."

Apathy on behalf of young voters has been a common problem in elections. Of students polled, 75 percent said they were registered to vote, an usually high percentage. If they will actually vote is another question.

Many efforts have been made in recent years to increase young voter registration since, as Sanjian explains, "Research has shown young, college people aged 18-25 are least likely to vote."

New study-abroad policy implemented

BY REBECCA KLINGLER
Bucknellian Staff Writer

Sophomores who are thinking about studying off-campus the spring semester of their junior year will need to begin planning almost a year in advance. According to a policy recently adopted by the International Education Office, all sophomores now need to apply for preliminary approval by Feb. 28, no matter which semester they are choosing to go off campus.

Upset by this change, some faculty members have requested a more in-depth look at the subject at the November faculty meeting.

The past procedure required only those students planning to leave campus in the fall to apply for preliminary approval by February. Students who wished to study off-campus in the spring were able to wait until September to seek approval.

Preliminary approval requires students to choose the program(s) in which they are interested, have a 2.8 cumulative grade point average, attend an advising session and submit the preliminary application.

Barbara Rowe, director of International Education, said that changes in enrollment patterns necessitated the new policy. Previously, the number of students studying abroad in the fall was similar to or slightly higher than the spring semester. Beginning in 1994, spring figures rocketed.

The precise number of students studying abroad in the spring cannot be determined before the school year begins, since students need not apply before September. This delay leaves the University unable to compensate for the loss of tuition and financial aid that transfers with the student.

The early deadline will provide the figures that the University needs to counteract this loss of money.

"We will know the numbers for the following year," Rowe said. "We may still have a high number, there may still be an imbalance between fall and spring, but we'll know."

Rowe said that once administrators know the number of students studying off campus in the spring, they have several options to prevent the loss of money, such as increasing the size of the freshman class or accepting more transfer students.

While faculty members recognize that the finances of the University are important, some feel money matters have taken precedence over educational purposes.

"The recommendation to change the date...is related more to economics than it is to academics," said John Murphy, professor of English.

John Beard, director of the Russian program, is bringing a twofold motion to the faculty meeting. He believes that this matter should be referred to the Committee on Instruction and that the administration's decision should be suspended until the committee has reached its own conclusions.

This was "a curricular decision, made by administrators without the consent of the faculty," he said. "Anything that affects the education of students must go through the faculty."

This decision does affect students' education, Beard said.

"Many students don't make up their mind until the last minute," he explained. "Fewer students will

Roofie drug adds to concern on campus

BY KATHRYN ARDINGER
Bucknellian Staff Writer

Since the campus has taken measures to heighten awareness about sexual assault, the University community should be aware of the "date-rape drug."

"Roofie-rape," the spiking of someone's drink with the prescription drug known as Rohypnol (flunitrazepam) and then raping that person, has been characterized as "the perfect crime."

"Some prescription drugs and other substances are being sold illegally to criminals who spike drinks to sedate women and sexually assault them," according to Hoffmann-La Roche Inc.

Rohypnol is prescribed for sleeping disorders and has been implicated in over 2,400 criminal rape cases across the country.

Within this region, there have been five reports of rape in which Rohypnol may have been involved. At Pennsylvania State University three such rapes have been reported. There have also been two reports in Lebanon county.

Vincent DeCerchio, director of Public Safety, commented that he has heard rumors of possible situations where the drug may have been used at the University. However, DeCerchio added, there is no evidence, information or names of anyone who is willing to come forward.

Sig Ep to recolonize

C.A.L..V.I.N. and H.O.B.B.E.S. may lose home

BY TRACY THIFFAULT
Bucknellian Staff Writer

Sigma Phi Epsilon, the fraternity formerly known as SPE, will make an effort to recolonize at the University next fall after being shut down by its national chapter in the fall of 1993.

Due to many problems, including financial mismanagement and substance abuse, the Bucknell chapter of Sigma Phi Epsilon's charter was revoked by its nationals, and the University acquired its house.

The fraternity must have 23 members to recolonize and agree to use "Sig Ep", the fraternity's official nickname, rather than SPE, as the fraternity was previously called on campus. Its national chapter will be looking for members of class of 2000 to aid in the effort of recolonization.

Sig Ep will not participate in formal rush next fall. Its search for members will begin following rush with those men who did not pledge an existing fraternity.

If its efforts are successful, the fraternity will be officially recognized by the University and will occupy its old house.

The house is now inhabited by the campus group, Creating A LiVely and Ingenious New Habit Of Being at Bucknell and Enjoying Sobriety (C.A.L.V.I.N. and H.O.B.B.E.S.).

The house's deed was transferred to the University in December of 1994. At that time the Uni-

Public speaking may be suggested as requirement

BY ARGUN ULGEN
Bucknellian Staff Writer

Public speaking brings fear to the hearts of many, in practically every field in the job market today.

Many University faculty members are aware of this and are considering making public speaking a requirement for students.

While the faculty does not desire to add new courses that will solely concentrate on public speaking, Gale Duque, a writing tutor at the University Writing Center believes that public speaking projects should definitely be incorporated into certain courses.

Duque believes that public speaking should be assimilated into foundation seminars and Capstone courses, because those courses present the best subject material on which to give oral reports. Duque, as well as other well trained public speakers, have been encouraged to give more lessons on public speaking in certain foundation seminars.

Members of the faculty have discussed making public speaking a more integral part of certain courses and possibly including public speaking as a course requirement. The faculty's logic behind this is that public speaking takes just as much precedence as writing does, and public speaking has become extremely important in the workplace.

Certain courses would be designated as public speaking courses and become a part of the graduation requirement.

However, there are many consequences of adding a public speaking requirement to the disciplinary breadth.

"While the idea is good, making a course requirement may present restrictions on other courses a student may want to take. It may also create the burden of adding new faculty members

CALVIN & HOBBES

Michelle Karam—The Bucknellian

The C.A.L.V.I.N. and H.O.B.B.E.S. house may be reclaimed by Sigma Phi Epsilon when they recolonize at Bucknell. Sig Ep, formerly SPE, will have one chance to recolonize in the fall of 1997.

versity decided to give the house to C.A.L.V.I.N. and H.O.B.B.E.S. As part of the agreement, Sig Ep would be allowed one opportunity to recolonize in the fall of 1997.

C.A.L.V.I.N. and H.O.B.B.E.S., a substance-free organization which celebrated its three year anniversary this fall, has occupied the house since 1995. It was assigned to the facility for two years with the stipulation that if Sig Ep was able to recolonize, they would be allowed to live in the house.

C.A.L.V.I.N. and H.O.B.B.E.S. has been extremely successful on campus, planning weekly events such as parties, movies, and trips for its members since its origination four years ago. Currently 35-40 students attend meetings, however as a campus group anyone on campus is encouraged to participate.

"With a house, the group is much stronger; it brings people together," said William Vogt '97, president of C.A.L.V.I.N. and H.O.B.B.E.S. The house, with a basement and common room, gives the organization a place to hold events and meetings.

"Obviously if we're moved we're not going to be very happy. Our concern is where we'll be moved—a dorm, a house, we just don't know," Vogt said.

The University plans to relocate C.A.L.V.I.N. and H.O.B.B.E.S. should Sig Ep reoccupy its house in 1998. Gerald Commerford, associate dean of students, said, "The concept [of C.A.L.V.I.N. and H.O.B.B.E.S.] is so wonderful. We'll do all we can to promote it."

Possible places of relocation include another fraternity house, a hall in Swartz, or an off-campus location.

New equipment comes to Gym

Jeanna Futuyma—The Bucknellian

New exercising equipment in the Davis Gymnasium Annex provides more opportunity for students to stay in shape on campus.

CORRECTIONS

In last week's article, "Questions shot at Firing Line," the following errors were made: Speaker Gingrich used an ice bucket to illustrate the waste in government spending as committed by the Democratic Party, not as a comparison to the United States in general. Shrum asked Gingrich why the term limits bill that passed did not apply to the current members. Gingrich explained that the Republican's were responsible for bringing the issue to the floor and that the Democrats opposed the concept of term limits. Gingrich referred to Shrum's diversion of the issue as a "cute" debate strategy, and did not say that the issue itself was "cute." He referred to Shrum's "ploy" as not substantial, not the issue as being lacking substance.

Also, on the front page, Tom Bonville '98 was misidentified as Josh LaBrec '98 in the photograph of Bonville yelling to his teammates.

On page 11, Elena Dodge '99 was wrongly named Nisa Bryant '98.

The Bucknellian would also like to remind students and faculty that Lewisburg began to ticket and tow cars not honoring parking restrictions on designated streets. Parking restrictions are posted on Borough streets from 7 a.m. 12 p.m. except for Market Street. Market Street must be clear from midnight until 7 a.m. This is to facilitate leaf removal efforts at this time of year. *The Bucknellian* would like to apologize for accidently omitting this information from last week's issue.

PUBLIC SAFETY LOG

October 23, 1996

INFORMATION/MEDICAL ASSIST— A Red Cross Bloodmobile volunteer was transported to Evangelical Hospital Emergency Room for treatment of abdominal pains.

October 24, 1996

INSTITUTIONAL VANDALISM/BROKEN WINDOW— A Public Safety Officer responded to Edwards House to find that unknown person(s) had thrown a pumpkin through a window. Investigation is continuing.

CRIMINAL MISCHIEF— A Public Safety Officer responded to Larison Hall on a report of two individuals taking license plates off of vehicles parked on St. George St. Investigation is continuing.

INFORMATION/STUDENT IN LIBRARY AFTER HOURS— Upon responding to an alarm at the library, Public Safety Officer escorted from the building, a University student who had fallen asleep prior to the building closing.

LARCENY/THEFT— A University employee reported to a Public Safety Officer that unknown person(s) had removed a fire extinguisher from Larison Cottage. The investigation is continuing.

RETAIL THEFT— A Public Safety Officer responded to Bucknell Bookstore for the theft of a compact disk. A University student was cited by East Buffalo Township Police in the incident.

HARASSMENT BY COMMUNICATION— A University student reported to a Public Safety Officer that he had received numerous harassing phone calls at his Vedder Hall dorm room. The investigation is continuing.

October 25, 1996

INSTITUTIONAL VANDALISM— A Public Safety Officer responded to Taylor Hall on the report of an individual breaking out windows. No persons were located in a search of the area. The investigation is continuing.

LARCENY— A University employee reported to a Public Safety Officer that unknown person(s) had stolen two pair of warm-up pants from the Fieldhouse Women's Equipment Room. The investigation is continuing.

LARCENY— A University student reported to a Public Safety Officer that unknown person(s) had removed $80-$100 from her unlocked Trax Hall room. The investigation is continuing.

INFORMATION/ASSIST EBTPD— Two University students reported to a Public Safety Officer that while walking on River Road a vehicle passed them several times and the occupants were shouting obscenities. One of the students was struck on the chin by an object thrown from the vehicle. The investigation will be conducted by East Buffalo Township Police Department.

INFORMATION/OFF CAMPUS MEDICAL INCIDENT— A University student reported to Public Safety Officer having been admitted to the hospital for an equestrian injury.

October 26, 1996

VANDALISM— A University student reported to a Public Safety Officer that unknown person(s) had kicked a hole in a glass door panel in Silberman. The investigation is continuing.

INFORMATION/MEDICAL ASSIST — A University employee was transported to the hospital after suffering symptoms of a heart attack.

LARCENY/THEFT— A University student reported that her bicycle was taken by unknown person(s) when it was locked to the bicycle rack outside of Smith Hall. The bicycle was later located at the Langone Center. The investigation is continuing.

October 27, 1996

INFORMATION/SICK STUDENT— A Public Safety Officer responded to Lit Road for a University student who had become ill while receiving a Safe Escort. The student refused medical treatment and was transported to the residence with a friend.

CAR FIRE/SUSPECTED ARSON— A Public Safety Officer responded to the Gateway Lot for a vehicle fire. William Cameron Engine Co. extinguished the fire. Lewisburg Police are conducting the investigation.

October 28, 1996

INFORMATION/MEDICAL ASSIST— A Public Safety Officer responded to the Fieldhouse for the report of a University student who had fainted. The student refused emergency transport and was taken to Evangelical Hospital Emergency Room by team members.

OFF CAMPUS INCIDENT/HARASSMENT— The three occupants of a vehicle traveling on S. 7th St. shouted and threw corn at a University student. The incident was also reported to Lewisburg Police.

CRIMINAL MISCHIEF— A Public Safety Officer responded to the Gateways parking lot for the report of a vehicle that had been scratched by unknown person(s). The investigation is continuing.

HARASSMENT BY COMMUNICATIONS— A Public Safety Officer responded to Larison Hall for a report of harassment by communication. The investigation is continuing.

October 29, 1996

CRIMINAL MISCHIEF/VEHICLE DAMAGE— A University student reported to a Public Safety Officer that unknown person(s) damaged the rear driver's side panel of his vehicle while it was parked at the Bucknell West parking lot. The investigation is continuing.

INFORMATION/UNFOUNDED ASSAULT REPORT— A Public Safety Officer responded to Bertrand Library for the report of a female being assaulted by a male University student. The student and suspected victim were questioned and verified that no assault had taken place.

INFORMATION/MISSING GASOLINE CAP— A University student reported to Public Safety Officer that unknown person(s) had taken the gas cap from his vehicle.

LARCENY/BICYCLE— A University student reported to Public Safety Officer that her bicycle was taken from the Vedder West bicycle rack by unknown person(s). The investigation is continuing.

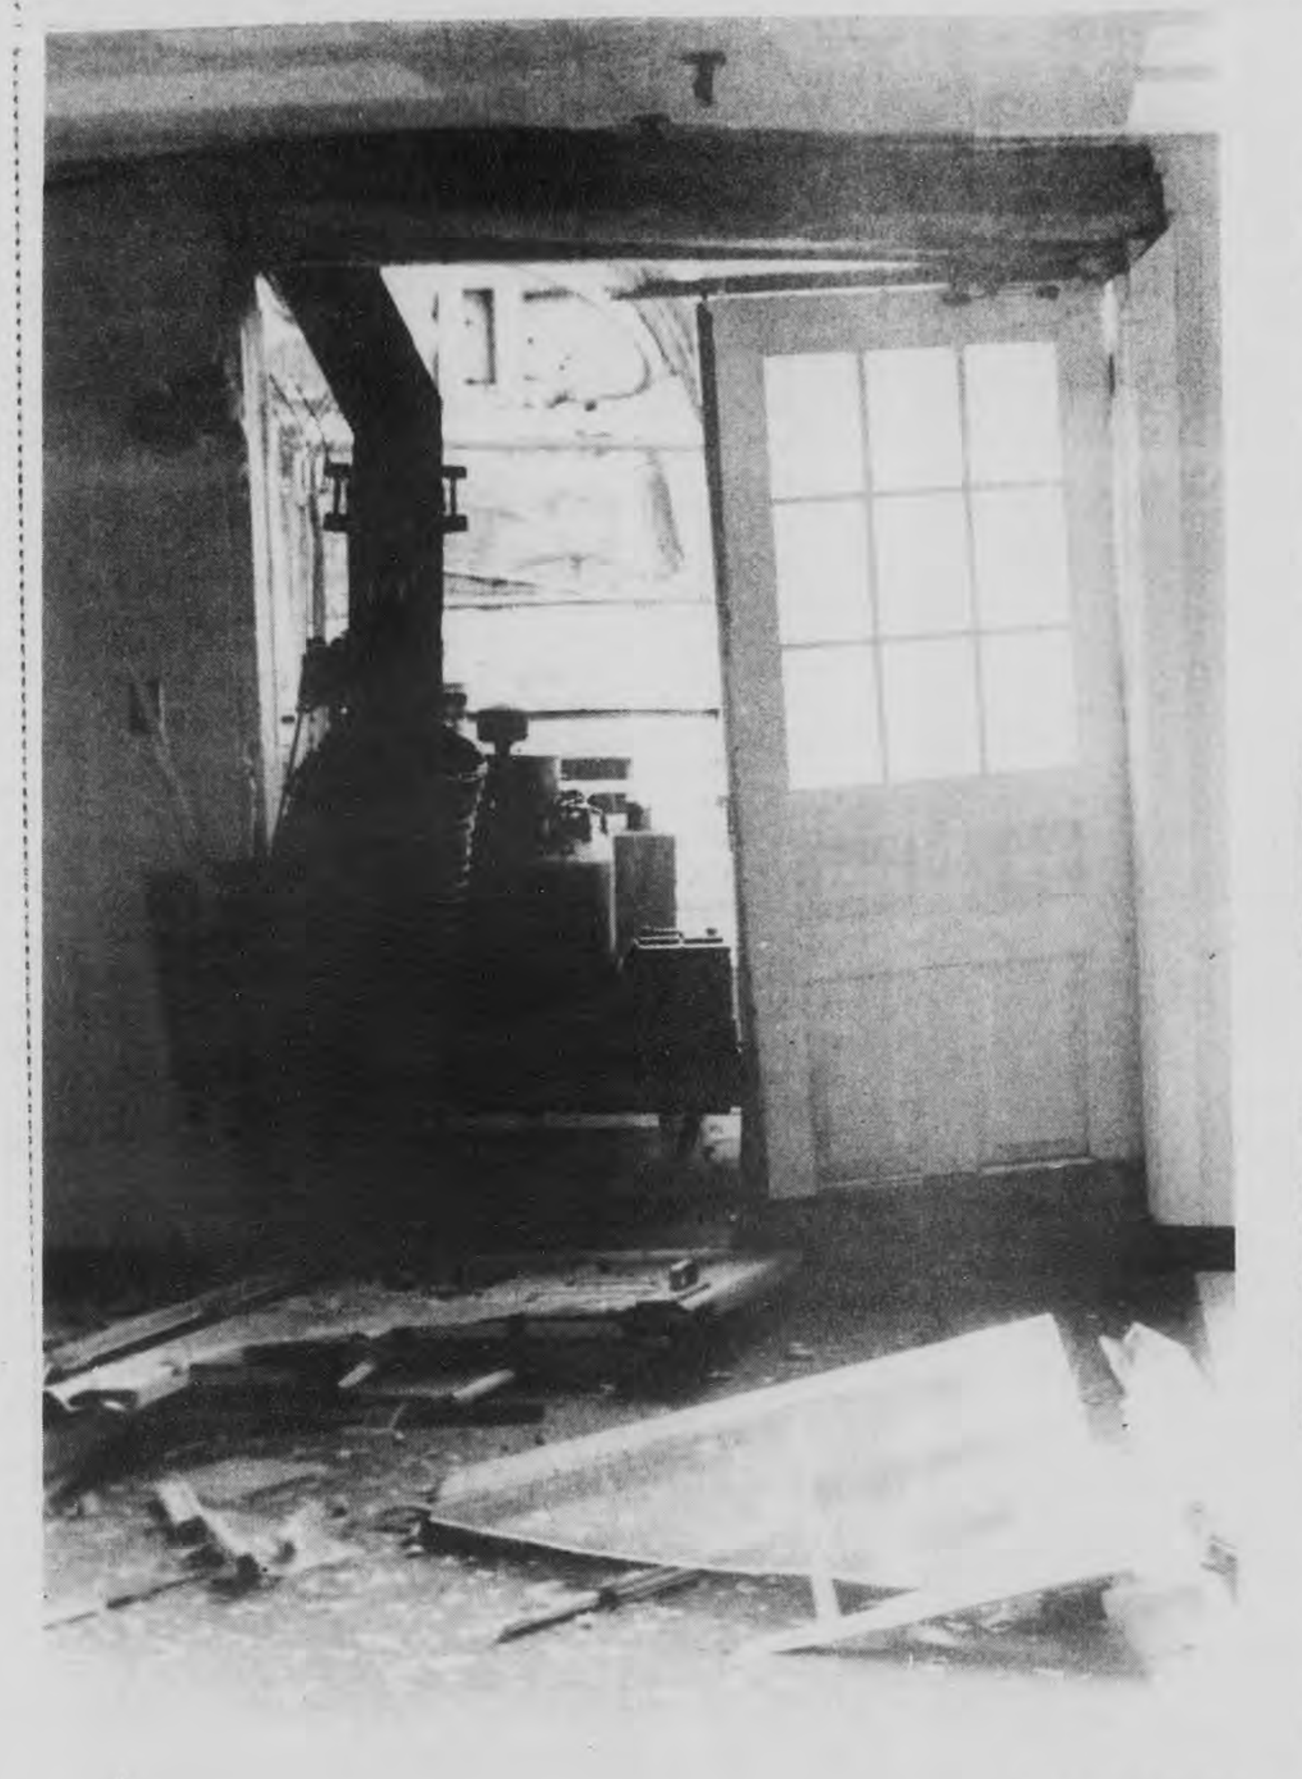
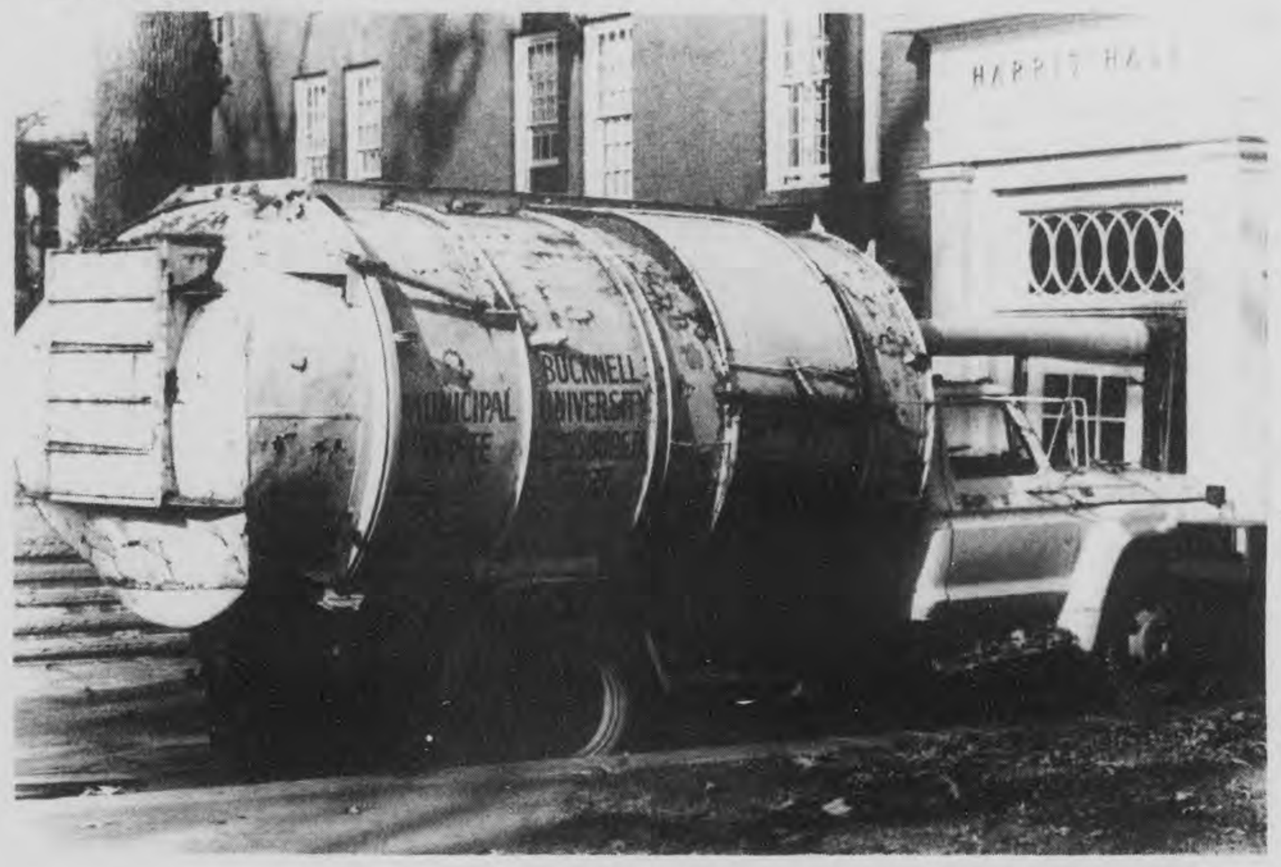
Harris truck stop



Jonah Half—The Bucknellian

While it attempted to remove leaves around the main entrance of Harris Hall, a municipal waste truck rolled down the steps and crushed the dorm doors yesterday afternoon. No one was harmed; however, the truck, the door frame and doors of Harris were "extensively damaged," said James Middleton, administration lieutenant. The cause of the accident is undetermined and damage costs are being estimated.



Jonah Half—The Bucknellian

Community Judicial Board Results

An underage first-year male student was stopped by Public Safety Officers on Fraternity Road for possession of an open container of beer. The student gave the officers false information and then attempted to flee. The officers had to restrain the student because he continued to resist and refused to comply with instructions.

The student was suspended from the University for one semester, however suspension has been remitted provided that he is not found responsible for any Category I violation of the Student Code of Conduct through June 1, 1997. If he is found responsible for a Category I offense the sanction of suspension for one semester will be activated.

The student is required to meet with the Coordinator of Drug and Alcohol programs, write letters of apology to the Public Safety Officers involved in the incident, perform 10 hours of University service, and write a five page paper reflecting on the incident.

A first-year male was stopped by Public Safety Officers while smoking marijuana. His room was searched by Lewisburg Police and Public Safety and a cigarette pack of roaches was found.

The student was suspended from the University for one semester, however suspension has been remitted provided that he is not found responsible for any Category I violation of the Student Code of Conduct through June 1, 1997. If he is found responsible for a Category I offense, the sanction of suspension for one semester will be activated.

The student acknowledged that his use of marijuana is a "psychological habit" and was referred to staff at Psychological Services.

A Public Safety Officer entered a room of a junior male in Gateway Malesardi after being contacted by a Resident Assistant who smelled the odor of marijuana. After entering the apartment the officer knocked and entered the student's bedroom. Two other students were also present in the room. The Lewisburg Police arrived and the student gave permission for the officer to search his room. The student then led the officer to one of his dresser drawers that contained a one gram bag of marijuana. The student claimed it had been left by friends of his who had visited that evening. The student was suspended from the University for one semester, however suspension has been remitted provided that he is not found responsible for any Category I violation of the Student Code of Conduct through June 1, 1997. If he is found responsible for a Category I offense, the sanction of suspension for one semester will be activated.

The student is required to write a three page testimonial to be used in the University Orientation Program, "You Gotta Be" in August 1997.

The two junior males who were also present in the room were found responsible by the Community Judicial Board because they did not take any action to correct the situation or leave the room.

The students were suspended from the University for one semester, however suspension has been remitted provided that they are not found responsible for any Category I violation of the Student Code of Conduct through June 1, 1997. If they are found responsible for a Category I offense, the sanction of suspension for one semester will be activated.

The students are required to write a three page testimonial to be used in the University Orientation Program, "You Gotta Be" in August 1997.

ELECTION

From page 1

He attributes this low turn out to the fact that younger adults are not as accustomed to voting as their parents might be or because "politics is not as important to them...[they] do not pay taxes or their college tuition," so voting is not as meaningful to them.

On campus, Delta Delta Delta sorority set up a table in the Langone Center Mall the first week of October to help students register to vote and apply for absentee ballots.

Alison Cox '97, helped with this effort, which registered over 300 students. Two hundred additional students either directly received absentee ballots or were given the phone number to call in their state in order to request an absentee ballot.

This was the first year Delta Delta Delta set up the table and Cox felt that, outside of simply voting in the general election, "a lot of people were excited to vote in their county's election on more of a grass roots level."

Traditionally a conservative campus, 34 percent of the students polled considered themselves to be Republican, 33 percent undecided, 17 percent Democrat, and 14 percent independent. However, 38 percent said they would vote for Clinton.

This disparity between party affiliation and voting does not surprise Sanjian. "In the 1992 Campaign with Clinton and Bush, Clinton did better than Bush," on campus Sanjian remembered. But the indecision among students still remains.

Cox said Delta Delta Delta hopes to continue its table in the future to promote voter registration and was surprised that no one else had done one. Simple and convenient practices such as these may be easy solutions to raising student registration and decreasing young voter indecision.

See Opinions for complete coverage of the election issues.

SIG EP

From page 1

CALVIN & HOBBES

Michelle Karam—The Bucknellian

The C.A.L.V.I.N. and H.O.B.B.E.S. house may be reclaimed by Sigma Phi Epsilon when they recolonize at Bucknell. Sig Ep, formerly SPE, will have one chance to recolonize in the fall of 1997.

versity decided to give the house to C.A.L.V.I.N. and H.O.B.B.E.S. As part of the agreement, Sig Ep would be allowed one opportunity to recolonize in the fall of 1997.

C.A.L.V.I.N. and H.O.B.B.E.S., a substance-free organization which celebrated its three year anniversary this fall, has occupied the house since 1995. It was assigned to the facility for two years with the stipulation that if Sig Ep was able to recolonize, they would be allowed to live in the house.

C.A.L.V.I.N. and H.O.B.B.E.S. has been extremely successful on campus, planning weekly events such as parties, movies, and trips for its members since its origination four years ago. Currently 35-40 students attend meetings, however as a campus group anyone on campus is encouraged to participate.

"With a house, the group is much stronger; it brings people together," said William Vogt '97, president of C.A.L.V.I.N. and H.O.B.B.E.S. The house, with a basement and common room, gives the organization a place to hold events and meetings.

"Obviously if we're moved we're not going to be very happy. Our concern is where we'll be moved—a dorm, a house, we just don't know," Vogt said.

The University plans to relocate C.A.L.V.I.N. and H.O.B.B.E.S. should Sig Ep reoccupy its house in 1998. Gerald Commerford, associate dean of students, said, "The concept [of C.A.L.V.I.N. and H.O.B.B.E.S.] is so wonderful. We'll do all we can to promote it."

Possible places of relocation include another fraternity house, a hall in Swartz, or an off-campus location.

New equipment comes to Gym

Jeanna Futuyma—The Bucknellian

New exercising equipment in the Davis Gymnasium Annex provides more opportunity for students to stay in shape on campus.

CORRECTIONS

In last week's article, "Questions shot at Firing Line," the following errors were made: Speaker Gingrich used an ice bucket to illustrate the waste in government spending as committed by the Democratic Party, not as a comparison to the United States in general. Shrum asked Gingrich why the term limits bill that passed did not apply to the current members. Gingrich explained that the Republican's were responsible for bringing the issue to the floor and that the Democrats opposed the concept of term limits. Gingrich referred to Shrum's diversion of the issue as a "cute" debate strategy, and did not say that the issue itself was "cute." He referred to Shrum's "ploy" as not substantial, not the issue as being lacking substance.

Also, on the front page, Tom Bonville '98 was misidentified as Josh LaBrec '98 in the photograph of Bonville yelling to his teammates.

On page 11, Elena Dodge '99 was wrongly named Nisa Bryant '98.

The Bucknellian would also like to remind students and faculty that Lewisburg began to ticket and tow cars not honoring parking restrictions on designated streets. Parking restrictions are posted on Borough streets from 7 a.m. 12 p.m. except for Market Street. Market Street must be clear from midnight until 7 a.m. This is to facilitate leaf removal efforts at this time of year. *The Bucknellian* would like to apologize for accidently omitting this information from last week's issue.

News Briefs

National News

Former FBI section chief pleads guilty, admits destroying Ruby Ridge report

WASHINGTON — An FBI executive pleaded guilty to obstruction of justice yesterday after admitting in federal court that he had destroyed an internal FBI report criticizing the bureau's handling of the 1992 siege at Ruby Ridge, Idaho.

As part of his plea, E. Michael Kahoe agreed to cooperate with federal prosecutors looking into the possibility that other FBI officials were involved in a cover-up of the actions that took place during the nine-day standoff outside white separatist Randy Weaver's mountain cabin.

Weaver's wife and son, and a federal marshal were shot to death during the nine-day standoff.

The lead federal prosecutor, U.S. Attorney Michael Stiles, said he has not promised Kahoe he will remain out of prison. Kahoe could be sentenced to up to 10 years in prison and a $250,000 fine. However, the judge granted the prosecutor's request that no sentencing date be set, and that Kahoe be released without posting bond.

TWA fuel probe tests shed no light on cause of explosion

WASHINGTON — Tests conducted on two fuel probes from the center fuel tank of TWA Flight 800 could not determine whether the explosion that killed 230 people was caused by a bomb, missile or mechanical failure, investigators said yesterday.

The probes were the only components on the plane whose wiring runs inside the center fuel tank, making them a possible source of ignition.

The tests ruled out the possibility that the probes had "arced," or sent a spark into the tank, said Shirly Hazle, spokeswoman for the National Transportation Safety Board.

One of the two probes found last week showed signs of "petaling," a curling pattern of metal damage that can be caused by high explosives.

However, Hazle said the tests showed the "petaling" was the result of the explosion in the center fuel tank, not high explosives.

CIA, Pentagon deny chemical weapons cover-up

WASHINGTON — The Pentagon and the CIA denied yesterday they are withholding evidence that thousands of U.S. troops were exposed to chemical weapons during the Persian Gulf War.

The charge was made by Patrick Eddington, a CIA intelligence analyst during the Gulf War who said he saw "a pattern of deception and denial, and it is continuing to this day."

The 33-year-old Eddington has since resigned from the CIA and is writing a book about chemical weapons in the Gulf War. His wife, Robin, also resigned from the agency.

"The idea that the Defense Department has engaged in any sort of conspiracy to cover up any information regarding Gulf War illness is simply not true," Pentagon spokesman Bryan Whitman said. "We have nothing to hide. As we learn new information, we provide it as rapidly as possible."

"All of the information Mr. Eddington brought forward was looked at by the CIA and provided to the presidential advisory commission," said CIA spokesman Mark Mansfield. The commission is reviewing allegations that U.S. troops were exposed to chemical agents during the 1990-1991 Gulf War.

Jenny Jones to testify in talk show murder trial

PONTIAC, Michigan — Talk show host Jenny Jones is expected to testify today in a murder trial after a judge ruled yesterday that she is a relevant witness to the defense of Jonathan Schmitz.

Schmitz, 26, is accused of first-degree murder in the shotgun death of Scott Amedure, 32, three days after Amedure revealed he had a crush on Schmitz during a taping of the "Jenny Jones" show about secret admirers.

Defense attorney James Burdick said he hoped to call Jones to the stand this afternoon.

"She's going to have to explain why they did things the way they did and why she went out of her way for the sake of ratings to yank every last bit of emotion of Jon," Burdick said.

Jones' appearance as a witness was cleared by Oakland County Circuit Judge Francis O'Brien, who granted a defense motion that her testimony is relevant to Schmitz' defense.

World News

S. African apartheid assassin jailed for life

PRETORIA, South Africa — Eugene de Kock, an assassin for South Africa's former whites-only government, was sentenced to life in prison yesterday. The former head of a secret police unit, known by his colleagues as "Prime Evil," is the highest ranking officer convicted so far for apartheid crimes.

A life sentence is the maximum possible in South Africa, where the death penalty has been abolished. There remains a chance, however, that de Kock, 47, will not have to serve any significant prison time following his 18-month trial.

He has asked for amnesty from South Africa's Truth and Reconciliation Commission. The panel, headed by Nobel Peace Prize-winner Desmond Tutu, can free perpetrators of human rights abuses who confess and prove their deeds were politically motivated.

One victim was Bheki Mlangeni, who left a widow and son, and who was a lawyer for the now ruling African National Congress (ANC), before his head was blown of by a booby-trapped cassette player mailed to him by De Kock in 1991.

Yeltsin's foes call for top aide to resign

MOSCOW — Gennady Seleznyov, the communist speaker of Russia's lower house of parliament, demanded the ousting of President Boris Yeltsin's chief of staff yesterday, accusing Anatoly Chubais of promoting a business associate to the powerful Security Council.

Chubais has been under increased fire from other Russian officials, with some saying that he is attempting to grab too much power while Yeltsin prepares for heart surgery and a lengthy recuperation.

Yeltsin's foes unleashed a fierce volley of potshots at Chubais yesterday after the president put one of Chubais' wealthy associates — auto and media mogul Boris Berezovsky — on the Security Council.

Enraged, Seleznyov decried what he called an invasion of the "holiest of holies" — the inner sanctum of national security — and demanded Chubais' resignation.

Zaire, Rwanda edge closer to war

KIGALI — Zaire and Rwanda moved closer to war yesterday after two days of trading artillery fire across their border and a Rwandan military operation into Zaire. "There is every indication that we are going in that direction," Rwandan Vice President Paul Kagame told a news conference in the capital Kigali.

French President Jacques Chirac called for an international conference on the mounting tensions between the two countries.

Kagame said Rwanda would be forced to respond if faced with what he termed Zairean aggression. "If Zaire brings the war to us we shall fight Zaire ... even though we seek no war with Zaire," said Kagame, who is also Rwanda's defense minister.

Later, Rwandan Lt. Col. Firmin Kagame told reporters in the border town of Cyangugu he sent "a good-sized" force of troops into Zaire after nightfall on Tuesday in retaliation for Zairean firing into Rwanda.

"After they hit our territory and injured and killed our people and hit civilians we were forced to retaliate," the commander said.

Settlers, extremists threaten peace process

JERUSALEM - Tensions are mounting in the West Bank town of Hebron amid fears that Jewish extremists might stage a violent effort to scuttle the peace process and the planned withdrawal of Israeli troops.

Israel wants to create a buffer zone between the 94,000 Palestinians and 450 Jewish settlers to prevent "an explosion of the whole system," chief Israeli negotiator Dan Shomron said yesterday.

A leaflet distributed in Hebron on Tuesday urged settlers to fire on Palestinian police if they were seen in Jewish areas.

"One does not need great sacrifice to destroy the agreement in Hebron," the leaflet said. "There are other ways to create friction that will harm them." The leaflet was signed by a group calling itself "Suppressing Traitors."

Meanwhile Jewish settlers are protesting Israel's planned troop redeployment, partly because they do not believe the Palestinians can be trusted. Israeli Prime Minister Benjamin Netanyahu has expressed his own misgivings.

"We insist on an ideal called reciprocity. It means that when we are asked to fulfill our sides of a contract, we expect the other side to fulfill it as well," the Prime Minister said.

SPEAKING

From page 1

who are experts in this field," said Geoffrey Schneider, visiting assistant professor of economics. In addition, engineers or science majors may argue that a public speaking requirement is not necessary for their field.

The faculty has expressed the seriousness of public speaking training at the University.

"It is so important that students learn how to convey their ideas in a cogent manner in the future. I see my students sway back and forth or stare directly at their textbooks while they speak. They don't notice it, but that does leave an impression on the audience," said Peter Kresl, professor of economics.

"I believe that course descriptions should state whether or not it stresses public speaking. While it should be optional, our faculty should continue encouraging more expert public speakers to visit certain classes throughout the year," said Kresl

The issue of a public speaking requirement is far from being settled, and as Schneider states, "It's constantly being argued at faculty meetings."

Colleen Dempster '97, said "I think that would be a good addition to the educational program already offered at Bucknell. Public speaking builds self-confidence and can only prepare students even more for life after college."

"I wouldn't be ecstatic, but I suppose it would be a good idea," Charles Burckmyer '99, said. "A large percentage of Bucknell students have a severe phobia of speaking in public."

go abroad...This will result in the deterioration of their education."

Beard said that the University has other options besides mandating an earlier deadline, such as observing the rising trends and "overprojecting" the numbers if necessary to prevent a loss of money.

"Students may select programs on a casual or uninformed basis" because of being rushed to meet deadlines, Murphy said. "That would be the worst thing."

But Rowe said that most sophomores are already planning ahead if they want to go abroad. In her experience, the student who makes up his or her mind at the last minute is the exception.

"I know that's going to happen for a few individual students," she said, adding that every exception will be reviewed on a case by case basis. "Our policy has always been to be as flexible as we can be."

"We're not putting a cap on spring enrollment," she said.

Under the new policy, students who want to go abroad in the spring do not need to get final approval until the fall semester, allowing them more time to decide which program they wish to attend. However, the memo distributed to sophomores explaining the new procedures to apply for off-campus study stated emphatically in bold letters that no late applications will be accepted after the February deadline.

This new deadline may in fact help students looking to study off campus spring semester, Rowe said. A few programs are "very competitive" and "fill up very quickly," requiring applications for spring enrollment in May.

The new policy does not upset Lauren Schmierer '99, who is planning to go abroad in the spring.

"It doesn't bother me because I would plan that far ahead anyway," she said.

But she did recognize the trouble the early deadline would impose on other students who may not be as organized.

"A lot more students will be able to go abroad if they utilize the old policy," she said.

"A lot of students will miss out. I think there will be a decline in the number of students who will go abroad."

Cheri Kantola '99, who is also planning on studying off campus next spring, said she likes the new deadline.

"I think it's a better policy because it starts you thinking about it earlier," she said. "It gets the ball rolling."

Without the earlier deadline, Kantola said she would delay researching her options, whereas now she has an incentive to begin looking at programs and talking to her adviser.

> ***"I think it's a better policy because it starts you thinking about it earlier. It gets the ball rolling."***

PORTABELLA MUSHROOM VEGETABLE BURGERS

Before the image of the California tofu-munching vegetarian leaps into your mind, consider the flavors integrated in this flame-broiled substitute. Teetering at the height of the "gourmet" wild mushrooms, portabellas infuse their surroundings with an intense texture and manner, while the onions, cheeses and fresh herbs offer their own variety of pleasure. Although no combination of vegetables can simulate the smoky and sizzling memory of a backyard summer picnic, these vegetable burgers take a valiant stab at updating your palate.

Ingredients:

1 head fresh broccoli
1 large red onion
1 medium Spanish onion
2 cloves garlic
1 T olive oil
2 large carrots
1 pound portabella mushrooms
1 cup natural tomato sauce
4 oz. Monterey Jack cheese, grated
2 t salt
2 t freshly ground pepper
2 eggs, lightly beaten
2 cups Total Corn Flakes
_ cup bread crumbs
assortment of fresh herbs (basil, thyme, parsley)

1. Finely chop the broccoli (florets only), onions, and garlic cloves. Lightly sauté the onions in olive oil until slightly translucent, adding garlic and broccoli. Continue to heat for 3-5 minutes at medium heat. Remove from burner and cover tightly, setting aside and allowing the broccoli to steam.

2. Peel and shred carrots into a large bowl. Prepare portabella mushrooms by carefully peeling the outer skin (work outwards toward the center, pulling back triangular sections), snapping the stem out, and tapping out any excess dirt. Coarsely grate mushrooms into the same bowl. Add cheeses, salt and pepper.

3. Prepare herbs by washing (if necessary) and finely chopping. Add these with onion and broccoli mixture to the bowl in step 2. Toss in tomato sauce, beaten eggs, corn flakes (crushed *after* measuring) and bread crumbs, mixing until all ingredients are completely integrated.

4. Preheat oven to 375°F. Brush baking sheets with olive oil very sparingly. Form burgers carefully, working them until they hold their shape. (At this point it may be necessary to add more cereal or bread crumbs so that burgers may be formed.) Bake for approximately 15 minutes each side, flipping at the halfway point. Use your own judgement; burgers should become slightly crusty on the edges. Cool the burgers on pans, loosening after a few minutes.

Serve immediately...Alternately, store in an airtight container in the refrigerator or freeze in bags. To reheat, defrost in the microwave for 90 seconds each and bake for a few minutes at 450°F, until hot.

Popular consumption of "veggie burgers" requires finely sliced onions, sprouts, tomatoes and lettuce on a toasted bagel or crunchy wheat bread, thickly sliced. Additional cheese, probably sharp cheddar (the monterey is rather mild) melted open-face lends a thrill to those seeking to escape low fat. Otherwise, the Portabella Mushroom Vegetable Burgers retain fairly low amounts of fat (4g), assuming 16 burgers. Flavor (and fat content) may be enhanced with more cheese (maybe 8 oz.), although this is generally unnecessary, as the mushrooms and onions demand plenty of attention.

Retiree reflects on life at Bucknell

BY TED BURNES
Bucknellian Staff Writer

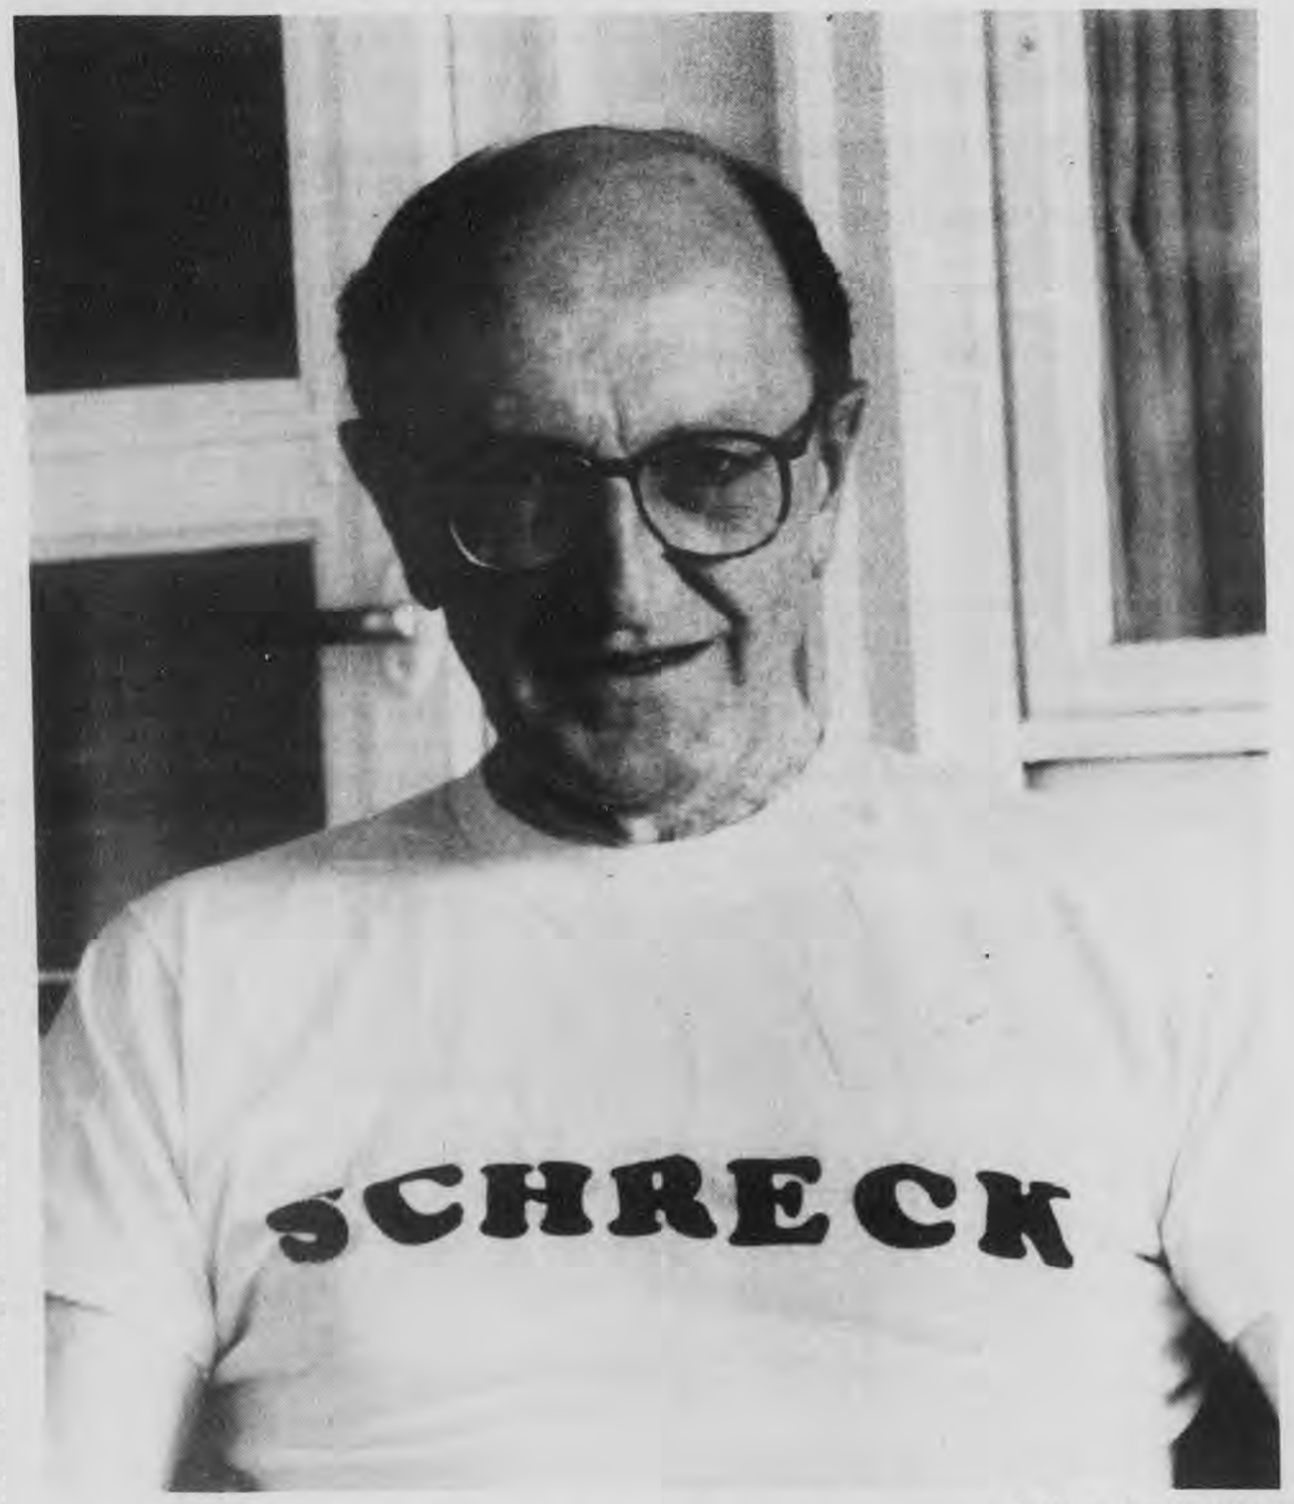

Photo courtesy of Joseph Fell

Joseph Fell taught in the philosophy department at the University from 1963 to 1993.

When they hear the word "Sesquicentennial," many students think simply of the birthday of Bucknell. However, many people fail to realize the true meaning of this word.

Have you ever thought of how many people lived and events have happened during the 150 years that the University existed? Many members of an earlier Bucknell community have enriched the University with their teachings, ideas and presence.

One such person is Joseph Fell, who taught in the University's philosophy department from 1963 to 1993. Fell was not only a teacher, he is also a distinguished philosopher, author, columnist, speaker and consultant. Why did he retire and what is he doing now? I decided to find out.

Fell and I met at the Seventh Street Cafe, where the smell of coffee provided a great atmosphere forour conversation. Fell, a very personable, amiable man, was full of stories about the University's past.

Fell smiled when he recalled how he started at the University. "I remember when I came here for a job interview years ago in the middle of winter," he told me. "It had just been snowing, very overcast; everything looked bleak. I thought, 'I could never live here; how could I survive?'"

This negative first impression did not last long.

"After being here six months, I fell in love with Lewisburg," he said. "I loved the quaintness of the town: the clean air, low crime rate, thought it was a great place to bring up kids. My love for the area was what made me stay here, and is still as strong as ever."

And indeed, rural Lewisburg must have been quite a change for Fell, who grew up in Troy, NY, an urban area.

Philosophy is one of Fell's great loves.

"My love for philosophy happened when I was in college at Williams, but it happened totally by accident. I wanted to major in Classics, Greek and Latin, but I didn't get started soon enough and I hadn't taken enough courses," Fell said.

Because of his late start, Fell didn't have enough time to take the required courses in Classics before he graduated to get a degree in that area.

"This came as a great blow to me—what was I going to do? At the same time, I had signed up for a philosophy class with a teacher named Professor Miller, and it just blew me away. When I began the course, I really felt threatened by it—but then I fell in love with it—that was the beginning."

That was the beginning of a life in philosophy for Fell. However, he did not start out with the idea of being a teacher. After college, he went to Union Theological Seminary for a year.

"I learned a lot [at Union], but I wasn't sure I was up for a career in philosophy. So, I let myself be drafted; the army shipped me off to Hawaii for almost two years; I wanted to go to Vienna, but Hawaii wasn't a bad way to go. By the time I got out of the army, I knew I wanted to go into college, so I enrolled in Columbia and did my graduate work there," he said.

Fell then went to Penn State for a year before arriving at Bucknell.

Fell admitted he loved teaching at the University and still loves being a part of the community. Retired and living in Lewisburg, he still enjoys coming back for events at the Weis Center and to talk. He recently gave a philosophical talk in Bucknell Hall.

Fell retired because his wife became ill. She passed away a year later in 1994.

His two children, both of whom grew up in the area, are "long grown and have flown the coup. For this reason, people always ask me, 'Joe, when are you going to move away and get out of the area? Your house must be haunted with the memory of your wife and your family,' and I always reply, ' I'm not moving—I love the area, and I love the proximity to the students and the events at Bucknell.'"

Fell has fond memories of teaching at the University.

"I guess the strongest memory is the greatness of teaching at a relatively small college. There's a real campus and a real kind of community. It's terribly different thing than teaching at Columbia, where your life is sort of split between the city and the school and where the students all go home to Brooklyn or Queens," Fell said.

"Bucknell is a real round-the-clock community," he added. "I also adore teaching in an undergraduate setting—I guess because I receive the opportunity to be with students so much... at a younger, more formative age then when they are in graduate school."

Fell believes that students should take advantage of their time and the experiences available at the University.

"My advice to students is to experiment, cast the nets widely. In order to find things that you like, you must take risks and don't stick with things you feel safe with. This is a four-year opportunity to do something you will never be able to do again," he said.
